Letter to Shareholders

Dear Shareholders,

2025 was a year of excellent results, supported by growth across all the group's labels and brands. This performance confirms the viability of positioning based on quality, stylistic research and sustainability - all factors that have contributed to elevating the perceived value of the brands, effectively meeting a growing demand for quality products which are always at affordable prices.

During the year, we continued our strategy of developing our portfolio of brands, enhancing the uniqueness of each one, with the aim of meeting the expectations of a large and diverse audience. OVS's offering was enriched by the introduction of Les Copains, launched in spring, the PIOMBO Tech and Contemporary lines, and the further development of the B.Angel, Utopja and Altavia brands.

There was significant growth in the women's segment, both in clothing and beauty, the latter also supported by the opening of stand-alone Shaka stores. Upim continued to grow through the opening of city centre locations with an even more extensive, higher-quality offering and image. Stefanel also posted very positive results, with a strategy focused on a greater quality and stand-out stylistic content that was highly appreciated by customers mindful of product value. Goldenpoint closed the first seven months of consolidation with excellent results, thanks to a contemporary offering and the renewal of the store concept, made more attractive.

We continued to invest in the enhancement of our retail outlets, in a context where offline shopping is regaining popularity in customer preferences. Thanks to striking window displays, plants inside the stores, wood finishes and warmer lighting, the perception of the point of sale is evolving, thus offering our customers the pleasure of a quality shopping experience.

EBITDA for the year exceeded €218 million, as a result of growth in the gross margin and careful cost control. The year-end net financial position and leverage ratio improved as a result of cash generation, which increased markedly compared to the previous year.

Looking to 2026, the Italian clothing market is showing good resilience despite geopolitical tensions in the Middle East. We are confident that the numerous initiatives concerning the brands, the expansion of the sales network and the development of labels such as Shaka and Goldenpoint will promote further growth of the group. On the margin side, the appreciation of the Euro against the US dollar since April 2025 has led to significant savings in procurement costs.

In the light of the results and prospects for growth, it was decided to propose the distribution of a dividend to the Shareholders' Meeting of 14 eurocents per share, up +27% on the previous dividend.

We would like to thank you for your trust and support, which are both essential - enabling us to look ahead to future challenges with renewed ambition and determination. Thanks also to all our staff who, with their professionalism and constant commitment, have contributed to achieving our goals.

Group structure

at 31 January 2026

The following chart shows how the OVS Group is organised, indicating the relative equity investments as percentages at the reporting date:

Brands

OVS
LOVE PEOPLE. NOT LABELS.

A leading brand in the clothing market in Italy. It offers a contemporary and essential style, with an excellent price/quality ratio and a strong focus on sustainability in the choice of materials and production processes.

The brand has increasingly evolved from a vertical retailer model to a platform logic, both physical and virtual, with the introduction of a curated selection of iconic brands and innovative proposals, each able to satisfy a specific lifestyle.

With approximately 1,300 stores, OVS is present in Italy and other countries, in major historic city centres, in shopping centres and residential areas.

OVS
kids

OVS Kids is the leader in the Italian children's clothing market, with a double-digit market share.

Its target is children aged 0 to 15 years, with a competitive and high-quality offering, placing considerable attention on the selection of certified raw materials and the development of clothing that combines style and practicality.

It has directly operated stores and franchises in Italy and other countries.

PIOMBO

Contemporary brand of clothing for men, women and children, designed by Massimo Piombo. The collections reflect the taste and talent of the famous Italian designer in the fabrics used, attention to detail and combinations of forms and colours.

The brand is present in Italy with shop-in-shops in more than 500 OVS stores and with single-brand stores in Cortina d'Ampezzo and Forte dei Marmi.

LES COPAINS

An iconic Italian brand acquired by OVS S.p.A. in 2022, which stands out for its versatile, refined style, aimed at contemporary women seeking elegance in their daily lives.

Les Copains is present in OVS stores.

upim

UPIM is the Italian family department store, a point of reference for service shopping, which offers value-for-money, is accessible and aimed at families' concrete needs. It has stores at local level, with a wide and varied assortment of products, ranging from clothing for the entire family, to beauty and homeware.

UPIM operates in Italy and other countries, with over 300 full-format stores, most of which are directly operated, in city centres, and in shopping and residential areas; it is also present with a shop-in-shop formula within the hypermarkets of major large retail groups.

BLUKIDS

Blukids is the clothing brand of Upim dedicated to children aged 0-15. It offers quality, certified clothing, which is always competitively-priced.

Blukids has 350 stores in Italy and other countries and more than 300 sales corners in Upim stores.

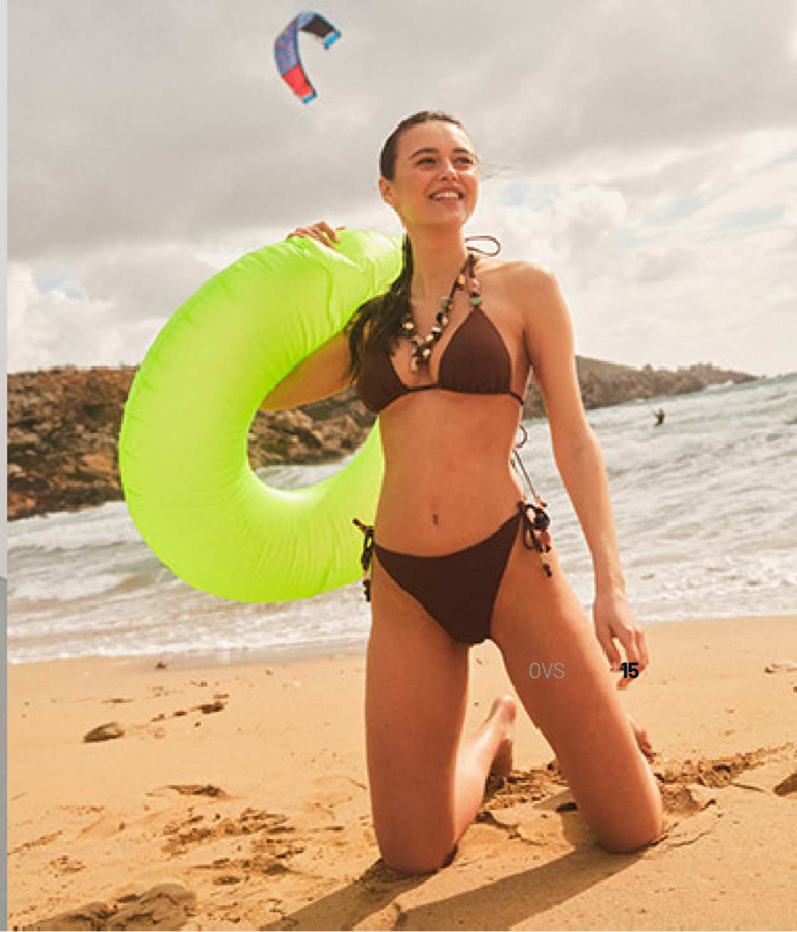

STEFANEL is the Italian contemporary clothing brand dedicated to women, famous for the design and quality of its knitwear. Founded in 1959, it has been part of the OVS Group since 2021.

It is present with over 100 stores in Italy and other countries, with direct stand-alone and franchise formats, and with sales corners inside department stores.

Goldenpoint is one of the most recognized Italian brands of underwear, swimwear and beachwear and hosiery. It offers collections that combine quality, style and attention to detail through a network of over 300 stores located in prestigious locations.

It was acquired in 2025 with the aim of consolidating the OVS Group's leading role in the underwear and beachwear segments, by enhancing and developing a retail network that will continue to operate under the Goldenpoint brand.

CROFF

CROFF is the Italian home decoration brand, dedicated to consumers who love a contemporary design, which is easy, informal, and for everyday living. The collections, with a unique style and excellent price/quality ratio, are the result of a careful selection of European and international producers.

CROFF is present in Italy with stand-alone formats, shop-in-shops in Upim stores, in city centres, and in shopping and residential areas.

Shaka

Shaka, OVS's Beauty Concept, brings together research, innovation, inclusivity and sustainability, and is aimed in particular at Millennials and Gen Z. The brand stands out for its constant development of products that combine advanced formulas, an attractive design and respect for the environment. Shaka offers a shopping experience by creating immersive beauty spaces, designed to offer an assortment ranging from make-up to skincare and haircare, with a focus on emerging brands and innovative solutions.

Report on Operations

at 31 January 2026

Foreword on methodology

The Annual Report at 31 January 2026 has been prepared in accordance with international accounting standards (IAS) and with the international financial reporting standards (IFRS) issued by the International Accounting Standards Board, and includes the following:

- Separate and consolidated statement of financial position
- Separate and consolidated income statement
- Separate and consolidated statement of comprehensive income
- Separate and consolidated statement of cash flows
- Statement of changes in shareholders' equity of the Parent Company and the Group
- Notes to the separate and consolidated financial statements at 31 January 2026.

In this Report on Operations at 31 January 2026, in addition to the indicators provided for in the financial statements and in compliance with the IFRSs, some alternative performance indicators used by management to monitor and assess the Group's performance are also presented. In particular, with the introduction of the IFRS 16 international accounting standard, relating to the accounting treatment of leases, with effect from financial year 2019, in order to make the Group's data comparable with the years prior to 2019 and for a better understanding of performance in relation to other comparables in the sector, some adjustments have been introduced with regard to: EBITDA, operating result, profit before tax, net result for the year, net invested capital, net financial position and cash flow generated by operating activities, as detailed below. For this reason, the results are also commented on excluding IFRS 16 in order to maintain a consistent basis of comparison. As in previous years, the impacts of the application of IFRS 16 have been reported separately, and the reconciliation with the financial statements is further detailed in the section entitled "Reconciliation of the consolidated results for FY 2025" below.

Group operating performance

FY 2025 generated **excellent results, with growth across all the main labels and brands**. This performance confirms the viability of positioning based on quality, stylistic research and sustainability that has elevated the perceived value of the brands, effectively meeting a growing demand for quality products at affordable prices.

During the financial year**, OVS** continued to work on its strategy of **developing and enhancing its portfolio of brands**, each with a separate identity aimed at different target customers. 2025 saw OVS expand with the launch of Les Copains, the extension of PIOMBO in the Tech and Contemporary lines and the strengthening of Altavia, B. Angel and Utopja.

There was significant growth in the product ranges aimed at women, in terms of both clothing and beauty, the latter driven not only by a strong performance within OVS stores, but also by the opening of stand-alone **Shaka** stores, which already number 10 independent locations, all of which have very good results.

Upim also continued to grow through the opening of city centre locations with a more extensive, higher-quality offering.

Stefanel posted a very positive performance. Its strategy, focused on raising quality and offering distinctive stylistic content through the use of group synergies, was rewarded by customers attentive to product value.

Goldenpoint ended its first seven months of consolidation with extremely positive results (sales growth of around 10%), thanks to a more contemporary offering, consistent with customer expectations and the revamp of the concept store, which has been made more attractive. Operational integration generated the expected synergies in purchasing, with a significant increase in margins. In light of these results, an expansion plan was launched with the opening of stores with a new image.

Another fundamental pillar remains the ongoing **enhancement of retail outlets**, in a context where offline shopping is regaining popularity in customer preferences. Thanks to striking window displays, plants inside the stores, wood finishes and warmer lighting, the perception of the point of sale is evolving, offering customers the pleasure of a quality shopping experience.

The OVS **internationalisation strategy** is accelerating, supported by a solid financial position and the success of the women's offering. Expansion in the most promising markets is anticipated in 2026.

Thanks also to the **growth in the sales margin and cost control**, with only staff costs rising due to the renewal of the national contract, **EBITDA for the year exceeded €218 million**.

In a year characterized by the consolidation of Goldenpoint, the group **improved the net financial position at year end and the leverage ratio on EBITDA**, even after flows allocated to dividends and buybacks.

Key information on operating results at 31 January 2026

In FY 2025, the OVS Group continued its upward trend, with all key financial KPIs improving compared to the previous year. In particular, further growth was recorded in both sales and EBITDA.

Net sales for the year ended 31 January 2026 reached **€1,746 million**, **up 7%** compared to 2024, driven by both like-for-like growth in points of sale, outperforming the market, and by the consolidation of Goldenpoint, which performed very well during the period.
Sales performance was excellent across all the main labels and brands. Brilliant results were achieved in particular in women's clothing and beauty, which again grew by double digits in 2025.
The adjusted **sales margin** rose to €1,033 million, **up 8.8%** compared to 2024, and adjusted **EBITDA** increased to **€218.2 million**, up €22.9 million (**+11.7%**) compared to 2024. The **EBITDA margin of 12.5%** increased by 50 bps compared to the previous year.
Adjusted **net profit** was **€89.4 million**, up €11.6 million (**+14.8%**) compared to 2024.

Cash generation came to **€90.0 million**, up €21.4 million (**+31.2%**) compared to 2024, equal to a Cash Flow Return on Investment (calculated on adjusted net invested capital, excluding intangible assets arising from business combinations) of approximately 26% and a cash conversion of 41.3% (35.1% in 2024). The **adjusted net financial position fell to €145.9 million** while still showing an improvement after the financial effects of the acquisition of Goldenpoint, the distribution of dividends amounting to €27.1 million and the purchase of treasury shares for €12.9 million. Leverage fell to 0.7x on EBITDA.
The start of FY 2026 recorded significant growth compared to FY 2025 due to the **very positive reception of the new collections**.
In light of the current performance and growth prospects in terms of margins and cash generation, the Board of Directors resolved to propose to the Shareholders' Meeting an **increase in the dividend to €0.14 per share, up 27% on the previous figure**. A proposal will also be made to continue the buyback plan which led to the purchase, in the years from 2022 to 2025, of approximately 50 million shares, with an investment of approximately €120 million and which is believed to remain an effective way of compensating shareholders.

The table below summarises the Group's key performance indicators.

The table shows the result adjusted to represent the Group's operating performance net of non-recurring events which are unrelated to ordinary operations and the effects of the adoption of IFRS 16.

In FY 2025, the results were adjusted mainly to strip out the impacts of IFRS 16. In particular, with regard to the effects of IFRS 16, the following should be noted: (i) €224.3 million on EBITDA to reflect rent, (ii) €58.8 million in higher net costs on EBIT due to the reversal of depreciation and amortisation of €165.5 million, and (iii) €9.8 million in lower net costs on the reported result for the year due to the reversal of €68.6 million relating to net financial expenses and €0.3 million in lower taxes. Lastly, (iv) the net financial position was adjusted for a €1,158.5 million decrease in liabilities.
EBITDA for FY 2025 was also adjusted as follows: (i) €1.3 million in net foreign exchange losses on forward hedging of purchases of goods in foreign currency, reclassified from "Net financial expenses (income)" to "Purchases of raw materials, consumables and goods"; (ii) €3.0 million in costs relating to stock option and stock grant plans (non-cash costs); and (iii) other net one-off costs of €2.1 million, mainly related to non-recurring expenses and some foreign businesses being divested.
Other adjustments that impacted EBIT and EBT refer to: (i) costs of €9.5 million related to the amortisation of intangible assets due to the purchase price allocation (PPA) related to business combinations and (ii) adjusted financial expenses of €24.8 million, mainly relating to foreign exchange differences arising from the valuation of items denominated in foreign currency, including with respect to forward derivatives and realised foreign exchange differences (the latter reclassified to "Purchases of raw materials, consumables and goods").
Lastly, the adjusted net result for the period reflects taxes recalculated following the aforementioned adjustments, entailing an increase in expenses of €9.5 million.
In 2024, the results had been adjusted mainly to strip out the impacts of IFRS 16. In particular, with regard to the effects of IFRS 16, the following should be noted: (i) €197.8 million on EBITDA to reflect rent, (ii) €45.1 million in higher net costs on EBIT due to the reversal of depreciation and amortisation of €152.8 million, and (iii) €16.1 million in lower net costs on the reported result for the year due to the reversal of net financial expenses of €63.9 million and higher taxes of €2.7 million. Lastly, (iv) the net financial position was adjusted for a €1,045.9 million decrease in liabilities.

EBITDA for the 2024 financial year was also adjusted as follows: (i) €6.3 million in net foreign exchange gains on forward hedging of purchases of goods in foreign currency, reclassified from "Net financial expenses (income)" to "Purchases of raw materials, consumables and goods"; (ii) €3.1 million in costs relating to stock option and stock grant plans (non-cash costs); and (iii) other net one-off costs of €6.6 million, mainly related to some foreign businesses being divested.
Other adjustments that affected EBIT and EBT refer to: (i) costs of €9.3 million related to the amortisation of intangible assets due to the purchase price allocation (PPA) of business combinations (including the PPA of JB Licenses S.r.l. of 2024); and (ii) adjusted financial income of €13.4 million, mainly relating to foreign exchange gains arising from the valuation of items denominated in foreign currency, including with respect to forward derivatives and realised foreign exchange gains (the latter reclassified to "Purchases of raw materials, consumables and goods").
Lastly, the adjusted net result for the period reflected taxes recalculated following the aforementioned adjustments, entailing an increase in expenses of €3.1 million.

Comments on the main items in the adjusted consolidated income statement

Net sales

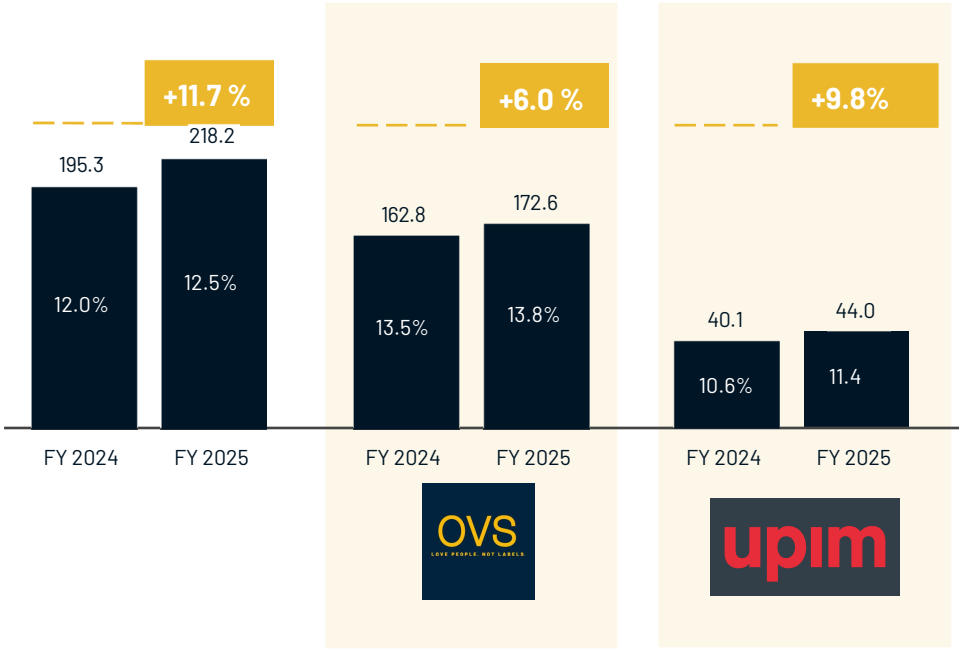

(amounts in millions of euro)

Adjusted net sales for the financial year, amounting to €1,745.9 million, were up 7.0% compared to the 2024 financial year. Excluding Goldenpoint's contribution, growth was 2.9%; over the same period, the reference market grew by 0.3%. With regard to distribution channels, sales from directly operated stores came to €1,431.3 million (+8.2% compared to 2024, corresponding to a growth of +3.6%, excluding Goldenpoint). Franchising and B2B channels recorded revenues of €314.7 million. Both the OVS and Upim brands registered a positive performance, with growth of +3.6% and +1.6% respectively, both increasing by 10% compared to 2023.

EBITDA

(amounts in millions of euro)

EBITDA (€m) AND EBITDA margin (%), Aggregate and for the main brands

In FY 2025, the Group achieved an adjusted EBITDA of €218.2 million, up €22.9 million compared to €195.3 million in 2024. Goldenpoint made a positive contribution of €3.9 million over the 7 months of consolidation.
OVS recorded EBITDA of €172.6 million, up €9.8 million compared with 2024. EBITDA of Upim increased to €44.0 million from €40.1 million in 2024, further improving on the substantial increase recorded compared with 2023. Stefanel's results increased by approximately €4 million.

EBIT

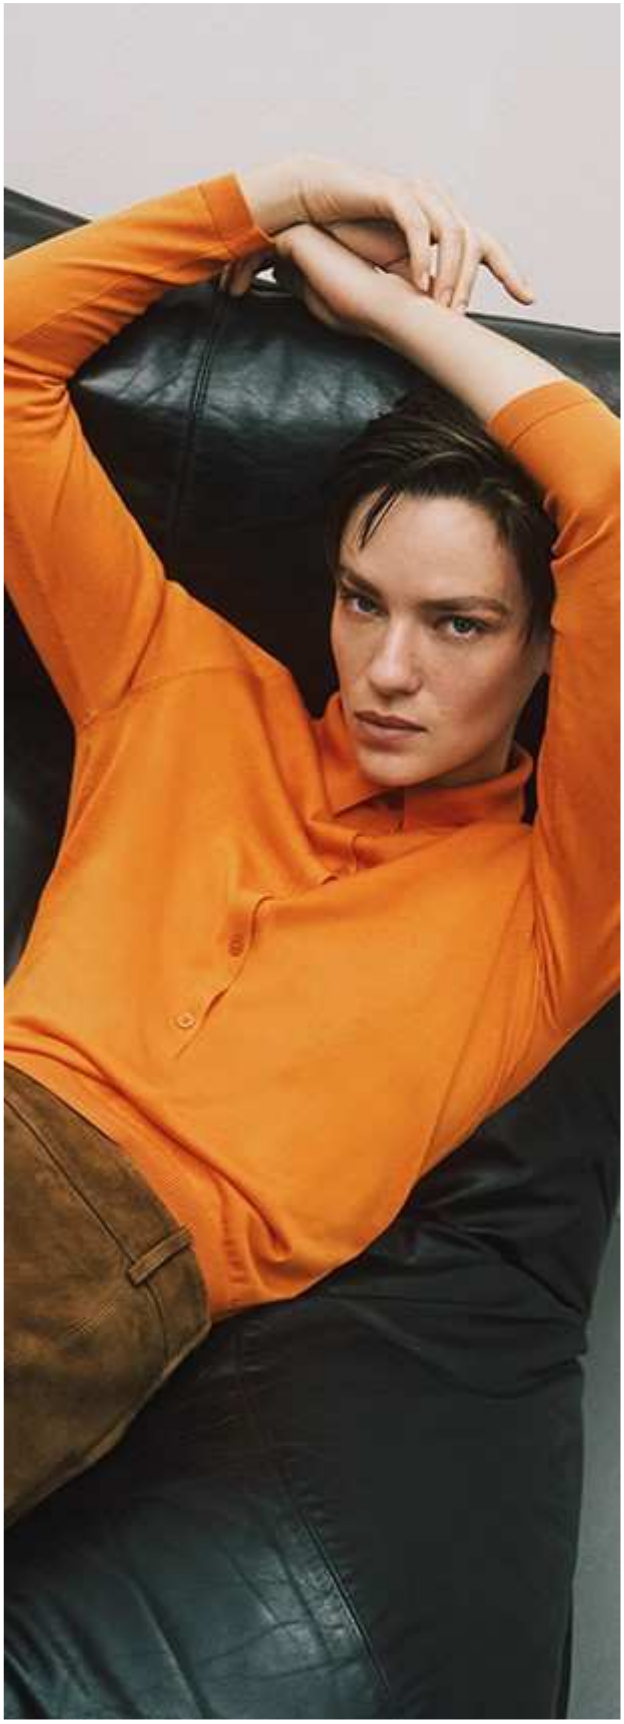

EBIT, adjusted to better reflect the Group's operating performance, amounted to €147.5 million, a significant improvement compared to €129.0 million in 2024. The increase during the year was essentially due to the robust increase in EBITDA, only marginally offset by the increase in depreciation and amortisation, which rose as a result of the substantial special investments made in the last few years, above all in IT and Logistics.

Net result for the year

Adjusted net profit for the year increased to €89.4 million, up €11.6 million (+14.8) compared to 2024; on the one hand, the result reflects an improvement due to higher EBITDA, but also reflects an increase in the tax rate associated with regulatory changes at international level. The reported net profit and net profit of OVS S.p.A. closed at €49.2 million and €51.8 million respectively.

Non-recurring income and expenses

The adjusted consolidated results of the OVS Group included, at 31 January 2026, non-recurring and non-operating income and expenses totalling €2.5 million before tax (compared to €7.4 million at 31 January 2025). These relate to net one-off costs of €1.4 million, some partially discontinued foreign businesses of €0.7 million and extraordinary amortisation and write-downs of related assets for €0.4 million.

Net financial position

€m	31 January 2026	31 January 2025
Reported net debt	1,316.2	1,179.4
Adjusted net debt for MtM hedging instruments and IFRS 16	**145.9**	**148.3**
Leverage on EBITDA Adjusted Net Debt / Adjusted EBITDA	**0.67x**	**0.76x**
Leverage on EBITDA last 12 months Last 12 months average Adjusted Net Debt / Adjusted EBITDA	**1.24x**	**1.32x**

At 31 January 2026, the Group's net financial position, adjusted for the mark-to-market impact of hedging instruments and the adoption of IFRS 16, stood at €145.9 million, essentially unchanged compared to 31 January 2025. The ratio of adjusted net financial position to adjusted EBITDA is 0.67x, a further slight improvement compared to 0.76x at 31 January 2025.

The net financial position includes the purchase of €15.9 million in treasury shares (4,484,351 shares purchased at an average price of €3.554, net of 2,026,718 shares sold for an average price of €1.515 as part of stock option plans) and the distribution of dividends for €27.7 million (including dividends to minority interests for €0.6 million). It is also affected by Goldenpoint joining the Group as from 3 July 2025 (with a contribution of a negative adjusted net financial position amounting to €35.6 million).

Please refer to the following paragraphs for a breakdown of the net financial position of the Parent Company, OVS S.p.A..

Summary statement of financial position

The table below shows the consolidated statement of financial position for 2025 compared to the end of the previous financial year (in millions of euro). The table is also shown adjusted to provide a representation of the Group's financial position net of the application of IFRS 16 and reclassifying liabilities for returns recognised under IFRS 15 (€27.3 million at 31 January 2026) under components of operating working capital (compared to the presentation in the financial statements under Other current payables).

Net Debt	157.7	133.5	24.2
Total sources of financing	**1,151.9**	**1,107.3**	**44.7**

The reported net invested capital of the Group at 31 January 2026, which therefore also includes the impact of IFRS 16, amounted to €2,219.8 million, up by €147.1 million compared to 31 January 2025, due to the combined effect of an increase in operating working capital following the Goldenpoint business combination, in addition to a significant increase in net fixed assets of approximately €132 million and mainly attributable to the increase in Right-of-use leased assets, also mainly due to the investee Goldenpoint acquired in 2025 (approximately €70.4 million). Reported and adjusted net invested capital includes approximately €800 million of intangible assets arising from business combinations, subsequently transferred to OVS S.p.A.. Excluding these components, invested capital amounts to approximately €350 million. Cash Flow Return on Investment is around 26%, an excellent result for the industry in which OVS operates.

Shareholders' equity

Consolidated shareholders' equity stood at €903.6 million at 31 January 2026, up compared to the previous year, when it came to €893.2 million. The main changes during the year, as well as the result of €49.2 million, include (i) changes in the treasury share reserve of -€12.8 million due to share purchases in the 12 months, already net of shares sold in the same period under stock option and performance share plans and (ii) the distribution of dividends of €27.7 million.
The reconciliation table for the shareholders' equity and the net result for the year of the Parent Company with the consolidated shareholders' equity and the consolidated net result for the year is shown below in the notes to the consolidated financial statements.

Adjusted summary consolidated statement of cash flows

The following table shows the 2025 statement of cash flows, compared with the statement of cash flows for the previous financial year, both restated according to management criteria and adjusted to exclude the effects of IFRS 16 as it does not have an impact on Group cash flows.

€m	31 January 26 Excluding IFRS 16	31 January 25 Excluding IFRS 16	Chg.
EBITDA - Adjusted	**218.2**	**195.3**	**22.9**

Change in the net financial position including MtM hedging instruments	**(24.2)**	**11.7**	**35.9**

Operating cash flow

The table above shows the adjusted cash flows to represent the Group's operating performance at the net of non-recurring events which are unrelated to ordinary operations and adjusted for the adoption of IFRS 16.
FY 2025 closed with cash generation of €90.0 million, marking an increase of 31.2% (+€21.4 million) compared to the previous year. This result was mainly driven by the growth in EBITDA (+€22.9 million). The conversion rate improved by about 6 percentage points.

Dividends

Thanks to excellent cash generation also in FY 2025, the Board of Directors resolved to propose to the Shareholders' Meeting a dividend payment of €0.14 per share. The date of payment of the dividend, coupon no. 9, will be 24 June 2026 (ex-dividend date 22 June 2026 and record date 23 June 2026).

Reconciliation of consolidated results for FY 2025

The following table shows the Group's consolidated results for FY 2025, presenting separately the effect of the application of IFRS 16, net non-recurring expenses before IFRS 16, stock option expenses, amortisation of intangible assets deriving from the purchase price allocation related to business combinations, and income and expenses relating to foreign exchange gains or losses, both realised and from the valuation of items in foreign currencies (mainly USD) at the reporting date, including with respect to contractualised forward derivatives.

€m	31 January 2026 Reported	Reclas-sification of rental income	of which IFRS 16	of which non-recurring	of which Stock Options; Derivatives; PPA, Foreign Exchange Gains/Losses		31 January 2026 Adjusted

(*) Other operating income and revenues have been reclassified to Total net operating costs to better represent the gross margin.

(a) These relate to foreign exchange differences for forward hedging on purchases of goods in foreign currency, reclassified from "Net financial income (expenses)" to "Purchases of raw materials, consumables and goods".

(b) These relate to costs recognised in the period relating to stock option and stock grant plans.

(c) These relate to the amortisation of intangible assets deriving from PPA.

(d) These mainly relate to foreign exchange differences arising from the valuation of items denominated in foreign currency, including with respect to forward derivatives and realised foreign exchange differences (the latter reclassified to "Purchases of raw materials, consumables and goods").

The following is the reconciliation table for the financial year 2024:

€m	31 January 2025 Reported	Reclas-sification of rental income	of which IFRS 16	of which non-recurring	of which stock options; Derivatives; PPA, Foreign Exchange Differences		31 January 2025 Adjusted

Taxes	25.8		(2.7)	(1.8)	(1.3)		31.6
Net result for the year	**52.1**		**(16.1)**	**(5.6)**	**(4.1)**		**77.9**

(*) Other operating income and revenues have been reclassified to Total net operating costs to better represent the gross margin.

(a) These relate to foreign exchange differences for forward hedging on purchases of goods in foreign currency, reclassified from "Net financial income (expenses)" to "Purchases of raw materials, consumables and goods".

(b) These relate to costs recognised in the period relating to stock option and stock grant plans.

(c) These relate to the amortisation of intangible assets deriving from PPA.

(d) These mainly relate to foreign exchange differences arising from the valuation of items denominated in foreign currency, including with respect to forward derivatives and realised foreign exchange differences (the latter reclassified to "Purchases of raw materials, consumables and goods").

With regard to the results at 31 January 2026, it should be noted that:

- Revenues and income, which came in at €1,745.9 million, mainly include the retail sales generated by the OVS, Upim, Goldenpoint and Stefanel brands.
- The gross operating margin or adjusted EBITDA, as the difference between revenues and operating costs, net of the effects of IFRS 16, excluding depreciation and amortisation (including amortisation of intangible assets deriving from the purchase price allocation related to business combinations), non-recurring expenses and stock option plans, and adjusted to take account of foreign exchange gains or losses realised on forward instruments entered into by the Group and underlying goods already purchased and sold, amounted to €218.2 million, equal to 12.5% of sales.
- The reported and adjusted profit before tax came in at €79.1 million and €128.6 million, respectively (the latter net of the effects of IFRS 16, non-recurring costs and other costs shown in the fifth column of the table).
- Adjusted net taxes amounted to €39.1 million, reflecting an increase in the tax rate from 33.1% to 37.8% due to a temporary time lag in taxation as a result of some regulatory changes at international level. A realignment to a normalised tax rate is expected in 2026.
- The reported and adjusted net profit for the year came to €49.2 million and €89.4 million respectively, net of the above expenses.

Impacts of IFRS 16 and alternative performance indicators

The consolidated income statement for FY 2025 is shown below, including and excluding the effects of IFRS 16.

€m	31 January 26 Reported	IFRS 16 effects	31 January 26 Excluding IFRS 16
Revenues	1,746.0		1,746.0
Other operating income and revenues	99.3	(5.6)	93.7
Total revenues	**1,845.3**	**(5.6)**	**1,839.7**
Purchases of raw materials, consumables and goods	711.7		711.7
Personnel costs	370.4		370.4

% on net sales	*4.5%*		*5.1%*
Net result for the year	**49.2**	**10.1**	**59.3**
% on net sales	*2.8%*		*3.4 %*

As already indicated in the introduction, with the adoption of the IFRS 16 accounting standard as of 2019, the main economic and financial indicators have been significantly affected and are not comparable with data from periods prior to 2019. With regard to the above economic data, €165.5 million of depreciation on right-of-use leased assets under property, plant and equipment, together with €68.6 million of net interest expenses on net liabilities, for leases, replacing €224.3 million of net rental costs (for lease and sublease agreements covered by IFRS 16) were recognised, resulting in an increase in the operating result and EBITDA.
The following table shows the reclassified consolidated statement of financial position at 31 January 2026, including and excluding the effects of IFRS 16.

€m	31 January 26 Reported	IFRS 16 effects	31 January 26 Excluding IFRS 16

Alternative performance indicators

The OVS Group uses certain alternative performance indicators which are not identified as accounting measures under IFRSs, to enable a better assessment of Group performance.
The calculation criterion applied by the Group may therefore not be consistent with those used by other groups and the balance obtained may not be comparable with theirs.
These alternative performance indicators are constructed solely on the basis of Group historical data and are calculated in accordance with the Guidelines on Alternative Performance Indicators issued by ESMA/2015/1415 and adopted by CONSOB with communication no. 92543 of 3 December 2015. They refer only to the performance for the accounting year covered by this Annual Report and the comparison years, and not to the Group's expected performance, and should not be regarded as a substitute for the indicators envisaged by the reference accounting standards (IFRSs).
The alternative performance indicators used in the Annual Report are defined below:
Adjusted net sales: consists of total revenues, net of non-recurring revenues.
Adjusted purchases of raw materials, consumables and goods: consists of purchases of raw materials, consumables and goods, net of non-recurring components but including foreign exchange gains and losses for forward hedging on purchases of goods in foreign currencies, reclassified from "Net financial income (expenses)".
Reported gross margin: the gross margin on sales, calculated as the difference between net sales and purchases of raw materials, consumables and goods.
Adjusted gross margin: calculated as the difference between adjusted net sales and adjusted purchases of raw materials, consumables and goods.
With regard to **reported EBITDA, adjusted EBITDA, the reported operating result, adjusted EBIT, adjusted profit before taxes (PBT) and the adjusted net result for the financial year**, see the section entitled "Reconciliation of consolidated results for FY 2025" above.
Net invested capital: consists of the total of non-current assets and current assets, excluding financial assets (current and non-current financial assets, current and non-current financial assets for leases, and cash and banks) net of non-current liabilities and current liabilities, excluding financial liabilities (current and non-current financial liabilities and current and non-current financial liabilities for leases).
Adjusted net invested capital: consists of net invested capital excluding the impacts of the adoption of the IFRS 16 accounting standard.
Net financial position or net (financial) debt: calculated as the sum of current and non-current financial liabilities and current and non-current financial liabilities for leases, net of the cash and banks balance, current and non-current financial assets including the positive fair value of derivative instruments, and current and non-current financial assets for leases.

Adjusted net financial position or adjusted net (financial) debt: represented by net (financial) debt excluding the impacts on current and non-current lease liabilities of IFRS 16 and the impacts of the mark-to-market of derivatives (where specified).
This is sometimes calculated as the arithmetic mean of the monthly net financial debt (e.g. as the arithmetic average of the last 12 months).
Adjusted summary consolidated statement of cash flows: consists of the net cash flow generated (absorbed) by operating, investment and financing activity, excluding the effects of the IFRS 16 accounting standard, and reclassified according to management criteria, i.e. based on the operating flow of adjusted EBITDA.

Operating performance of the Parent Company OVS S.p.A.

The following table shows the consolidated results for FY 2025 of the Parent Company, OVS S.p.A., presenting separately the effects of the application of IFRS 16, net non-recurring expenses before IFRS 16, stock option and performance share expenses, amortisation of intangible assets deriving from the purchase price allocation (PPA) related to business combinations, and income and expenses relating to foreign exchange gains or losses, both realised and from the valuation of items in foreign currencies (mainly USD) at the reporting date, including with respect to contractualised forward derivatives.

Gross operating margin – EBITDA	**386.9**		**207.5**	**(1.8)**	**(1.6)**	**182.8**
Depreciation, amortisation and write-downs of assets	222.3		150.7		9.5	62.1
Operating result - EBIT	**164.6**		**56.8**	**(1.8)**	**(11.1)**	**120.7**
Expenses (Gains) from equity investments	(21.1)					(21.1)
Net financial expenses (income) and foreign exchange differences	108.5		64.8		26.1	17.6
Earnings before tax	**77.1**		**(8.0)**	**(1.8)**	**(37.2)**	**124.2**
Taxes	25.4		0.3	(0.4)	(8.9)	34.4
Net result for the year	**51.8**		**(8.4)**	**(1.4)**	**(28.3)**	**89.8**

(*) Other operating income and revenues have been reclassified to total net operating costs to provide a correct representation of the gross margin.

The following is the reconciliation table for the financial year 2024:

€m	31 January 2025 Reported	Reclas-sification of rental income	of which IFRS 16	of which non-recurring	of which Stock Options; Derivatives; PPA, Foreign exchange gains and losses	31 January 2025 Adjusted
Net sales	**1,597.6**					**1,597.6**
Purchases of raw materials, consumables and goods	713.9				6.3	707.6
Personnel costs	325.7			0.4	3.1	322.2
Service costs	239.2		(1.0)	1.3		238.9
Lease and rental costs	39.9	(15.8)	(193.1)			217.2
Provisions	8.6			1.2		7.4
Other operating income and revenues (*)	(97.2)	15.8	(1.3)			(80.1)
Other operating charges	18.6		1.0	0.2		17.4
Gross operating margin – EBITDA	**348.9**		**194.4**	**(3.1)**	**(9.4)**	**167.0**
Depreciation, amortisation and write-downs of assets	222.1		150.2		8.6	63.3
Operating result - EBIT	**126.8**		**44.2**	**(3.1)**	**(18.0)**	**103.7**
Expenses (Gains) from equity investments	(16.3)				0.0	(16.3)
Net financial expenses (income) and foreign exchange differences	66.8		62.8		(14.3)	18.3
Earnings before tax	**76.3**		**(18.6)**	**(3.1)**	**(3.7)**	**101.7**
Taxes	24.7		(2.7)	(0.7)	(0.9)	29.0
Net result for the year	**51.6**		**(15.9)**	**(2.4)**	**(2.8)**	**72.7**

(*) Other operating income and revenues have been reclassified to total net operating costs to provide a correct representation of the gross margin.

With regard to the results at 31 January 2026, it should be noted that:

- Net Sales, which came in at €1,634.8 million, mainly include the retail sales generated by the OVS, Upim and Stefanel brands.
- Depreciation and amortisation of €222.3 million refers to right-of-use assets for €150.7 million, while the remainder essentially relates to store improvements and refits.
- Other operating expenses, net of other income and revenues, amounted to €196.1 million; these would have amounted to €402.4 million gross of the effects of IFRS 16, amounting to €207.5 million, and non-recurring expenses of €1.8 million, and are broken down as follows: lease and rental costs (€226.7 million), costs for services (€239.0 million), miscellaneous operating expenses (€18.8 million), write-downs and provisions (€2.7 million), net of other income and revenues (€84.8 million).
- Expenses (gains) from equity investments include income for dividends received from the subsidiary OVS Hong Kong Sourcing Ltd of €21.5 million and from the subsidiary 82 S.r.l. of €1.5 million, and expenses arising from the write-down of the Italian and foreign investee companies totalling €2.1 million.
- Net financial expenses of €108.5 million, gross of the effects of IFRS 16 of €64.8 million, would have amounted to €43.7 million, deriving from financial expenses of €17.6 million and foreign exchange losses and the positive fair value of forward derivatives in the income statement of €26.1 million.
- Taxes were negative for €25.4 million; without the adjustments in the columns on the table, they would have been negative for €34.4 million.
- The reported and adjusted net result for the year was, respectively, a profit of €51.8 million and a profit of €89.8 million.

Financial performance

The financial performance is shown below, and is described in more detail in the Notes to the separate financial statements.

€m	31 January 2026	31 January 2025
Operating capital (A)	(91.3)	(91.2)
Net capital employed (B)	2,166.2	2,118.9
Net debt	1,186.5	1,154.2
Shareholders' equity	888.3	873.5

(A) The item includes: Trade receivables and payables, current and deferred tax assets, other receivables, inventories, current and deferred tax liabilities, other payables, employee benefits and provisions for risks and charges.
(B) The item includes: Property, plant and equipment, right-of-use assets, intangible assets, goodwill and equity investments.

Financial management

Net debt stood at €1,186.5 million at 31 January 2026, compared to €1,154.2 million at 31 January 2025.
The breakdown is as follows (in millions of euro):

€m	31 January 2026	31 January 2025
Cash and cash equivalents and net financial assets	91.0	80.5
Receivables/(payables) for derivatives	(11.6)	14.8
Financial receivables/(payables) with respect to third parties	3.5	5.9
Financial receivables/(payables) with respect to subsidiaries	22.0	20.6
Financial receivables/(payables) with respect to banks	(233.9)	(241.2)
Financial receivables/(payables) with respect to other lenders	0	0
Finance lease receivables/(payables)	(1,057.4)	(1,034.8)
Net financial position	**(1,186.5)**	**(1,154.2)**

Excluding the payables recognised under IFRS 16, but keeping only the lease liabilities under IAS 17, the net financial position of OVS S.p.A. changed from €120.1 million at 31 January 2025 to €129.4 million at 31 January 2026, reflecting the excellent cash performance for the year, in terms of both operations and working capital management, and more than offsetting the change in the year in the mark to market of forward currency exchange contracts, negative for over €26 million.

Payables to banks are described later in this report.

Main subsidiaries

OVS Hong Kong Sourcing Ltd

OVS Hong Kong Sourcing Ltd, which has its registered office in Hong Kong, operates in the Far East (mainly China, Bangladesh and India, and, more generally, in areas outside Europe), aiming to select suppliers, win orders, and manage the entire product development and quality control phase up to delivery. OVS Hong Kong Sourcing Ltd, which has facilities in various countries, is able to support production activities and monitor that the costs and quality of products are in line with Group standards. Specifically, the company focuses on strengthening existing supplier relationships in the Asia region, further boosting its presence in Bangladesh and China by increasing purchasing volumes. At the same time, purchasing has also increased in the India and Pakistan region, and the search has continued for more sources of supply in countries in that area that can meet the quality standards required by the Group in a context of lower costs (e.g. Cambodia and Vietnam).
The company recorded a net profit of €24.8 million in FY 2025 (compared to €22.9 million in 2024).

Goldenpoint S.p.A.

The Goldenpoint brand was founded in 2001, immediately becoming a successful retailer aiming to continuously improve its offering, paying considerable attention to innovation and product quality, placing the consumer at the heart of its business.
Its wide assortment of socks, tights, leggings, underwear, nightwear and swimwear is aimed at a female, male and junior target.
Goldenpoint's strengths are its careful choice of location, ongoing staff training, an extensive, all-round assortment, and efficient replenishment service that enables points of sale to guarantee a variety of new products, at all times.
The company has 400 sales outlets (of which 320 directly operated) located both in Italy and in the main foreign cities.
The Company became part of the OVS Group on 3 July 2025 following its acquisition by the Parent Company OVS S.p.A.. For more details on the acquisition, see paragraph 3.4 Business combinations in the Notes to the consolidated financial statements. From its acquisition (3 July 2025) to 31 January 2026, the company achieved a turnover of €67.6 million and adjusted EBITDA of €3.9 million.

OVS Maloprodaja d.o.o.

The company operates in the Croatian market and now directly operates 4 OVS stores.
There were no changes in the scope of the directly managed stores in 2025.
The company is not material for the purposes of the consolidated financial statements.

OVS Department Stores d.o.o. Belgrade

The company operates in the Serbian market, directly operating 12 OVS stores.
A new direct store was opened in 2025, while there were no closures.
The company is not material for the purposes of the consolidated financial statements.

OVS Fashion España S.L.

OVS Fashion España S.L., which was acquired in 2016 in order to achieve more direct operation of the major Spanish retail market, operates the sales network in Spain, with 115 stores in franchising and 1 directly operated Kids store. There were 8 new openings and 4 closures of stores in franchising in 2025. With regard to direct stores, the PIOMBO store in Madrid was closed.
In FY 2025, the company recorded a turnover of €15.5 million and a net profit of €0.2 million (compared to a loss of -€1.3 million in 2024).

OVS France S.A.S.

OVS France S.A.S., formed in 2018, initially operated through the direct management of stores in France, initially in full-format, before focusing on the "Kids" format from 2022. Given the unsatisfactory results in 2024, these businesses were discontinued and, at the end of July 2025, the last PIOMBO direct store on Rue St. Honoré in Paris was permanently closed. The company is therefore not currently material for the purposes of the consolidated financial statements.

OVS Germany G.m.b.H.

OVS Germany G.m.b.H. was incorporated on 28 September 2022, with its registered office in Leipzig. As at the date of these consolidated financial statements, the company is 100% owned by OVS S.p.A. The company had already in 2023 definitively closed its only DOS operating under the STEFANEL brand, which had been opened in Düsseldorf in 2022. The company is therefore not currently material for the purposes of the consolidated financial statements.

OVS India Retail Private Ltd.

OVS India Retail Private Ltd. was incorporated on 10 January 2025 to undertake commercial activities with the opening of stores in India, one of the fastest growing markets in the world. On 14 October 2025, the company opened its first store in New Delhi inside the Pacific Mall in Tagore Garden.
At 31 January 2026, the company was not material for the purposes of the consolidated financial statements.

OVS Department Store LLC-SO

The company OVS Department Store LLC-SO (UAE) was incorporated on 1 September 2025 in Dubai, with the aim of opening the first flagship multi-store in Dubai by the end of summer 2026.
At 31 January 2026, the company was not material for the purposes of the consolidated financial statements as it was not yet operational.

82 S.r.l.

82 S.r.l. was incorporated in 2017 and is a subsidiary of OVS S.p.A., which owns 70% of the company. Partner Massimo Piombo is a minority shareholder, holding the remaining 30%. The company was initially established to undertake the development through several PIOMBO-branded stores, dedicated to upper casual men's wear. In 2018, 82 S.r.l., the licensee of the PIOMBO brand, granted OVS S.p.A. the sub-licence of the brand after structured negotiations, for organisational reasons, and simultaneously revised its strategy of opening DOS and focusing its business on the operational management of the brand. As part of this strategy, on 9 March 2021 an agreement was signed for the sale of the PIOMBO brand with Ciro Paone S.p.A., as a result of which the company became the owner of the brand.
The company recorded net profit of €2.8 million in FY 2025 (compared to €2.2 million in 2024).

OVS Innovazione e Sostenibilità S.r.l.

OVS Innovazione e Sostenibilità S.r.l. was incorporated on 21 June 2022, with its registered office in Venice-Mestre. As at the date of these consolidated financial statements, the company is 100% owned by OVS S.p.A. The three-year investment programme continued in FY 2025, both in Industrial Research and Experimental Development and in logistics. The final Programme Agreement between OVS Innovazione e Sostenibilità S.r.l. and the Puglia Region – Department of Economic Development was signed on 29 November 2023: note that the investment programmes

of OVS Innovazione e Sostenibilità S.r.l. total €36,152,507, approved by the Puglia Region for inclusion in the programme subject to concessions, including €20.7 million in industrial research and experimental development and €15.5 million in tangible assets. With regard to this latter business development area, on 28 March 2025, the new multi-function centre was opened, launching the first activities to recover the unsold clothing of the OVS Group as early as February 2025. The centre has an innovative facility with a reconditioning capacity of 70,000 pieces of clothing a day, with the aim of reaching a total of 15 million reconditioned items in 2026. The entire process has been designed to optimise internal flows within the centre including through the use of models based on smart automation technologies.
The company recorded a net loss of €3.1 million in 2025 (compared to €1.2 million in 2024).

JB Licenses S.r.l.

The company was incorporated on 27 March 2024, by means of a partial demerger from J. Brand International S.r.l. in relation to the licence business. On 10 April 2024, OVS S.p.A. completed the acquisition of 100% of the shares and therefore now holds control.
The company manages a broad portfolio of licences and markets clothing and accessories under these brands or private labels through various wholesale, FOB and retail channels to customers including the Parent Company, Prenatal, Capri, Eurospin and NKD. In FY 2025, the main licences sold were Slazenger, Sonic, Peanuts, Russell Athletic and Pokémon.
The second financial year of JB Licenses S.r.l. closed with net a profit of €1.9 million.

Main risks and uncertainties

The Group operates in the commercial sphere, both retail and wholesale, with exposure to market risks relating to changes in interest rates, exchange rates and merchandise prices. The risk of changes in prices and cash flows is connected to the very nature of the business and can be only partially mitigated by the use of appropriate risk management policies.

Credit risk

Credit risk represents the Group's exposure to the risk of potential losses arising from default by a counterparty. The current macroeconomic context has made continual monitoring of credit increasingly important, so that situations in which there is a risk of insolvency and delayed payment deadlines can be anticipated.
There were no significant concentrations of credit risk in the year under review.
To reduce this risk generally, the Group also obtains guarantees in the form of sureties in respect of loans granted for the supply of goods.
Financial assets are recognised in the financial statements net of write-downs calculated on the basis of the risk of counterparty default, determined by using available information on the solvency of the customer and taking historical data into account.
For information on the Group's assessment of credit risks associated with the macroeconomic situation, see the sections headed "Significant events during the reporting period" and "Significant events after the reporting period" below.

Liquidity risk

Liquidity risk is the risk that financial resources may be difficult to access.
As of the reporting date, the Group believes that it can access, through available sources of financing and lines of credit, amply sufficient funds to meet its foreseeable financial requirements.
With regard to the Group's assessments of liquidity risks, see also the sections entitled "Significant events after the reporting period" and "Business outlook" below.

Market risk

Market risk includes the effects that changes in the market might have on the Group's commercial activity that is sensitive to consumer spending choices.
Positive results can be influenced, inter alia, by the business environment, interest rates, taxation, local economic conditions, uncertainty over the economic outlook and shifts to other goods and services in consumer spending choices. Consumer preferences and economic circumstances may change from time to time in every market in which the Group operates.
For this reason, the ability to combat the deflationary price pressure associated with increased competition and changes in consumer choices, which could have adverse effects on the financial situation and results, has become strategically important.
For information on the Group's assessments of market risk associated with the ongoing conflict between Russia and Ukraine and the instability related to the conflicts in the Middle East, with obvious repercussions on international shipping routes, see the sections headed "Significant events during the reporting period", "Significant events after the reporting period" and "Business outlook" below.

Management of financial risks

Financial risk management is carried out according to guidelines defined by the Board of Directors.

The aim is to ensure a liability structure that is consistent with the composition of the assets and the Group's requirements in order to maintain adequate solvency of the assets. The Group is exposed to various degrees to financial risks associated with its core business.

Risk of change in prices and cash flows

The Group's margins are influenced by changes in the prices of the goods it deals in.
Any reduction in the price of items sold, if not accompanied by a corresponding reduction in purchase cost, generally entails a decrease in operating results.
In fact, the economic environment in the year just ended was still characterised by inflationary pressures. Only the careful management of this risk by the OVS Group, which caused it to secure several contracts in the previous year at prices that then proved to be very advantageous, particularly in the spring-summer collection (compared to that of 2024), together with calibrated action on the sale lists and promotional activities, resulted in a Gross Margin of 59.2% in 2025, a further improvement on 2024.
The Group's cash flows are also exposed to the risk of changes in market exchange rates and interest rates. Specifically, exposure to exchange rates arises because the Group operates in currencies other than the euro, in which it purchases a substantial part of the products marketed, listed or pegged to the US dollar.
Lastly, interest rate fluctuations affect the market value of the Group's financial liabilities and its net financial expenses.

OBJECTIVES AND POLICIES FOR MANAGING THE RISK OF CASH FLOW CHANGES

The Group has guidelines in place for financial operations that involve the use of forward derivatives to reduce foreign exchange risk against the US dollar (forward currency purchase contracts) and the risk of interest rate fluctuations.

DERIVATIVE CONTRACTS

Nominal value of derivative contracts

The nominal value of a derivative contract is the amount of each contract in monetary terms. Monetary amounts in foreign currency are converted into euro at the spot exchange rate on the reporting date.

Interest rate risk

Given the projections for the 6-month Euribor rate until the expiry of the loan agreements and the structure of the Group's debt, it was decided not to take action to hedge the risk of interest rate fluctuations, except for the instruments already in place at the subsidiary Goldenpoint before its acquisition.

Foreign exchange risk

The OVS Group purchases most of its products for sale from foreign suppliers for which the reference currency is the US Dollar (USD). In order to ensure reliability in the planning of sales prices and the relative industrial margin (understood as the difference between sales prices in EUR and the purchase costs of products in USD), the OVS Group routinely enters into derivative contracts designed to stabilise the exchange rate of goods purchases. The nature of these instruments is quite simple, as they are purchases of forward USD currency (forward derivatives) implemented in relation to estimated inflows and with timelines associated with the foreseeable outflow of cash, usually with a time horizon of 12 to 24 months from the date of signing the associated contracts. The instruments in question are initially entered into, in particular, taking into account quantifications (based on estimates) determined on the basis of purchases of the previous collection and considering the business outlook. Such operational hedges of purchase flows take place, in fact, by collection and by month. The instruments are then constantly monitored and updated by the OVS Group in relation to potential changes in purchase and payment flows and therefore to the variable need for stabilisation of exchange rates during the operational development of commercial planning.

The derivatives described are recognised at 31 January 2026 at fair value, according to the methods of recognition and measurement established in the reference accounting standards (IFRS 9). Under this accounting standard (as was already the case under IAS 39), the entity may, under certain conditions, book derivatives using hedge accounting. In view of the operational complexity in managing the correspondence between the theoretical underlyings (the flows subject to the management hedging described) and the derivatives, the OVS Group has decided not to adopt hedge accounting. Consequently, the fair value of existing financial instruments and subsequent changes in such instruments are directly charged to the income statement on each reporting date. The fair value of derivatives is quantified using common valuation techniques and is mainly determined by the difference between the notional amount in USD converted into euro at the forward exchange rate at the time of entering into the contract and the notional amount in USD converted into euro at the exchange rate at the end of the reference period. This difference may be positive or negative depending on changes in the EUR/USD exchange rate, resulting in a certain level of volatility in the Group's results. This is appropriately taken into account in the presentation of adjusted figures in this document.

For an in-depth analysis and representation of financial risk management, as well as for the other information required under IFRS 7, see the details provided in the notes to these financial statements.

Environmental risks and impacts of climate change on the consolidated financial statements

Environmental issues are a strategic priority for the OVS Group, and the relevant risks are defined, assessed and consequently managed as part of a mitigation and adaptation plan in order to achieve certain objectives and, ultimately, to preserve the continuity of the business and the Group.
Within the periodic risk identification and assessment process, OVS also considers risks related to environmental and social aspects both from an inside-out perspective (impacts generated) and from an outside-in perspective (impacts suffered).
Climate change is identified as an area of significant risk, due to the actual impact generated by OVS in terms of CO_2 emissions and also the consequences that climate change may have on the business of the company and the Group.
Some time ago, OVS launched a decarbonisation plan with objectives approved by the Science Based Targets Initiative, to keep global warming below 1.5°C. Please refer to the section of this Report on Operations relating to the Consolidated Sustainability Report.

Investment and development

Gross investments of €79.5 million were made in 2025. During the year, major investments were made to strengthen the sales network and major projects were completed to upgrade the logistics and IT systems. In this regard, it is worth mentioning the opening in early 2025 of the logistics hub in Bari dedicated to garment reconditioning and second-hand management. In detail, investments in 2025 related to: (i) the restructuring of 25 stores in the existing network, extraordinary maintenance and other commercial activities relating to the existing network, including the Goldenpoint network, amounting to around €30.2 million, (ii) new store openings for around €27.4 million, (iii) the upgrading of IT facilities, including through the subsidiary OVS Innovazione e Sostenibilità S.r.l. (approximately €15.4 million), (iv) management of the distribution network and the upgrading of the logistics unit (around €5.6 million) in order to improve distribution efficiency.

Investments made in FY 2024 amounted to €87.6 million, of which approximately €40 million were for restructuring and extraordinary maintenance, €16 million for opening new stores, €17 million for upgrading the IT facilities and €11 million for increased automation of the distribution network.

At Group level, the sales network comprised a total of 2,241 stores at 31 January 2026 (including the small-format stores) including 882 DOS (18 outside Italy), 1,261 affiliated stores (374 outside Italy) and 98 administered stores (74 outside Italy). In addition, the network comprises 388 Goldenpoint stores, of which 328 DOS and 60 affiliated stores. Overall, the sales network at 31 January 2026 comprised 2,629 stores.
In FY 2025 (1 February 2025 – 31 January 2026), the direct network continued to expand with the opening (net of closures) of 14 stores, while the number of affiliated and administered stores decreased by 15. In FY 2024 (1 February 2024 – 31 January 2025), the overall network decreased by 2 stores, due to the opening (net of closures) of 6 DOS and 8 affiliated stores, while the number of administered stores decreased by 16.

Research and development

In FY 2025, the Group carried out important and significant industrial research and experimental development activities, primarily through its subsidiary OVS Innovazione e Sostenibilità S.r.l., in partnership with the Politecnico di Bari. In particular, the Company is continuing its investment plan under the Planning Agreement with the Region of Puglia, aimed at using and creating further complex solutions with a strong focus on technological innovation in processes and products and supportive of the digital transformation of business processes and the activities of the sole shareholder OVS S.p.A..
It should also be noted that a number of people are continuously employed in creating and developing collections, to ensure an exclusive offering that is consistent with the positioning of the Group's various brands. The activities carried out by dedicated teams are also covered by EU Directive 2006/c 323/01, which defines "industrial research" as "industrial research means the planned research or critical investigation aimed at the acquisition of new knowledge and skills for developing new products, processes or services or for bringing about a significant improvement in existing products, processes or services [...].".

Related party transactions

In accordance with applicable laws and regulations, the Parent Company's Board of Directors approved the

"Procedure governing related party transactions", first by resolution of 23 July 2014, and effective as of 2 March 2015, most recently updated by resolution of the Board of Directors of 17 June 2021, with effect as of the same day.
The Procedure was adopted by the Company in implementation of Article 2391-bis of the Italian Civil Code and the regulation containing provisions on transactions with related-parties adopted by CONSOB with resolution no. 17221 of 12 March 2010 as subsequently amended and supplemented, also taking into account the guidelines and clarifications provided by CONSOB in communication no. DEM/10078683 of 24 September 2010.
The Procedure identifies the rules governing the approval and execution of transactions with related parties entered into by OVS, directly or through subsidiaries, in order to define the relevant competencies and responsibilities and ensure the transparency and substantive and procedural correctness of such transactions.
Information on, and details of, relations with related entities are provided in the notes to the consolidated financial statements and the separate financial statements, pursuant to IAS 24.

Significant events during the reporting period

Impacts of global conflicts and inflation on the Group's performance

In FY 2025 and the last two previous years, the period was also characterised by continuing macroeconomic phenomena following the outbreak of the Russian-Ukrainian conflict, which began more than 3 years ago, and the Middle East conflict that began in October 2023.
However, the year just ended is still set against a backdrop of adverse external factors: the disruption to the Suez Canal continues, resulting in longer shipping routes around Africa. This also took place in a climate where the clothing market contracted again in 2025 (-2% vs. 2019 in nominal terms, -20% in real terms).
All these factors have also been duly considered in the business plans underlying certain financial statement estimates. For more information, see the "Business outlook" section and the notes to the financial statements.
Despite this extremely difficult economic environment, the OVS Group's results for FY 2025 in terms of sales and EBITDA were particularly strong.

Other significant events during the reporting period

Among the key events that characterised FY 2025, it should be noted that on 19 February 2025, an Extraordinary Shareholders' Meeting was convened to approve the:

- cancellation of a number of treasury shares equal to 10% of the share capital, and
- granting of a mandate to the Board of Directors to further cancel a number of treasury shares equal to at most 5.50% of the share capital.

Pursuant to the resolution of the Extraordinary Shareholders' Meeting of 19 February 2025, a total of 35,891,347 treasury shares were cancelled, of which 29,092,347 cancelled by resolution of the Shareholders' meeting and 6,799,000 by resolution of the Board of Directors on 1 April 2025, in implementation of the mandate granted.
On 28 March 2025, the OVS Group publicly opened the new technological innovation hub and multi-function centre which were part of the investment project launched in 2023 through the Planning Agreement for Large Companies in the Puglia Region. The project is now well under way, enabling the group to address significant challenges in the areas of digital transformation, artificial intelligence, cyber security and the circular economy.
The technology hub is developing projects with high digital content, with a particular focus on the use of innovative solutions for retail, while the multi-function centre has been operational since February and has already started recovering unsold garments. This centre is located in a leased property of approximately 15,000 sq.m. in the industrial area of Bari, and includes an innovative plant with a reconditioning capacity of 70,000 items of clothing per day, with the aim of reaching a total of 15 million reconditioned pieces in 2026. The entire process has been designed to optimise internal flows within the centre including through the use of models based on smart automation technologies. The implementation of this project is an important objective in the Group's development plan for digital innovation and sustainability. The creation of this technology hub has enabled the Group to begin welcoming new resources to join those already contributing to its digital transformation and innovation; at the same time, the multi-function centre for garment recovery is proving its potential in the circular economy.
The Puglia region continues to offer a dynamic industrial ecosystem with close ties to leading academic institutions such as the Politecnico di Bari, with which the OVS Group has an active partnership. This favourable context is contributing significantly to the success of the initiative by strengthening the entire Group's capacity for innovation.
On 30 May 2025, the Ordinary Shareholders' Meeting of the Parent Company, OVS S.p.A. approved the financial statements at 31 January 2025, also resolving to distribute an ordinary dividend of €0.11 per share for the financial year ended 31 January 2025.

The detachment date for coupon no. 8 was 23 June 2025 and the payment date was 25 June 2025 (with a record date of 24 June 2025). For further details, see the consolidated statement of changes in shareholders' equity.
The Ordinary Shareholders' Meeting also approved the renewal - subject to revocation for the part not executed, of the resolution passed by the Shareholders' Meeting of 24 January 2024 - authorising the purchase and disposal of treasury shares up to a maximum of 10% of the share capital, also taking into account the treasury shares held in portfolio by the Company and its subsidiaries. The authorisation was approved, in accordance with applicable legislation, for a maximum period of 18 months (i.e. until 30 November 2026). Following the vote by the shareholders, on 6 June 2025, the Board of Directors of OVS resolved to launch, as of 9 June 2025, a share buyback programme for a maximum of €20 million, up to a maximum of 6 million shares, in execution of, and according to the methods, terms and conditions set out in, the resolution approved by the Shareholders' Meeting of 30 May 2025, the date of conclusion of the buy-back plan based on the previous authorising resolution of 24 January 2024.
On 3 July 2025, OVS S.p.A. completed the acquisition of the entire share capital of Goldenpoint S.p.A. following the sale by Gilfin S.r.l. of the remaining 97% of the share capital. For accounting purposes, the acquisition is reflected in the OVS Group's accounts from 1 July 2025. This operation accelerated the acquisition of Goldenpoint by OVS compared with the agreements previously signed, which envisaged a gradual takeover in several phases up to 100% between 1 August 2026 and 31 July 2029. The rationale for the deal is to expedite growth in a segment in which OVS already has significant competencies and considerable market share due to sales in its own stores.
For further details, see the Notes to the consolidated financial statements, and in particular section 3.4 "Business combinations".
It should be noted lastly that, as part of the authorisations to purchase treasury shares, most recently that approved by the Shareholders' Meeting on 30 May 2025, in implementation of the purchase programme launched on 9 June 2025 (already subject to disclosure also pursuant to Article 144-bis of CONSOB Regulation 11971/99 and Article 132 of Legislative Decree no. 58/98), from 1 February 2025 to 31 January 2026, the Parent Company had purchased an additional 4,484,351 treasury shares, while it sold on the market 2,026,718 treasury shares following the exercise of options by certain Beneficiaries of the 2019-2022 Stock Option Plan and 1,371,941 treasury shares following the maturity of the first cycle of the 2022-2026 Performance Share Plan and cancelled a total of 35,891,347 treasury shares. At 31 January 2026, the Company therefore holds 11,402,806 treasury shares (equal to 4.471% of the share capital, broken down into 255,032,123 shares), while its subsidiaries do not hold any OVS shares.

There were no other significant events in the 2025 financial year.

Other information

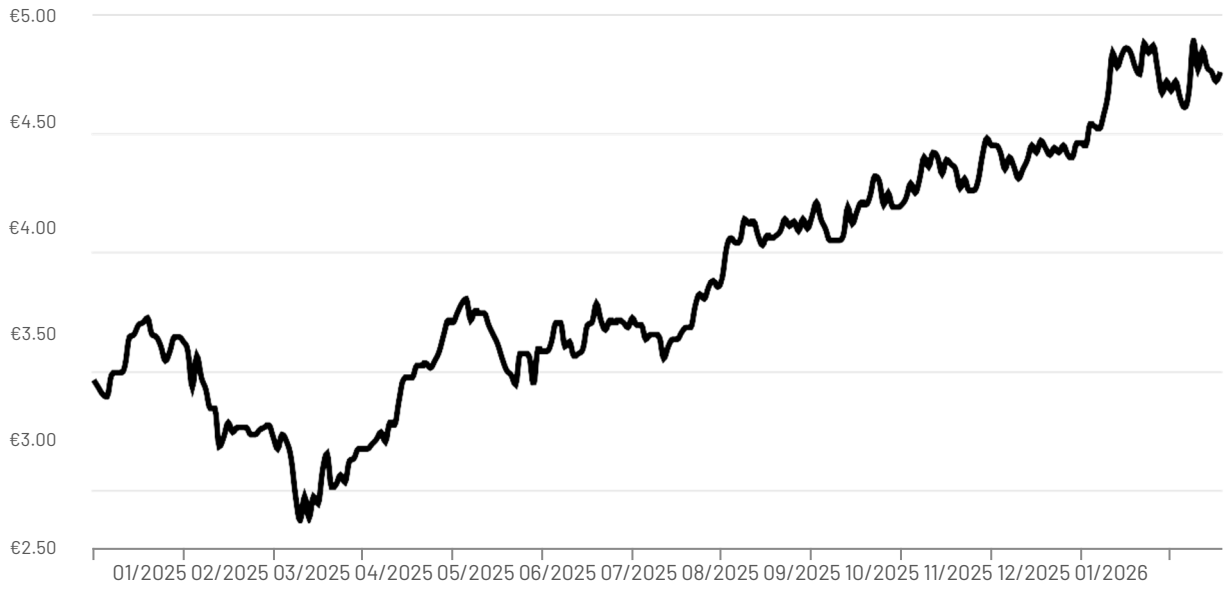

OVS on the equity markets

2025 was characterised by a complex and constantly evolving global context, marked by persistent geopolitical and macroeconomic uncertainty.
Although the conflict between Russia and Ukraine remained unresolved, market pressure was more muted than in the past. In parallel, tensions in the Middle East remained high, leading to episodes of significant volatility in financial markets. Lastly, the announcement of new US trade measures on Liberation Day in April 2025 was a significant turning point for global markets, rekindling protectionism concerns and raising doubts as to the resilience of global growth and the stability of supply chains.
Despite these critical aspects, financial markets were remarkably resilient. The monetary easing undertaken by central banks at the end of 2024 continued throughout 2025, supported by an inflation rate that is now close to the targets set in major developed economies. The gradual reduction in interest rates provided the necessary support for economic activity, helping to balance the uncertainties arising from the geopolitical front and renewed trade tensions.

Against this backdrop, equity markets posted strong results (S&P Global Broad Market Index: +20%).
The Italian market was also particularly positive: the FTSE MIB ended the year up +25%, led by the performance of the financial sector, while the FTSE Italia Mid Cap, the benchmark index for mid-caps including OVS, was up 20%.

Within this market framework, OVS registered a very positive equity performance of +38% (€4.76 at 31 January 2026 compared to €3.46 at 31 January 2025), a result that reflects a rigorous implementation of the business strategy, with financial results constantly exceeding market expectations.
Total Shareholders Return (TSR) for FY 2025 was +41%, while market capitalisation at 31 January 2026 came to €1,214 million.

OVS stock performance in 2025

During FY 2025, engagement with shareholders, investors and analysts was constant. Management participated in several industry conferences, in roadshows on major financial markets, and in meetings and conference calls with fund managers, and analysts on the buy-side and sell-side. The events were sometimes held in person, and sometimes virtually.

For more information and updates on share performance, and for the latest press releases, visit the "Investor Relations" section of the website at www.ovscorporate.it.

Incentive plans

It should be recalled that on 26 May 2015, the Shareholders' Meeting approved a stock option plan for the period 2015-2020, to be implemented through the granting of free stock options for ordinary newly issued shares of OVS S.p.A. The Plan was reserved for directors who are also employees, executives with strategic responsibilities and/or other employees of OVS S.p.A. and its subsidiaries. The Plan was intended to create value for shareholders by improving long-term corporate performance and attracting and retaining staff who play a key role in the Group's development.

The Plan provided for the issue of up to 5,107,500 options, granted free of charge to the Beneficiaries if certain performance targets are met, and conferred on each of them the right to subscribe for 1 ordinary share of the Company for each option granted. The above Shareholders' Meeting was also convened in an extraordinary session to resolve upon the proposal to give the Board of Directors, for a period of five years from the resolution date, the power to increase the share capital, pursuant to Article 2443 of the Italian Civil Code, in tranches, excluding option rights pursuant to Article 2441, paragraph 8, of the Italian Civil Code, for a maximum nominal amount of €35,000,000, through the issue, in one or more tranches, of a maximum of 5,107,500 ordinary shares with no par value, to be reserved to the beneficiaries of the "2015-2020 Stock Option Plan", with the consequent amendment of Article 5 of the Articles of Association.

At 31 January 2026, all of the 2,724,963 option rights assigned pursuant to the "2015-2020 Stock Option Plan" were permanently cancelled, as the exercise period of the rights in favour of the Beneficiaries expired on 8 June 2025.

It should also be noted that the Shareholders' Meeting of 31 May 2017 approved a further stock option plan, called the "Stock Option Plan 2017-2022", reserved for directors who are also employees, managers with strategic responsibilities and/or other employees of OVS S.p.A. and its subsidiaries, which may be implemented using (i) treasury shares purchased under the authorisation referred to in Article 2357 of the Italian Civil Code granted at any given time by the Shareholders' Meeting; (ii) or shares resulting from a capital increase resolved by the Board of Directors, after granting the Board a mandate to increase the share capital pursuant to Article 2443 of the Italian Civil Code, in tranches, excluding option rights pursuant to Article 2441, paragraph 8, of the Italian Civil Code, for a maximum nominal amount of €4,080,000, through the issue of a maximum of 4,080,000 newly issued ordinary shares of OVS, in one or more tranches, reserved to beneficiaries of the Stock Option Plan 2017-2022.

This Plan was also intended to create value for shareholders by improving long-term corporate performance and attracting staff who play a key role in the Group's development.

The Plan provided for the free allocation to each beneficiary of up to a total of 4,080,000 options, which give the right to subscribe or purchase ordinary shares of OVS in the ratio of 1 ordinary share for every 1 option exercised. The options matured when certain performance targets were met. At 31 January 2026, 1,222,000 options had been granted under the "Stock Option Plan 2017-2022".

The Ordinary Shareholders' Meeting held on 31 May 2019 also approved, pursuant to Article 114-bis of the Consolidated Law on Finance, the adoption of an incentive plan called the "Stock Option Plan 2019-2022", to be implemented through the granting of free stock options for newly issued ordinary shares of OVS S.p.A. The Plan was reserved for directors who are also employees, executives with strategic responsibilities and/or other employees of OVS S.p.A. and its subsidiaries pursuant to Article 93 of Legislative Decree no. 58 of 24 February 1998, which were identified by the Board of Directors, following consultation with the Appointments and Remuneration Committee, from among those who played a key role in achieving the Company's strategic objectives (hereinafter, the "Beneficiaries").

The Plan was intended to create value for shareholders by improving long-term corporate performance and by attracting and retaining personnel that play a key role in the Group's development, in order to align the interests of the Beneficiaries with those of the Group's shareholders.

Up to 5,000,000 options may be issued under the Plan, granted free of charge to the Beneficiaries. Each Beneficiary may exercise the options actually accrued on fulfilment of a condition of access to the Plan (gate) and a performance condition linked to a predefined value of three-year cumulative EBITDA. Each option confers on each Beneficiary the right to subscribe for 1 ordinary share of the Company for each option granted.

The exercise price of the shares is currently set at €1.42. At 31 January 2026, 76,575 option rights relating to the "Stock Option Plan 2019-2022" had not yet been exercised, due to the partial exercise of 4,609,604 rights (of which 2,026,718 exercised in FY 2025) and 113,821 cancelled during FY 2024.

With regard to the three plans in place, it should be recalled that, in 2021, the dilutive effect of the capital increase in July 2021 had to be neutralised by adjusting the strike price and any access condition price (present only in the 2019-2022 Plan).

The new values, calculated according to the formulas commonly used in similar situations, are therefore recalculated as follows:

Stock Option Plan (amounts in Euro)	Exercise price	New exercise price
2015-2020 Plan	4.88	4.08
2017-2022 Plan	6.39	5.26
2019-2022 Plan	1.85	1.72

The new strike prices indicated above are also further adjusted to neutralise the effects of the distribution of dividends in 2022, 2023, 2024 and 2025 (totalling €0.31 per ordinary share).
On 31 May 2022, the Ordinary Shareholders' Meeting approved, pursuant to Article 114-bis of the Consolidated Law on Finance, the adoption of a stock grant plan named the "2022-2026 Performance Shares Plan" reserved for the Chief Executive Officer, Executives with Strategic Responsibilities, employees, contractors and consultants of OVS and its subsidiaries.
Finally, on 30 May 2024, the Ordinary Shareholders' Meeting approved, pursuant to Article 114-bis of the Consolidated Law on Finance, the adoption of a further stock grant plan called the "2024-2026 Performance Shares Plan" reserved for the Chief Executive Officer, Executives with Strategic Responsibilities, employees, contractors and consultants of OVS and its subsidiaries.
For more information on the aforementioned incentive plan, see note 7.27 in the notes to this document and the specific documentation relating to the respective Shareholders' Meetings, which is available on the corporate website.
For the characteristics of all the plans, see the reports of the Board of Directors and the information documents, pursuant to Article 84-bis of CONSOB Regulation no. 11971/1999, which are available in the Governance/Shareholders' Meeting section of the Company website at www.ovscorporate.it.

Shares held by directors, statutory auditors and executives with strategic responsibilities

For information on the Shares held by Directors, Statutory Auditors and Managers with strategic responsibilities, see the Remuneration Report, prepared in accordance with Article 123-ter of the Consolidated Law on Finance, pursuant to Article 84-quater and Annex 3A, Schedule 7-bis of CONSOB Regulation no. 11971/1999 as subsequently amended (the "Issuers' Regulation") and Article 6 of the Corporate Governance Code, which can be viewed in the Governance/Shareholders' Meeting section of the Company website at www.ovscorporate.it.

Treasury shares

At 31 January 2026, the Parent Company, OVS S.p.A., held a total of 11,402,806 treasury shares, representing 4.471% of the share capital.
During FY 2025, 4,484,351 treasury shares were acquired at an average purchase price of €3.554 per share for a total amount of €15,937 thousand, while there were disposals of 3,398,659 shares for an amount of approximately €3,071 thousand.

Article 15 of the Markets Regulation (adopted by CONSOB with Resolution no. 20249 of 28 December 2017)

Investee companies with registered offices in non-EU countries, of which the biggest is OVS Hong Kong Sourcing Ltd, are not significant under Article 151 of the Issuers' Regulation as their respective assets amount to less than 2% of the assets in the Group's consolidated financial statements at 31 January 2026 and their respective revenues amount to less than 5% of the Group's consolidated revenues at 31 January 2026.

Article 16, paragraph 4 of the Markets Regulation (adopted by CONSOB by Resolution No. 20249 of 28 December 2017)

At 31 January 2019, OVS S.p.A. was a 17.835%-owned investee company of Gruppo Coin S.p.A..
On 11 March 2019, Gruppo Coin S.p.A., the vendor, and Tamburi Investment Partners S.p.A., as the buyer, reached an agreement concerning the sale of the equity investment (17.835%) held by Gruppo Coin S.p.A. in OVS S.p.A. Due to this purchase, Tamburi Investment Partners S.p.A., which was already a shareholder of OVS with an equity investment of approximately 4.912%, obtained a total stake of around 22.747% in OVS's capital.
Lastly, as a result of the paid capital increase completed in July 2021 and subsequent purchases on the market and cancellations of treasury shares during FY 2025, at 31 January 2026, the shareholder Tamburi Investment Partners S.p.A. held a total stake of approximately 32.44% in OVS's capital. Despite the equity investment held by Tamburi Investment Partners, OVS S.p.A. does not consider itself to be subject to management and coordination by the latter, as:

- it operates completely independently;
- there is no cash pooling function for the Group;

- key decisions relating to management of the Parent Company and its subsidiaries are taken by the Parent Company's own management bodies;
- the Parent Company's Board of Directors is responsible, inter alia, for reviewing and approving the strategic, business and financial plans and budgets of the Company and the OVS Group, reviewing and approving the organisational structure of the OVS Group, and assessing the adequacy of the organisational, management and accounting structure of the Company and the OVS Group.

Information pursuant to Articles 70 and 71 of CONSOB Regulation 11971/1999

It should be noted that OVS S.p.A. has opted to adopt the system in derogation of Articles 70, paragraph 6 and 71, paragraph 1 of CONSOB Regulation No. 11971/1999 (the Issuers' Regulation) in the event of significant mergers, demergers and capital increases through the contribution of assets in kind, acquisitions and disposals, having notified CONSOB, Borsa Italiana and the public thereof at the time of submission of the application for the listing of shares on the MTA market, pursuant to Articles 70, paragraph 8 and 71, paragraph 1-bis of the Issuers' Regulation.

Information on Corporate Governance and Ownership Structure (disclosure pursuant to Article 123-bis of Legislative Decree 58/1998)

On 16 April 2026, the Company's Board of Directors approved its report on corporate governance and ownership structure for the year ended 31 January 2026, drafted pursuant to Article 123-bis of the Consolidated Law on Finance (the "Corporate Governance Report").
The Corporate Governance Report contains a description of the corporate governance system adopted by the Company in the financial year 2025, information on its ownership structure and adherence to the Corporate Governance Code as of the date of the Corporate Governance Report, information on the Company's main governance practices and the characteristics of its risk management and internal control system for the financial reporting process.
For further information on the Company's corporate governance structure, which was adopted in application of the principles enunciated in the Corporate Governance Code, see the document entitled "Corporate Governance Report", which is available in the Governance/Shareholders' Meeting 2026 section of the Company website.

Significant events after the reporting period

With reference to the incentive plan "2022-2026 Performance Share Plan", approved by the Shareholders' Meeting on 31 May 2022 and divided into three, three-year cycles (2022-2024; 2023-2025; 2024-2026), on 4 February 2026, the Board of Directors of OVS S.p.A. notified that the actual number of shares to be allocated to each beneficiary, based on the level of achievement of the performance target, had been determined, since the vesting period for the second cycle (2023-2025) of the Plan had ended and the conditions for the allocation of shares to the beneficiaries identified on 19 April 2023 had been met.

In particular, considering that the performance target had been achieved in full, the Board of Directors resolved - for each of the 84 beneficiaries in respect of whom the conditions for allocation had been verified - to allocate 100% of the maximum number of shares that could be allocated.

The Chief Executive Officer was allocated 230,000 shares and Directors and executives with strategic responsibilities were allocated 255,000 shares. The other beneficiaries were allocated 924,466 shares.

The number of beneficiaries, initially identified as 91, changed in application of the provisions governing bad and good leavers set out in the Information Document and the Regulations of the 2022-2026 Performance Share Plan.

On 26 February 2026, OVS Cyprus Ltd, a wholly owned subsidiary of the Parent Company, was incorporated. The company will be in charge of developing the commercial business with the opening of stores in Cyprus.

As already mentioned, on 27 March 2026, OVS S.p.A. completed a process for the total refinancing of the Group by signing a sustainability-linked loan agreement (hereinafter the "2026 Loan"), consisting of three lines of credit totalling €300 million, with a 5-year term. The transaction was closed on 31 March 2026.

This transaction further improves the Group's financial structure, already strengthened thanks to a strong performance in terms of cash flows generated during 2025. The new lines present significant advantages in terms of cost, extension of terms and, more generally, contractual conditions in line with the Group's situation.

The 2026 loan enables the Parent Company to access financial resources aimed, among other things, at repaying and replacing: i) two lines of credit, a Revolving Loan for €120 million and a Term for the remaining €65 million, which became available with the loan signed on 7 April 2022, both maturing on April 2027; ii) a credit line for €18.75 million guaranteed 90% by SACE for the subsidiary Goldenpoint S.p.A., obtained pursuant to a loan agreement signed in 2020 to meet the needs related to the Covid-19 pandemic, subsequently amended with the Framework agreement signed in July 2024 maturing on September 2028.

The new financial lines, which will expire on 31 March 2031, consist of: (i) a Term Line of €120 million with a pre-amortisation period until 31 May 2027, followed by a repayment plan in eight six-monthly instalments; (ii) a Revolving Line of €120 million; and (iii) a committed Backstop Line of €60 million, which may be requested by OVS for Capex and/or to repay the Bond Loan by no later than November 2027 and which, if used even partially, will have a repayment plan for the actual amount used in six, six-monthly instalments with maturity aligned with that of the Term Line.

The lines, as per market practice, will be subject to compliance with a covenant relating to the ratio of the average annual adjusted NFP to adjusted EBITDA, set at 3.0x, a level that ensures a large margin compared to the current situation and future reasonable management forecasts.

The 2026 loan includes pricing of between 160 bps and 135 bps, to which the value of the Euribor should be added if positive, therefore with costs lower at 31 January 2026 than the lines being repaid.

The structure of the financing agreement also provides for an annual decrease or increase in the cost of financing of 5 bps, depending on the achievement of specific sustainability targets, starting from FY 2026. With this agreement, all of the Group's main lines of financing are linked to sustainability performance.

On 31 March 2026, the OVS Group increased its presence in India two-fold, through its subsidiary OVS India Retail Private Ltd.. After a debut in New Delhi, the company opened its second direct store covering a surface area of 1,000 m^2 in the Sky City Mall shopping centre in Borivali (Mumbai), with an offering that includes the women's, men's and children's clothing collections and a wide selection of brands developed by the internal creative team, including Piombo, Les Copains, B.Angel, Altavia and Ovs Kids.

Lastly, for the sake of completeness, it should be noted that, as part of the authorisations to purchase treasury shares approved by the Shareholders' Meeting on 30 May 2025, in implementation of the purchase programme launched on 9 June 2025 and further confirmed on 27 March 2026 (already subject to disclosure also pursuant to Article 144-bis of CONSOB Regulation 11971/99 and Article 132 of Legislative Decree no. 58/98), from 1 February 2026 to date, the Parent Company has purchased an additional 1,788,244 treasury shares, while it sold 16,382 treasury shares following the exercise of options by certain Beneficiaries of the 2019-2022 Stock Option Plan and 1,409,466 treasury shares following the vesting of the second cycle of the 2022-2026 Performance Share Plan.

At 16 April 2026, the Company therefore held 11,765,202 treasury shares (equal to 4.613% of the share capital, broken down into 255,032,123 shares), while its subsidiaries did not hold any OVS shares.

There were no other significant events after 31 January 2026.

Business outlook

The start of FY 2026 recorded significant growth compared to 2025 due to the very positive reception of the new collections.

At the end of March 2026, the group also signed a new loan agreement of €300 million, maturing in 2031, extending the average life of the lines of credit under improved economic conditions. The loan provides for a margin adjustment mechanism to achieve specific ESG objectives in line with the OVS Group's sustainability plan, confirming the sustainability-linked nature of all the main financial sources.

Based on the strong balance sheet and the growth prospects for margins and cash flows, the Board of Directors resolved to propose to the Shareholders' Meeting the distribution of a dividend of 14 eurocents per share, up 27% compared to the previous dividend.

A proposal will also be made to the Shareholders' Meeting to continue the buyback plan which, from 2022 to the present day, has led to the purchase of approximately 50 million shares for a total investment of approximately €120 million and is believed to remain an effective way of compensating shareholders.

As regards the outlook of operations and sales in 2026, the Italian clothing market is showing a good resilience after the start of the conflict in the Middle East (+1.6% in March). However, the continuation of the crisis having an impact on consumer behaviour in the medium term cannot be ruled out. In terms of costs, OVS does not believe it is exposed to significant impacts. In particular, the countries of origin of the goods are not involved and the shipping routes do not pass through the Strait of Hormuz. Freight rates, which are stable in the medium term, although subject to increases, will not have a material impact on the total cost of goods. In terms of energy, exposure to price fluctuations is also minimal thanks to the amount of in-house consumption, medium- to long-term agreements with renewable energy producers and forward purchases.

Initiatives related to products, brands, the expansion of the store network, and the development of brands such as Shaka and Goldenpoint, should encourage sales growth.

With regard to profit margins, the appreciation of the euro against the dollar since April 2025 has resulted in savings on the purchase cost of goods currently for sale, and these benefits will benefit profitability, allowing flexibility for any additional promotional activities.

Cash generation is expected to improve further compared with 2025.

In the first few months of 2026, all the Group's labels and brands grew significantly.

Proposal for approval of the financial statements and appropriation of earnings for the 2025 financial year of OVS S.p.A.

Dear Shareholders,
We submit the following resolution for your approval:

"The Shareholders' Meeting of OVS S.p.A., in ordinary session,
- having approved the statements of the Board of Directors;
- having examined the draft financial statements of OVS S.p.A. at 31 January 2026, reporting a profit for the year of €51,750,966 and the Report on Operations of the Board of Directors;
- having acknowledged the reports of the Board of Statutory Auditors and the independent auditor;
- having examined the consolidated financial statements at 31 January 2026 and the consolidated sustainability report;

resolves

1. to approve the financial statements of OVS S.p.A. at 31 January 2026, which show a net profit for the year of €51,750,966;
2. to approve the consolidated financial statements at 31 January 2026 and the consolidated sustainability report;
3. to allocate the net profit for FY 2025 of OVS S.p.A., amounting to €51,750,966, as follows:
   i. to the shareholders, an ordinary gross dividend of €0.14 for each outstanding ordinary shares, net of the treasury shares held by the Company (payment on 24 June 2026, with a detachment date for coupon no. 9 of 22 June 2026 and a record date - the accounting day at the end of which the accounts are valid for the purposes of entitlement to the dividend payment - of 23 June 2026);
   ii. the remainder to the retained earnings reserve."

Mestre, Venice, 16 April 2026

for the Board of Directors
The Chief Executive Officer
Stefano Beraldo

Consolidated Sustainability Report 2025

1. General information

1.1 Basis for preparation

BP-1 GENERAL BASIS FOR PREPARATION OF SUSTAINABILITY STATEMENTS AND BP-2 DISCLOSURES IN RELATION TO SPECIFIC CIRCUMSTANCES

This Consolidated Sustainability Report (hereinafter also "SR" or "Sustainability Report") of the OVS Group (hereinafter also only "OVS" or "Group") is prepared in accordance with the provisions of Legislative Decree 125 of 6 September 2024, which incorporates the requirements of the Corporate Sustainability Reporting Directive (hereinafter "CSRD") and the European Sustainability Reporting Standards (hereinafter "ESRS").

This document is published annually. The data relate to the period between 1 February 2025 to 31 January 2026. The scope of the general, environmental, social and governance information is the same as that of the scope of the Consolidated Financial Statements of OVS at 31 January 2026.

This document does not contain any omissions due to confidentiality requirements under applicable law. If it was not possible to find the quantitative data using the tools available to the Group, the use of estimates was duly reported. When the metric has been estimated, the calculation approach has been described in the paragraph on the metric itself (ref. E1, E3, E5).

The estimates used are representative of performance and data and are reported together with their degree of uncertainty.

For this reporting year pursuant to Legislative Decree 125, OVS has decided to use the transitional provisions listed in Appendix C of ESRS 1 applicable to the Group.

Some standard metrics and some Entity Specific metrics have been restated, where the calculation methodology has changed. The variations are commented on in the body of the text or in the notes to the text.

The information on each of the environmental objectives set out in the Taxonomy Regulation is set out in the paragraph European Taxonomy.

The company adopts the provisions of Commission Delegated Regulation (EU) 2026/73 approved in January 2026, which provides for a materiality threshold of 10% for Turnover, CapEx and OpEx.

For objectives that are not linked to ESRS-defined metrics, entity-specific metrics have been implemented and their calculation methodologies are specified in the relevant sections (Ref. E1- Entity-specific metrics, Ref. S2 - Entity-specific metrics), in line with MDR-M. Where more technical terminology was required than that used in the ESRS, this has been highlighted (ref. E5-4 Resource inflows).

In order to standardise the reporting of information and facilitate its correlation with the content indicated by Legislative Decree no. 125, for each sustainability aspect, evidence is provided of its relevance, impact and financial position, with respect to the activities of OVS and the value chain. Information on the value chain has been included, in accordance with regulatory requirements, with a focus on the most important actors for OVS: in the *upstream*, the analysis considers suppliers of products and raw materials, due to their strategic importance and impact; in the *downstream* franchisees were included, key players in the distribution of OVS products throughout the territory, and consumers. In fact, their behaviour and the way in which products are used influence and are strongly influenced by OVS's strategy.

The inclusion of information on upstream and downstream actors focused exclusively on the areas in which these materially relevant, so that the information provided complies with the principle of double materiality and meets the quality requirements set out in the reporting standards.

The method of managing the impacts, risks and opportunities (hereinafter also "IRO") identified along the value chain is described through specific policies, actions and objectives, together with the results obtained and monitored during the year.

The topic S3 - Affected Communities is excluded from the reporting scope because it is not considered material after the double materiality assessment.

Reporting is based on the time horizons currently provided for in the company Enterprise Risk Management (ERM) model[7]. Within 1 year (short term), between 1 and 3 years (medium term) and beyond 3 years (long term). This approach ensures alignment with the Group's business and sustainability plans, ensuring consistency in assessing impacts, risks and opportunities over time.

The data and information contained in this SR relate to events that took place during the reference year indicated above, deriving from the company's business activities, identified as significant based on the relevance analysis carried out in accordance with the Decree. As part of the data collection process, the specific functions responsible for the areas covered by the reports provided the data for which they are responsible, using extractions from corporate information systems, billing and internal and external reporting, under the coordination of the Corporate Sustainability function. The calculation methodologies related to the metrics are not certified by an external body.

OVS has defined an Internal Procedure for preparing Sustainability Reports in order to set out the process of collecting and approving the information to be reported. The persons covered by the procedure are the individuals in the company bodies/departments identified for the collection, control and certification of sustainability data and information, as well as the persons/bodies responsible for its preparation, approval and verification.

[7] This time horizon is different from that suggested by the ESRS, where the medium-term horizon is 1-5 years.

This document has been assessed for limited assurance by independent auditors. The assessment was carried out according to the procedures indicated in the "Independent Auditor's Report", provided at the end of the document.

1.2 Governance

GOV-1 ROLE OF ADMINISTRATIVE, MANAGEMENT AND SUPERVISORY BODIES

The Board of Directors (hereinafter also "BoD") it is the most senior body in the Group's governance structure. The Board is vested with all powers of ordinary and extraordinary management, except for those that the law expressly assigns to the Shareholders' Meeting.

The Board of Statutory Auditors: oversees compliance with the law, the Articles of Association and the principles of correct management of the company.

The Director Responsible pursuant to Article 154-bis of the TUF shall be responsible for drawing up the corporate accounting documents, including the Consolidated Sustainability Report.

The Board of Directors of OVS also operates through the Chief Executive Officer and the Directors with powers of representation and is assisted by Committees, set up within the Board, which make recommendations and give advice:

- The Control, Risks and Sustainability Committee (hereinafter also "CRSC") supports the assessments and decisions of the Board of Directors relating to the internal control and risk management system and the monitoring of impacts, risks and opportunities identified in relation to ESRS issues. The CRSC is vested with these responsibilities in application of the Corporate Governance Code for companies listed on the Italian Stock Exchange;
- the Appointments and Remuneration Committee assists the Board of Directors in making assessments and decisions regarding the composition of the Board of Directors and the remuneration of directors and managers with strategic responsibilities.

On 31 May 2023, the Shareholders' Meeting appointed the current Board of Directors, which will naturally expire with the approval of the financial statements for the year ended 31 January 2026.

The Board of Directors currently has 9 members, of whom 44% are women and 56% are men (the average gender ratio is 0.8), and most of whom (89%) are aged over 50. 8 members have a non-executive role, of whom 62.5% are independent, while only one is an executive.

COMPOSITION OF THE BOARD OF DIRECTORS

COMPOSITION OF THE BOARD OF DIRECTORS							
Full name	**Gender**	**Age bracket**	**Role**	**Independence**	**Mandate start date**	**Nationality**	**Qualifications**
Franco Moscetti	M	50+	Non -executive	Yes	31.05.2023	Italian	DEGREE
Stefano Beraldo	M	50+	Executive	No	31.05.2023	Italian	DEGREE
Giovanni Tamburi	M	50+	Non -executive	No	31.05.2023	Italian	DEGREE
Alessandra Gritti	F	50+	Non -executive	No	31.05.2023	Italian	DEGREE
Carlo Achermann	M	50+	Non -executive	Yes	31.05.2023	Italian	DEGREE
Chiara Mio	F	50+	Non -executive	Yes	31.05.2023	Italian	DEGREE
Elena Garavaglia	F	41-50	Non -executive	Yes	31.05.2023	Italian	DEGREE
Flavia Sampietro	F	50+	Non -executive	Yes	31.05.2023	Italian	DEGREE
Roberto Cappelli	M	50+	Non -executive	No	31.05.2023	Italian	DEGREE

There are no directors appointed by the Company's employees on the Board of Directors.
The Board of Directors' sustainability expertise is maintained through periodic updating and induction sessions, which have also been extended to the Board of Statutory Auditors. The last induction session was conducted on 12 November 2024 by the Head of Corporate Sustainability.
In addition, the Board of Directors can benefit from the expertise in the field of Prof. Chiara Mio, a professor in strategic planning and sustainability management and Corporate Sustainability Reporting, in the Management department of Ca' Foscari University of Venice. Prof. Mio also serves as Chairman of the CRSC.
For more details about the methodology and process of involving decision-making bodies in monitoring impacts, risks and opportunities - the BoD, CRSC, CEO, top management and the Corporate Sustainability function - see the paragraph IRO-1.
Please refer to the "Report on corporate governance and ownership structure" and the "Report on the remuneration policy and remuneration paid" for further information on the composition (e.g. mandate, other positions and commitments, skills relevant to the impact of the organisation, etc.), appointment and selection, conflicts of interest and assessment of the performance of the Board of Directors. The members of the administrative, management and control bodies have many years of experience in the sector, products, business conduct and geographical areas of the Group. For more information, visit the corporate website at www.ovscorporate.it, and the Governance section in particular.
The Board of Statutory Auditors consists of 3 standing auditors and 2 alternate auditors. On 31 May 2023, the Shareholders' Meeting appointed the Board of Statutory Auditors, on the natural expiry of its term of office with the approval of the financial statements for the year ended 31 January 2026.
At 31 January 2026, the Board of Statutory Auditors was composed of 5 members, of whom 60% were female and 40% were male (the average gender ratio was 1.5), 80% were aged over 50 and 20% were aged 41-50.

COMPOSITION OF THE BOARD OF STATUTORY AUDITORS

Full name	Gender	Age bracket	Role	Indepen-dence	Mandate start date	Nationality	Qualifications
Stefano Poggi Longostrevi	M	50+	Chairman of the Board of Statutory Auditors	Yes	25/7/2018	Italian	Degree in Economics and Business
Federica Menichetti	F	41-50	Standing auditor	Yes	31/5/2022	Italian	Degree in Law
Massimiliano Nova	M	50+	Standing auditor	Yes	31/5/2023	Italian	Degree in Economics and Business
Marzia Nicelli	F	50+	Alternate auditor	Yes	31/5/2023	Italian	Degree in Economics and Business
Donata Paola Patrini	F	50+	Alternate auditor	Yes	31/5/2023	Italian	Degree in Economics and Business

Please refer to the "Report on Corporate Governance and Ownership Structure" for further information on the composition (e.g. mandate, other positions and commitments, skills relevant to the impact of the organisation, etc.), appointment and selection, conflicts of interest and assessment of the performance of the Board of Directors.

The CEO, supported by the Corporate Sustainability function, defines the strategic sustainability guidelines - taking into account the impacts, risks and opportunities identified - assessed by the CRSC and approved by the Board of Directors. The Corporate Sustainability function is responsible for the process of internal planning and coordination of initiatives at a corporate level, setting up specific work groups drawn from across the company. The function also manages the development of special projects, with particular focus, among other matters, on initiatives to improve the product portfolio and the supply chain, and on the decarbonization programme.

GOV-2 INFORMATION PROVIDED TO AND SUSTAINABILITY MATTERS ADDRESSED BY THE UNDERTAKING'S ADMINISTRATIVE, MANAGEMENT AND SUPERVISORY BODIES

In the context of sustainability governance, a key role is also given to the Control, Risks and Sustainability Committee (CRSC), entrusted by the Board of Directors with overseeing sustainability issues related to the performance of the company's activities and the assessment of the SR. This Committee was established on 23 July 2014. On 31 May 2023, the Board of Directors appointed the current CRSC, which consists of 3 Directors, all non-executive and all meeting the independence requirements established by the TUF and the Code of Corporate Governance:

- Chiara Mio (Chairman)
- Flavia Sampietro
- Franco Moscetti

The CRSC is responsible for assessing sustainability policies and plans designed to ensure value creation over time for shareholders and all other stakeholders, on a medium- to long-term basis, in compliance with the definition of sustainable success. The CRSC is involved on an annual basis in assessing the adequacy of sustainability policies and plans, as well as evaluating the results achieved.

The Corporate Sustainability function, together with the CRSC, assesses the availability of skills necessary to manage the impacts, risks and opportunities, deeming them currently adequate. The CRSC also reviewed the double materiality assessment process conducted by OVS for the first time and the related results. Finally, the CRSC expresses its opinion on the adequacy of the Consolidated Sustainability Report submitted annually to the Board of Directors.

The 2024-2026 Sustainability Plan was assessed by the CRSC in December 2023 and formally approved by the Board of Directors in January 2024. Meetings organised by the CRSC involve the participation of the Chief Executive Officer and the Board of Statutory Auditors. From an internal organisational perspective, all Sustainability issues are managed by the Corporate Sustainability function, which reports periodically to the Chief Executive Officer, the CRSC and the Board of Directors.
During 2025, the CRSC and the Board of Directors were involved in monitoring the process of adaptation to the ESRS standard, periodically reviewing the progress and the overall areas of impacts, risks and opportunities set out in this Report.

GOV-3 INTEGRATION OF SUSTAINABILITY-RELATED PERFORMANCE IN INCENTIVE SCHEMES

The remuneration of the Chief Executive Officer is composed not only of a fixed part, but also of a variable part based on both short-term (STI or Short-Term Incentive) and long-term (LTI or Long Term Incentive) targets.
In particular, the TSI part includes quantitative economic/financial targets representing 70% and qualitative objectives linked to new value creation projects also in line with ESG principles representing 30%. 30% of the LTI is paid based on the achievement of two indicators: a 19.3% reduction in Scope 3 emissions intensity on consolidated revenues by 2026, compared to 2023, and an increase in materials related to "preferred"[8] clothing products up 65% by the end of 2026.
Similar targets are also included in incentive mechanisms for Managers with Strategic Responsibilities and other managers selected based on their possible contribution to such targets.
The Remuneration Committee supports the Board of Directors in approving the terms of the incentive systems.
Please refer to the Remuneration Report for other details on the Chief Executive Officer pay mix and detailed gross compensation based on the offices of other Board members.

GOV-4 STATEMENT ON DUE DILIGENCE

OVS has for some time adopted a due diligence process that aims to identify, prevent and mitigate actual and potential negative impacts on the environment and people.
Consistent with the double materiality assessment, these impacts are mainly identifiable in the supply chain and, to a lesser extent, in direct operations.

[8] "Preferred" materials are those sourced from supply chains with certified custody chains.

DUE DILIGENCE INFORMATION MAPPING

Key elements of due diligence	**SR paragraphs/pages**
a) Integrating due diligence into governance, strategy and business model	**G1-1** Business conduct policies and corporate culture **GOV-2** Information provided to and sustainability matters addressed by the undertaking's administrative, management and supervisory bodies **GOV-3** Integration of sustainability-related performance in incentive schemes **SBM-3** Material impacts, risks and opportunities and their interaction with business strategy
b) Involving stakeholders at all key stages of due diligence	**IRO-1** Description of the processes to identify and assess material impacts, risks and opportunities **SBM-2** Interests and views of stakeholders **SBM - 2 S1** Own workforce **SBM - 2 S2** Workers in the value chain **SBM - 2 S4** End users and consumers
c) Identifying and assessing negative impacts	**SBM-3** Material impacts, risks and opportunities **IRO-1** Description of the processes to identify and assess material impacts, risks and opportunities
d) Taking action to address negative impacts	**Due Diligence Policy in Environmental policies** **E1-3 - E1 4** Actions, resources and targets related to climate change policies **E2-2 and E2-3** Actions, resources and targets related to pollution **E3-2 and E3-3** Actions, resources and targets related to water and marine resources **E4-3 and E4-4** Actions, resources and targets related to biodiversity **E5-2 and E5-3** Actions, resources and targets related to resource use and circular economy Social policies **S1-4 and S1-5** Action and targets related to own workforce **S2-4 and S2-5** Actions and objectives relating to workers in the value chain
e) Monitoring effectiveness of interventions and communication	**Metrics within paragraphs E1, E3, E5, S1, S2, G1**

GOV-5 RISK MANAGEMENT AND INTERNAL CONTROLS OVER SUSTAINABILITY REPORTING

OVS has adopted a risk management system in line with the "Enterprise Risk Management - Integrated with Strategy and Performance" and "Internal Control - Integrated Framework" international frameworks. Since 2015, it has also worked in accordance with the "Guidelines for the internal control and risk management system", a document prepared by the Board of Directors to identify, monitor and manage areas of risk, ensuring the achievement of strategic and operational targets, the reliability of financial reporting, compliance with laws and regulations and the safeguarding of corporate assets.

OVS has defined an Internal Procedure for preparing the Consolidated Sustainability Report in order to integrate risk management into the data collection and information approval phases. This process helps ensure the accuracy and reliability of the published data. The persons covered by the procedure are the individuals in the company bodies/departments identified for the collection, control and certification of non-financial data and information, as well as the persons/bodies responsible for its preparation, approval and verification.

OVS considers the risks associated with incomplete or inconsistent sustainability reporting, including the risks associated with the completeness and integrity of data, the accuracy of any estimates, the availability of value chain data and the timescales in which such information is made available.

Based on the results of the risk assessment, the Manager responsible has defined specific control procedures, proper separation of functions and the allocation of roles and responsibilities through the involvement of key functions, and the provision of training sessions to the data owners (persons approving the data) and to the data providers (persons preparing the data).
The Manager responsible informs the Board of Directors of the adequacy and effective application of these control procedures, at the same time as the approval of the financial statements.
The scope of the controls covers all relevant processes and systems, from data collection to reporting, with standardised procedures for gathering, verifying and consolidating information.

1.3 Strategy

SBM-1 STRATEGY, BUSINESS MODEL AND VALUE CHAIN

BUSINESS MODEL AND VALUE CHAIN

OVS is one of the main retailers for women's, men's and children's clothing in Italy. The group operates based on a business model typical of vertically integrated retailers, offering products created in-house, and as a phygital marketplace through the introduction of iconic brands and innovative proposals. Product development is entrusted to a team of product managers, designers and merchandisers that leverages an organisational structure highly specialised in sourcing with a strong presence in the key geographical areas to design, develop and implement the merchandise mix with external suppliers, under the artistic guidance of the creative director and the organisational guidance of the category managers.
OVS operates through a multi-channel approach with a network of DOS and franchises in Italy and abroad, integrated with e-commerce. The Group consists of OVS S.p.A. and its subsidiaries in Serbia, Croatia and Spain, which manage the network of stores abroad (mainly in franchising), and OVS Hong Kong Sourcing Ltd, which also operates through a subsidiary in India and representative offices in Bangladesh, Pakistan and Turkey, responsible for supplier research and accreditation processes, product industrialisation at manufacturing sources, production and shipping monitoring and quality control. In 2025, the company Goldenpoint SpA was acquired, specialised in the sale of underwear and nightwear. This company was acquired in full synergy with the processes already in place at OVS S.p.A., without causing any changes in the structure of the value chain associated with the company's transactions.
The OVS Group manages the following product categories:

- clothing: the development and marketing of products for men, women and children, designed for different occasions;
- footwear and accessories: the development of collections of footwear, handbags and other non-textile accessories to complement the clothing offering;
- home furnishings: the selection and development of textile products for the home, housewares and furnishings;
- perfumery and cosmetics: research into and marketing of cosmetic products.

In addition, part of the business is developed through commercial partnerships with third-party brands, where OVS acts as a distributor through its network of stores and online marketplaces.
Lastly, OVS Innovazione e Sostenibilità S.r.l. was incorporated in 2022, dedicated to projects focusing on digital and innovation and the circular economy.

VALUE CHAIN

OVS's value chain is characterised by:

- upstream operations that include the supply of raw materials (extraction, cultivation and development of semi-finished products), the processing of raw materials, the production and packaging of finished products. These activities are outsourced.
- direct operations such as the administration and management of the business carried out at headquarters, the sale of products through the network of stores of the various brands
- downstream operations through franchising stores and those related to the use and disposal of products sold by end customers.
- logistics operations that span the value chain and are contracted out to external suppliers.

OVS'S PEOPLE

The OVS Group's success depends on the work of approximately 10,000 people worldwide, distributed as described in the table below.

NUMBER OF EMPLOYEES BY COUNTRY

	2025	2024
Employees	**Total**	**Total**
Bangladesh	101	98
China	100	103
Spain	51	60
Croatia	28	29
India	84	47
Italy	9,886[9]	8,104
Pakistan	12	12
Serbia	74	67
Turkey	7	7
France	0	5
Total	**10,343**	**8,532**

SUSTAINABILITY STRATEGY

The OVS sustainability strategy is an integral part of the group's business model and is based on the commitment of each corporate function to considering the environmental and social impacts generated by actions and operations. For OVS, sustainability is a characteristic feature of every business action, without limiting itself to intervening in ad-hoc projects.
The Sustainability Plan defined for the period 2024-2026 has been updated to map initiatives in line with European Sustainability Reporting Standards (ESRS), maintaining a systemic approach. A new sustainability plan will be defined during 2026 considering the integration of Goldenpoint and the new three-year plan 2026-2028. There are four areas of action identified in the Plan, each having specific short, medium and long-term commitments and actions.

Design for circularity. This action area covers all environmental issues: Climate Change (E1), Pollution (E2), Water (E3), Biodiversity (E4) and Resource Use and Circular Economy (E5). It includes the decarbonisation plan, the strategy to increase materials with reduced impact (recycled, certified or of organic origin) and actions to promote the extension of the life of the clothing and to implement circular economy systems.

[9] Note that the figures for the number of employees in Italy for FY 2025 include the company Goldenpoint, acquired on 1/7/2025. To ensure the comparability of the data with the previous year on a constant basis, it should be noted that, excluding the new subsidiary, the number of employees in Italy would be 8,451

Being fair and transparent. With the actions provided for in this pillar, both the issue of Workers in the value chain (S2) and Climate change (E1) are covered. As part of the activities to involve suppliers and support them in improving their environmental and social performance, measures have been put in place to decarbonise the supply chain and specific targets have been set to improve worker representation systems within the factories, thereby also encouraging the widest possible adoption of a living wage throughout the supply chain.

Design a better work. At OVS, practices and spaces for everyone are encouraged, creating favourable conditions for the development of a fair, flexible and inclusive culture; the targets set in this area, which address issues related to our own workforce (S1), are aimed at improving the well-being of people in the workplace for both the sales network and head office.

Making fashion a better choice. Through reliable, clear and transparent communication, OVS raises customer awareness of issues such as conscious consumption, informed choices and garment care. The store network becomes a tool to make customers aware of responsible choices, including through projects with work inclusion programmes. With the targets and actions in this pillar, OVS addresses issues of interest to consumers and end-users (S4).
For a description of the specific actions, see the MDR-A sections at the beginning of the relevant chapters.

SBM-2 INTERESTS AND VIEWS OF STAKEHOLDERS

OVS stakeholders are at the heart of the Company's sustainability strategy, so they are periodically involved with different activities in line with their category and their interests. With these initiatives, OVS has a dual objective:

- gathering information on the needs of the various categories of stakeholders and their view on the Company's activities, in order to better direct the Sustainability Plan and ensure its consistency with the expectations of its stakeholders;
- informing the people inside and outside of the Company in order to raise awareness on sustainability issues, with an approach aimed at promoting transparency.

The table below shows the map of key stakeholders, their priorities and the main methods of involvement by OVS, with the relevant frequency.

Feedback collected from all stakeholders is analysed and reported periodically to the Board of Directors by the Corporate Sustainability function.

MAP OF STAKEHOLDERS

Stakeholders	Stakeholder's interest	OVS's interest in the stakeholder	Method of involvement	Frequency
CUSTOMERS	Satisfy the need to purchase	Satisfy the customer	Customer satisfaction surveys and service quality surveys	Annual
	Ability to buy affordable and safe clothes for their family	Increase the propensity to purchase and the value of the OVS brand	Loyalty programmes	Ongoing
	Express their personality with brands that visibly align themselves with their values	Educate and raise awareness about more responsible purchases	Survey to identify material impacts	Periodic/ as needed
	Look fashionable			
OFFICE STAFF	Professional fulfilment	Increase employee productivity	Initiatives for training and development of human capital	Ongoing
	Increase the meaning and purpose of their role	Increase sense of company belonging	Training and professional and personal growth projects	Periodic/ as needed
	Increase their skills	Reduce turnover rate	Code of Ethics and Safety training	Periodic/ as needed
	Increase well-being during the working day (concentration, nutrition)	Make the employee an ambassador of OVS's values	Surveys to guide business planning	Periodic/ as needed

Stakeholders	Stakeholder's interest	OVS's interest in the stakeholder	Method of involvement	Frequency
COMPETITORS	Gain market share through distinctive levers	Maintain leadership in the Italian clothing market	Work groups	Periodic/ as needed
	Common interest in enhancing the reputation of the clothing market	Use distinctive levers to increase brand reputation	Participation in industry conferences and events	Periodic/ as needed
SUPPLIERS	Consolidate the relationship with OVS over time and increase the value of the relationship	Systematically improve the supplier's environmental and social practice	Meetings with key suppliers to share good practices for the improvement of environmental and social performance	Periodic/ as needed
			Audit programmes	Periodic/ as needed
	Improve their practices	Promote economic development	Industry Collaboration initiatives	Annual
			Survey to identify material impacts	Periodic/ as needed
LOCAL COMMUNITIES PRODUCING COUNTRIES[10]	Operational support in developing countries	Build profitable relationships to generate shared value	Meeting on specific focus points	Periodic/ as needed
			Partnerships	Ongoing
	Promoting work and rights	Increase the level of acceptance of the company	Local social and cultural promotion projects (e.g. Save the Children women empowerment project, RE-UP)	Periodic/ as needed
LOCAL COMMUNITIES STORES (ITALY)	Support from the company on a par with institutions for a common benefit	Build profitable relationships to generate shared value	Active participation in working groups promoted by trade associations	Ongoing
		Increase the level of acceptance of the company	Meetings with members of the fashion and arts world	Periodic/ as needed

[10] There was no such involvement in 2025.

Stakeholders	Stakeholder's interest	OVS interest in Stakeholders	Method of involvement	Frequency
PRESSURE GROUPS	Ensuring that OVS is part of the solution in solving global environmental problems by reducing the impact of the Fashion industry	Be recognised as a reliable Brand with a clear strategy in terms of environmental and social sustainability	Participation in industry conferences and events	Periodic/ as needed
	Increasing transparency and consumers information to guide more informed choices			
	Making Green Washer Brands stand out		Participation in transparency initiatives of the fashion industry	Periodic/ as needed
INSTITUTIONS	Enforce the rules Incentivise the company if it is virtuous in improving access to and availability of resources for citizens	Leverage institutions to create a positive impact	Work groups	Periodic/ as needed
			Participation in industry conferences and events	Periodic/ as needed
OPINION LEADERS	Create new trends	To be perceived as a modern brand, aimed at families and their needs, innovative in terms of digitalisation and customer services	Work groups	Periodic/ as needed
			Participation in industry conferences and events	Periodic/ as needed
STAFF IN STORES	Promote well-being in store (temperature, cleanliness, etc.) Facilitate interaction with customers, with stand-out topics	Increase employee productivity Facilitate interaction with the client with distinctive arguments Reduce turnover rate	Community Wins Together	Ongoing
			Initiatives for training and development of human capital	Ongoing
INVESTORS	Increase return on investment Reduce investment risk Define specific targets for environmental, social, governance and due diligence aspects	Communicate sustainability as a strategy to minimise risk and create long-term value In general, create value	Investor Relations activities	Ongoing
			Publication of reports (financial and non-financial)	Annual
			Participation in sustainability surveys (ESG rating)	Annual
FRANCHISEES	Improve their performance Increase brand attractiveness	Establish long-term partnerships in line with OVS's values	Meeting	Periodic/ as needed
			Survey to identify material impacts	Periodic/ as needed

Stakeholders	Stakeholder's interest	OVS interest in Stakeholders	Method of involvement	Frequency
INDUSTRY COALITIONS	Acquire new affiliates Ensure that the affiliate plays an active role in improving working conditions and reduce the use and impact of harmful substances in the clothing industry's supply chain	Join coalitions strategically in order to increase the visibility of OVS and maximise the positive impact, leveraging economies of scale generated by industry collaboration	Membership of international initiatives to improve sustainability throughout the fashion industry (Cascale, Better Cotton Initiative, Accord, Federdistribuzione)	Ongoing
NEW GENERATIONS (25+)	Respond to new market needs and requirements	Anticipate the evolution of market needs	Social media presence	Ongoing
	Include long-term impacts when defining business strategies	Prepare for the new challenges of the sector	Survey to identify material impacts	Periodic/ as needed
	Act with authenticity and transparency	Be perceived as a modern brand, geared towards young people and families	Collaborations with universities (e.g. Contamination Lab)	Ongoing
			Lectures at universities	Ongoing

SBM-3 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

The double materiality assessment, conducted for the 2024 Sustainability Report and confirmed for 2025, provided an overview of the impact of the organisation on the environment and society, along the entire value chain and the risks and opportunities for OVS's business. Details of the impacts, risks and opportunities (IROs) identified for each material topic are reported in the relevant sections, with reference to their location in the value chain. Integrating the double materiality assessment into the Enterprise Risk Management process, OVS carried out a resilience analysis of the business model as described in detail in paragraph SBM-3 E1.

This analysis identified the most important sustainability issues for OVS: Resource use and circular economy (E5) is the highest priority, followed by Climate Change (E1) and Workers in the Value Chain (S2). These are the main issues in which OVS has been involved since 2016 with mitigation strategies and investments in research and development. In addition to the environmental picture, Pollution (E2), Water (E3) and Biodiversity (E4) were also important topics, in particular for potential negative impacts along the value chain. From a social point of view, Own Workforce (S1), Consumers (S4) and Business Conduct (G1) were considered material for the potential risks and opportunities they represent for the company. The only issue that is not material for the Company is Affected Communities (S3).

The following table provides details of the impacts, risks and opportunities (IRO) that are material to OVS.

IRO - IMPACTS, RISKS AND OPPORTUNITIES

ESRS topic	ESRS sub-topic	IRO	DESCRIPTION	IRO CODE	CURRENT/ POTENTIAL	VALUE CHAIN			TIME HORIZON
						UP[11]	DC[12]	DW[13]	
Climate change	Climate change mitigation/Energy	Negative impact	The entire life cycle of products, from the cultivation of raw materials (aggravated by the impact of fertilisers) to the production, distribution and transport of goods, generates high greenhouse gas emissions.	E1-IN01	Current	x	x	x	Short
Climate change	Adaptation to climate change	Negative impact	The choice of raw materials grown in areas increasingly affected by extreme heat and the use of cotton and monoculture viscose make crops more vulnerable to droughts and floods.	E1-IN02	Current	x			Short
Climate change	Climate change mitigation	Opportunity	Proper planning of decarbonisation processes can help avoid the costs typically associated with a reactive approach and provide a competitive edge in the market.	E1-OP01		x	x	x	Medium
Climate change	Climate change mitigation/Energy	Risk	Transition risk: The adaptation of infrastructure and energy sources to decarbonisation targets may lead to higher operating expenses and higher capital expenditure.	E1-RS01		x	x	x	Medium
Climate change	Adaptation to climate change	Risk	Physical risk: Climate change can lead to unpredictable business conditions, negatively impacting revenues and margins as well as expenses needed to recover from extreme weather events.	E1-RS02			x		Long
Pollution	Microplastics	Negative impact	The release of non-biodegradable synthetic fibres from the production, use or end-of-life of the product contributes to the increase in microplastic concentrations in the environment by altering aquatic and terrestrial ecosystems.	E2-IN01	Current	x		x	Short

[11] Upstream.
[12] Direct.
[13] Downstream.

ESRS topic	ESRS sub-topic	IRO	DESCRIPTION	IRO CODE	CURRENT/ POTENTIAL	VALUE CHAIN			TIME HORIZON
						UP[11]	DC[12]	DW[13]	
Pollution	Water pollution	Negative impact	Chemicals used in the production of agricultural raw materials are released into the environment infiltrating aquifers and industrial waters used in clothing production processes may be released without adequate treatment.	E2-IN01	Current	x			Short
Pollution	Microplastics	Risk	The need to adapt to new regulations related to microplastic pollution and eco-design could put pressure on the margins of collections, especially for the lowest price ranges.	E2-RS01		x			Medium
Water and marine resources	Water	Risk	Inadequate wastewater management can result in reputational damage and clean-up costs.	E2-RS03		x	x	x	Short
Water and marine resources	Water	Negative impact	The cultivation of cotton and the production processes of garments cause over-exploitation of water basins in areas already subject to high water stress.	E3-IN01	Current	x			Short
Water and marine resources	Water	Opportunity	Diversifying cotton sources with a view to greater sustainability contributes to building a more resilient supply chain and reducing supply costs for materials with low water consumption.	E3-OP01		x			Medium
Water and marine resources	Water	Risk	Water scarcity due to climate change and extreme weather events may negatively affect the production of strategic agricultural raw materials for OVS, such as cotton, reducing availability and increasing costs.	E3-RS02		x			Long
Biodiversity and ecosystems	Direct impact drivers of biodiversity loss/ Impact on extent of ecosystems	Negative impact	Greenhouse gas emissions generated along the value chain and conventional agricultural practices for producing cotton or other plant/animal materials contribute to the degradation of ecosystems, reducing biodiversity.	E4-IN01	Current	x		x	Short

ESRS topic	ESRS sub-topic	IRO	DESCRIPTION	IRO CODE	CURRENT/ POTENTIAL	VALUE CHAIN			TIME HORIZON
						UP[11]	DC[12]	DW[13]	
Biodiversity and ecosystems	Direct impact drivers of biodiversity loss	Risk	The depletion of biodiversity can lead to an increase in raw material costs due to reduced availability or the need for more expensive agricultural/production practices	E4-RS01		x			Long
Resource use and circular economy	Resource inflows, including resource use	Negative impact	The limited use of circular economy systems in the selection and supply of raw materials for products results in high consumption of natural resources and chemicals.	E5-IN01	Current	x			Short
Resource use and circular economy	Resource inflows, including resource use	Opportunity	Transitioning to circular business models that implement eco-design criteria in the product design phase and offer circular services to extend garment life (repair, collection of used garments, textile recycling) can represent a significant business opportunity: lower raw material procurement costs, expansion of in-store offer and development of new business lines.	E5-OP01			x	x	Long
Resource use and circular economy	Outflows of resources related to products and services/Waste	Negative impact	The disposal and incineration of end-of-life products, as well as manufacturing waste, even if not hazardous, pollutes the soil and air.	E5-IN02	Current			x	Short
Resource use and circular economy	Outflows of resources related to products and services/Waste	Risk	New regulations on the use of recycled resources and waste disposal may lead to an increase in operating expenses.	E5-RS02			x		Short
Resource use and circular economy	Outflows of resources related to products and services	Risk	Extending garment life cycles to adapt to consumer choice or new regulations may result in lower revenues.	E5-RS01			x		Long
Own workforce	Own working conditions/ Equal treatment and opportunities for all	Positive impact	Providing stable, fair (with low levels of gender pay gap) and diverse job opportunities with a breadth of roles and tasks covered by the various business functions.	S1-IP01	Current		x		Short

ESRS topic	ESRS sub-topic	IRO	DESCRIPTION	IRO CODE	CURRENT/ POTENTIAL	VALUE CHAIN			TIME HORIZON
						UP[11]	DC[12]	DW[13]	
Own workforce	Own working conditions	Risk	Jobs that are not always compatible with a good work-life balance can lead to increased turnover and the loss of key skills	S1-RS02			x		Short
Own workforce	Equal treatment and opportunities for all	Risk	Discrimination or failings in health and safety management at work can lead to penalties and reputational harm, as well as contributing to negative turnover	S1-RS01			x		Short
Own workforce	Own workforce working conditions/ Equal treatment and opportunities for all	Opportunity	Attracting and retaining talent through the provision of an inclusive and fair working environment that ensures opportunity and growth for all.	S1-0P01			x		Medium
Workers in the value chain	Value Chain Working Conditions	Negative impact	The seasonal nature of the business leads to production peaks during the year that can increase the use of overtime that could potentially be unregulated, violating international conventions on the matter.	S2-IN01	Current	x			Short
Workers in the value chain	Value chain working conditions/ Equal treatment and opportunities for all	Negative impact	Some production areas are located in countries where full freedom of association is not guaranteed and effective collective bargaining and, consequently, fair remuneration for the workforce (both in terms of alignment with the living wage and in terms of gender or other discrimination)	S2-IN02	Current	x			Short
Workers in the value chain	Value Chain Working Conditions	Negative impact	Business dynamism can generate turnover in the supplier base, potentially creating instability for workers in the value chain and a reduced ability to protect under-represented categories	S2-IN03	Current	x			Short

ESRS topic	ESRS sub-topic	IRO	DESCRIPTION	IRO CODE	CURRENT/ POTENTIAL	VALUE CHAIN			TIME HORIZON
						UP[11]	DC[12]	DW[13]	
Workers in the value chain	Value chain working conditions/ Equal treatment and opportunities for all	Positive impact	Through stable and long-term relationships and open dialogue with the social partners, OVS contributes to building more favourable working conditions for workers, also representing a lever for change in raising awareness on the issues of violence and harassment at work, as well as on workers' rights such as freedom of association in factories.	S2-IP01	Current	x			Short
Workers in the value chain	Value Chain Working Conditions	Positive impact	By participating in multi-stakeholder initiatives, OVS contributes to improved health and safety in the workplace.	S2-IP02	Potential	x			Long
Workers in the value chain	Value Chain Working Conditions	Opportunity	Supporting projects to improve working conditions by verifying compliance with the Code of Conduct, can contribute to greater employment stability in the supply chain, resulting in greater specialization of the workforce and returns in terms of quality and efficiency.	S2-OP01		x			Medium
Workers in the value chain	Value Chain Working Conditions	Risk	A wage adjustment due to inflation or living wage alignment that is not supported by better productivity generates higher production costs, resulting in lower margins.	S2-RS01		x	x		Medium
Workers in the value chain	Value Chain Working Conditions	Risk	Failure to offer tools to improve work-life balance, and to adequately train workers of suppliers and franchise stores, could increase turnover and affect product quality and sales service.	S2-RS02		x	x		Medium
Workers in the value chain	Value Chain Working Conditions	Risk	Accidents at work, tensions with suppliers and potential strikes due to poorly managed social dialogue can impact the continuity of production operations.	S2-RS03		x	x		Short

ESRS topic	ESRS sub-topic	IRO	DESCRIPTION	IRO CODE	CURRENT/ POTENTIAL	VALUE CHAIN			TIME HORIZON
						UP[11]	DC[12]	DW[13]	
Workers in the value chain	Value chain equal treatment and opportunities for all	Risk	Inadequate attention to workers' rights may lead to an increase in workforce turnover, with a consequent impact on the quality of the product/service and possible reputational damage.	S2-RS04		x	x		Short
Consumers and end-users	Social inclusion of consumers and/or end-users	Positive impact	OVS is an accessible brand and its customer communications convey the values of inclusivity and democracy, allowing everyone to express themselves through their choice of brand (e.g. models for advertising campaigns or corporate communications).	S4-IP01	Current			x	Short
Consumers and end-users	Information-related impacts for consumers and/or end-users	Opportunity	Thanks to transparent communication and a wide product range, OVS builds consumer trust and loyalty, while also attracting segments interested in specific product categories	S4-OP1				x	Medium
Consumers and end-users	Information-related impacts for consumers and/or end-users	Risk	The use of sustainability-related topics without a solid foundation may result in penalties and legal disputes	S4-RS01			x	x	Medium
Consumers and end-users	Social inclusion/ Information-related impacts for consumers and/or end-users	Risk	Possible shortcomings in the design of sales channels (stores and websites) could result in costs for compliance with accessibility rules	S4-RS02			x	x	Medium
Business conduct	Political engagement and lobbying activities	Opportunity	Helping to build a more business-friendly regulatory framework can reduce compliance costs and attract new talent through authoritative positioning	G1-OP01			x		Long
Business conduct	Management of relation-ships with suppliers including payment practices	Risk	The deterioration in relationships with suppliers due to irresponsible behaviour in relation to contracts may have an impact on product/service quality or on the loss of important production sources	G1-RS01		x	x		Medium

OVS does not identify any significant current financial effects for the above risks and opportunities, as they mainly relate to a medium/long term horizon.

The risks associated with a short-term time horizon have no material impact on the company. OVS reserves the right to build a methodology to quantify the financial effects for risks and opportunities.

1.4 Double materiality assessment

IRO-1 DESCRIPTION OF THE PROCESSES TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES

The double materiality assessment enabled sustainability issues to be assessed and prioritised from both an inside-out (or impact) and outside-in (or economic-financial) perspective and their reporting to be aligned with ESRS standards.

METHODOLOGICAL APPROACH AND ASSUMPTIONS

The analysis was carried out in accordance with ESRS reporting standards, IG 1 Materiality Assessment guidelines published by EFRAG and using qualitative and quantitative data to ensure a robust assessment.

The process involved the ongoing participation of various categories of stakeholders, both external and internal, whose contributions were based on their knowledge of the company and sustainability issues.

The scope of the analysis covered the entire OVS value chain, particularly in relation to housebrand clothing products, which represent more than 85% of the Group's turnover. With regard to the supply chain, the 'Made in' countries with the highest percentage of expenditure were considered – Bangladesh, China, India, Italy, Myanmar and Pakistan – which together account for 92% of orders. The analysis considered the DOS and franchise stores as sales channels, as they are the Group's main sales channels.

ANALYSIS PROCESS

1. Value chain and context analysis

All phases of the Group's value chain have been mapped, identifying operations carried out directly (Direct) and operations carried out by upstream or downstream entities. Starting with mapping the value chain and integrating an in-depth analysis of the fashion sector – through benchmarks, industry standards, academic studies and research – OVS's dependencies were identified, as well as the main challenges and scenarios for the sector in which it operates.

2. Identification and assessment of IROs

To identify the IROs, the starting point was Application Requirement 16 (AR 16), which provides an overview of the sub-topics and sub-sub-topics covered by the topical ESRS. Considering this list to be purely supplementary, each sub-sub-topic has been put into context with regard to the OVS group and its value chain in order to identify the specific impacts, risks and opportunities for the company and provide a more accurate and relevant assessment.

During this phase, the dependencies of OVS's business model and the impacts that these have on resources and business relationships were considered.

In particular, it was assessed whether a specific impact is closely related to natural resources (e.g. water, soil) or to relationships with relevant actors (e.g. suppliers, employees, customers). This analysis was the starting point for identifying the connections between negative and positive impacts and risks and opportunities. Different input parameters were used in the identification, assessment and management phases of material IROs. The Group's corporate strategy, core operations, market trends and various clothing collections were taken into consideration when identifying IROs. The analysis was based on the previous non-financial statements, OVS sustainability policies and the previous materiality assessment carried out. European regulations in force and those to be introduced in the coming years have also been taken into consideration, particularly in the context of the EU Strategy for Sustainable and Circular Textiles. External analysis was carried out across numerous areas to identify different perspectives: an analysis of the financial and sustainability reports of OVS's peers and leading companies in the sector in terms of sustainability; the SASB framework and reports from leading institutions in the sector, such as the Global Fashion Monitor and the Textile Exchange Material Market Report.

Inside-out. The identified impacts - negative and positive, actual and potential - were assessed individually through a valuation model based on a scale of 0 to 4, where 0 indicates negligible impacts and higher values represent increasing levels of impact. The assessment considered the following criteria: magnitude, irremediability (negative impacts only), probability (potential impacts only) and their future development (increasing, stable or decreasing). This assessment was entrusted to the Corporate Sustainability function, which, thanks to its experience and multidisciplinary approach, was able to assign the various scores, providing concrete examples and accurate data.

To ensure a broader view and to integrate external perspectives, some categories of key stakeholders were involved through a survey: customers, employees, suppliers, investors and franchisees. For this first analysis exercise, the consultations were not extended to the affected communities. The survey allowed stakeholders to assess the impact of the OVS value chain on all sustainability issues listed in the RA16 table. Their input added to the assessment process and influenced priority setting, helping to refine the materiality level assigned to each impact.

METHODS OF STAKEHOLDER ENGAGEMENT

Stakeholders	Mode of engagement	Detail of people/organisations involved
Customers	Survey	1500+ customers of OVS, Upim, Stefanel and GAP
Staff in offices	Survey	170 employees at head office
Top Management	Workshop	3 Strategic Managers, Head of Internal Audit and Risk
Suppliers	Survey	32 suppliers involved
Staff in stores	Survey	114 employees of the stores of the various brands
Investors	Survey	22 Italian and international institutional investors
Franchisees	Survey	4 franchisees involved
Competitors	Industry benchmarks	10 companies in the Fashion industry
Industry coalitions	Industry desk research	4 position papers
New generations (25+)	Survey	9 clients in the 18-25 years range
Institutions	Industry desk research	Italian and European regulatory framework

Sector research has shown that the Resource use and circular economy (E5) and the Own workforce (S1), followed by Climate Change (E1), Workers in the Value Chain (S2) and Business Conduct (G1) are the most relevant and policy-driven topics.
The survey results helped complete the picture, unanimously indicating the importance of impacts related to Water (E3) and Pollution (E2), as well as those related to Workers in the value chain (S2) and Resource use and circular economy (E5).
In addition, customers and employees rate Own workforce as very important for OVS (S1), while investors and suppliers prioritise the interests of Consumers and end-users (S4).

Outside-in. Managers with Strategic Responsibilities (MRS) participated in a dedicated workshop to identify and analyse risks and opportunities, with the aim of having a complete and shared overview of the company's priorities and main challenges. Again using ESRS topics as a starting point, the MRS prioritised risks and opportunities, considering both the potential financial implications and the impact on the business model.
The quantitative assessment of individual risks and opportunities was based on the business Enterprise Risk Management (ERM) model and structured according to predefined thresholds of economic-financial significance and probability of occurrence.
This approach enabled sustainability-related risk assessment to be integrated into the existing corporate framework, ensuring consistency with overall risk management.
Opportunities identified as priorities are or will be integrated into the business strategy as levers for innovation and competitive differentiation for the company.
In addition to the process described here, the identification of IROs related to environmental and governance issues was supported by specific complementary analyses described in the relevant sections (ref. ESRS 2 IRO-1-E1, ESRS 2 IRO-1-E2, ESRS 2 IRO-1-E3, ESRS 2 IRO-1-E4, ESRS 2 IRO-1-E5, ESRS IRO-1-G1).

Once the IRO assessment was complete, materiality thresholds were established, identified for impacts at the midpoint (5) of the assessment scale (1-10) and for financial risks and opportunities at the median of the assessments (0.6).
In accordance with ESRS guidelines, the materiality assessment of IROs on social issues considered a materiality threshold 10% lower than that used for other issues, in order to give greater priority to human rights issues.

3. IRO Validation

Once the IRO assessment was complete, the Corporate Sustainability function conducted a comprehensive review of the analysis to identify any issues or points requiring attention. This phase ensured the consistency and sound methodology of the results.
The assessment then underwent a structured decision-making process involving several levels of validation:

- review by the CEO, who assessed results during FY 24 in light of the company's strategic priorities;
- review and approval by the CRSC (Control, Risks and Sustainability Committee), which, during FY24, examined critical aspects of the assessment and verified its alignment with the company's governance, risk management and Sustainability Plan;
- final approval by the Board of Directors (BoD), on 1 April 2025, to integrate the analysis into business processes and the Consolidated Sustainability Report;
- confirmation of the analysis conducted also for FY 2025 by the CRSC on 26 January 2026 and by the Board of Directors on 4 February 2026, since the only material change occurring during the year, with a potential impact on the double materiality assessment, concerns the completion of the acquisition of Goldenpoint S.p.A..

Following a careful analysis, conducted with the support of Goldenpoint S.p.A.'s staff, it was found that the company's activities are significant in relation to the same topics already considered material for OVS, both from an inside-out perspective and from an outside-in perspective. Moreover, as regards the main business processes, there are significant synergies between the two companies.

This process ensures that the double materiality assessment is subject to rigorous internal control and that it is considered in the strategic decisions of the company. The analysis represents a significant evolution compared to previous years, as the financial dimension has been integrated with the impact dimension, in accordance with the ESRS. Until 2023, the analysis had followed the recommendations of the GRI standards, focusing exclusively on impact materiality.

The company plans to update its materiality assessment every two years, unless there are any significant changes in the business model or regulatory or market environments, which may require an earlier review, or methodological improvements.

ESRS 2 IRO-1-E1 DESCRIPTION OF THE PROCESS TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES

OVS identifies its climate-related impacts by adopting an analysis approach aligned with the "ISO14064 Carbon Footprint of the Organisation" standard. This approach was certified for the year 2018 by an independent third party and the same methodology was maintained and improved, although without certification, in the following years.

When identifying risks, the time horizons taken into account are short (1 year), medium (1-3 years), and long (3-5+ years), in line with the double materiality assessment and the strategic planning horizon of the business.

For physical risks, the climate risks identified in Annex A of Commission Delegated Regulation (EU) 2021/2139 were considered and projected into the Shared Socio-economic Pathway (SSP) 5-8.5 reference scenario (Very High Emission) at a national level for Italy, India, China, Bangladesh, Myanmar and Turkey, in order to analyse the exposure levels of OVS operations and fixed assets to the aforementioned risks.

The analysis carried out considered the countries in which OVS's supply chain is located and the geographical areas in which the stores and logistics centres are concentrated.

The data used is derived from context analysis and various digital tools, specifically:

- Copernicus Interactive Climate Atlas;
- Climate Analytics Climate Impact Explorer in collaboration with the Network for Greening the Financial System, the Potsdam Institute for Climate Impact Research and ETH Zürich;
- WWF Water Risk Filter;
- WWF Biodiversity Risk Filter.

The analysis identified the following physical risks as significant:

- Acute physical risks resulting from climate change related to increased heat waves, floods and droughts in supply areas, as:
  - they can damage cotton crops and other natural fibres, reducing the availability of resources and increasing the prices of raw materials;
  - they can damage logistics infrastructure causing disruptions and delays in the supply chain;
- Chronic physical risks associated with temperature change, water stress and soil degradation. Their effects may adversely affect the upstream supply chain, particularly the cultivation of raw materials. These risks will also be addressed in the chapters on Biodiversity and Water.

These risks are summarised by IRO [E1-RS02].

For transition risks and opportunities, the events envisaged in the transition scenarios consistent with limiting global warming to 1.5°C (SSP1-2.6) were evaluated and the consequences for the company's operations and fixed assets were analysed. In particular, the risks and opportunities linked to the expected changes in four areas have been considered:

- Policies and regulations: upcoming developments in the European and international regulatory framework on sustainability for the fashion and textile sector (EPR, CSDDD).
- Technology: the costs of implementing low-emission technology solutions.
- Market: Changing consumer habits due to growing awareness of climate change and higher raw material costs.
- Reputation: reputational damage, in the event of penalties or failure to achieve decarbonisation targets.

Considering all of the above, market risks related to higher operating expenses and increased capital expenditure to adapt infrastructure and energy sources to decarbonisation targets were assessed as being significant [IRO E1-RS01]. The market and reputation opportunity revealed by the analysis lies in the proper planning of decarbonisation processes, avoiding the costs associated with a reactive approach to incoming regulations and ensuring a point of differentiation in the market. [IRO E1-OP01].

ESRS 2 IRO-1-E2 DESCRIPTION OF THE PROCESSES TO IDENTIFY AND ASSESS POLLUTION-RELATED MATERIAL IMPACTS, RISKS AND OPPORTUNITIES

In assessing the impacts, risks and opportunities associated with air, water, and soil pollution, microplastics and substances of concern, OVS considered both its direct operations and the upstream and downstream activities in its value chain, as described in section ESRS 2 **IRO-1.** The analysis examined dependencies on ecosystem services, which help to mitigate pollution impacts.

The pollution resulting from its own direct operations and from downstream value chain operations is not significant, as it is a Retail operating model. On the contrary, pollution caused by operations upstream of the value chain was considered material for the purposes of double materiality assessment.

More specifically, as regards impacts related to the production of raw materials, these occur in the geographical areas of Tier 4 suppliers (suppliers of raw materials for textile production), i.e. China, India and Pakistan. The negative impacts linked to manufacturing occur instead in the areas where Tier 1 and 2 suppliers are located (suppliers of finished and semi-finished products), i.e. Bangladesh, China, India, Myanmar, Turkey, Vietnam, Pakistan, Italy, etc.

It is not possible to pinpoint exactly where the impacts of microplastics released from end-of-life garments occur.

The results of the assessment of impacts, risks and opportunities referred to in paragraph **SBM-3** are summarised below.

Summary of negative impacts

- The release of non-biodegradable synthetic fibres from the production, use or end-of-life of the product contributes to the increase in the concentration of microplastics in the environment by altering aquatic and terrestrial ecosystems.
- Chemicals used in the production of agricultural raw materials are released into the environment infiltrating aquifers and industrial waters used in clothing production processes may be released without adequate treatment.

Summary of risks

- The need to adapt to new regulations related to microplastic pollution and eco-design could put pressure on the margins of collections, especially for the lowest price ranges.

ESRS 2 IRO-1 - E3 DESCRIPTION OF THE PROCESSES TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO WATER AND MARINE RESOURCES

In the assessment of water-related impacts, risks and opportunities, as described in ESRS 2 **IRO-1**, OVS considered water consumption during the following activities:

- growing and sourcing cotton;
- garment dyeing and finishing processes;
- management of stores and offices;
- washing garments during their use.

Water consumption hotspots were identified in upstream operations, which were then the focus of the analysis carried out using the WWF Water Risk Filter. Using this tool, which maps suppliers who were active in the 2024 financial year, it was possible to quantify water-related risks according to optimistic (SSP1-RCP2.6 /RCP4.5), current (SSP2-RCP4.5 /RCP6.0) and
pessimistic (SSP3-RCP6.0/RCP8.5) scenarios. The results show that high physical risks to water basins affect 100 of the 235 sites mapped, with an upward trend expected in the medium to long term, particularly with regard to risks related to water scarcity, flooding and the quality of available water.
The value chain analysis identified cotton cultivation and garment production processes as the main drivers of water basin exploitation, given the highly water-intensive nature of the cultivation, dyeing and washing stages.
Dyeing, in particular, could cause reputational damage and remediation costs if wastewater management is inadequate. There is also a correlation between water scarcity related to climate change, extreme weather events and a reduction in the production capacity of textile crops, leading to increases in their cost.
On the other hand, greater diversification towards sustainable cotton sources represents an opportunity due to their greater resilience.
The results of the assessment of impacts, risks and opportunities referred to in paragraph **SBM-3** are summarised below.

Summary of negative impacts

- The cultivation of cotton and the production processes of garments cause over-exploitation of water basins in areas already subject to high water stress.

Summary of risks

- Inadequate wastewater management can result in reputational damage and clean-up costs.
- Water scarcity due to climate change and extreme weather events may negatively affect the production of strategic agricultural raw materials for OVS, such as cotton, reducing availability and increasing costs.

Opportunity Summary

- Diversifying cotton sources with a view to greater sustainability contributes to building a more resilient supply chain and reducing supply costs for materials with low water consumption.

ESRS 2 IRO-1 - E4 DESCRIPTION OF PROCESSES TO IDENTIFY AND ASSESS MATERIAL BIODIVERSITY AND ECOSYSTEM-RELATED IMPACTS, RISKS, DEPENDENCIES AND OPPORTUNITIES

To assess the impacts, risks and opportunities related to biodiversity, in addition to following the process described in ESRS 2 **IRO-1,** OVS used the WWF Biodiversity Risk Filter, which assesses physical risks in terms of procurement and regulation services (enabling and mitigating). All aspects listed in RA 4 were taken into account in the assessment process and only those relating to climate change were considered material.

The geographical mapping of Tier 1 suppliers on this tool led to an initial analysis of the risks associated with dependencies on biodiversity and upstream value chain ecosystems. The analysis revealed risks related to supply and regulation ecosystem services, as well as pollution-related pressure on biodiversity. Biodiversity loss could lead to an increase in the costs of raw materials, in the event of a reduction in production or the implementation of more expensive production practices than those currently in use.

A more detailed analysis aimed at setting targets in line with the SBTN (Action E-A13) will make it possible to verify in detail the impacts on biodiversity and ecosystems throughout the value chain, with the aim of identifying mitigating actions to be implemented.

It is important to note that the OVS Group does not own or operate any factories or operational sites located near protected areas or that include protected areas or areas with high biodiversity outside protected areas.

The results of the assessment of impacts, risks and opportunities referred to in paragraph **SBM-3** are summarised below.

Summary of negative impacts

- Greenhouse gas emissions generated along the value chain and conventional agricultural practices for producing cotton or other plant/animal materials contribute to the degradation of ecosystems, reducing biodiversity.

Summary of risks

- The depletion of biodiversity can lead to an increase in raw material costs due to reduced availability or the need for more expensive agricultural/production practices.

ESRS 2 IRO-1 E5 DESCRIPTION OF THE PROCESSES TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO RESOURCE USE AND THE CIRCULAR ECONOMY

With regard to the materiality assessment related to resource use and the circular economy, OVS followed the process described in section ESRS 2 **IRO-1** considering in particular:

- Product design
- Selection and supply of raw materials
- Extending garment life
- Management and disposal of production waste and end-of-life products

Developments in the regulatory framework governing the use of recycled resources and waste disposal, as set out in the *European Strategy for Sustainable and Circular Textiles*, were considered when assessing the risks and opportunities of transitioning to a circular economy model. Implementation of these new regulations could have financial effects on the company, leading to an increase in the supply costs of second-life or organic raw materials and managing end-of-life products. Another consequence could be a reduction in product demand, due to extended garment life cycles and changes in customer purchasing habits.

However, OVS intends to tap into the vast opportunities offered by integrating circular practices into its business, a strategic pillar for the company since 2016. The main levers for the creating value for customers, reducing the extraction of virgin resources and waste production lie in eco-design during the garment design phase, working hand in hand with circular services, such as repair, collection of used garments and textile recycling. This could also increase the availability of second-life raw materials and attract new customers who are mindful of resource use.

The results of the assessment of impacts, risks and opportunities referred to in paragraph **SBM-3** are summarised below.

Summary of negative impacts

- The limited use of circular economy systems in the selection and supply of raw materials for products results in high consumption of natural resources and chemicals.
- The disposal and incineration of end-of-life products, as well as manufacturing waste, even if not hazardous, pollutes the soil and air.

Opportunity Summary

- Transitioning to circular business models that implement eco-design criteria in the product design phase and offer circular services to extend garment life (repair, collection of used garments, textile recycling) can represent a significant business opportunity: lower raw material procurement costs, expansion of in-store offer and development of new business lines.

Summary of risks

- Extending garment life cycles to adapt to consumer choice or new regulations may result in lower revenues.
- New regulations on the use of recycled resources and waste disposal may lead to an increase in operating expenses.

ESRS 2 IRO-1 G1 - DESCRIPTION OF PROCESSES TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO BUSINESS CONDUCT

The double materiality assessment, carried out as described in section ESRS 2 **IRO-1**, enabled OVS to identify and evaluate various financial impacts and risks associated with the Group's global operations. Opportunities relating to political engagement and risks associated with supplier management were deemed material, as they are crucial to ensuring business continuity.

During the assessment, OVS also identified and evaluated the risks of corruption related to abuse of influence, misappropriation of assets and fraudulent financial reporting, as well as the risks of corruption and extortion related to suppliers and other business partners.

2. Environmental information

From the perspective of OVS and the fashion industry in general, environmental impacts, risks and opportunities are deeply interconnected. An action taken in a specific area can generate cross-cutting benefits on multiple fronts, just as an environmental risk can have implications for different aspects of the business. For this reason, many of the actions and targets outlined in OVS's Sustainability Plan apply across multiple areas and contribute to mitigating multiple impacts or risks. This integrated vision guides its strategy and approach, ensuring that each initiative is recognised for its overall impact.

Environmental policies

The policies adopted by OVS that cover environmental issues are:

- [E-P01] Climate and Energy Policy
- [E-P02] Environment and Territory Policy
- [COC] Code of Conduct[14]
- [DD] Due Diligence Policy

The impacts, risks and opportunities referred to in the above policies are the result of double materiality assessment, carried out taking into account the interests of OVS stakeholders, as described above (Ref. **IRO-1**).
The policies are updated periodically by the responsible departments and shared on the company intranet for the benefit of all employees. Policies relevant to external stakeholders are also available on the group's corporate website. All Company Departments are periodically informed about policy updates.

[E-P01] CLIMATE AND ENERGY POLICY

Reference IRO	Scope	Function responsible for implementation
E1-IN01 E1-IN02 E1-OP01 E1-RS01 E1-RS02 E5-IN01 E5-OP01 (Ref. SBM-3)	Upstream/Direct/Downstream (Ref. SBM-1)	Corporate Sustainability Function

[14] The Group specifies that although the Code of Conduct is a code and not strictly a policy, it is included in this section because it performs a similar function.

The general objectives of this policy are to define the Group's commitment to addressing current and future environmental challenges and to actively contribute to achieving European and global decarbonisation targets[15].

[E-P02] ENVIRONMENT AND TERRITORY POLICY

Reference IRO	Scope	Function responsible for implementation
E2-IN01, E2-RS01, E2-IN02, E2-RS03, E3-IN01, E3-OP01, E3-RS02, E4-IN01, E4-RS01, E5-IN01, E5-OP01, E5-IN02, E5-RS02, E5-RS01 (Ref.SBM-3)	Upstream/Direct/Downstream (Ref. SBM-1)	Corporate Sustainability Function

The Environment and Territory policy defines the Group's commitment to addressing current and future environmental challenges and to actively contribute to protecting the environment and the territory[16].

[COC] CODE OF CONDUCT

Reference IRO	Scope	Function responsible for implementation
E2-IN02, E2-RS03, E3-IN01 S2-IN02, S2-IP01, S2-IP02, S2-OP01, S2-RS01, S2-RS03, S2-RS04 (Ref.SBM-3)	Upstream/Direct/Downstream (Ref. SBM-1)	Management Operations, Sourcing, Buying and Merchandising

The aim of the Code of Conduct adopted by OVS is to set out certain binding requirements for suppliers, with a view to continuously improve their practices in terms of transparency and environmental and social sustainability[17]. Every supplier who has a business relationship with OVS must operate in full compliance with the Code of Conduct.

[15] The framework for defining policy principles is the Paris Agreement, together with the United Nations Sustainable Development Goals (in particular Goal 13: Climate Action). The decarbonisation targets associated with the Policy were approved by the Science Based Targets Initiative in April 2022.
[16] The policy is aligned with the targets outlined in the United Nations Sustainable Development Goals and takes into account the latest versions of the following private sector standards and voluntary initiatives: The 10 principles of the UN Global Compact; The Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; The Kyoto Protocol; The United Nations Framework Convention on Climate Change (UNFCCC); The indications of The Science Based Targets Initiative and The 4 Sustainability Principles of The Natural Step.
[17] The provisions of the Code of Conduct are inspired by international standards, various national legislations, the United Nations Convention on the Rights of the Child, the Universal Declaration of Human Rights, the ILO Conventions and industry best practices.

[DD] DUE DILIGENCE POLICY

Reference IRO	Scope	Function responsible for implementation
E2- R01, S2-IP02, S2-OP01, S2-RS04, G1 - RS01 (Ref. SBM-3)	Upstream/Direct/Downstream (Ref. SBM-1)	Management Operations, Sourcing, Buying and Merchandising

The purpose of the Due Diligence Policy is to define the framework for identifying, assessing and managing risks related to business operations and the complex supply chain in relation to human rights and the environment[18]. The policy also sets out risk prevention actions, such as capacity building programmes, participation in multi-stakeholder initiatives, clauses to ensure compliance with the Code of Conduct and corrective action plans for negative impacts.

ESRS E1 Climate change

E1-1 TRANSITION PLAN FOR CLIMATE CHANGE MITIGATION

OVS is currently drawing up a transition plan to mitigate climate change, which will be based on the group's decarbonisation plan[19] (Ref. E-P01, E1-3, E1-4). In view of the integration of Goldepoint which took place during 2025 and the significant methodological changes in the quantification of climate-related emissions, the transition plan currently being prepared will be substantially revised.

ESRS 2 SBM-3 - E1 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

The double materiality assessment, integrated with the more general corporate ERM process, was used to support the resilience analysis of the business strategy and model, with particular reference to the clothing business line, as described in section SBM-1.

The climate scenario analysis described in ESRS 2 IRO-1-E1 provided scientific data and an objective long-term view as input for the assessment.

The resilience analysis results showed that, for transition to a climate-neutral economy, the business activities that require significant effort are mainly related to:

- Product: as highlighted by the Textile Exchange "Vision Climate+", the industry's decarbonization process cannot be achieved solely by replacing existing materials, but also by identifying innovative new business models and slowing growth in order to decouple economic development from resource consumption.
- Supply Chain: OVS works with supply chain actors in countries where renewable energy is not yet widely available and there is a risk that it may not develop in time to meet climate neutrality targets.

The results of the assessment of impacts, risks and opportunities referred to in paragraph **SBM-3** are summarised below.

Summary of negative impacts

- The entire life cycle of products, from the cultivation of raw materials (aggravated by the impact of fertilisers) to the production, distribution and transport of goods, generates high greenhouse gas emissions.
- OVS uses raw materials grown in areas increasingly affected by extreme heat and the use of cotton and monoculture viscose that make crops more vulnerable to droughts and floods.

Summary of risks

- Transition risk: The adaptation of infrastructure and energy sources to decarbonisation targets may lead to higher operating expenses and higher capital expenditure.
- Physical risk: Climate change can lead to unpredictable business conditions, negatively impacting revenues and margins as well as expenses needed to recover from extreme weather events

[18] The regulatory framework of the policy is Directive (EU) 2024/1760 (CSDDD), the OECD Guidelines for Responsible Supply Chains in the Apparel & Footwear Industry, and the UN Guiding Principles on Business and Human Rights.
[19] The current plan focuses on reducing carbon emissions and does not cover other areas that would be required by a complete climate transition plan.

Opportunity Summary

- Proper planning of decarbonisation processes can avoid the costs typically associated with a reactive approach to incoming regulations and provide a competitive edge in the market

E1-2 POLICIES RELATED TO CLIMATE CHANGE MITIGATION AND ADAPTATION

In addition to the above policies[20], it should be noted with regard to climate change that the Climate and Energy Policy [E1-P01] sets out the decarbonisation plan and areas of intervention to achieve the Scope 1, 2 and 3 emission reduction targets set out in the plan, addressing climate change mitigation, climate change adaptation, energy efficiency and the growth of renewable energy. With regard to climate change adaptation, the policy is based on three principles: climate risk assessment, resilient design and support for the supply chain.

E1-3 - E1 4 ACTIONS, RESOURCES AND TARGETS IN RELATION TO CLIMATE CHANGE POLICIES

In its 2024-2026 Strategic Sustainability Plan, OVS defined objectives to mitigate the negative climate impacts generated by direct operations and the value chain, with particular reference to product-related impacts and impacts related to the product and supply chain.

[20] Please refer to Environmental policies .

IRO	Decarbonisation leverage	Target	Target Description	Baseline[21]	FY 2025	FY 2024[22]	Scope
E1-IN01 E1-0P01	Supply chain decarbonisation Energy efficiency	E-T01	Overall 46.2% reduction in CO2 emissions by 2030 (Scope 1, 2 market-based and 3) [23]	2019	See E1-6		Upstream/ Direct/ Downstream
E1-IN01 E1-IN02 E1-0P01	Supply chain decarbonisation Energy efficiency	E-T02	19.3% reduction in Scope 3 carbon intensity relative to consolidated revenues by 2026 (Scope 3) [24]	2023	See E1-6		Upstream/ Downstream
E1-IN01 E1-IN02 E1-RS02	Supply chain decarbonisation	E-T03	65% of materials with reduced impact and traceable by 2026 (Scope 3)	2024	See E5-4		Upstream
E1- IN01 E1-0P01 E1-RS02	Supply chain decarbonisation	E-T04	80% of the production volume covered by suppliers with a decarbonisation target by 2026 (Scope 3) [25]	2024	E1 - Metrics - Entity specific Percentage of the production volume covered by suppliers with a decarbonisation programme		Upstream
E1-IN01 E1-0P01	Electrification	E-T05	100% renewable electricity by 2030 (Scope 2)	2019	See E1-5		Direct
E1-IN01	Energy efficiency	E-T06	Adoption of a Goods Transport Policy to limit air travel by 2026 (Scope 3)	N/A	Implementation of Climate and Energy Policies	To be launched	Upstream
E1-0P01 E1-RS01	Electrification	E-T07	40% of electricity requirements covered by photovoltaic systems by 2028 (Scope 2)	2024	See E1-5		Direct

[21] Where the baseline year is 2024, the relative value is that of the 2024 result. In other cases, the value is indicated in the comments for the relevant metric.
[22] The results achieved during the reference period are reported with reference to the metric, if applicable, or through summary data.
[23] While sharing the 46.2% reduction target, Scope 1 and 2 (market-based) targets and Scope 3 targets are reported separately.
[24] This target was reviewed during the year in order to align it with the new decarbonisation plan being prepared. However, as the target was used in the 2024-2026 LTI plan, it was maintained in the table above, but is not reported.
[25] Entity-specific metric - Calculation method: The figure is calculated as a percentage of the volume of production based on quantity, recorded in corporate systems, generated by Tier 1 suppliers active in FY 2025, who have defined a decarbonization plan verified through the Higg vFEM module. The indicator is limited to the production perimeter managed by OVS S.p.A., expressly excluding Goldenpoint, as its contribution to the indicator is negligible, having been consolidated in the second half of the year. The metric will be updated in 2026, extending it to the entire scope of consolidation.

IRO	Decarbonisation leverage	Target	Target Description	Baseline [21]	FY 2025	FY 2024 [22]	Scope
E1-RS02	Supply chain decarbonisation	E-T08	Launch of the supplier reward process with improved environmental performance by 2026 (Scope 3)	2024	Supplier scorecard defined	Study started for supplier scorecard	Upstream
E1-IN02	Supply chain decarbonisation	E-T09	Adoption of Better Products guidelines by 2026 (Scope 3)	2024	Updating of the procedure for managing the most sustainable materials	Definition of criteria and scores and initial collection mapping	Upstream
E1-IN02 E1-RS02	Supply chain decarbonisation	E-T11	Diversification (type and origin) of cotton supply by 2026 (Scope 3)	2024		See E5-4	Upstream
E1-IN02 E1-RS02	Supply chain decarbonisation	E-T12	Review of Science Based Targets for Nature sourcing strategy by 2026 (Scope 3)	N/A		To be launched	Upstream

The targets were set to enable OVS to achieve its greenhouse gas emission reduction goals, in line with the Science Based Target initiative (SBTi) framework. All targets included in the decarbonisation plan are aligned with the 2024-2026 Strategic Sustainability Plan and, for Scope 1 and 2 market-based, in line with the plan to keep global warming below 1.5°C. This alignment was confirmed by the approval obtained from SBTi in April 2022.

The emissions analysis led to the identification of the main sources contributing to the overall carbon footprint and their relative weight, and consequently to the development of more detailed targets.

In order to achieve these objectives, the necessary actions have been identified. The timeframes for action implementation are in line with the targets set out in the table above, with the exception of ongoing actions, for which no completion date has been set.

IRO	Decarbonisation leverage	Action	Action Description	Status	Scope	Interested stakeholders
E1-IN01 E1-IN02 E1-RS02	Supply chain decarbonisation	E-A01	Selection and purchase of certified and low-impact materials and research and implementation of innovative fibres (Scope 3)	Ongoing	Upstream	Suppliers, Employees
E1-IN01 E1-OP01	Supply chain decarbonisation	E-A02	Support for suppliers in defining a decarbonisation programme (Scope 3)	Ongoing	Upstream	Suppliers, Employees
E1-IN01	Electrification	E-A03	Guarantees of Origin purchasing programme (Scope 2)	Ongoing	Direct	Suppliers, Employees
E1-IN01	Energy efficiency	E-A04	Transport of goods by ship and air transport only in exceptional cases (Scope 3)	Ongoing	Upstream	Suppliers, Employees
E1-OP01	Energy efficiency	E-A05	Replacement of diesel boilers with lower impact systems (Scope 1)	Ongoing	Direct	Suppliers, Employees
E1-OP01	Electrification	E-A06	Inclusion of electric or hybrid vehicles in the company car fleet and installation of charging systems and photovoltaic systems to support them (Scope 1)	Ongoing	Direct	Suppliers, Employees
E1-OP01 E1-RS01	Electrification	E-A07	Installation of solar panels to produce the energy needed for shops and head office (Scope 2)	Ongoing	Direct	Suppliers, Employees
E1-RS02	Supply chain decarbonisation	E-A08	Programme of monitoring and involvement of all the suppliers through the Higg platform and the completion of the FEM module (environmental) (Scope 3)	Ongoing	Upstream	Suppliers, Employees, Industry coalition
E1-RS02	Supply chain decarbonisation	E-A09	Establishing a rating system that rewards suppliers with improved environmental performance (Scope 3)	Ongoing	Upstream	Suppliers, Employees

Of the actions listed above, a specific budget is allocated for the implementation of E-A01, E-A03, E-A05 and E-A07 under the responsibility of the relevant company departments. OVS did not consider the CapEx and OpEx values for 2025 to carry out the actions indicated above to be material.
The metrics used to measure progress and monitor targets are set out in this section and include those defined by ESRS.

The OVS Group's consolidated energy consumption, based on the consumption of electricity and fossil fuels, amounts to 167,637 Mwh[26]. 83% of consumption comes from certified electricity (96% of electricity consumed).
Renewable energy is currently only produced and/or purchased in Italy, but the Group is considering extending its purchase to offices and stores abroad.
The following tables show the consolidated electrical consumption.

{E1-5 ENERGY CONSUMPTION AND MIX

ENERGY CONSUMPTION AND MIX

	2025	2024
Fuel consumption from coal and coal products (MWh)	0	0
Fuel consumption from crude oil and petroleum products (MWh)	8,744	8,252
Fuel consumption from natural gas (MWh)	8,777	8,284
Fuel consumption from other non-renewable sources (MWh)	0	0
Consumption of purchased or acquired electricity, heat, steam, and cooling from fossil sources (MWh)	10,202	5,985
Total energy consumption from fossil sources (MWh)	**27,723**	**22,522**
Share of fossil fuels in total energy consumption (%)	17%	14%
Consumption from nuclear sources (MWh)	**0**	**0**
Share of nuclear sources in total energy consumption (%)	0	0
Fuel consumption for renewable sources including biomass (MWh)	0	0
Consumption of self-generated renewable electricity (MWh)	2,686	1,977
Consumption of purchased or acquired electricity, heat, steam, and cooling from renewable sources (MWh)	137,228	138,305
Total energy consumption from renewable sources (MWh)	**139,914**	**140,281**
Share of renewable sources in total energy consumption (%)	83%	86%
Total energy consumption (MWh)	**167,637**	**162,803**

ENERGY INTENSITY

	2025	2024
Energy/revenue (MWh/€ m) [27]	96.01	99.76

[26] The data is collected from the management systems at the points of sale and at headquarters, through entering data from bills or other consumption reports. In the few remaining cases where this data is not available, a proportionate estimate is made based on square metres. For renewable energy, the data comes from the Guarantees of Origin (GO) purchased and from direct readings of the energy produced by the photovoltaic panels.
[27] The revenue figure, which also applies to the intensity KPI in paragraphs E1-6 and E2-3, is provided in note 7.23 of the consolidated income statement in the Consolidated Financial Statements.

With regard to electricity consumption, it should be noted that most stores are equipped with automatic systems to monitor consumption relating to lighting and air conditioning systems. The constant monitoring of data relating to the individual stores means that consumption anomalies can be reported to the Technical Services Department, which can then take action accordingly.
In 2025, OVS consumed 2,685.51 Mwh of electricity self-generated from photovoltaic panels (equal to 1.6% of total electricity requirements). Renewable energy production is expected to increase significantly in the coming years, given the installation programme for solar farms.
Since 2017, the electricity purchased directly by OVS in Italy has been sourced from certified green energy, in accordance with company policy, either from its own production systems or by purchasing Guarantees of Origin. The total amount of electricity from renewable sources is 139,914 Mwh, equal to 97% of consumption in Italy.

E1-6 GROSS SCOPE 1, 2, 3 GHG EMISSIONS AND TOTAL GHG EMISSIONS

During 2025, OVS adopted a new method for calculating CO2 emissions, for a more accurate representation. The purpose of identifying and applying this new methodology is related to the fact that through its application, OVS is better able to monitor actions aimed at reducing GHG emissions. In support of the methodology, specialized software for emissions inventory and scenario simulation related to the impact on climate change was adopted.
The innovations introduced have led to significant differences compared to the previous calculation. In particular, the main reasons for these changes are reported below:

- **Changes due to new estimation criteria:** the change is due to the use of spend-based emission factors[28] for categories previously valued with emission factors poorly supported by the literature.
- **Changes due to updated emission factors:** change due to the use of more up-to-date emission factors.
- **Change due to new emission categories:** inclusion of previously unreported categories in Scope 3.
- **Variations for raw materials and production processes:** the methodology now considers the amount of material consumed taking into account the processing scrap generated during the production activities.

  In addition, the individual production processes for each macro commodity were assessed separately, also using direct emission factors, where available through the verified Higg FEM modules[29].

These changes particularly affect Scope 3 emissions, especially with regard to Housebrand Clothing, Beauty, Waste and End of Life products. There are no significant changes to Scope 1 and 2.

- **Housebrand Clothing:** the substantial difference between emissions in the two methodologies is derived from a complete revision of the model used for the calculation. The methodology now considers the amount of material consumed taking into account the processing scrap generated during production activities. In addition, the individual production processes for each macro commodity were assessed separately, also using direct emission factors, where available through the verified Higg FEM modules.
- **Beauty:** the difference in emissions between the two methodologies results from a substantial change in the calculation. In the old methodology, a generic average emission factor was used. In the new method, emissions are estimated using a spend-based emission factor based on the country of origin. The factors used also include the impacts of packaging.
- **End of life of the product:** the difference in emissions between the two methodologies is mainly due to other, previously unconsidered product categories being included in the scope of calculation. To calculate emissions, quantities in kg, the recycling rate and the geographical area of disposal are taken into account.
- **Waste:** the difference in emissions between the two methodologies is due to a better alignment with the calculation Best Practices that require the emissions of flows of materials for recycling to be allocated to the recycled product and not to waste, in accordance with the end-of-life allocation approach.

Following the methodological change, the emissions data for 2024 and the baseline year 2019 had to be updated.
In 2025, gross GHG Scope 1, Scope 2 Market-based, and Scope 3 emissions are reduced by 7% compared to the 2019 baseline.

[28] Emission factors related to emissions valued using a spend-based methodology come from the Exiobase database, version 3.8.2
[29] Data collection forms relating to environmental practices that OVS suppliers are required to complete on an annual basis through the Worldly monitoring platform.

EMISSIONS
tCO2e

	Retrospective			Goals and Goal years		
	Baseline Year 2019	**2025**	**2024**	**2030**	**2050**	**Annual target % / baseline year**
Scope 1 GHG emissions[30]						
Total direct emissions - Scope 1	11,171	8,048	7,266	(46)%	N/A	(28)%
Percentage of GHG Scope 1 emissions covered by regulated emissions trading schemes (%)	–	–	–	N/A	N/A	– %

Scope 3 emissions[32]						
Category						
1. Purchase of goods and services	877,473	842,334	777,736	(46)%[33]	N/A	(4)%
2. Capital goods	8,963	16,774	15,682	N/A	N/A	87%
3. Fuel and energy related activities	12,339	3,388	8,628	N/A	N/A	(73)%
4. Upstream transport and distribution	34,901	16,032	24,523	(46)%[34]	N/A	(54)%
5. Waste generated in operations	2,535	883	844	N/A	N/A	(65)%
6. Business travel	747	890	700	N/A	N/A	19%
7. Employee commuting	6,162	5,494	4,735	N/A	N/A	(11)%
8. Upstream leasing/rental activities	3,491	2,715	2,880	N/A	N/A	(22)%
11. Use of the sold product	67,206	53,486	57,300	N/A	N/A	(20)%
12. End-of-life disposal of products sold	40,556	33,705	31,782	N/A	N/A	(17)%
13. Downstream leasing/rental activities	1,563	1,199	1,325	N/A	N/A	(23)%
14. Franchising	7,019	14,998	17,465	N/A	N/A	114%
Total Scope 3	**1,062,954**	**991,897**	**943,601**	**N/A**	**N/A**	**(7)%**
Total (Scope 1,2,3) location based	**1,117,842**	**1,034,404**	**986,244**	**N/A**	**N/A**	**(7)%**
Total (Scope 1,2,3) market based	**1,080,743**	**1,005,133**	**953,055**	**N/A**	**N/A**	**(7)%**

The following table shows the split of Scope 1 and Scope 2 emissions by emission type.

[30] With reference to Scope 1 emissions, no emissions from biomass combustion or biodegradation were identified.
[31] With reference to Scope 2 emissions, no emissions from biomass combustion or biodegradation were identified.
[32] With reference to Scope 3 emissions, no emissions from biomass combustion or biodegradation were identified.
[33] The reduction target for category 1 "Purchase of goods and services" and 4 "Upstream transport and distribution" refers to the categories shown in the table "Emissions covered by the Decarbonisation Plan" (to which reference is made) and added together.
[34] See the previous note.

tCO2e	Baseline Year 2019	2025	2024
Scope 1 GHG emissions			
Direct emissions from coolant gases	5,391	4,352	3,761
Direct emissions from mobile combustion (Petrol, Diesel)	1,186	1,324	1,133
Direct emissions from stationary combustion (LPG, Methane, Diesel, Petrol)	4,593	2,372	2,373
Total direct emissions - Scope 1	11,171	8,048	7,266

	Baseline Year 2019	2025	2024
Scope 2 GHG Emissions			
Electricity consumption emissions (Location Based)	42,956	33,631	34,501
Emissions from district heating consumption - Non-renewable (Location Based)	761	828	876
Emissions from district heating consumption - Renewable (Location Based)	0	0	0
Scope 2 emissions - Location Based	43,717	34,459	35,377
Emissions from consumption of non-zero-emission renewable energy	0	0	0
Emissions from non-renewable/unknown electricity consumption (Market Based)	5,857	4,360	1,312
Emissions from district heating consumption - Non-renewable (Market Based)	761	828	876
Emissions from district heating consumption - Renewable (Market Based)	0	0	0
Scope 2 emissions - Market-based	6,618	5,188	2,188

The figures in the table for the baseline year emissions were updated by estimating what the Goldenpoint figure could have been for 2019. In the absence of primary data for the year, baseline emissions were estimated from data collected by Goldenpoint for a full tax year (2024) and re-proportioned for the various categories based on specific drivers such as Revenue, Number of employees, and surface area (in square metres) of headquarters and stores.

The figures in the table relating to 2024 do not include Goldenpoint emissions as they are not present in the Group perimeter. The 2025 figures include Goldenpoint emissions for the second half of the tax year, from 01/07/2025 to 31/01/2026, the period when Goldenpoint was actually consolidated.

Scope 1 and 2 emissions

With regard to data relating to Scope 1 and 2 emissions, the 2024 report did not consider the foreign perimeter in the baseline representation, as this corresponds to less than 5% of total emissions. However, in the 2025 report, these emissions were estimated by taking the emissions intensity per square metre for the last available year and applying this indicator to the square metres for 2019.

OVS does not operate in a regulated emissions trading system so the Scope 1 emissions managed in this area is therefore equal to zero.

Scope 1 and 2 emissions relate to the scope of the consolidated accounting group and the companies over which OVS S.p.A. exercises operational control. These emissions were calculated by applying the emission factors made available by DEFRA and EcoInvent to the energy consumption identified by the Energy Management systems summarised in paragraph **E1-5.**

Scope 3 emissions

Scope 3 emissions refer to the company's core business and are estimated based on the activities carried out by the OVS Group, exclusively in the own-brand clothing segment.

The emissions for each category were calculated as follows:

- Cat. 1 - Purchase of goods and services: this mainly considers emissions from the production of raw materials and subsequent processing to make the finished product, linking a specific emission factor to each material, process and country of manufacture. The valuation takes into account the different uptake of material in the various production stages. In addition, emissions due to the production of packaging and display and advertising materials of retail outlets as well as the purchase of indirect products and services are considered in this category[35].
- Cat. 2 - Capital goods: this category is calculated using a spend-based emission factor applied to the increase in consolidated tangible fixed assets (excluding increases under IFRS 16).
- Cat. 3 - Fuel and energy related activities: emissions related to the energy life cycle are calculated by applying an EcoInvent emission factor to recorded consumption.
- Cat. 4 - Upstream transport and distribution: transport is calculated by applying a specific emission factor (EcoInvent) for each means of transportation applied to the weight transported and the kilometres travelled. It covers both inbound and outbound transportation.
- Cat. 5 - Waste generated in operations: waste disposal emissions are calculated by applying EcoInvent emission factors to the amount of waste produced by type, allocating them according to an end-of-life criterion.
- Cat. 6 - Business travel: Emissions from business travel are calculated by applying a specific emission factor on the basis of the means of transport used for the kilometres travelled.
- Cat. 7 - Employee commuting: Emissions from employee commuting are calculated by taking into account the total number of employees, the number of journeys and the number of days worked in a year.
- Cat. 8 - Upstream leasing/rental activities: emissions from energy consumption in buildings where OVS does not hold the energy supply contract are calculated in the same way as for Scopes 1 and 2.
- Cat. 11 - Use of the product sold: emissions from the use of the product sold are calculated taking into account all expected consumption during the useful life of the item of clothing for washing, ironing and drying, taken on the basis of average industry data.
- Cat. 12 - End-of-life disposal of products sold: the end of life of the products sold generates emissions that are calculated based on the composition of products purchased during the financial year and applying the relevant emission factors.
- Cat. 13 - Downstream leasing/rental activities: represents emissions arising from energy consumption at the logistics centre leased free of charge to an external company. They are valued in the same way as for Scope 1 and 2 emissions.
- Cat. 14 - Franchising: emissions from franchising are estimated by applying an average of Scope 1 and Scope 2 location based emissions per square metre calculated for directly managed stores and applied to the square metres of franchised stores.

Category "9. Downstream transport and distribution"[36] was excluded as it was not significant, representing less than 1% of total emissions. Category "10. Processing of products sold" is not applicable. Category "15. Investments" is excluded as there are no equity investments exceeding 5%, a threshold defined by OVS to identify equity investments to which the GHG inventory should be extended.

In 2021, OVS set its Scope 3 emissions reduction targets, relative to the 2019 baseline and in line with SBTi for category 1, limited to own-brand clothing products, and for category 4, both of which are particularly material and offer significant potential for reduction.

The reduction targets for E-T01 and E-T02 refer to the perimeter just described.

The following tables therefore represent a subset, however significant, of the overall emissions reported previously.

[35] Emissions data for purchasing services was not available in the 2019 report (baseline). It has therefore been added using an estimate calculated by multiplying the proportion of service expenditure in 2024 sales by the spend-based EcoInvent emission factor of 0,0001623 tCO_2e/EUR.

[36] Outbound transport-related emissions are included in category 4. Residual emissions relating to the management of returned products are not significant.

EMISSIONS COVERED BY THE DECARBONISATION PLAN

Scope 1 and Scope 2 emissions covered by the decarbonisation plan	Baseline Year 2019	2025	2024	% vs Last Year	% vs Baseline	Target 2030
Total Scope 1 and Scope 2	17,789	15,376	13,476	14.10	(13.56) %	**46.20 %**

Scope 3 emission categories covered by the decarbonisation plan	Baseline Year 2019	2025	2024	% vs Last Year	% vs Baseline	Target 2030
1 Purchase of goods and services	757,511	671,558	621,197	8%	(11)%	
1.1 Raw materials	230,007	198,689	190,929	4%	(14)%	
1.2 Processing	495,300	464,562	419,920	11%	(6)%	
1.3 Packaging	32,203	8,307	10,348	(20)%	(74)%	
4. Upstream transport and distribution	26,786	11,790	16,971	(31)%	(56)%	
Total scope of decarbonisation plan	**784,296**	**683,348**	**638,168**	**7%**	**(13)%**	**46.20 %**

The increase in Scope 1, 2 and 3 emissions in 2025 is due to the consolidation of Goldenpoint and a general increase in business activity.
In representing the changes in emissions in the perimeter covered by the decarbonization plan and in the relative intensity indicators, a figurative estimate of the impact of Goldenpoint in 2024 and 2025 was included, in order to allow for a clearer comparison of the data. Therefore, the data reported do not represent OVS's actual performance in terms of decarbonisation, but make it possible to correctly understand its performance compared to the baseline, in view of future years when the consolidation of Goldenpoint will be complete over the 12-month period.

The intensity of emissions is calculated by comparing the total Scope 1, 2 Market Based and 3 emissions with consolidated revenue from the total perimeter considered.

INTENSITY OF SCOPE 1, 2, 3 EMISSIONS

Scope 1, 2, 3 intensity	2025	2024	(%) 2025 / 2024
Total Scope 1+2+3 emissions (location-based) compared to revenue	0.59	0.61	(3)%
Total Scope 1+2+3 (market based) emissions compared to revenue	0.58	0.58	(1)%

Furthermore, the intensity of emissions in relation to the scope of the decarbonisation plan is shown below.

INTENSITY OF EMISSIONS IN RELATION TO THE SCOPE OF THE DECARBONISATION PLAN

Scope 1, 2, 3 intensity	2025	2024	(%) 2025 / 2024
Scope 1 emissions compared to revenue	0.0047	0.0045	2.5 %
Scope 2 (market based) emissions compared to revenue	0.0041	0.0040	4.4 %
Scope 3 emissions compared to revenue	0.3914	0.3910	0.1 %
Total Scope 1+2+3 (market based) emissions compared to revenue	0.3996	0.3996	— %

INTENSITY OF EMISSIONS IN RELATION TO THE PRODUCT VOLUME OF THE DECARBONISATION PLAN

Scope 1, 2, 3 intensity	**Baseline 2019**	**2025**	**2024**	**(%) 2025 / 2024**	**(%) 2025/ baseline 2019**
Scope 3 intensity in relation to tonnes of product	23.66	18.89	18.05	4.6%	(20.2)%

E1-7 GHG REMOVALS AND GHG MITIGATION PROJECTS FINANCED THROUGH CARBON CREDITS

In 2025, OVS did not mitigate emissions through GHG absorption projects.
In 2024, OVS S.p.A. neutralised 9,300 tonnes of CO2e[37], through the purchase and collection of CO_2 credits under the VCS/VERRA (Verified Carbon Standard). The credits come from a renewable energy project located in Pakistan (ID 1346).

E1-8 INTERNAL CARBON PRICING

OVS does not adopt an internal carbon pricing system.

E1 - METRICS - ENTITY SPECIFIC – PERCENTAGE OF THE PRODUCTION VOLUME COVERED BY SUPPLIERS WITH A DECARBONISATION PROGRAMME

50.2% of OVS's production volume in 2025 was covered by Tier 1 suppliers.
The figure is calculated as a percentage of the volume of production, as recorded on corporate systems, produced by Tier 1 suppliers active in FY 2025, who confirmed they have a decarbonization plan by completing the approved Higg FEM module.

	FY 2025	FY 2024
Production volume of Tier 1 suppliers	50.2%	21.0%[38]

European Taxonomy

1. PURPOSE AND CONTENT OF REGULATION (EU 2020/852

The European Taxonomy (hereinafter also referred to as the "Regulation" or "Taxonomy") is a standardised classification system of environmentally sustainable economic activities, introduced by the European Union with Regulation 2020/852, in effect since 12 July 2020. It aims to provide investors and the market with a common language based on sustainability metrics, to ensure comparability between operators, reduce the risk of greenwashing, and increase the quantity and quality of information on the environmental and social impacts of business, thereby promoting more responsible investment decisions.

In addition to Regulation 2020/852, the European Commission has published Delegated Regulation 2139/2021 ("Climate Delegated Act"), Delegated Regulation 2486/2023 ("Environmental Delegated Act") and Delegated Regulation 2178/2021 which together provide a set of rules for the identification and reporting of environmentally sustainable economic activities.

[37] As shown in the VCS/VERRA registry.
[38] The figure for FY 2024 has been adjusted, as stated in note 25, as the previously indicated value of 26% excluded certain categories of suppliers, which were instead included in FY 2025.

The Taxonomy focuses on identifying economically sustainable activities, defined as those economic activities that:

- make a substantial contribution to at least one of the six environmental and climate objectives (Article 9 of EU Regulation 2020/852);
- do not cause significant harm to any of the other environmental objectives, in accordance with the "do no significant harm" principle (hereinafter DNSH); and
- comply with minimum safeguards.

The environmental objectives of the Taxonomy are:

1. climate change mitigation;
2. climate change adaptation;
3. sustainable use and protection of water, water and marine resources;
4. transition to a circular economy;
5. pollution prevention and control;
6. protection and restoration of biodiversity and ecosystems.

2. REPORTING OBLIGATIONS AND GENERAL PRINCIPLES FOR DEFINING KPIS

Article 8 of EU Regulation 2020/852 sets out the reporting obligations under the Taxonomy and clarifies that these requirements apply to any company subject to the publication of a Sustainability Report pursuant to Article 19-bis or Article 29-bis of Directive 2013/34/EU. The taxonomy requires information to be provided on how and to what extent a company's activities are aligned with environmentally sustainable economic activities.

With regard to non-financial companies, the disclosure relates in particular to the following metrics ("key performance indicators" or "KPIs"):

- the proportion of turnover derived from products or services associated with environmentally sustainable economic activities;
- the proportion of capital expenditure (CapEx) and operating expenditure (OpEx) relating to assets or processes associated with environmentally sustainable economic activities.

In July 2021, EU Regulation 2021/2178 supplementing Article 8 of EU Regulation 2020/852 was published to further specify the content and presentation of these KPIs as well as the methodology to be followed for their measurement and the qualitative information that must accompany their reporting. In 2023, this Regulation was amended by Annex V to Regulation 2023/2486, with specific reference to KPI reporting models.

In 2026, Commission Delegated Regulation (EU) 2026/73 was issued, introducing a materiality threshold of 10% for Turnover, CapEx and OpEx relating to eco-sustainable activities.

For the reporting of KPIs for 2025, the Group adopted the new delegated regulation, taking into account that the activities identified as eligible represent less than 5% of total CapEx and OpEx.

3. INFORMATION ON THE EU TAXONOMY AND KPI CALCULATION CRITERIA

Turnover, operating expenses and capital expenditure relating to eligible activities and activities aligned with the Taxonomy, used to calculate key performance indicators (KPIs) and percentages of balance sheet values, are reported in accordance with the models provided in Annex II to Commission Delegated Regulation (EU) 2026/73.

Financial Year 2025															
KPI	Total	Proportion of Taxonomy-eligible activities	Taxonomy-aligned activities	Proportion of Taxonomy-aligned activities	Breakdown by environmental objectives of Taxonomy-aligned activities						Proportion of enabling activities	Proportion of transitional activities	Not assessed activities considered non-material	Taxonomy-aligned activities in previous financial year (2024)	Proportion of Taxonomy-aligned activities in previous financial year (2024)
					Climate Change Mitigation	Climate Change Adaptation	Water	Circular Economy	Pollution	Biodiversity					
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)

OpEx	14,982	– %	0	– %	– %	– %	– %	– %	– %	– %	– %	– %	2.06%	84.81	0.51%

ESRS E2 Pollution

E2-1 POLLUTION POLICIES

In addition to the above policies [39] on pollution, it should be noted that:

- The Environment and Territory policy [E-P02] aims to reduce the risk of excessive and improper use of pollutant chemicals[40] that could negatively impact water, air, soil and the health of workers, Consumers and end-users by complying with the quantity of chemicals set out in the OVS MRSL.
- The Code of Conduct [COC] requires suppliers to check for the presence of chemicals in wastewater at least every six months through a testing programme conducted by an accredited laboratory in order to prevent accidents and emergencies and to monitor the impact on people and the environment.

E2-2 AND E2-3 ACTIONS, RESOURCES AND TARGETS RELATED TO POLLUTION

In the 2024-2026 Strategic Sustainability Plan, OVS identified targets[41] to reduce pollution generated by its upstream and downstream value chain, with particular reference to product-related impacts, and to mitigate the risks associated with microplastics. All pollution targets are voluntary.

[39] See Environmental policies
[40] For details, see the Restricted Substance List on the group website.
[41] The targets set out in the table do not relate to the prevention and control of:
1. air pollutants and respective specific loads;
2. emissions to water and respective specific loads;
3. pollution to soil and respective specific loads.

IRO	Target	Target Description	Baseline[42]	FY 2025	FY 2024[43]	Scope
E2-IN01 E2-IN02	E-T03	65% of materials with reduced impact and traceable by 2026	2024		See E5-4	Upstream
E2-RS03	E-T08	Launch of the supplier reward process with improved environmental performance by 2026	2024	Supplier scorecard defined	Study started for supplier scorecard	Upstream
E2-IN01	E-T09	Adoption of Better Products guidelines by 2026	2024	Updating of the procedure for managing the most sustainable materials	Definition of criteria and scores and initial collection mapping	Upstream
E2-IN02 E2-RS03	E-T10	100% of waste water tested against the MRSL [44]	N/A		To be launched	Upstream
E2-RS01	E-T11	Diversification (type and origin) of cotton supply by 2026	2024		See E5-4	Upstream
E2-IN01 E2-IN02	E-T12	Review of Science Based Targets for Nature sourcing strategy by 2026	N/A		To be launched	Upstream

Similarly, relevant and priority actions[45] for OVS's business have been identified to achieve these targets, always prioritising the impacts generated in the supply chain. The timeframes for action implementation are in line with the targets set out in the table above, with the exception of ongoing actions, for which no completion date has been set.

[42] Where the target baseline year is 2024, the baseline value is that of the 2024 result. In other cases, the value is indicated in the comments for the relevant metric.
[43] The results achieved during the reference period are reported with reference to the metric, if applicable, or through summary data.
[44] The efficacy of the action in relation to the objective set will be monitored annually through reports on the number of tests carried out at Tier 1 suppliers, compiled by the managers of the offices acting on behalf of the subsidiaries OVS Hong Kong Sourcing Ltd and OVS India Sourcing Private Ltd.
[45] As 2024 is the first year of reporting under ESRS standards, OVS has not provided qualitative or quantitative information on the progress of the action or share plans described.

IRO	Action	Action Description	Status	Scope	Interested stakeholders
E2-IN01 E2-IN02 E2-RS01	E-A01	Selection and purchase of certified and low-impact materials and research and implementation of innovative fibres	Ongoing	Upstream	Suppliers, Employees

E2-RS03	E-A09	Establishing a rating system that rewards suppliers with improved environmental performance	Ongoing	Upstream	Suppliers, Employees
E2-IN01 E2-RS01	E-A10	Preference for biodegradable materials in collections through implementation of Better Products guidelines	Ongoing	Upstream / Direct	Suppliers, Employees
E2-IN02 E2-RS03	E-A12	Support and involvement of product suppliers in the wastewater analysis process	To be launched	Upstream	Suppliers/ Employees/Local Communities (production countries)

Targets and actions were determined based on an assessment of the downstream impacts of the supply chain, taking into account the possible leverage that OVS can apply, given that it does not manufacture clothing directly. For this reason, targets and actions mainly relate to planning product collections and related activities for sourcing materials[46].

[46] Plans for collections and sourcing materials are guided by the Scope 3 decarbonisation plan.

E2-4 POLLUTION OF AIR, WATER AND SOIL

The significant IROs identified with reference to the issue of sustainability "air, water and soil pollution" relate only to the upstream and/or downstream value chain, as OVS does not produce its products directly.

However, synthetic fibres are the second most used type of material, after cotton, in OVS clothing collections. Therefore, although it does not have a direct impact on the dispersion of microplastics, OVS considers its contribution to the increase in their concentration in the environment to be material. For this reason, OVS is committed to providing entity-specific metrics that can address this topic in the value chain. It currently adopts the transitional provision provided for in ESRS 1 no. 132 indicating that by adopting Better Products guidelines that favour the use of biodegradable materials (Action E-A10), OVS aims to reduce the impact of synthetic fibres on the environment.

OVS has not emitted any of the pollutants listed in Annex II to Regulation (EC) no. 166/2006 of the European Parliament and of the Council.

ESRS E3 Water and marine resources

E3-1 POLICIES RELATED TO WATER AND MARINE RESOURCES

In addition to the above policies[47] on pollution, it should be noted that:

- The Environment and Territory Policy [E-P02] addresses the issue of water resource management, in particular water use and supply, including building maintenance activities to reduce water consumption and initiatives to raise awareness about saving water among employees and those involved in company activities.
- The Code of Conduct [COC] addresses the issue of water resource management by requiring suppliers to take all necessary measures to reduce their use and to adopt methods aimed at reducing consumption during the production process.
- Both policies [E-P02] and [COC] look at designing products and services with a view to favouring production materials and treatment processes that use less water.
- The [E-P02] and [COC] policies apply to all suppliers regardless of the level of water risk present in the area where production takes place.
- It should be noted that OVS has not adopted any policies or practices related to the sustainability of the oceans and seas.

E3-2 AND E3-3 ACTIONS, RESOURCES AND TARGETS RELATED TO WATER AND MARINE RESOURCES

In its 2024-2026 Strategic Sustainability Plan, OVS defined objectives to reduce and mitigate the negative impacts and risks associated with water consumption in its supply chain, with particular reference to the cultivation of raw materials and production processes.

The targets set by OVS related to water include all OVS value chain operations, regardless of their level of water stress, and specifically refer to water consumption reduction, particularly with regard to operations upstream of the OVS value chain.

All targets set by OVS are optional and are not a legal requirement.

[47] See Environmental policies

IRO	Target	Target Description	Baseline[48]	FY 2025	FY 2024[49]	Scope
E3-IN01	E-T03	65% of materials with reduced impact and traceable by 2026	2024		See E5-4	Upstream
E3-IN01	E-T08	Launch of the supplier reward process with improved environmental performance by 2026	2024	Supplier scorecard defined	Study started for supplier scorecard	Upstream
E3-IN01	E-T09	Adoption of Better Products guidelines by 2026	2024	Updating of the procedure for managing the most sustainable materials	Definition of criteria and scores and initial collection mapping	Upstream
E3-0P01 E3-RS02	E-T11	Diversification (type and origin) of cotton supply by 2026	2024		See E5-4	Upstream
E3-0P01	E-T12	Review of Science Based Targets for Nature sourcing strategy by 2026	N/A		To be launched	Upstream

Similarly, relevant and priority actions for OVS's business have been identified to achieve these targets, always prioritising the impacts generated in the supply chain. The timeframes for action implementation are in line with the targets set out in the table above, with the exception of ongoing actions, for which no completion date has been set.

[48] Where the target baseline year is 2024, the baseline value is that of the 2024 result. In other cases, the value is indicated in the comments for the relevant metric.
[49] The results achieved during the reference period are reported with reference to the metric, if applicable, or through summary data.

IRO	Action	Action Description	Status	Scope	Interested stakeholders
E3-IN01 E3-0P01 E3-RS02	E-A01	Selection and purchase of certified and low-impact materials and research and implementation of innovative fibres	Ongoing	Upstream	Suppliers, Employees
E3-IN01	E-A08	Programme of monitoring and involvement of all the suppliers through the Higg platform and the completion of the FEM module (environmental)	Ongoing	Upstream	Suppliers, Employees, Industry coalition
E3-IN01	E-A09	Establishing a rating system that rewards suppliers with improved environmental performance	Ongoing	Upstream	Suppliers, Employees

The metrics used to measure progress and monitor targets are set out in this section and include those defined by ESRS.
Targets and actions were determined based on an assessment of the downstream impacts of the supply chain, taking into account the possible leverage that OVS can apply, given that it does not manufacture clothing directly. For this reason, targets and actions mainly relate to planning product collections and related activities for sourcing materials[50].

E3-4 WATER CONSUMPTION

In 2025, the OVS Group's water consumption came to 517,277 m3. 99% of direct water consumption is concentrated in Italy, with consumption of 515,311 m3.

WATER CONSUMPTION

Water consumption	2025	2024
Water consumption from areas not subject to water stress (m3)	127,902	148,342
Water consumption from areas subject to water stress (m3)	389,376	426,746
Total water consumption (m3)	**517,277**	**575,088**
Total water recycled and reused (m3)	0	0
Total water stored (m3)	0	0

[50] Plans for collections and sourcing materials are guided by the Scope 3 decarbonisation plan.

The water data have been calculated based on the readings of the relative meters, where available. For the remainder, consumption was estimated using an average per square meter that, for Italy, excluded stores with special features (e.g. evaporation towers, condensation systems), for which the actual data were used instead.
The water used is mainly taken from municipal water networks. With regard to water consumption in Italy, it is necessary to point out that this figure recorded for the stores comprises the sum of the consumption directly attributable to OVS and other consumption, not directly attributable, which is not currently measurable. This is the case when OVS subleases part of the premises leased to it without having a meter installed to specifically measure the consumption of the third party. OVS charges back for this consumption using methods not necessarily related to actual consumption.
As in 2024, water consumption from areas subject to water stress came to 74%, identified using the WWF "Water Risk Filter" tool. All places where OVS has stores or offices that have a medium to high risk of water stress were considered as areas subject to water stress.

INTENSITY OF WATER CONSUMPTION

Intensity of water consumption	**2025**	**2024**
Water consumption compared to revenue	0.30	0.35

ESRS E4 - Biodiversity and ecosystems

E4-1 TRANSITION PLAN AND CONSIDERATION OF BIODIVERSITY AND ECOSYSTEMS IN STRATEGY AND BUSINESS MODEL

OVS will draw up a transition plan focusing on biodiversity and ecosystems following the identification and prioritisation of the impacts on biodiversity generated by the OVS cotton supply chain, in line with the Science Based Targets for Nature (Action E-A12).

ESRS 2 SBM-3 - E4 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

As OVS does not manufacture clothing but only sells and distributes it, it has not identified any activities within its direct operations which have a negative impact on areas that are sensitive in terms of biodiversity.
OVS did not identify any material negative impacts with regard to soil degradation, desertification or soil sealing.
OVS direct operations have no impact on endangered species.

E4-2 POLICIES RELATED TO BIODIVERSITY AND ECOSYSTEMS

In addition to the above policies on biodiversity, [51]it should be noted that:

- The Environment and Territory policy [E-P02] does not cover the issues specified by ESRS E4 RA4;
- The Environment and Territory policy [E-P02] covers some issues relating to biodiversity, such as the Company's impacts biodiversity. OVS considers the impact in terms of natural resource use in all corporate activities, ensuring traceability of raw materials, favouring materials sourced from managed ecosystems to preserve nature's ability to regenerate, thus avoiding biodiversity loss. From a social point of view, preventing negative impacts on health and promoting the well-being of the communities in which it operates.
- The Environmental and Territory policy [E-P02] does not address dependencies, opportunities and physical and transition risks related to biodiversity.
- OVS does not adopt policies related to the protection of biodiversity and ecosystems with regard to its production sites, sustainable soil farming practices or policies, marine use practices or policies or policies to address deforestation.

[51] See Environmental policies

E4-3 AND E4-4 ACTIONS, RESOURCES AND TARGETS RELATED TO BIODIVERSITY

In its 2024-2026 Strategic Sustainability Plan, OVS defined objectives to reduce the negative impacts on biodiversity through the cultivation of OVS's raw materials (plant and animal fibres) and to mitigate the risks associated with biodiversity loss.

OVS did not apply ecological thresholds or use biodiversity offsets to define its biodiversity-related objectives.

The objectives are not aligned with the post-2020 global biodiversity framework or other international biodiversity and ecosystem policies and standards.

All targets set by OVS are optional and are not a legal requirement.

IRO	Target	Target Description	Baseline[52]	FY 2025	FY 2024[53]	Scope
E4-IN01	E-T01	Overall 46.2% reduction in CO2 emissions by 2030	2019	See E1-6		Upstream/ Direct/ Downstream
E4-IN01	E-T02	19.3% reduction in scope 3 carbon intensity relative to consolidated revenues in 2026	2023	See E1-6		Upstream/ Downstream
E4-IN01	E-T03	65% of materials with reduced impact and traceable by 2026	2024	See E5-4		Upstream
E4-IN01	E-T08	Launch of the supplier reward process with improved environmental performance by 2026	2024	Supplier scorecard defined	Study started for supplier scorecard	Upstream
E4-IN01	E-T09	Adoption of Better Products guidelines by 2026	2024	Updating of the procedure for managing the most sustainable materials	Definition of criteria and scores and initial collection mapping	Upstream
E4-RS01	E-T11	Diversification (type and origin) of cotton supply by 2026	2024	See E5-4		Upstream
E4-RS01	E-T12	Review of Science Based Targets for Nature sourcing strategy by 2026	N/A	To be launched		Upstream

[52] Where the target baseline year is 2024, the baseline value is that of the 2024 result. In other cases, the value is indicated in the comments for the relevant metric.

[53] The results achieved during the reference period are reported with reference to the metric, if applicable, or through summary data.

Similarly, relevant and priority actions for OVS's business have been identified to achieve these targets, always prioritising the impacts generated in the supply chain. The timeframes for action implementation are in line with the targets set out in the table above, with the exception of ongoing actions, for which no completion date has been set. All objectives have been defined with a view to prevention. OVS did not use biodiversity offsets in its action plans and did not incorporate local and indigenous knowledge.

IRO	Action	Action Description	Status	Scope	Interested stakeholders
E4-IN01	E-A01	Selection and purchase of certified and low-impact materials and research and implementation of innovative fibres	Ongoing	Upstream	Suppliers, Employees
E4-IN01	E-A08	Programme of monitoring and involvement of all the suppliers through the Higg platform and the completion of the FEM module (environmental)	Ongoing	Upstream	Suppliers, Employees, Industry coalition
E4-IN01	E-A09	Establishing a rating system that rewards suppliers with improved environmental performance	Ongoing	Upstream	Suppliers, Employees
E4-RS01	E-A13	Identifying and prioritising the impacts on biodiversity generated by the cotton supply chain, in line with the Science Based Targets for Nature	To be launched	Upstream	Suppliers, Employees

Targets and actions were determined based on an assessment of the downstream impacts of the supply chain, taking into account the possible leverage that OVS can apply, given that it does not manufacture clothing directly. For this reason, targets and actions mainly relate to planning product collections and related activities for sourcing materials[54].

[54] Plans for collections and sourcing materials are guided by the Scope 3 decarbonisation plan.

E4-5 IMPACT METRICS RELATED TO BIODIVERSITY AND ECOSYSTEMS CHANGE

OVS has not identified any sites within or near biodiversity-sensitive areas that are negatively affected by its operations. The company does not own or manage any sites located close to or within protected areas.
The contribution of OVS to changes in land use or to changes in freshwater use is not material through the double materiality assessment.
Following the results of the double materiality, it is noted that the relevant IROs related to biodiversity and ecosystems refer to the upstream value chain. Since there are no metrics within the ESRS relating to indirect impact analyses, and since the targets defined by OVS do not currently require entity-specific metrics, OVS does not provide metrics in this report, re-evaluating this assessment in subsequent financial years.

ESRS E5 - Resource use and circular economy

E5-1 POLICIES RELATED TO RESOURCE USE AND CIRCULAR ECONOMY

In addition to the above policies [55] on resource use and circular economy, it should be noted that:

- The Environment and Territory [E-P02] and Climate and Energy [E-P01] policies address the issues of reducing the use of virgin resources and the sustainable supply and use of renewable resources, in line with decarbonisation objectives. The policies also regulate the design of clothing in accordance with Eco-Design principles and the adoption by companies of initiatives to manage end-of-life products and reduce waste.
- OVS is committed to drawing up a Circular Economy policy by 2026.

{E5-2 AND E5-3 ACTIONS, RESOURCES AND TARGETS RELATED TO RESOURCE USE AND CIRCULAR ECONOMY

In its 2024-2026 Strategic Sustainability Plan, OVS defined objectives to reduce the environmental impacts generated at the various stages of the product life cycle and by packaging, and to mitigate risks arising from market trends and industry regulations. Particular attention was paid to increasing the percentage of recycled materials, choosing raw materials with a reduced environmental impact and launching services to care for and extend the life of garments.

All targets set by OVS are optional and are not a legal requirement.

[55] See Environmental policies

IRO	Target	Target Description	Baseline[56]	FY 2025	FY 2024[57]	Scope
E5-IN01 E5-IN02	E-T01	Overall 46.2% reduction in CO2 emissions by 2030	2019	See E1-6		Upstream/ Direct/ Downstream
E5-IN01 E5-IN02	E-T02	19.3% reduction in scope 3 carbon intensity relative to consolidated revenues in 2026	2023	See E1-6		Upstream/ Downstream
E5-IN01	E-T03	65% of materials with reduced impact and traceable by 2026	2024	See E5-4		Upstream
E5-IN02	E-T08	Launch of the supplier reward process with improved environmental performance by 2026	2024	Supplier scorecard defined	Study started for supplier scorecard	Upstream
E5-IN01	E-T09	Adoption of Better Products guidelines by 2026	2024	Updating of the procedure for managing the most sustainable materials	Definition of criteria and scores and initial collection mapping	Upstream
E5-IN01	E-T11	Diversification (type and origin) of cotton supply by 2026	2024	See E5-4		Upstream
E5-0P01 E5-IN02 E5-RS02	E-T13	Extension of repair services to the network [58]	2024	Extension of the service to 5 more stores	Launch of the "Tailoring services" pilot project in a selection of points of sale	Direct/ Downstream

[56] Where the target baseline year is 2024, the baseline value is that of the 2024 result. In other cases, the value is indicated in the comments for the relevant metric.
[57] The results achieved during the reference period are reported with reference to the metric, if applicable, or through summary data.
[58] The number of stores offering tailoring and repair services is updated every six months in consultation with the Sales Department, based on feedback from store managers and an assessment of demand for the service.

E5-IN01 E5-RS01	E-T14	Achieving the following percentages of recycled materials: 1% recycled cotton, 50% recycled wool, 70% recycled polyester and polyamide by 2026	2024	See E5-4		Upstream
E5-IN01 E5-RS01	E-T15	At least 50% of e-commerce packaging to be reusable by 2026	N/A	Reusable packaging use test started	To be launched	Upstream/ Direct

Similarly, relevant and priority actions for OVS's business have been identified to achieve these targets. The timeframes for implementing the actions are in line with the targets set out in the table above, with the exception of ongoing actions, for which no completion date has been set.

IRO	Action	Action Description	Status	Scope	Interested stakeholders
E5-IN01	E-A01	Selection and purchase of certified and low-impact materials and research and implementation of innovative fibres	Ongoing	Upstream	Suppliers, Employees
E5-IN01 E5-IN02	E-A08	Programme of monitoring and involvement of all the suppliers through the Higg platform and the completion of the FEM module (environmental)	Ongoing	Upstream	Suppliers, Employees, Industry coalition
E5-IN01	E-A09	Establishing a rating system that rewards suppliers with improved environmental performance	Ongoing	Upstream	Suppliers, Employees
E5-IN02	E-A11	Membership and participation in collective systems of extended producer responsibility for textile waste management (EPR)	Ongoing	Direct/ Downstream	Opinion leaders, Employees, Competitors, Local communities
E5-IN01	E-A14	Implementation of Better Products guidelines for collection design (with preferred use of single materials/single fibres and single components)	To be launched	Upstream/ Downstream	Suppliers / Employees
E5-IN02	E-A15	Launch of repair services (in-store or through agreements)	To be launched	Direct	Employees/ Customers
E5-IN02 E5-RS02	E-A16	Development of a programme dedicated to creating a durability indicator	To be launched	Direct	Employees, Customers, Institutions
E5-RS02	E-A17	Expanding and diversifying the OVS offer with ancillary and circular services (e.g. repair services)	Ongoing	Direct	Employees/ Customers
E5-RS01	E-A18	Increase in recycled materials, with priority given to synthetic fibres	Ongoing	Upstream/ Downstream	Suppliers / Employees
E5-RS01	E-A19	Use of reusable packaging for e-commerce	To be launched	Upstream/ Downstream	Suppliers/ Employees/ Customers

The metrics used to measure progress and monitor targets are set out in this section and include those defined by ESRS.
Similarly, relevant and priority actions for OVS's business have been identified to achieve these targets. Targets and actions were determined based on an assessment of the downstream impacts of the supply chain, taking into account the possible leverage that OVS can apply, given that it does not manufacture clothing directly. For this reason, targets and actions mainly relate to planning product collections and related activities for sourcing materials[59]. Specifically, in relation to the circular economy, a number of specific actions are identified relating to product Eco-Design (E-A11, E-A16) and the implementation of circular services for customers (E-A17) to encourage the extended use of clothing.

[59] Plans for collections and sourcing materials are guided by the Scope 3 decarbonisation plan.

E5-4 RESOURCE INFLOWS

The resources used by OVS along the upstream value chain mainly relate to raw materials used for the production of house-brand clothing and packaging for product transportation (hangers, polybags, boxes, etc.) and store fitting materials (window sheets, signage, etc.). This approach is consistent with the results of the double materiality assessment that have IRO relevance limited to house-brand clothing. Therefore data relating to materials used in cosmetics, home furnishings and third-party products not considered material in the double materiality assessment were excluded from this metric.

Note that the following definitions have been used in relation to the data reported below:

- materials of natural origin[60]: raw materials of plant or animal origin that have not undergone industrial chemical processing (e.g. cotton, linen, wool, wood, etc.);
- materials of technical origin: raw materials of fossil origin (e.g. polyester, polyamide, etc.) or of natural origin that have undergone industrial chemical processing (e.g. viscose, paper and other materials of cellulose origin);
- materials of natural origin from a sustainable supply chain: raw materials of natural origin produced in accordance with higher sustainability standards (e.g. GOTS or OCS standards);
- recycled materials of natural or technical origin: raw materials certified as originating in whole or in part from recycling processes (e.g. in line with GRS or RCS standards);
- materials of technical origin with other certifications: raw materials of technical origin sourced from entities or suppliers that guarantee low impact transformation and processing processes (e.g. Viscose from FSC certified cellulose, Tencel™, LivaEco™, etc).

With regard to product-related materials, the indicator is calculated based on the average weight of each product, divided by the percentage of fibres indicated in the composition of each component of the garment and taking into account any certifications specified in the product data sheet[61].

With regard to packaging materials, the data was obtained by considering the weight of the various elements, which are mainly paper, cardboard and plastic. For POP materials, the weight of the materials was obtained from the suppliers.

[60] Corresponding to "organic materials" defined in ESRS E5-4.
[61] This calculation has an estimation error equivalent to the amount of waste along the supply chain, which will be included in the next report.

INFLOWS OF NATURAL AND TECHNICAL ORIGIN

Total materials	**35,744**	**100%**	**34,587**	**100%**

For its textile production, OVS uses raw materials of natural origin, mainly cotton - which is the most used raw material - and of technical origin, such as polyester and polyamide.
Of the 23,465 tonnes of cotton used in the collection, 1% is recycled, 32% is certified as organic (according to GOTS or OCS). OVS has launched a sourcing strategy to gradually migrate the quantities of BCI Mass-Balance cotton to BCI-Physical cotton, to ensure a greater traceability of raw materials. 4% of cotton already follows this criterion, while 39% comes from crops that follow the Better Cotton standards, but is quantified through the mass-balance system.

Under OVS's cotton sourcing policy, 100% of material is selected from certified sources. The 11% discrepancy represents types of cotton that, in order to comply more closely with the ESRS, and despite being from virtuous supply chains, have been excluded, as no third-party certification was obtained (for example Italian cotton), or because of situations where the certificate for the material was still being issued at the closing of this Sustainability Report.

In general, data were constructed from the Transaction Certificates received from suppliers, for the certifications that require them, and from the SCOT systems for Cotton Made in Africa and from the Sourcing Reports available on the online platform for BCI Mass Balance and BCI Physical.
Polyester is the second most used raw material, representing 18% of total raw materials, and 51% of it is recycled (GRS or RCS certified).
Viscose and other materials of cellulose origin account for 5% of total raw materials, with 66% sourced from more sustainable sources [62] (FSC certified or from specific suppliers who certify their analysis of the material's life cycle).
Wool accounts for around 1% of total raw material supply and is 10% recycled (GRS or RCS certified).
Focusing on the materials used for the core business, 73% are sourced overall from a sustainable or recycled supply chain (26% from mass-balance systems and 47% from traceability systems).
With regard to packaging, it should be noted that all polybags used for transport from the countries of production and plastic hangers are made with recycled materials. In addition, the Pontenure logistics centre runs a programme to recover boxes and pallets so that they can be reused.

E5-5 RESOURCE OUTFLOWS

Products and materials

The clothing sector currently makes little use of circular economy systems, although there is promising growth in technologies and initiatives. Textile products reach the end of their life for functional reasons (the product is damaged or worn out and is no longer fit for its intended use) or for emotional reasons (the garment is no longer liked or is no longer fashionable).
OVS has worked over the years to improve the quality of its products and increase their functional durability, implementing physical and mechanical testing programmes to assess product resistance to washing, drying, abrasion, etc., which are shared with the suppliers involved in production. Furthermore, a process of stylistic simplification has been underway for some time, aiming to create timeless garments that, while incorporating contemporary design, are less sensitive to fashion trends and therefore have a longer life from an emotional point of view.
There is currently no specific indicator for product durability, but the development of a dedicated tool for this measurement is being assessed.

All OVS products can be repaired, depending on the nature of the damage and the consumer's willingness to deem the repair satisfactory for the continued use of the product. Replacement parts are supplied for many products (e.g. buttons or zip pulls).
The process of stylistic simplification has also made it possible to focus on materials with simpler compositions which are therefore easier to recycle at the end of their life.
66% of our items can be successfully sent for textile recycling at the end of their life cycle thanks to their single-material composition or compositions that are compatible with current recycling technologies.
The remainder can be sent to recycling processes intended for other industrial sectors or for energy recovery. A negligible share of less than 1% does not have an identifiable recovery channel.
This information is based on the Eco Valore[63] circularity index, which shows how recyclable a piece of clothing is on a scale from 1 to 10. During 2021, OVS worked with the University of Padua to refine its calculation methodology based on existing scientific standards and real-world considerations related to actual recoverability. The indicator considers the type of fibres used (i.e. cotton, polyester, wool), the number of different fibres in the composition and the number of components (i.e. front, back, padding).
The materials used for packaging are 100% recyclable.

[62] See the definition of materials with other certifications.
[63] Eco Valore is a set of indicators that describe the impact of products brought to market, using three values: CO_2 and water consumption during production and a circularity index that assesses the recyclability of the product at the end of its life.

Waste

The amount of waste produced in 2025, equal to 11,088 tonnes, was managed under an ISO 14001 certified system.
The information shown in the previous table was determined on the basis of final data of head office, part of the store network and on sites. Data on waste by category was extracted from forms provided by the private companies that manage waste collection and disposal, for stores that use municipal collection services, the waste quantities by category were estimated using an average per square metre.

NON-HAZARDOUS RESOURCE OUTFLOWS BY CATEGORY (TONNES)

	2025	2024
Paper and cardboard	3,300.93	2,465.18
Mixed packaging	3,865.97	3,356.21
Plastic	2,158.40	2,057.46
Clothing	49.37	6.68
Wood	322.99	362.37
Toner	3.83	1.20
Metal - iron and steel	144.94	288.95
Non-hazardous batteries	0.44	0.39
Bulky waste	532.30	630.17
End-of-life equipment	30.98	23.71
Glass	8.65	10.56
Unsorted	204.83	247.49
Gas in pressurised containers	0.20	0.21
Other materials	6.51	45.28
Site waste	457.99	542.78
Total	**11,088.33**	**10,038.62**

HAZARDOUS RESOURCE OUTFLOWS BY CATEGORY (TONNES)

	2025	2024
Hazardous batteries	0.26	0.30
Fluorescent tubes	5.34	2.88
Equipment containing CFCs	0.03	0.20
End-of-life equipment	6.28	5.16
Paints and varnishes containing organic solvents or other hazardous substances	2.57	0.01
Bio-waste containing hazardous substances	0.07	26.58
Absorbent filter materials	0.23	0
Packaging containing residues of hazardous substances	0.10	0.16
Other hazardous materials	0.02	2.15
Hazardous site waste	3.41	2.45
Total	**18.31**	**39.89**

Waste data was obtained by reviewing disposal forms and, where unavailable, by using an estimate based on average waste production per square metre applied to the floor space of sites/sales outlets for which no direct data was available.

With regard to the methods used to dispose of the waste generated by the Group, 89% of the waste produced was sent for recycling (unchanged from 2024), and approximately 5% was sent for incineration with energy recovery (unchanged from 2024). Approximately 6% is sent for thermal treatment (unchanged from 2024) and the remaining 0.25% goes to landfill (0.18% in 2024). This information on disposal channels was obtained by reviewing a study conducted by a specialist company that analysed the distribution of waste across the various channels.

METHODS OF DISPOSAL AND RECOVERY OF OUTGOING RESOURCES (TONNES)

	2025			2024		
	Hazardous	Non-hazardous	Total	Hazardous	Non-hazardous	Total
Recycling	14.32	9,887.80	9,902.12	35.37	8,894.65	8,930.02
Incineration (with energy recovery)	1.01	533.95	534.96	1.95	488.58	490.53

3. Social information

Social policies

The policies adopted by OVS that cover social issues are:
- [S-P01] Labour and Human Rights Policy
- [S-P02] Diversity, Equity and Inclusion Policy
- [S-P03] Hybrid Working and Smart Working Policy
- [S-P04] Performance Development and Evaluation Policy
- [PPP] Purchasing Practices Policy
- [EC] Code of Ethics[64]
- [COC] Code of Conduct[65]

The impacts, risks and opportunities referred to in the above policies are the result of double materiality assessment, as described above (Ref. IRO-1).
The policies are updated periodically by the responsible departments and shared on the company intranet for the benefit of all employees. These are available on the group's corporate website. All Company Departments are periodically informed about policy updates.

[S-P01] LABOUR AND HUMAN RIGHTS POLICY

Reference IRO	Scope	Function responsible for implementation
S1-IP01, S1-RS02, S2-IN02, S2-IP01, S2-RS01, S2-RS02, S2-RS03, S2-RS04 (Ref. SBM-3)	Upstream/Direct (Ref. SBM-1)	Corporate Sustainability Function Human Resources and Organisation Department

The Policy sets out the basic principles of conduct that all group employees must follow[66], addressing human rights and labour rights, such as the right to health and safety, fair pay, reasonable working hours, protection from harassment, abuse and discrimination.

[64] Although the Code of Ethics is a code and not strictly a policy, it is included in this section because it performs a similar function.
[65] [COC] Code of Conduct in Environmental policies
[66] In setting out these principles, a number of international frameworks were used as reference points, including the United Nations Universal Declaration of Human Rights, the conventions of the International Labour Organisation and the European Convention on Human Rights. This policy condemns child labour and forced labour.

[S- P02] DIVERSITY, EQUITY AND INCLUSION POLICY

Reference IRO	Scope	Function responsible for implementation
S1-IP01, S1-RS02, S1-RS01, S1-OP01, S4-IP01 (Ref. SBM-3)	Direct (ref. SBM-1)	Human Resources and Organisation Department

The policy sets out some general principles[67] that guide the company's activities and management with a view to protecting and promoting diversity. It also regulates the areas and methods of application in relation to remuneration policies, personnel selection, career development, training and welfare programmes, resource management and relationships with the affected communities.
The Diversity Equity and Inclusion policy is prepared with input from the Works Council for Diversity Equity and Inclusion.

[S-P03] HYBRID WORKING POLICY AND FLEXIBLE WORKING GUIDELINES

Reference IRO	Scope	Function responsible for implementation
S1-RS01 (Ref. SBM-3)	Direct (ref. SBM-1)	Human Resources and Organisation Department

This policy governs remote working. Smart working is a way of carrying out work that represents an opportunity for the company to improve the well-being of workers and increase their productivity. It also helps to reduce potential absences at work and, at the same time,the risk that inflexible working hours may lead to increased staff turnover.
The policy is written and updated by the Human Resources and Organisation Department and shared via the company intranet for the benefit of all employees.

[S-P04] PERFORMANCE DEVELOPMENT AND EVALUATION POLICY

Reference IRO	Scope	Function responsible for implementation
S1-RS01, S1-OP01 (Ref. SBM-3)	Direct (ref. SBM-1)	Human Resources and Organisation Department

[67] In setting out these principles, the most recent versions of the following private sector standards and voluntary initiatives were used as reference points: United Nations Sustainable Development Goals; the 10 principles of the Global Compact; the Organisation for Economic Co-operation and Development (OECD) guidelines for multinational enterprises; the ILO Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy; the DEI Observatory guidelines of the UN Global Compact Network Italy.

The policy sets out the rules by which individual objectives are agreed in the context of work activities and the assessment methods for quantifying results. The latter aims to enhance individual skills, improve the involvement of all employees in activities and raise awareness of company objectives.
The policy is written and updated by the Human Resources and Organisation Department and shared via the company intranet for the benefit of all employees.

[PPP] PURCHASING PRACTICES POLICY

Reference IRO	Scope	Function responsible for implementation
S2-IN01, S2-IN03, G1-RS01 (Ref. SBM-3)	Upstream (product suppliers) (Ref. SBM-1)	Operations, Sourcing, Buying and Merchandising Department

The Purchasing Practices Policy governs OVS's standards of conduct in building fair and just relationships with product suppliers[68]. Taking into account the dynamic nature of the business, which is subject to seasonal peaks, a number of rules have been established regarding order planning, supply costs and negotiation margins, payment terms and the system for collecting periodic feedback.
The Purchasing Practices Policy is updated by the Operations, Sourcing, Buying and Merchandising Department and shared via the company intranet for the benefit of all employees. This is available on the group's corporate website. All Company Departments are periodically informed about policy updates.

[CE] CODE OF ETHICS

Reference IRO	Scope	Function responsible for implementation
S2-IP02, S2-OP01, S2-RS03, S4-OP1, S4 - RS01, G1-OP01, G1-RS01 (Ref. SBM-3)	Upstream/Direct/Downstream	All corporate functions

[68] The policies do not make explicit reference to international frameworks.

In its Code of Ethics, OVS identifies the ethical and behavioural principles that apply to all Group companies[69], highlighting the rights, duties and responsibilities of all those who, in any capacity, work for or collaborate with them (directors, statutory auditors, managers, employees, external contractors, commercial partners, suppliers and, more generally, any other person with whom there is contact). The Code of Ethics also reports OVS's commitment to preventing and combating active and passive corruption, sanctioning any corrupting behaviour (including, for example, the giving or promise of donations in money or other benefits, also in the form of gifts or benefits of any kind, hiring, etc.) in relationships with interlocutors or partners. In particular, any conduct involving the giving or promising of money or other benefits to any person belonging to other organisations is prohibited, even if such conduct could result in a direct or indirect advantage for the Company. In this regard, the company also condemns any corrupting behaviour aimed at obtaining from its interlocutors or partners any information relating to third parties or the disclosure of industrial and business secrets or in any case of confidential data or know-how. This commitment applies to both employees and third parties, through an appropriate disciplinary system and with the provision of specific "ethical" contractual clauses.

The Code of Ethics was adopted by resolution of the Board of Directors of the company on 27 October 2014 and subsequently updated by resolution of the Board of Directors, most recently on 20 September 2023.

ESRS S1 - Own workforce

SBM-2 S1 INTERESTS AND VIEWS OF STAKEHOLDERS

OVS considers the needs of its employees when designing the corporate strategy and model by listening closely over time and through direct dialogue.

The materiality of impacts, risks and opportunities related to own workforce is assessed every two years, through a dedicated survey sent to all employees.

The results of the survey are analysed by the Human Resources and Organisation Department to identify any priorities for intervention relating to positive or negative impacts, when planning activities and defining business strategies. Significant changes in risks or opportunities are shared with the Control, Risks and Sustainability Committee within the company's general Risk Assessment process.

Employee representatives have been informed of the IRO analysis (Ref. SBM-2 Interests and views of stakeholders).

SBM-3 S1 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

The OVS business model relies heavily on its workforce. More than 10,000 people, mainly employed at points of sale, work for the Group and represent the core of the business: for this reason all actions directed at the workforce are closely integrated into the corporate strategy.

The workforce mainly consists of personnel working at points of sale under permanent contracts, for whom the most significant impacts have been identified. Given its business model, OVS also uses fixed-term employment contracts to cover peak periods due to seasonality, and a significant number of workers who are not employees, hired through temporary employment agencies to cover extraordinary activities or temporary labour shortages.

The headquarters in Italy is home to Administration and Control, Human Resources and Organisation, Product Design, Marketing, Sourcing, Logistics, IT, Digital Business and other departments.

The workforce described above, including workers in foreign offices, represents all the workers for whom impacts, risks and opportunities have been assessed (ESRS 2 SBM-3). No negative impacts on the workforce resulting from climate transition plans were identified. OVS does not carry out any direct operations that involve a risk of forced labour or child labour.

The results of the assessment of impacts, risks and opportunities referred to in paragraph SBM-3 are summarised below.

Summary of positive impacts

- Providing stable, fair (with low levels of gender pay gap) and diverse job opportunities with a breadth of roles and tasks covered by the various business functions.

Summary of risks

- Discrimination or failings in health and safety management at work can lead to penalties and reputational harm, as well as contributing to negative turnover
- Jobs that are not always compatible with a good work-life balance can lead to increased turnover and the loss of key skills

[69] In setting out these principles, the Code of Ethics refers to private sector standards and international frameworks, including the United Nations Universal Declaration of Human Rights, the conventions of the International Labour Organisation and the European Convention on Human Rights. This policy condemns child labour and forced labour.

Opportunity Summary

- Attracting and retaining talent through the provision of an inclusive and fair working environment that ensures opportunity and growth for all.

S1-1 POLICIES RELATED TO OWN WORKFORCE

In relation to its own workforce, OVS adopts the policies described in the paragraph Social policies in line with the impacts, risks and opportunities considered material.

Specifically with regard to human rights, policies on Labour and Human Rights and on Diversity Equity and Inclusion adhere to the guiding principles of the United Nations. The Labour and Human Rights policy also refers to ILO and OSCE guidelines. OVS does not tolerate any form of forced labour or child labour.

OVS has adopted a occupational safety management system that includes a series of activities designed to monitor the safety of workers and reduce the risk, identified among those considered significant, of accidents involving non-compliance with safety regulations.

The group has adopted a Diversity, Equity and Inclusion policy aimed at reducing the risk of harassment and discrimination based on various forms of diversity, such as age, gender identity, sexual and emotional orientation, religious and political beliefs, ethnicity and cultural background, physical and intellectual disabilities, and psychological and social fragility. Any non-compliance with the policy can be reported through the Whistleblowing platform available on the corporate website and open to all stakeholders.

The company has not yet made any policy commitments on inclusion issues.

S1-2 PROCESSES FOR ENGAGING WITH OWN WORKFORCE AND WORKERS' REPRESENTATIVES ABOUT IMPACTS

In the process of assessing and defining material, actual and potential impacts, employees were involved by being asked to complete a questionnaire, shared annually, in which they were asked to rate the importance of sustainability issues (corresponding to the ESRS principles) using a score from 1 (can wait) to 3 (act now).

The survey is sent directly to all employees by Human Resources. The company intranet has a section open to all employees where they can send suggestions, opinions and ideas on inclusion and sustainability issues.

Employee representatives were involved in the approval stage of assessing material, actual and potential impacts on the workforce.

Employees' needs are recorded and mapped during one-to-one performance reviews, which the department manager conducts annually with their team.

S1-3 PROCESSES TO REMEDIATE NEGATIVE IMPACTS AND CHANNELS FOR OWN WORKFORCE TO RAISE CONCERNS

No significant negative impacts on consumers and end-users have been identified following the double materiality assessment. However, the company provides channels for raising concerns, which are also open to consumers and end-users[70].

S1-4 AND S1-5 ACTION AND TARGETS RELATED TO OWN WORKFORCE

In its 2024-2026 Strategic Sustainability Plan, OVS defined objectives to improve the working conditions of its employees and to promote their growth and satisfaction.

[70] For more information see S2-3 Processes to remediate negative impacts and channels for value chain workers to raise concerns

IRO	Target	Target Description	Baseline[71]	FY 2025	FY 2024[72]	Scope
S1-IP01	S-T01	100% of people from level 3 to senior management to receive performance reviews by 2026	2024		See S1-13	Direct
S1-IP01 S1-RS02 S1-0P01	S-T02	Obtain Uni Pdr 125 certification by 2026	2024	Obtaining certification	Drafting of the DEI Policy Establish-ment of the DEI Committee	Direct
S1-RS02	S-T03	Define guidelines for managing vulnerable individuals and ensure reasonable accommodations are in place by 2026	N/A		To be launched	Direct
S1-RS02	S-T04	Implementation of a system to monitor the satisfaction and well-being of OVS employees by 2026	N/A		To be launched	Direct
S1-RS01	S-T05	Ensure all stores in the sales network can choose the organisational model (NOL or MOA) best suited to them by 2026	2023	NOL programme activated in 410 stores	Pilot phase completed, project roll out underway	Direct

Similarly, relevant and priority actions for OVS's business have been identified to achieve these targets. The timeframes for action implementation are in line with the targets set out in the table above, with the exception of ongoing actions, for which no completion date has been set. No significant resources have been allocated to impact management.

[71] Where the target baseline year is 2024, the baseline value is that of the 2024 result. In other cases, the value is indicated in the comments for the relevant metric.
[72] The results achieved during the reference period are reported with reference to the metric, if applicable, or through summary data.

IRO	Action	Action Description	Status	Scope	Interested stakeholders
S1-IP01	S-A01	Performance review programmes guaranteed for all roles from level 3 to senior management	Ongoing	Direct	Employees
S1-IP01	S-A02	Annual salary reviews with assessment of gender pay gaps within each function	Ongoing	Direct	Employees
S1-IP01	S-A03	Continued development programmes include refresher courses for all employees on digital skills, soft skills in leadership, teamwork and communication. Product training courses developed specifically for the sales network	Ongoing	Direct	Employees
S1-RS02 S1-0P01	S-A04	Development of a DEI Plan and definition of actions necessary to maintain certification	Ongoing	Direct	Employees, local communities
S1-RS02	S-A05	Reasonable accommodation to identify the correct employment position based on health status	To be launched	Direct	Employees
S1-RS01	S-A06	Formalisation of Smart Working	Ongoing	Direct	Employees
S1-RS01	S-A07	Extension of the offer of a new organisational model for store employees (NOL - New Work Organisation) to be joined on a voluntary basis	Ongoing	Direct	Employees
S1-0P01	S-A08	Welcome project for the professional integration of refugees and beneficiaries of international protection residing in Italy	Ongoing	Direct	Employees, local communities

Action planning and target setting are based on assessments that take into account not only the double materiality assessment but also feedback gathered during annual performance reviews (with managers and HR) as part of the individual needs assessment process.
The metrics used to measure progress and monitor targets are set out in this section and include those defined by ESRS.

S1-6 CHARACTERISTICS OF THE UNDERTAKING'S EMPLOYEES

The OVS Group has 10,343 employees [73] worldwide, with a clear predominance of women, which is in line with the sector. The workforce is spread across ten countries: Italy, Croatia, Serbia, Spain, China, Bangladesh, India, Turkey and Pakistan. The workers at headquarters and those in the Italian sales network of OVS represent the majority of the workforce. Note that the figures for the number of employees in Italy for FY 2025 include the employees of Goldenpoint, acquired on 1/7/2025. Excluding the new subsidiary, the number of employees in Italy would be 8,451, a slight increase compared to 2024.

NUMBER OF EMPLOYEES BY GENDER (ITALY)

	2025	2024
Gender	**Number of employees (number of people)[74]**	
Women	8,153	6,419
Men	1,733	1,685
Total employees	9,886	8,104

Most of the workforce are workers on permanent contracts. However, the types of activities of OVS's network of stores require a flexible operating model with extensive use of part-time working. In 2025, the Group also employed 1,909 temporary workers.

NUMBER OF TEMPORARY/PERMANENT EMPLOYEES BY GENDER

2025			2024		
Women	**Men**	**Total**	**Women**	**Men**	**Total**
Number of fixed-term employees			Number of fixed-term employees		
1,669	240	1,909	1,136	243	1,379
Number of permanent employees			Number of permanent employees		
6,734	1,700	8,434	5,527	1,626	7,153[75]
Number of full-time employees			Number of full-time employees		
4,533	1,850	6,383	4,284	1,801	6,085
Number of part-time employees			Number of part-time employees		
3,870	90	3,960	2,379	68	2,447
Number of employees with variable hours			Number of employees with variable hours		
0	0	0	0	0	0

[73] The figures below refer to the number of OVS Group employees at 31 January 2026, as recorded in the company's employee register.
[74] The figures below refer to the number of people with an employment contract with OVS Italia at 31 January 2026, as recorded in the company's employee register.
[75] Figure at 31 January 2026, as stated in the Consolidated Financial Report. The Consolidated Financial Report also includes the average number of permanent employees across the group, which is not relevant for this SR.

OVERALL EMPLOYEE TURNOVER

2025			2024		
Women	**Men**	**Total**	**Women**	**Men**	**Total**
Number of employees leaving			Number of employees leaving		
848	255	1,103	724	246	970
% employees leaving			% employees leaving		
10 %	13 %	11%	11%	13 %	11%

In 2025, the OVS Group's employee turnover rate was 11%, [76], and stable compared to 2024.

[76] The turnover rate is calculated as the ratio between the number of permanent and temporary employees no longer in the workplace on a voluntary basis or due to redundancy, retirement or death in service and the number of employees at 31 January 2026.

S1- 7 CHARACTERISTICS OF NON-EMPLOYEES IN THE UNDERTAKING'S OWN WORKFORCE

OVS employs agency staff on temporary contracts to cover sales roles in stores and, to a lesser extent, staff roles at its offices. In 2025, the total number of non-employees working for OVS was 967 (compared to 1083 in 2024), including 241 men and 726 women[77].

S1-8 COLLECTIVE BARGAINING COVERAGE AND SOCIAL DIALOGUE

	Coverage by collective bargaining	Social dialogue
Coverage ratio	**Employees - EEA[79]**	**Representation in the workplace (EEA only)**
0-19%		Italy - Headquarters Italy - Sales Network
20-39%		
40-59%		
60-79%		
80-100%	Italy	

99.5%[78] of the Group's employees are covered by collective agreements, a slight increase compared to 2024.

The working conditions of OVS S.p.A Italia employees are regulated by the National Collective Labour Agreement for Modern Organised Distribution (CCNL DMO), signed by Federdistribuzione with Filcams - CGIL, Fiscascat - CISL, UILTuCS-UIL and UGL. OVS also applies a second-level agreement (supplementary company contract) drawn up with the main national trade unions representing employees on a company level, strengthening the exercise of trade union freedoms for its employees.

The National Collective Agreement and the supplementary company contract signed by the parties regulate both the rights of all employees and the procedures for establishing their representation in the workplace (RSU/RSA/Company Delegates).

As a result of the agreements entered into, which led the parties to sign the supplementary company agreement, the right to worker representation has been extended to operating units with up to 15 employees, where the trade union representative may be appointed jointly by the trade unions that signed the agreement, a "National Coordination Committee" has been set up composed of trade union representatives from the various units, with the company covering the cost of a set number of hours of trade union leave per year, and joint committees have been set up to deal with specific issues.

The working conditions set out in the National Collective Labour Agreement also apply to workers who are not employees.

S1-9 DIVERSITY METRICS

Gender distribution in top management shows an imbalance towards males, but an improvement in the Executives cluster (from 20% in 2024 to 27% in 2025), partly due to the acquisition of Goldenpoint. Top management is seen here as reporting directly to the Chief Executive Officer. For greater clarity in reading the indicator, the gender distribution for other management positions is also reported.

GENDER DISTRIBUTION OF TOP MANAGEMENT

2025		2024	
Women	**Men**	**Women**	**Men**
Top Management		Top Management	
2	9	2	7
% distribution by gender Top Management		% distribution by gender of Top Management	
18%	82%	22%	78%
Managers		Managers	
26	72	16	64
% distribution by gender Managers		% distribution by gender of Managers	
27%	73%	20%	80%

[77] The figures shown refer to the number of people who worked for OVS under an agency contract between 1 February 2025 and 31 January 2026 within the OVS group, as recorded in the payroll.

[78] The percentage is the average of the entire reporting scope. Data relating to OVS S.p.A. are entered into the data collection platform by the Human Resources Department. For subsidiaries in Hong Kong, India, Croatia, Serbia and Spain the data was provided by the HR managers of each office through the data collection platform who checked the existence of a national collective agreement. In the European Economic Area, all workers are covered by national contracts. Outside the EEA, OVS employees in Pakistan, India and China are not covered by collective agreements, in line with local legislation.

[79] EEA here stands for European Economic Area.

EMPLOYEE DISTRIBUTION BY AGE BRACKET

2025			2024		
Women	**Men**	**Total**	**Women**	**Men**	**Total**
<30			<30		
1,617	326	1,943	1,287	327	1,614
30-50			30-50		
4,561	1,064	5,625	3,878	1,094	4,972
> 50			> 50		
2,225	550	2,775	1,498	448	1,946

S1-10 ADEQUATE WAGES

All OVS Group employees receive adequate wages, which are determined, for OVS Italia employees, based on compliance with the provisions of the National Collective Labour Agreement for Modern Organised Distribution (CCNL DMO). All employees in foreign companies are guaranteed a salary in line with local market rates[80].

S1-11 SOCIAL PROTECTION

All employees of the OVS Group are covered by social protection (sickness, unemployment as soon as the employee starts working for the company, accidents at work and acquired disabilities, parental leave and retirement), in accordance with individual country regulations[81]. In Croatia, Serbia, Spain and Turkey the cover includes sickness, unemployment as soon as the employee starts working for the company, accidents at work and acquired disabilities, parental leave and retirement.

Parental leave is not recognised in Bangladesh. In India, there is no coverage for sickness, unemployment or paternity leave. China covers sickness, unemployment, accidents, parental leave and retirement. Under Hong Kong legislation, there is no cover for unemployment or retirement.

S1-12 PERSONS WITH DISABILITIES

Most of the OVS workforce consists of staff working in stores, carrying out tasks that are not always compatible with disabilities. The percentage of employees of the OVS Group with disabilities[82] is 3% (3% of women and 3% of men), in line with 2024. The shortfall is covered by programme agreements entered into with individual municipalities and work orders pursuant to Article 14 of Legislative Decree no. 276/2003.

S1-13 TRAINING AND SKILLS DEVELOPMENT METRICS

To facilitate staff development, a structured performance management system has been implemented to periodically appraise work performance by means of formal meetings with managers to analyse to what extent employees have achieved the targets set and progressed on their career development path. Generally, OVS's performance management provides for periodic formal meetings with managers, individual or group appraisals and observations on the ground by line managers or HR personnel.

In 2025, the percentage of employees participating in performance reviews[83] was 20% (15% women and 40% men), down slightly from 21% in 2024 (15% women and 44% men). All employees included in performance management participated in the appraisal process; the goal for the coming years is to extend the process to all employees. Goldenpoint does not currently have an internal performance appraisal system in place.

The average number of training hours[84] per employee in 2025 was 23.02 (25.03 in 2024). Female employees received 17.8 hours of training in 2025 (23.04 in 2024) and men received 45.8 hours (32.14 in 2024).

Total hours of training given to employees of OVS S.p.A. increased compared to 2024. However, the total average per employee at group level fell slightly, due also to the acquisition of Goldenpoint, which did not register any training activities during 2025.

[80] For all companies in the consolidated accounting group and companies over which operational control is exercised, the data were provided by the Human Resources managers of each office, who periodically analyse the pay conditions of OVS employees using an approach structured as follows: compliance with OVS Employment and Human Rights Policy, comparison of the company's wages with those of companies in the same sector operating in the same country, assessment against the Global Living Wage Coalition standards and collection of employee feedback.

[81] In Italy, coverage is in line with the provisions of the National Collective Labour Agreement for Modern Organised Distribution (CCNL DMO) and covers all aspects required by the ESRS. For all companies in the consolidated accounting group and the companies over which operational control is exercised, the data were provided through communication from the Human Resources managers who verified that the contracts entered into with workers complied with the regulations of the relevant country.

[82] The data comes from the disability report submitted annually by the Human Resources and Organisation Department to the Ministry of Labour in relation to OVS S.p.A and from reports provided by managers of foreign offices. Persons with disabilities are defined as persons with a physical, mental, intellectual or sensory impairment recognised by a special medical committee.

[83] The data is obtained from reports managed by the Human Resources and Organisation Department.

[84] The data is obtained from reports on training sessions managed by the Human Resources and Organisation Department.

S1-14 HEALTH AND SAFETY METRICS

100% of OVS workers[85] are covered by a health and safety management system in line with the regulations of each country in which the company operates[86].

NUMBER OF WORK-RELATED INJURIES

	2025	2024
Type of incident	**No.**	
Work-related injuries	88	82
Occupational diseases	0	1
Deaths due to occupational-related injury and diseases	0	0
Accident frequency index (no. of accidents X 1,000,000/no. of hours worked)	7	7
Type of days lost		
No. of days lost due to accidents	2,130	2,002
No. of days lost due to occupational diseases	0	0

In 2025, 2,130 days were lost due to accidents; no days were lost due to occupational diseases.

S1-15 WORK LIFE BALANCE METRICS

Parental leave is recognised for all employees of OVS Italia. The recognition of this right is regulated by the National Collective Labour Agreement for Modern Organised Distribution CCNL DMO. In other countries, this right is recognised for all employees, in accordance with country specific regulations[87].

EMPLOYEES WHO ARE ENTITLED TO AND HAVE TAKEN PARENTAL LEAVE BY GENDER

2025			2024[88]		
Women	**Men**	**Total**	**Women**	**Men**	**Total**
% employees entitled on family leave			% employees entitled on family leave		
11%	9%	11 %	3%	2%	3%
% Employees who have taken leave family member			% Employees who have taken leave family member		
96%	66%	92%	77%	16%	68%

The reporting standard requires the percentage of those who have taken leave to be indicated, calculated based on the total number of employees with the right to do so. It is important to note that the Law or employment contract grants all persons this possibility, provided they are in the conditions that guarantee the exercise of the right.

It is necessary to specify that, when calculating the indicator, the population entitled to family leave was identified considering workers who were in a position to actually exercise the right (for example, following the birth of a child or if the need arose to care for a relative with a disability, etc.). Entitled persons were identified considering all workers who in the period from 01/02/2025 to 31/01/2026 completed maternity or mandatory parental leave, thus also making the right to benefit from optional parental leave accrue, as well as all workers who in the period from 01/02/2025 to 31/01/2026 benefited from the concessions granted by Law 104.

S1-16 REMUNERATION METRICS

The analysis of remuneration differences within the OVS Group must take into account the different workforce composition of the group companies that, in some cases, do not have a sufficient number of employees to make the data statistically significant.

Data relating to OVS S.p.A., which represents more than 80% of the total headcount, were also analysed[89] more precisely for 2025. The pay differences in the company were identified, shown in the tables below, providing an overview of both head office and store roles.

[85] Information is also be provided for workers operating on company sites, such as value chain workers if operating on company sites.
[86] The data reported is extracted from the payroll and attendance records. This information is also sent monthly to the INAIL (National Institute for Insurance against Accidents at Work) for OVS S.p.A. workers.
[87] In Bangladesh, the right to parental leave is not recognised by law and in India it is only recognised for women.
[88] Data from 2024 were recalculated using the methodology used in 2025.
[89] The analysis was carried out using the methodology specified by the ESRS.

OVS S.P.A. GENDER PAY GAP - OFFICE ROLES

Role	2025	2024
Top Management	(1)%	2%
Managers	3%	6%
Executives	1%	1%
1st level employees	6%	7%
2nd level employees	2%	2%
3rd level employees	(3)%	(2)%
4th level employees	(1)%	0 %
5th level employees	(1)%	0 %

As can be seen from the table above, the gender pay gap for head office roles is very limited and below market parameters. The analysis would require further investigation to explore differences for the same actual roles, as there are a variety of different roles at the company's headquarters that are linked to the availability of resources on the market and also widely varying salaries. It should be noted that the gender pay gap does not exceed 10% in any professional category, a threshold value also established for eligibility for Gender Equality Certification according to UNI/PdR 125:2022.

OVS S.P.A. GENDER PAY GAP - STORE ROLES

Role	2025	2024
Store managers Seniority Less than 5 years	— %	(1)%
Store manager Seniority between 5 to 10 years	4%	4%
Store manager Over 10 years	15%	15%
Other store roles	3%	3%

In store roles, the highest gender pay gap was found in store manager roles for employees with more than 10 years' service. This circumstance is a consequence of the socio-cultural context in which the company operates, where this indicator has only recently started to be accorded the importance it deserves. The fact that the pay gap narrows and disappears among employees with a shorter length of service in the company is clear evidence of the implementation of pay policies and career paths that are proactively geared towards ensuring equal opportunities. Considering the perimeter of the previous tables, the average value of the pay gap, weighted by the number of employees, is 3.3%.

The gender pay gap is calculated in accordance with the standard by comparing the average hourly pay of female employees with that of male employees, without any distinction based on role, country, length of service or other factors, is 22.7%, slightly up on 19.4% in 2024. However, this figure is not particularly representative as it is affected by currency and organisational differences between the various companies in the group and does not adequately reflect differences in terms of length of service in the role or specific nature of the roles of currency effects.
The ratio between the total annual remuneration of the highest-paid employee and the median total annual remuneration of all employees is 231.08[90].

S1-17 INCIDENTS, COMPLAINTS AND SEVERE HUMAN RIGHTS IMPACTS

During the reporting period,[91] 2 possible incidents of discrimination were reported (3 in 2024). The cases were handled and considered closed. No complaints were recorded and the total amount of fines was 0. No serious human rights incidents were recorded during the year, so - like 2024 - no amount for fines, penalties and compensation for damages was recorded.

[90] Note that in 2024 the ratio was 172.86.
[91] The cases of discrimination referred to in this paragraph have been recorded by the Human Resources Department taking into account the following channels: reports through the Whistleblowing platform, reports to the mailbox sustainability@ovs.it, reports received by HR Business Partners or the Legal Department.

ESRS S2 - Workers in the value chain

SBM-2 S2 INTERESTS AND VIEWS OF STAKEHOLDERS

OVS relies on a global network of product suppliers with whom it has built relationships over decades. Maintaining a stable supply chain and ensuring the quality of products placed on the market are key to business success. For this reason, OVS considers the needs of workers in the value chain through a continuous monitoring programme of all Tier one suppliers. Thanks to its participation in the multi-stakeholder Cascale initiative, OVS has access to tools such as the Higg FEM and Higg FSLM, used to track the environmental and social performance of suppliers. The list of product suppliers is assessed and reviewed seasonally and social performance indicators are included in the assessment.

SBM-3 S2 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

The analysis conducted for the 2024 financial year identified negative and positive impacts affecting workers in the value chain. Actual and potential impacts and risks are directly linked to the structure of the value chain[92], starting from the production sources of the clothing, sold through the sales network, to the franchising stores, including logistics infrastructure, and involving various types of workers, who are not part of their own workforce:

- all workers in the upstream value chain, such as the supply of raw materials and the transformation into semi-finished products for textile production;
- workers at factories producing, assembling and packaging finished products;
- workers involved in downstream and upstream logistics;
- workers in the sales outlets of the franchising network.

The results of the assessment of impacts, risks and opportunities referred to in paragraph SBM-3 are summarised below. Significant negative impacts are directly influenced by the socio-economic context in which the company operates.

Identifying these IROs facilitates the adaptation of the strategy and business model to address them effectively.

Summary of negative impacts

- The seasonal nature of OVS business leads to production peaks during the year that can increase the use of overtime that could potentially be unregulated, violating international conventions on the matter.
- Some production areas are located in countries that do not guarantee full freedom of association and effective collective bargaining. Consequently, it is recognised that there is a potential negative impact on fair remuneration of the workforce due to the political and socio-economic contexts of the countries where production takes place, both in terms of alignment with the living wage and in terms of gender or other forms of discrimination.
- Business dynamism can generate turnover in the supplier base, potentially creating instability for workers in the value chain and a reduced ability to protect under-represented categories.

Summary of positive impacts

- Through stable and long-term relationships and open dialogue with the social partners, OVS contributes to building more favourable working conditions for workers, also representing a lever for change in raising awareness on the issues of violence and harassment at work, as well as on workers' rights such as freedom of association in factories.
- By participating in multi-stakeholder initiatives, OVS contributes to improved health and safety in the workplace.

Summary of risks

- A wage adjustment due to inflation or living wage alignment if not properly planned and that is not supported by better productivity generates higher production costs, resulting in lower margins.
- Failure to offer tools to improve work-life balance, and to adequately train workers of suppliers and franchise stores, could increase turnover and affect product quality and sales service.
- Accidents at work, tensions with suppliers and potential strikes due to poorly managed social dialogue can impact the continuity of production operations.
- Inadequate attention to workers' rights may lead to an increase in workforce turnover, with a consequent impact on the quality of the product/service and possible reputational damage.

[92] For a more detailed description of the value chain, see SBM-1 Strategy, business model and value chain.

Opportunity Summary

- Supporting projects to improve working conditions by verifying compliance with the Code of Conduct can contribute to more stable employment in the supply chain, resulting in a more specialised workforce and returns in terms of quality and efficiency.

S2-1 POLICIES RELATED TO VALUE CHAIN WORKERS

With regard to workers in the value chain, among the policies described above[93], OVS adopts the Labour and Human Rights Policy [S-P01], the Purchasing Practices Policy [PPP], the Code of Ethics [EC] and the Code of Conduct [CoC].

Specifically with regard to human rights, policies on Labour and Human Rights adhere to the guiding principles of the United Nations. The Labour and Human Rights policy also refers to ILO and OSCE guidelines. OVS does not tolerate any form of forced labour or child labour. OVS regularly conducts in-depth audit activities, however, these activities are mainly focused on OVS suppliers with whom it has continuous collaboration and who are related to its core business, where the most significant risks lie. Although marginal to OVS's core business, the company nevertheless uses the aforementioned tools in relation to economic activities assessed for the purposes of the Taxonomy. However, due diligence activities related to the protection of human rights and workers' rights by companies involved in the supply chain were conducted in a manner consistent with a low risk assessment. OVS has therefore requested and analysed a number of documents produced by suppliers and/or certified by third parties, which demonstrate the effective management of activities potentially exposed to the risk of violations of human and workers' rights, and has positively assessed the measures implemented by companies involved as suppliers.

S2-2 PROCESSES FOR ENGAGING WITH VALUE CHAIN WORKERS ABOUT IMPACTS

The process of involving workers in the value chain is carried out through the managers of the garment manufacturing factories for workers in the supply chain, who annually complete the Higg FEM and Higg FSLM modules available on Worldly[94], after receiving training on how to use the tool, and through a questionnaire to determine the materiality of sustainability issues. Within the Social Module (FSLM), there are specific questions to gather information on the presence and working conditions of people belonging to the most vulnerable categories, with particular reference to female workers who make up the majority of the workforce in factories. The Operations, Sourcing, Buying and Merchandising Department is responsible for ensuring that engagement activities take place periodically and for disseminating the results of the questionnaires.

OVS also involved its suppliers in a programme (called Making Progress Together) aimed at activating workers empowerment tools, through the establishment of democratically elected workers' committees.

Adherence to international initiatives

OVS is one of the signatories of the "Accord on Fire and Building Safety" programme, a legally binding agreement between the brands, manufacturers and the main trade unions operating in Bangladesh, promoted internationally by the OECD after the Rana Plaza tragedy. Accord was created with the aim of improving working conditions through the factory inspections and safety measures. Another important achievement was the extension of Accord's validity to Pakistan.

In 2023, OVS also joined the EIS pilot programme managed by the ILO (International Labour Organization) to establish a system for insurance against accidents at work.

[93] See Social policies

[94] Worldly is a platform that provides tools for environmental and social monitoring of suppliers, accessible to Cascale members. For further details on OVS's involvement in Cascale, see G1-2 Management of relationships with suppliers.

S2-3 PROCESSES TO REMEDIATE NEGATIVE IMPACTS AND CHANNELS FOR VALUE CHAIN WORKERS TO RAISE CONCERNS

OVS uses reporting tools implemented in Model 231, such as the whistleblowing system and a dedicated email address, providing individuals or legal entities affected by a negative impact (or who have reasonable grounds to believe they may be affected) and their legitimate representatives, trade unions, employee representatives and civil society organisations the opportunity to report any breaches safely and anonymously.

OVS provides two channels for reporting breaches and complaints:

- A dedicated email box (sustainability@ovs.it), provided in the Code of Conduct and accessible via posters displayed in suppliers' factories and on the OVS website in the main languages of the countries in which it operates;

An online whistleblowing system, available on the OVS website, which sends reports directly to the Supervisory Board, ensuring confidentiality, anonymity and compliance.

OVS has corrective action plans in place for negative impacts generated by suppliers or sub-suppliers in which OVS is not directly involved, but of which it becomes aware. Corrective action plans are agreed between OVS and suppliers, taking due account of the classification of the impacts identified. All corrective action plans include deadlines that are consistent with the severity of the impact and determined based on the practical feasibility of carrying out the measures within the timeframe agreed with the supplier. In addition, qualitative and quantitative indicators are defined to measure progress in remedying the negative impacts identified.

OVS corrective action plans are structured as follows:

- identification of specific actions to address the causes;
- identification of the personnel necessary to implement the corrective plan;
- identification of specific KPIs to monitor the implementation of the corrective measures;
- clear allocation of responsibilities and timing.

OVS ensures that all workers in the value chain are aware of the Code of Conduct signed by the factory manager and that it contains information on the channels available for reporting non-compliance with the code.

S2-4 AND S2-5 ACTIONS AND OBJECTIVES RELATING TO WORKERS IN THE VALUE CHAIN

In its 2024-2026 Strategic Sustainability Plan, OVS defined objectives to improve working conditions in the value chain, with a particular focus on suppliers in countries with the highest production volumes.

IRO	Target	Target Description	Baseline	FY 2025	FY 2024	Scope
S2-IN01 S2-IN02 S2-IP01 S2-IP02 S2-RS04	S-T07	Extend monitoring with FEM and FLSM modules to Tier 2 and Tier 3 by 2026	N/A		To be launched	Upstream
S2-IN01 S2-RS02	S-T08	Start supplier satisfaction monitoring by 2026	N/A		To be launched	Upstream
S2-IN02 S2-IP01 S2-RS01 S2-RS04	S-T09	80% of the production volume covered by suppliers that adopt systems of democratically elected worker representation in factories, thus laying the foundations for a collective bargaining system and progressive alignment with the living wage by 2025	2024	See S2 - Entity Specific Metrics - Percentage of production volume covered by suppliers that adopt systems of democratically elected worker representation in factories		Upstream
S2-IP02 S2-RS03	S-T10	Maintain active partnerships in production countries and continuously monitor the progress made by factories in the supply chain by 2025	N/A		Ongoing	Upstream
S2-OP01	S-T11	Launch of the supplier reward process with improved social performance by 2026	2024	Prepared scorecard supplier with sustainability KPIs	Study started for supplier scorecards	Upstream
S2-RS04	S-T12	Incorporate sustainability aspects into franchisee partnership assessments by 2026	N/A		To be launched	Direct/ Downstream

Similarly, relevant and priority actions for OVS's business have been identified to achieve these targets. The timeframes for action implementation are in line with the targets set out in the table above, with the exception of ongoing actions, for which no completion date has been set.

IRO	Action	Action Description	Status	Scope	Interested stakeholders
S2-IN01 S2-IN03	S-A10	Sharing accurate production forecasts with suppliers well in advance of formal order placement	Ongoing	Upstream	Suppliers, Employees
S2-IN01 S2-IN02 S2-IP01 S2-IP02 S2-RS02 S2-RS04	S-A11	Programme of monitoring and involvement of all the suppliers through the Higg platform and the completion of the FSLM module (social)	Ongoing	Upstream	Suppliers, Employees, Industry coalition
S2-IN02 S2-IP01	S-A12	Training, support and monitoring activities at the factories in the supply chain	Ongoing	Upstream	Suppliers, Employees, Industry coalition, Local communities (production countries)
S2-IN03	S-A13	Share any cancellations or changes to purchase orders with suppliers with reasonable notice	Ongoing	Upstream	Suppliers/ Local communities (production countries)
S2-IP01	S-A14	Extension of reporting and complaint mechanisms for factory workers in a direct and anonymous manner	To be launched	Upstream	Suppliers/ Local communities (production countries)
S2-IP02 S2-RS03	S-A15	Participation in international programmes for the protection of workers' safety in factories and participation in multi-stakeholder round tables in the industry	Ongoing	Upstream	Suppliers/ Local communities (production countries)
S2-OP01	S-A16	Establishing a rating system that rewards suppliers with improved social performance	Ongoing	Upstream	Suppliers / Employees
S2-RS01	S-A17	Annual mapping of wages paid in the supply chain and comparison to country benchmarks	Ongoing	Upstream	Suppliers/ Local communities (production countries)
S2-RS04	S-A18	Identification of selection and evaluation criteria of downstream partners in the chain	To be launched	Downstream	Franchisees

The actions and objectives identified are the result of an evaluation process that combines the materiality of impacts with the system for monitoring environmental and social performance of suppliers using Higg FEM and FSLM modules. Once these objectives are achieved, OVS will undertake to involve factory workers more directly in order to assess the effectiveness of the initiatives. As OVS does not have any direct production sites, it can intervene by promoting change processes within the factories, starting with support activities to ensure worker representation systems in the workplace as levers for acquiring greater rights.
Actions planned to address the negative impacts on the value chain require the allocation of a budget for Cascale membership and the corresponding use of the platform for monitoring tools.
No serious human rights issues or incidents related to workers in the value chain were recorded during the reporting year.

S2 - ENTITY SPECIFIC METRICS - PERCENTAGE OF PRODUCTION VOLUME COVERED BY SUPPLIERS THAT ADOPT SYSTEMS OF DEMOCRATICALLY ELECTED WORKER REPRESENTATION IN FACTORIES

OVS monitors the production volume covered by Tier 1 suppliers that adopt a system of democratically elected worker representation at clothing production factories.
The figure is calculated as a percentage of the Tier 1 production volume of suppliers active in the reporting tax year, with a system of democratically elected worker representation, as verified by the Higg vFSLM module.

	FY 2025	FY 2024
Production volume of Tier 1 suppliers	61.2%	59.2%[95]

ESRS S4 - Consumers and end-users

SBM-2 S4 INTERESTS AND VIEWS OF STAKEHOLDERS

The OVS business model requires constant dialogue with consumers and end-users of the products placed on the market through its network of stores (directly owned and franchised) and e-commerce.
These individuals are frequently consulted by the company, through periodic surveys and thematic focus groups, to shape business strategies in both the design of clothing collections and sales and marketing strategies. The company periodically includes specific questions on sustainability issues in customer surveys.

SBM-3 S4 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

The end-users of OVS products are customers that purchase from the stores of the Group's brands, which together constitute a sales network throughout Italy, with a strong presence in some European countries, including Spain, Germany, Serbia and Croatia. Through the sales network and its brands, and with a wide range of affordable products, OVS reaches more than 13 million customers every year, of which the majority are families and children.
None of the products placed on the market by OVS are inherently harmful to people, based on the information provided on the label of each item, which specifies the composition and correct care instructions for the garment. Any negative impacts may be related to individual incidents, such as a defect in a product placed on the market.
In accordance with Article 13 of Regulation (EU) 2016/679, the policy on the management of customer personal data provides information on the personal data collected when using the website or visiting one of the stores to make purchases. It can be viewed on the websites of the brands and on the group website.
The results of the assessment of impacts, risks and opportunities referred to in paragraph SBM-3 are summarised below.

Summary of positive impacts

- OVS is an accessible brand and its customer communications convey the values of inclusivity and democracy, allowing everyone to express themselves through their choice of brand (e.g. models for advertising campaigns or corporate communications).

Opportunity Summary

- Thanks to transparent communication and a wide product range, OVS builds consumer trust and loyalty, while also attracting segments interested in specific product categories

[95] The figure for FY 2024 has been adjusted, as the previously indicated value of 40% excluded certain categories of suppliers, which were instead included in FY 2025.

Summary of risks

- The use of sustainability-related topics without a solid foundation may result in penalties and legal disputes.
- Possible shortcomings in the design of sales channels (stores and websites) could result in costs for compliance with accessibility rules.

S4-1 POLICIES RELATED TO CONSUMERS AND END-USERS

The Code of Ethics[96] sets out all the principles aimed at protecting the consumer, specifically condemning all forms of human rights violations, committing to providing clear and transparent information, and offering safe and increasingly sustainable products, ensuring respect for our customers' privacy at all levels.

The Diversity, Equity and Inclusion policy[97], while aimed at OVS's internal and external employees, also aims to strengthen OVS's actions toward the communities in which it operates. Its areas of application also include marketing campaigns or collaborative projects for the development of product collections, through which it promotes an inclusive culture that values diversity to consumers and end-users.

S4-2 PROCESSES FOR ENGAGING WITH CONSUMERS AND END-USERS ABOUT IMPACTS

In the process of assessing and defining material, actual and potential impacts, consumers were involved by being asked to complete a questionnaire in which they were asked to rate the importance of sustainability issues (corresponding to the ESRS principles) using a score from 1 (can wait) to 3 (act now)[98].

The survey, prepared by the Corporate Sustainability department, is sent directly to a selected panel of consumers by the CRM - Customer Relationship Management department. This department is responsible for ensuring the effectiveness of the tool used and reporting the results to the Sales Departments and to the Operations, Sourcing, Buying and Merchandising Department to guide strategy.

S4-3 PROCESSES TO REMEDIATE NEGATIVE IMPACTS AND CHANNELS FOR CONSUMERS AND END-USERS TO RAISE CONCERNS

No significant negative impacts on consumers and end-users have been identified following the double materiality assessment. However, the company provides channels for raising concerns, which are also open to Consumers and end-users[99].

[96] For further information, see the EC Code of Ethics referred to in the section Social policies.
[97] See Social policies.
[98] For further details on the processes for involving workers in the supply chain in the impact identification process, see [SBM-2] Interests and views of stakeholders and the assessment process and [IRO-1] Description of the process to identify and assess material impacts, risks and opportunities.
[99] For more information see S2-3 Processes to remediate negative impacts and channels for value chain workers to raise concerns

S4-4 S4-5 ACTIONS AND OBJECTIVES RELATING TO CONSUMERS AND END-USERS

In its 2024-2026 Strategic Sustainability Plan, OVS defined objectives to ensure transparent and fair communication with its customers and to respond to the needs and demands of the current and future market.

IRO	Target	Target Description	Baseline[100]	FY 2025	FY 2024[101]	Scope
S4-OP1 S4-RS01	S-T13	Digital passport for each product for sale with information on the value chain by 2026	2025	Onboarding of strategic suppliers for FW26 orders initiated	To be launched	Downstream
S4-OP1 S4-RS01	S-T14	Increase in the % of certified products by 2030	2024		See E5-4	Direct/ Downstream
S4-RS02	S-T15	All stores to have an accessibility profile by 2026	N/A		To be launched	Direct

Similarly, relevant and priority actions for OVS's business have been identified to achieve these targets. The timeframes for action implementation are in line with the targets set out in the table above, with the exception of ongoing actions, for which no completion date has been set.

[100] Where the target baseline year is 2024, the baseline value is that of the 2024 result. In other cases, the value is indicated in the comments for the relevant metric.
[101] The results achieved during the reference period are reported with reference to the metric, if applicable, or through summary data.

IRO	Action	Action Description	Status	Scope	Interested stakeholders
S4-IP01	S-A19	Create campaigns that convey the brand's values of accessibility and democracy	Ongoing	Downstream	Customers/Local Community (Italy)
S4-OP1 S4-RS01	S-A20	Integration of Eco Valore indexes	Ongoing	Direct	Customers/Local Community (Italy)
S4-OP1 S4-RS01	S-A21	Digital Product Passport implementation plan	To be launched	Upstream/ Direct	Customers/ Suppliers/ Employees
S4-OP1 S4-RS01	S-A22	Obtaining product certifications (GOTS, OCS, GRS and RCS)	Ongoing	Upstream/ Direct	Customers
S4-RS02	S-A23	Inclusion of accessibility information for intellectual and physical disabilities in the store details on the company website	To be launched	Direct	Customers/Local Community (Italy)

Action planning and target setting are based on assessments that take into account feedback collected from customers through periodic surveys to monitor satisfaction levels, industry benchmarks and market trend studies.

Actions planned to manage the impact on consumers require the allocation of a budget for marketing campaigns and customer care staff. No serious human rights issues or incidents related to consumers and/or end-users were recorded during the reporting year.

4. Information on Business Conduct[102]

G1-1 Business conduct policies and corporate culture

The policies that OVS has adopted to properly manage Business conduct issues are:

- [EC] Code of Ethics[103]
- [DD] Due Diligence Policy[104]

OVS has implemented a whistleblowing system and related report management procedure, in line with legal requirements. This system aims to ensure compliance with OVS's ethical and regulatory principles and is accessible by all stakeholders through the company website. Reports are sent to the members of the OVS Supervisory Body. In handling reports, the recipient carries out the necessary investigations, maintaining an open dialogue with the whistleblower, protecting their identity, and providing feedback within 3 months of the date of receipt. At the end of the preliminary investigation, the Whistleblowing Report Recipient Body shall make its decisions, explaining the reasons for them, and, where appropriate, closing the report (if it is found to be not relevant) or requesting the Corporate department responsible to take any disciplinary or punitive measures following the findings.

The Company undertakes not to engage in any form of retaliation or discrimination against the whistleblower, undertaking to protect them and guaranteeing them the standards of confidentiality provided for in Directive (EU) 2019/1937.

The Company also actively promotes a culture of lawfulness by adopting the Code of Ethics that sets out OVS's commitment to preventing and combating active and passive corruption, sanctioning any corrupting behaviour (including, for example, the giving or promise of donations in money or other benefits, also in the form of gifts or benefits of any kind, hiring, etc.) in relationships with interlocutors or partners.

Every person joining the company must complete online training on the Code of Ethics and Model 231. Specific in-depth sessions are also organised periodically in relation to matters related to Legislative Decree 231/01, including corruption.

The departments at risk of active and passive corruption are Real Estate, Indirect Purchasing and Product Purchasing, and the foreign offices responsible for sourcing.

G1-2 Management of relationships with suppliers

In view of the retail business model, managing supplier relationships is one of the most important and strategic factors for business continuity and for achieving economic, environmental and social objectives. In maintaining relations with suppliers, OVS observes the provisions in the Code of Ethics and Purchasing Practices Policy.[105] The policy sets out the principles for order management and payment practices with supplier companies including a commitment to plan orders in good time, to update purchase costs periodically taking into account inflation or international market dynamics affecting trading, to comply with payment terms agreed with the supplier without extending payment times and monitoring them using in-house IT systems.

Since 2017, OVS has been a member of Cascale, a global multi-stakeholder alliance for the fashion industry, which provides a series of tools for monitoring the production chain. Using the modules provided by Worldly (Higg FEM and Higg FSLM), OVS is able to monitor the environmental and social performance of product suppliers.

One of the requirements to be accredited as an OVS supplier is to register on the Worldly platform and provide the information required by the social and environmental Higg modules.

[102] For information on the Role of the administrative, management and control bodies, see GOV-1 Role o f administrative, management and supervisory bodies

[103] See Social policies

[104] See Environmental policies

[105] See the Purchasing Practices Policy [PPP].

G1-5 Political influence and lobbying activities

OVS does not exercise any political influence, nor does it accept funding from political parties.
OVS is not registered in the EU Transparency Register.
The Company plays an active role in defining industry regulations, participating in initiatives such as Policy Hub and collaborating on strategic issues such as Extended Producer Responsibility. European lobbying enables OVS to identify business opportunities in upcoming sustainability regulations that, if not adequately addressed, could be a factor slowing down business innovation.
OVS also regularly participates at working tables organised by trade associations, such as Federdistribuzione and Confimprese. Since 2015, OVS has been a member of the Erion Textiles consortium, which operates in the management of textile waste in Italy.

G1-6 Payment practices

OVS has commercial relationships with suppliers located all over the world, divided mainly into two broad categories: suppliers of goods and suppliers of non-goods. Since the risk identified in the DMA phase relates to the clothing sector, the metric has been designed to analyse payments to suppliers of goods. The average payment time for invoices from suppliers of goods[106] is 127 days and all payments were made within the agreed time frame.
At the reporting date, there were no pending legal proceedings due to late payments.

[106] For this Consolidated Sustainability Report, the analysis of payment practices covered all payments made to suppliers of goods in Italy, the EEC and outside the EEC in the period from 1 February 2025 to 31 January 2026.

Certification of the Sustainability Report pursuant to Article 81-ter, paragraph 1, of CONSOB Regulation 11971 of 14 May 1999, as amended

We, the undersigned, Stefano Beraldo, the Chief Executive Officer, and Nicola Perin, the Director responsible for preparing the corporate accounting statements of OVS S.p.A., hereby declare, pursuant to Article 154-bis, paragraphs 3 and 4, of Legislative Decree of 24 February 1998 No. 58 that the sustainability report included in the management report has been prepared:

- in accordance with the reporting standards applied pursuant to Directive 2013/34/EU of the European Parliament and of the Council of 26 June 2013 and Legislative Decree 125 of 6 September 2024;
- with the specifications adopted pursuant to Article 8 (4) of Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020.

Independent auditors' limited assurance report on the consolidated sustainability statement pursuant to article 14-bis of Legislative decree no. 39 of 27 January 2010

To the shareholders of
OVS S.p.A.

Conclusion

Pursuant to articles 8 and 18.1 of Legislative decree no. 125 of 6 September 2024 (the "decree"), we have been engaged to perform a limited assurance engagement on the consolidated sustainability statement for the year ended 31 January 2026 of the OVS Group (the "group") prepared in accordance with article 4 of the decree, presented in the specific section of the directors' report (the "consolidated sustainability statement").

Based on the procedures performed, nothing has come to our attention that causes us to believe that:

- the group's consolidated sustainability statement for the year ended 31 January 2026, has not been prepared, in all material respects, in accordance with the reporting standards endorsed by the European Commission pursuant to Directive 2013/34/EU (the European Sustainability Reporting Standards, "ESRS");
- the information presented in the "European Taxonomy" section of the consolidated sustainability statement has not been prepared, in all material respects, in accordance with article 8 of Regulation (EU) 852 of 18 June 2020 (the "taxonomy regulation").

Basis for conclusion

We have performed the limited assurance engagement in accordance with the Standard on Sustainability Assurance Engagements - SSAE (Italia). The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. Our responsibilities under that standard are further described in the "*Auditors' responsibilities for the sustainability assurance engagement*" section of our report.

We are independent in accordance with the ethics and independence rules and standards applicable in Italy to sustainability assurance engagements.

Our company applies International Standard on Quality Management 1 (ISQM Italia 1) and, accordingly, is required to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have acquired is sufficient and appropriate to provide a basis for our conclusion.

Responsibilities of the directors and board of statutory auditors ("Collegio Sindacale") of OVS S.p.A (the "parent") for the consolidated sustainability statement

The directors are responsible for designing and implementing the procedures to identify the information included in the consolidated sustainability statement in accordance with the ESRS (the "materiality assessment process") and for the description of these procedures paragraph "1.4 Double materiality assessment - IRO-1 Description of the processes to identify and assess material impacts, risks and opportunities" of the consolidated sustainability statement.

The directors are also responsible for the preparation of a consolidated sustainability statement in accordance with article 4 of the decree, which contains the information identified through the materiality assessment process, including:

- compliance with the ESRS;
- compliance of the information presented in the "European Taxonomy" section with article 8 of the taxonomy regulation.

Moreover, the directors are responsible, within the terms established by the Italian law, for designing, implementing and maintaining such internal controls as they determine is necessary to enable the preparation of a consolidated sustainability statement in accordance with article 4 of the decree that is free from material misstatement, whether due to fraud or error. They are also responsible for selecting and applying appropriate methods to produce disclosures and formulating assumptions and estimates about specific information on sustainability matters that are reasonable in the circumstances.

The *Collegio Sindacale* is responsible for overseeing, within the terms established by the Italian law, compliance with the decree's provisions.

Inherent limitations in preparing the consolidated sustainability statement

For the purpose of disclosing forward-looking information in accordance with the ESRS, the directors are required to prepare such information based on assumptions, described in the consolidated sustainability statement, regarding future events and the group's actions that are not necessarily expected to occur. Actual results are likely to be different from the forecast sustainability information since anticipated events frequently do not occur as expected and the variation could be material.

The disclosures provided by the group about Scope 3 emissions are subject to more inherent limitations than those on Scope 1 and Scope 2 emissions, given the lack of availability and relative precision of information used for determining both qualitative and quantitative value chain Scope 3 emissions information.

Auditors' responsibilities for the sustainability assurance engagement

Our objectives are to plan and perform procedures in order to obtain limited assurance about whether the consolidated sustainability statement is free from material misstatement, whether due to fraud or error, and to issue an assurance report that includes our conclusion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence decisions of intended users taken on the basis of the consolidated sustainability statement.

As part of a limited assurance engagement in accordance with SSAE (Italia), we exercise professional judgement and maintain professional scepticism throughout the engagement.

Our responsibilities include:

- considering risks to identify disclosures where a material misstatement is likely to occur, whether due to fraud or error;
- designing and performing procedures to address disclosures where a material misstatement is likely to occur. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- directing, supervising and performing the sustainability limited assurance engagement and assuming full responsibility for the conclusion on the consolidated sustainability statement.

Summary of the work performed

A limited assurance engagement involves carrying out procedures to obtain evidence as a basis for our conclusion.

The procedures performed are based on our professional judgement and include inquiries, primarily of the parent's personnel responsible for the preparation of the information presented in the consolidated sustainability statement, documental analyses, recalculations and other evidence gathering procedures, as appropriate.

We have performed the following main procedures:

- we gained an understanding of the group's business model, strategies and operating environment with regard to sustainability matters;
- we gained an understanding of the process adopted by the group to identify and assess material sustainability-related impacts, risks and opportunities (IROs), based on the double materiality principle. Moreover, on the basis of the information acquired, we evaluated any emerging inconsistencies that may indicate the presence of sustainability matters not addressed by the group in its materiality assessment process; Specifically, mostly through inquiries, observations and inspections, we gained an understanding of how the group:
  - considered the interests and opinions of the stakeholders involved;
  - identified its sustainability-related IROs, assessing their consistency with our knowledge of the group and its sector;
  - defined and assessed material IROs by analysing the qualitative and quantitative materiality thresholds it determined;
- we gained an understanding of the processes underlying the generation, recording and management of the qualitative and quantitative information disclosed in the consolidated sustainability statement, including of the reporting boundary, through interviews and discussions with the group's personnel and selected procedures on documentation;

- we identified the disclosures associated with a risk of material misstatement, whether due to fraud or error;
- we designed and performed procedures, based on our professional judgement, to respond to identified risks of material misstatement, including:
  - with reference to qualitative information and, in particular, the sustainability-related policies, actions and targets, we held inquiries and performed limited procedures on documentation;
  - with reference to quantitative information, we carried out analytical procedures, inspections, observations and recalculations on a sample basis;
- we gained an understanding of the process adopted by the group to determine taxonomy-eligible exposures and whether they were aligned under the taxonomy regulation and checked the related disclosures presented in the sustainability statement;
- we checked the consistency of the disclosures contained in the consolidated sustainability statement with those included in the group's consolidated financial statements pursuant to the applicable financial reporting framework, the underlying accounting records or management accounts;
- we checked the compliance of the structure and presentation of disclosures included in the consolidated sustainability statement with the ESRS;
- we obtained the representation letter.

Verona, 7 May 2026

Notes to the financial statements

1. General information

OVS S.p.A. (hereinafter also the "Company" or the "Parent Company") is a company incorporated on 14 May 2014, domiciled in Italy and organised under the laws of the Republic of Italy, having its registered office in Mestre, Venice, Italy, at Via Terraglio no. 17.

Borsa Italiana, with Order no. 8006 of 10 February 2015, approved the listing of the shares of OVS S.p.A. on the Mercato Telematico Azionario (MTA) stock market, organised and managed by Borsa Italiana S.p.A..
Trading on the Mercato Telematico Azionario (MTA), as ordered by Borsa Italiana, began on Monday, 2 March 2015.

2. Impacts of global conflicts and inflation on the Group's performance

As more fully detailed in the Report on Operations, as in the last two previous years, 2025 was also characterised by continuing macroeconomic phenomena following the outbreak of the Russian-Ukrainian conflict, which began more than 4 years ago, and the Middle East conflict that began in October 2023. As explained in detail, the financial year ended 31 January 2026 closed with even better performance than in 2024 and also better than the budget forecasts, mainly thanks to cost containment measures. EBITDA for the year was €218.2 million and cash generation reached €90 million (up 31% on 2024).
Specifically, OVS does not believe it is exposed to significant impacts deriving from the current conflict in the Middle East, as the countries of origin of the goods are not involved and the shipping routes do not pass through the Strait of Hormuz. Freight rates, which are stable in the medium term, although subject to increases, will not have a material impact on the total cost of goods. In terms of energy, exposure to price fluctuations is also minimal thanks to the amount of in-house consumption, medium- to long-term agreements with renewable energy producers and forward purchases.
All these factors have also been duly considered in the business plans underlying certain financial statement estimates. For more information, see also the business outlook section in the Report on Operations at 31 January 2026.

3. Criteria for preparation of the consolidated financial statements

The structure of the consolidated financial statements, the main accounting policies and the valuation criteria used by the Group are described below.

3.1 Structure and content of the financial statements

The consolidated financial statements of the OVS Group at 31 January 2026 were prepared in accordance with the International Financial Reporting Standards ("IFRSs") issued by the International Accounting Standards Board. "IFRS" is intended to mean all the revised International Accounting Standards (IAS), and all the interpretations of the International Financial Reporting Interpretations Committee (IFRIC), including those previously issued by the Standing Interpretations Committee (SIC). At the reporting date for the consolidated financial statements, these had been approved by the European Union under the procedure set forth in (EC) Regulation No 1606/2002 of the European Parliament and the European Council of 19 July 2002.

The consolidated financial statements of the OVS Group, which comprise the consolidated statement of financial position, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of cash flows, the consolidated statement of changes in consolidated shareholders' equity and the notes to the financial statements, are presented in euro as the current currency of the economies in which the Group chiefly operates, unless otherwise indicated.

These consolidated financial statements have been prepared in accordance with the general criteria for the reliable and truthful presentation of the Group's financial position, results of operations and cash flows, in accordance with the general principles of business continuity, accrual, consistency of presentation, relevance and aggregation, prohibition of offsetting and comparability of information.

See the following sections of these notes and comments on the Report on Operations concerning the detailed examination of the various financial and non-financial instruments available to the Group that ensure the normal course of its business and compliance with its current obligations, despite the macroeconomic context, which is still characterised by uncertainty, particularly due to the instability of the raw materials, transport and energy markets, due to the many conflicts in Eastern Europe and the Middle Eastern region.

With regard to the presentation methods used for the consolidated accounting schedules, in the context of the options under IAS 1, the OVS Group has opted for the following types of accounting schedules:

- Statement of financial position: assets and liabilities are classified with current and non-current items shown separately;
- Income statement: prepared separately from the statement of comprehensive income with operating costs classified by nature;
- Statement of comprehensive income: includes, as well as net profit, changes in shareholders' equity related to items of an economic nature which, by express provision of the international accounting standards, are recognised as components of shareholders' equity;
- Statement of cash flows: the statement shows the cash flows from operating, investment and financing activities. The indirect method was used to prepare this statement;
- Statement of changes in shareholders' equity: shows the net profit or loss for the year and each item of income and expense not posted to the income statement but recognised directly in equity pursuant to specific IFRS.

The schedules used, as specified above, provide the best representation of the OVS Group's financial position and profit performance.
The notes to the financial statements analyse, expand upon and comment on the values shown in the OVS Group's consolidated financial statements. They are accompanied by additional information deemed necessary to give a true and fair view of the Group's financial position and results.
Changes in the items recognised under assets and liabilities and in the income statement are expanded upon when they are significant.

The consolidated financial statements were prepared on the basis of the historical cost criterion, except for some financial instruments including derivatives, which are measured at fair value as required by IFRS 9.

For detailed information on the nature of the Group's activity, see the Report on Operations at 31 January 2026.

These financial statements have been audited by KPMG S.p.A..

3.2 Scope of consolidation

The consolidated financial statements include, as well as the Parent Company's financial statements, the financial statements of all the subsidiaries as of the date at which control is assumed until the date at which this control ceases.
The following is a list of the companies included within the scope of consolidation on a line-by-line basis, indicating the information relating to the name, registered office and share capital held directly and indirectly by the OVS Group at 31 January 2026:

Company	Registered office	Share Capital		% investment
Italian companies				
OVS S.p.A.	Venice - Mestre	290,923,470	EUR	Parent company
82 S.r.l.	Venice - Mestre	10,000	EUR	70%
OVS Innovazione e sostenibilità S.r.l.	Venice - Mestre	5,000,000	EUR	100%
JB Licenses S.r.l.	Venice - Mestre	600,919	EUR	100%
Goldenpoint S.p.A.	Cavriana (MN)	20,000,000	EUR	100%
Foreign companies				
OVS Department Stores d.o.o. Belgrade	Belgrade - Serbia	1,867,391,238	RSD	100%
OVS Malopradaja d.o.o.	Zagreb - Croatia	2,654	EUR	100%
OVS Hong Kong Sourcing Ltd.	Hong Kong	585,000	HKD	100%
OVS India Sourcing Private Ltd	Delhi - India	15,000,000	INR	100%
COSI International (Hong Kong) Ltd	Hong Kong	10,000	HKD	100%
COSI International (Shanghai) Ltd (P.R.C.)	Shanghai - China	1,000,000	RMB	100%
OVS Fashion España S.L.	Madrid - Spain	3,100	EUR	100%
OVS France S.A.S.	Paris - France	716,184	EUR	100%
OVS Germany G.m.b.H.	Leipzig - Germany	100,000	EUR	100%
OVS India Retail Private Ltd	New Delhi - India	92,800,000	INR	100%
OVS Department Store LLC SO	Dubai - UAE	20,500,000	AED	100%

The list of equity investments measured using the equity method is as follows:

Centomilacandele S.c.p.A. (in liquidation)	Milan	300,000	EUR	31.63%
Deaway Solar 3 S.r.l. (formerly Energia Verde Uno S.r.l.)	Bozen	10,000	EUR	18%

During the financial year, Goldenpoint S.p.A. was added to the scope of consolidation following its acquisition on 3 July 2025, as discussed in more detail in section 3.4 Business Combinations.
The end of the financial year also saw the establishment of OVS Department Store LLC-SO, a direct investee of OVS S.p.A., with the aim of commencing commercial activities through the opening of an important flagship store in Dubai during the 2026 financial year.

Other changes to report include the cancellation of the American subsidiary Vespucci Fashion, Inc. due to its liquidation in December 2025 and the termination of the Group's relationship of control with the company Energia Verde Uno S.r.l. (now Deaway Solar 3 S.r.l.) due to the partial sale of shares held by the Parent Company: the sale to third parties of 33% of the share capital took place on 29 July 2025 for €3 thousand, resulting in the company simultaneously leaving the scope of full consolidation.
There were no other changes in the scope of consolidation.

3.3 Consolidation criteria

The consolidated financial statements include the financial statements of Parent Company OVS S.p.A. and the companies over which it has the right to exercise control pursuant to IFRS 10. This standard stipulates that an investor controls an entity in which it has invested when it enjoys rights that confer the possibility of directing the entity's significant activities, has an exposure or a right to receive variable returns from its involvement in the entity and has the real possibility of using its power to influence the amount of its returns from the investment.

Equity investments held in companies over which significant influence is exercised ("associates"), which is presumed to exist when the percentage of the equity investment is between 20% and 50%, are measured using the equity method.

Application of the equity method involves aligning the carrying amount of the equity investment with shareholders' equity, adjusted where necessary to reflect the application of the IFRS endorsed by the European Commission (and includes any goodwill identified at the time of acquisition).

The share of gains/losses realised by the associate after the acquisition is recognised in the income statement, while the share of movements in reserves after the acquisition is booked in equity reserves. When the Group's share of losses in an associate is equal to or more than its non-controlling interest in this associate, taking any unsecured credit into account, the value of the investment is reduced to zero and the Group recognises no further losses other than those pertaining to it, unless and to the extent that the Group is obliged to meet them. Unrealised gains and losses on transactions with associates are derecognised according to the value of the Group's equity investment in these associates.

"Joint arrangements" (agreements under which two or more parties hold common control, within the meaning of IFRS 11) are included, where they exist, according to the equity method, if they qualify as joint ventures, or by recognising their specific shares of assets, liabilities, costs and revenues, if they qualify as joint operations.

The financial statements of the subsidiaries are consolidated line by line in the consolidated financial statements from the date at which control is assumed until the date at which this control ceases.

Where necessary, the financial statements used to prepare the consolidated financial statements have been appropriately restated and adjusted to comply with the Group's accounting policies.

The following consolidation criteria are used:

- for equity investments consolidated line by line, the carrying amount of the individual consolidated equity investments is eliminated against the relative shareholders' equity, with the assumption of the assets, liabilities, costs and revenues of the subsidiaries, regardless of the size of the investment held. Any shares of shareholders' equity and net profit attributable to minorities are identified separately in shareholders' equity and in the income statement;
- all inter-company balances and transactions are derecognised, as are profits and losses (the latter only if they do not represent effective impairment of the asset transferred) arising from commercial transactions, including the sale of business units in the Parent Company's subsidiaries, or financial inter-company transactions not yet realised with third parties;
- all increases/decreases in the shareholders' equity of the consolidated companies arising from results generated after the date of acquisition of the equity investment are booked in a dedicated equity reserve named "Retained earnings (accumulated losses)" at the time of the elision;
- the dividends distributed to Group companies are derecognised in the income statement at the time of consolidation;
- changes in the percentage of ownership of subsidiaries that do not entail a loss of control, or that represent increases after control has been acquired, are recognised under changes in shareholders' equity.

3.4 Business combinations

The Group recognises business combinations using the acquisition method pursuant to IFRS 3 - Business Combinations.

Under this method, the consideration transferred to a business combination is measured at fair value, calculated as the sum of the fair values of the assets transferred and the liabilities assumed at the acquisition date. The ancillary costs of the transaction are usually recognised in the income statement when they are incurred.

Goodwill is determined as the excess of the sum of the considerations transferred to the business combination, shareholders' equity attributable to third parties and the fair value of any equity investment previously held in the acquiree, over the fair value of the net assets acquired and liabilities assumed at the acquisition date.

If a business combination takes place in stages with successive purchases of shares, each phase is valued separately, using the cost and information on the fair value of the assets, liabilities and contingent liabilities at the date of each operation to determine the amount of any difference.

When a subsequent purchase means that control of a company is obtained, the stake previously held is re-presented based on the fair value of the identifiable assets, liabilities and contingent liabilities determined at the date that control is acquired, and the difference is recognised in the income statement.

As already reported in the Report on Operations, on 3 July 2025, OVS S.p.A. completed the acquisition of the entire share capital of Goldenpoint S.p.A. following the sale by Gilfin S.r.l. of the remaining 97% of the share capital. For accounting purposes, the acquisition is reflected in the OVS Group's accounts from 1 July 2025.
This operation accelerated the acquisition of Goldenpoint by OVS compared with the agreements previously signed, which envisaged a gradual takeover in several phases up to 100% between 1 August 2026 and 31 July 2029. The rationale for the deal is to expedite growth in a segment in which OVS already has significant competencies and considerable market share due to sales in its own stores.
As stipulated by IFRS 3 - Business Combinations, the acquisition gave rise to a business combination, and as such was recognised according to the purchase method.

The total price paid to the seller (Gilfin S.r.l.) for the acquisition was provisionally defined as €12,150 thousand, of which €150 thousand paid in April 2024 for the acquisition of 3% of the capital, €8,000 thousand paid at the closing of 3 July 2025 and €4,000 thousand paid in October 2025. This will be supplemented by an earn-out to be paid to the seller in July 2029, on the basis of certain economic and financial parameters of the acquired target company. Note that the acquired company continued to operate without interruption.
The fair value of the components of the consideration transferred at the date of acquisition of control (thus including the future earn-out and the re-statement at fair value of the portion previously held) was €14,044 thousand.
At the time of the preparation of these consolidated financial statements, the final allocation of the consideration identified above (purchase price allocation) resulted in the following acquired assets and liabilities (figures in €/thousands):

	Final Fair Value	Carrying amount in the Financial Statements of Goldenpoint prepared in accordance with OIC
Cash and banks	1,036	1,036
Trade receivables	262	262
Inventory	28,471	29,260
Financial assets	—	1
Current tax assets	210	210
Other receivables	4,740	4,740
Total current assets	**34,718**	**35,508**
Property, plant and equipment	7,686	6,984
Right-of-use assets	74,028	—
Intangible assets	25,326	5,912
Goodwill	—	—
Deferred tax assets	9,014	9,561
Other receivables	325	325
Total non-current assets	**116,378**	**22,782**
TOTAL ASSETS	**151,096**	**58,290**
Financial liabilities	18,789	18,435
Financial liabilities for leases	16,851	—
Trade payables	12,096	12,096
Other payables	8,306	8,306
Total current liabilities	**56,042**	**38,837**
Financial liabilities	16,045	15,874
Financial liabilities for leases	57,176	—
Employee benefits	709	755
Provisions for risks and charges	50	577
Deferred tax liabilities	6,474	1,047
Other payables	555	555
Total non-current liabilities	**81,010**	**18,808**
TOTAL LIABILITIES	**137,052**	**57,645**
NET ACQUIRED ASSETS/(LIABILITIES)	**14,044**	**646**

As the acquisition was completed on 3 July 2025, the consolidated financial statements of the OVS Group at 31 January 2026 include the financial data of Goldenpoint S.p.A. for the period from 1 July 2025 to 31 January 2026.
The effect on cash flows for the period resulting from the business combination was equal to a reduction in cash and cash equivalents of €10,964 thousand, equal to the price paid in 2025 net of the liquidity acquired from Goldenpoint S.p.A. (which amounted to €1,036 thousand on 1 July 2025).
The revenues and EBITDA of the entity resulting from the business combination - assuming the acquisition date as the start date of the financial year (assuming 1 February 2025 as the new reporting date) to which these financial statements refer, as required by IFRS 3 - would amount to €1,779 million and €209.2 million respectively (without considering non-recurring income and expenses).

The comparison between the cost of the business combination and the acquirer's share of the net fair value of the acquired assets and liabilities did not identify any residual goodwill.

3.5 Financial statements in foreign currencies

The translation into euro of the financial statements of foreign subsidiaries denominated in currencies other than the euro is carried out by applying the exchange rates in force at the end of the year to assets and liabilities and applying average exchange rates in the period to income statement items, while shareholders' equity is recognised at historical exchange rates, usually identified as the exchange rates at the end of the first year in which the investee company was included in the consolidation scope.
Foreign exchange gains or losses arising from the translation of financial statements presented in foreign currencies using the above methods are cumulatively recognised under other comprehensive income in a specific equity reserve until the equity investments are disposed of.
The exchange rates used for translation are shown in the following table:

		Final exchange rate at		Average exchange rate	
Currency	**Code**	**31.01.2026**	**31.01.2025**	**FY 2025**	**FY 2024**
US dollar	USD	1.19	1.04	1.14	1.08
Hong Kong dollar	HKD	9.31	8.10	8.90	8.41
Chinese renminbi	RMB	8.28	7.54	8.17	7.76
Serbian dinar	RSD	117.28	117.13	117.23	117.07
Indian rupee	INR	109.58	89.99	99.99	90.45
Emirate Dirham	AED	4.38	n.a.	4.28	n.a.

3.6 Goodwill

Goodwill is recognised at cost, less any accumulated impairment.
Goodwill acquired as part of a business combination is determined as the excess of the sum of the considerations transferred to the business combination, shareholders' equity attributable to non-controlling interests and the fair value of any equity investment previously held in the acquiree, over the fair value of the net assets acquired and liabilities assumed at the acquisition date.
If the value of the net assets acquired and liabilities assumed exceeds the sum of the considerations transferred, the shareholders' equity attributable to non-controlling interests and the fair value of any equity investment previously held in the acquiree, the excess amount is immediately recognised in the income statement as income.
Goodwill is not amortised, but is tested annually, and whenever events or circumstances indicate the possibility of impairment, for recoverability pursuant to IAS 36 - Impairment of Assets.
If the recoverable amount is lower than the carrying amount, the asset is written down to the recoverable amount. If goodwill is allocated to a cash-generating unit that is partially transferred/disposed of, the goodwill associated with this unit is used to determine any gain/loss arising from the operation.

3.7 Brands

Brands deriving from business combinations are recognised at fair value at the date of the combination, according to the acquisition method. They are not amortised as they have an indefinite useful life, but are tested annually, and whenever events or circumstances indicate the possibility of impairment, for recoverability pursuant to IAS 36 - Impairment of Assets. After initial recognition, brands are valued at cost less any cumulative impairment.

3.8 Intangible assets

Intangible assets consist of non-monetary items, identifiable and without physical substance, which can be controlled by the Group, can generate future economic benefits and whose cost can be reliably determined. These items are recognised at cost, less amortisation, calculated using the straight-line method for a period corresponding to the useful life, and any impairment. Useful life is reviewed annually. Specifically:

Licences – Licences deriving from business combinations are recognised at fair value at the date of the combination, according to the acquisition method. After initial recognition, licences are valued at cost less amortisation and any cumulative impairment. Amortisation is calculated based on the difference between the cost and the residual value at the end of their useful life, on a straight-line basis over their useful life (defined as 40 years).
For a description of the criteria used to define useful life and residual value at the end of useful life, see note 6.10 (Intangible assets).

Software – The costs of software licences, including ancillary costs, are capitalised and recognised in the financial statements net of amortisation and any cumulative impairment. The depreciation rate used may vary between 20% and 33%.

Other intangible assets – These assets are measured at acquisition cost, less amortisation calculated on a straight-line basis throughout their useful life and cumulative impairment.
The value of the franchising network recognised post-business combination is amortised on the basis of a useful life of 20 years.
The values allocated to intangibles arising from the final purchase price allocation of JB Licenses S.r.l. (Customer relationships and Licensor relationships) are amortised over an estimated useful life of 6 years.

3.9 Property, plant and equipment

Property, plant and equipment is measured at acquisition cost, including ancillary costs booked directly, less depreciation and cumulative impairment. Land is not depreciated even if acquired at the same time as buildings.
Depreciation is booked from the month in which the assets are available and ready for use.
Depreciation is charged on a monthly basis at constant rates that allow assets to be depreciated until their useful life is ended or, in the case of disposals, until the last month of use.

Depreciation is calculated on a straight-line basis over the estimated useful lives of property, plant and machinery as shown in the following table:

Buildings	17-33 years
Light construction	10 years
Plant and equipment for lifting, loading, unloading, weighing, etc.	13 years
Miscellaneous machinery, appliances and equipment	9 years
Special facilities for communications and remote signalling	4 years
Furnishings	9 years
Alarm systems	9 years
Specific bar, restaurant and canteen facilities	12 years
Bar, restaurant and canteen furnishings	9 years
Office furniture and ordinary machinery	8 years
Electromechanical and electronic office equipment	5 years
Cash registers	5 years
Motor vehicles and internal transport	4-5 years
Leasehold improvements	Based on the remaining term of the lease of the asset

Ordinary maintenance costs are charged in full to the income statement in the period in which they are incurred.
Leasehold improvements are classified as tangible assets. The depreciation period is the lesser of the remaining useful life of the tangible asset and the remaining term of the lease.

3.10 Right-of-use assets

When signing a contract, the OVS Group assesses whether it is, or contains, a lease, i.e. whether the contract confers the right to direct the use of an identified asset for a period of time in exchange for a consideration.
The Group uses a single model of recognition and measurement for all leases, except for leases of low-value assets. The Group recognises liabilities relating to lease payments and the right of use asset, which represents the right to use the asset underlying the contract.

The Group recognises right of use assets at the lease commencement date (i.e. the date on which the underlying asset is available for use). Right of use assets are measured at cost, net of accumulated depreciation and impairment losses, and adjusted for any remeasurement of the lease liabilities. The cost of the right of use includes the amount of the lease liabilities recognised, the initial direct costs incurred and the lease payments made as of the commencement or before inception, net of any incentives received.
Right-of-use assets are depreciated on a straight-line basis from the commencement date of use of the underlying asset over the shorter of the end of the useful life of the asset and the end of the lease term.
Right of use assets are subject to impairment. See the information provided in the following section.

3.11 Impairment of tangible and intangible assets

IAS 36 stipulates that tangible and intangible assets must be tested for impairment if indicators suggest that such a problem might exist.
Impairment testing takes place at least once a year in the case of goodwill, other intangible assets with an indefinite useful life and assets not available for use.
In accordance with the Group's policies, the recoverability of the amounts recognised is assessed by comparing the carrying amount with the higher of the fair value (current realisable value) less the costs of disposal and the value in use of the asset. Value in use is defined by discounting the expected cash flows generated by the asset.
To determine value in use, expected future cash flows are discounted using a rate that reflects current market valuations of the time value of money, compared with the investment period and the specific risks associated with the activity.
For the purposes of assessing impairment, assets are analysed starting from the lowest level for which there are separately identifiable independent cash flows (cash generating units).
If the recoverable amount of an asset is lower than the carrying amount, the carrying amount is reduced to the recoverable amount. This reduction constitutes impairment and is charged to the income statement.
If there is an indicator of reversal of the impairment loss, the recoverable amount of the asset is recalculated and the carrying amount is increased to this new amount. The increase in the carrying amount may not, however, exceed the net carrying amount that the asset would have had if impairment had not occurred.
Goodwill write-downs cannot be reversed.
In order to provide complete information, it should be noted that in 2019, the Group approved another update of this policy (the "IAS 36 Policy on Impairment and Impairment Testing"), making several revisions, particularly in order to bring it into line with the amendments made to the accounting standards and, specifically, with the entry into force of the new IFRS 16 international accounting standard from 2019, which entailed the inclusion of a new "category" of tangible assets with a very significant overall value, relating to the rights to use the assets underlying the leases, consequently increasing both the carrying amount of the OVS Group's CGUs and their EBITDA accounting flows (due to the "removal" of the cost of lease payments). However, no significant changes were made to the methodology used and summarised above.
As was the case in previous years, when compiling the financial statements at 31 January 2026, the Group made use of an external expert to prepare the impairment testing. The methods applied, the parameters used and the results of the impairment tests are extensively commented on in the following sections of these notes.

3.12 Other equity investments

Other equity investments (i.e. other than in subsidiaries, associates and joint ventures), where these exist, are included among non-current assets, or among current assets if they will remain among the assets of the OVS Group for a period of, respectively, more than one year and no longer than one year.
Other equity investments constituting FVTPL (see the next section) financial assets are measured at fair value, if this can be determined, and any gains or losses deriving from changes in the fair value are entered directly under other comprehensive gains/(losses), until they are transferred or undergo impairment, at which time the other comprehensive gains/(losses) previously recognised in equity are recognised in the income statement for the period.
Other equity investments for which the fair value is not available are recognised at cost, written down for any impairment.

3.13 Financial assets

Financial assets are recognised under current and non-current assets based on maturity and expectations of when they will be converted into monetary assets. Financial assets include equity investments in other companies (other than associates and joint ventures), derivatives, receivables, and cash and cash equivalents.
The OVS Group's financial assets are classified according to the business model adopted for the management of these assets and the related cash flows. The categories identified are as follows:

FINANCIAL ASSETS MEASURED AT AMORTISED COST

Financial assets that meet the following requirements are categorised in this class: (i) the asset is owned within the framework of a business model whose objective is to own the asset in order to collect contractual cash flows; and (ii) the contractual terms of the asset provide for cash flows represented solely by payments of principal and interest on the principal amount to be repaid. In this specific case, these are mainly loans recognised as assets (if these exist), and trade and other receivables, as described in the section "Trade and other receivables" below. Receivables and loans recognised as assets are included in current assets, except for those with a contractual maturity of more than twelve months from the reporting date, which are classified as non-current assets. Receivables are classified in the statement of financial position as trade and other receivables. Loans recognised as assets are classified as financial assets (current and non-current). With the exception of trade receivables that do not contain a significant financial component, other receivables and loans recognised as assets are initially recognised in the financial statements at their fair value plus any ancillary costs directly attributable to the transactions that generated them. Upon subsequent measurement, assets in this category are measured at amortised cost using the effective interest rate. The effects of this measurement are recognised among the financial income components. Such assets are also subject to the impairment model described in the section "Trade and other receivables".

It should be noted that, pursuant to IFRS 16, the OVS Group, as an intermediate lessor in a sub-lease, classifies the sub-lease as a finance lease if it meets the conditions laid down by the standard. If the sub-lease is classed as a finance lease, the original lessee eliminates the right of use on the lease asset in the main lease agreement at the inception of the sub-lease and continues to account for the original lease liability in accordance with the lessee's accounting model, while simultaneously booking a financial asset for leases that represents the entire life of the sub-lease.

FINANCIAL ASSETS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME ("FVOCI")

Financial assets that meet the following requirements are categorised in this class: (i) the asset is owned within the framework of a business model whose objective is achieved either through the collection of contractual cash flows or through the sale of the asset; and (ii) the contractual terms of the asset provide for cash flows represented solely by payments of principal and interest on the principal amount to be repaid. These assets are initially recognised in the financial statements at their fair value plus any ancillary costs directly attributable to the transactions that generated them. Upon subsequent measurement, the valuation carried out at the time of recognition is updated and any changes in fair value are recognised in the statement of comprehensive income. As with the preceding category, these assets are subject to the impairment model described in the section "Trade and other receivables" below.

FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS ("FVTPL")

Financial assets that cannot be placed in any of the previous categories are classified under this category (a residual category). These are mainly derivatives and listed equity instruments that the Group has not irrevocably decided to classify as FVOCI at initial recognition or at the time of transition (see note 6.4 below in particular). Assets in this category are classified under current or non-current assets according to their maturity and recognised at fair value at the time of initial recognition. In particular, equity investments in non-consolidated companies over which the Group does not exercise significant influence are included in this category and recognised under "Equity investments". The ancillary costs incurred when recognising the asset are immediately charged to the consolidated income statement. Upon subsequent measurement, FVTPL financial assets are measured at fair value. Gains and losses arising from changes in fair value are recognised in the consolidated income statement in the period in which they are recorded, under other net income/(expenses).

Purchases and disposals of financial assets are booked at the settlement date.

Financial assets are removed from the statement of financial position when the right to receive the cash flows from the instrument has been extinguished and the Group has substantially transferred all the risks and benefits relating to the instrument and its control.

The fair value of listed financial instruments is based on the current offering price. If the market for a financial asset is not active (or unlisted securities are involved), the Group defines fair value using valuation techniques. These techniques include referring to advanced trading in progress, securities with the same characteristics, cash flow analyses, and price models based on the use of market indicators and aligned, as far as possible, with the assets to be valued.
In the process of formulating the valuation, the Group emphasises the use of market information over the use of internal information specific to the nature of the Group's business.

3.14 Inventory

Inventories are recognised at the lower of acquisition cost and net realisable value.
The acquisition cost is determined by configuring the weighted average cost for the reporting period. The cost also includes ancillary costs directly attributable to the purchase of goods.
Goods relating to the collections are written down according to the presumed possibility of future realisation, by recognising a specific adjustment provision.

3.15 Trade and other receivables

The assumption adopted by OVS with regard to trade and other receivables is that these do not contain a significant financial component maturing in less than one year: they are therefore recognised initially at the price defined for the relevant transaction (determined according to the provisions of IFRS 15 – Revenue from Contracts with Customers). Upon subsequent measurement, they are valued using the amortised cost method and the impairment model introduced by IFRS 9. According to this model, the Group assesses receivables on an expected loss basis, replacing the framework set out in IAS 39 above, which is typically based on incurred losses.
For trade receivables, the Group has adopted a simplified measurement approach, which does not require the recognition of periodic changes in credit risk, but rather the recognition of an expected credit loss ("ECL") calculated over the entire life of the receivable ("lifetime ECL"). Depending on the diversity of customers, it was decided to use different matrices for different groups of receivables, based on the characteristics of the credit risk. In particular, the expected solvency of counterparties is assessed according to different clusters and the stratification of the trade receivables in each cluster into different categories based on past due days.
Write-down rates are applied to these categories that reflect the related expected losses (based on historical trade receivables payment profiles). Some trade receivables are assessed individually and, if necessary, fully written down, if there is no reasonable expectation of recovery, or if there are inactive commercial counterparties (situations of bankruptcy and/or initiation of legal actions, classified by OVS in the "Disputed receivables" category).

3.16 Cash and banks

The Cash and banks item includes available cash and credit balances of bank current accounts with no limits or restrictions, recognised at nominal value. These liquid assets are short-term, highly liquid investments that are readily convertible to cash, for which the risk of a change in value is insignificant. Investments are generally classified as cash and cash equivalents when their original maturity is three months or less.
Cash in foreign currency is valued according to period-end exchange rates.

3.17 Provisions for risks and charges

Provisions for risks and charges are allocated for current obligations, legal or constructive, arising from a past event in respect of third parties for which the utilisation of resources, the amount of which can be reliably estimated, is probable.
The amount recognised as a provision is the best estimate of the expenditure required to settle the current obligation fully. Risks for which the emergence of a liability is only possible are disclosed in the notes to the financial statements, and no provision is made.

3.18 Employee benefits

PENSION PLANS

Post-employment benefits are defined under either "defined contribution" plans or "defined benefit" plans.
Defined benefit plans, such as the provision for employee severance benefits accrued before the entry into force of the 2007 Budget, are plans with guaranteed benefits for employees that are paid out at the end of the employment relationship. The liability relating to defined benefit plans is determined on the basis of actuarial assumptions and booked on an accruals basis in line with the service required to obtain the benefits; the liability is measured annually with the help of independent actuaries.

Employee severance benefits and pension provisions, which are determined using an actuarial method, provide for the recognition in the income statement under employment cost of the rights accrued during the year, while the figurative cost is included among net financial income (expenses). Actuarial gains and losses that reflect the effects of changes in the actuarial assumptions used are instead fully recognised in a specific equity reserve in the year in which they arise, with immediate recognition in the statement of comprehensive income.
From 1 January 2007, the 2007 Budget and the associated implementing decrees introduced significant amendments to the rules on employee severance benefits, including options for employees, to be exercised by 30 June 2007, with regard to the allocation of their accruing severance benefits. Specifically, new flows of severance benefits may be directed by the employee to preselected or company pension schemes (in the latter case, the company pays severance benefit contributions into a treasury account set up with the INPS (the Italian social security and welfare institution).
As a result of these amendments, the provision for employee severance benefits accrued since the date of the employee option (defined benefit plan) has been recalculated by independent actuaries to exclude the component relating to future pay increases.
The portion of the employee severance benefits that has accrued since the option date (30 June 2007) is regarded as a defined benefit plan, and the accounting treatment is similar to that used for all other contribution payments, unless the consolidated entity is not exempt from this modification.
Employee benefits also include pension provisions and similar obligations. This provision mainly includes liabilities and rights accrued by the employees of the former Standa, in relation to supplementary pension schemes pertaining to them; the liability associated with such defined-benefit programmes is determined on the basis of actuarial assumptions and the amount recognised in the financial statements represents the present value of the OVS Group's obligation.

COMPENSATION PLANS IN THE FORM OF STOCK OPTIONS

The Group provides additional benefits to certain employees and consultants through stock option plans offering equity-settled stock options or stock grants. In accordance with IFRS 2 Share-based Payments, the current value of the stock options determined at the grant date using the "Black and Scholes" method is recognised in the income statement under staff costs on a straight-line basis over the period between the grant date of the stock options and the vesting date, with a direct balancing entry in shareholders' equity.
The present value is defined on the basis of market parameters and non-granting conditions and is not subject to subsequent amendments after the date of initial determination.
The effects of granting conditions not related to the market (performance and retention conditions) are not taken into account in the evaluation of the fair value of the instruments granted, but are relevant to the evaluation of the number of instruments expected to be exercised.
At the reporting date the Group reviews its estimates of the number of options that are expected to be exercised. The effect of the review of the original estimates is recognised in the income statement over the vesting period with a balancing entry in shareholders' equity.
When the stock options are exercised, the amounts received from the employee, net of costs directly attributable to the transaction, are credited to the share capital in an amount equal to the nominal value of the issued shares, with the remaining portion credited to the share premium reserve.

3.19 Financial liabilities and trade and other payables

Payables and other financial and/or trade liabilities are initially recognised at fair value, less any transaction costs incurred in relation to obtaining the obligation. They are subsequently carried at amortised cost; in the case of loans, any difference between the amount received (less transaction costs) and the total repayment amount is recognised in the income statement over the period of the loan, using the effective interest rate method (amortised cost).
Trade payables are classified as current liabilities if payment will take place within one year of the reporting date. Otherwise, such payables are classified as non-current liabilities.
Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for twelve months after the reporting date; in this case, only the portion falling due within twelve months of the reporting date is classified as a current liability. Payables to banks and other lenders are removed from the financial statements when they are settled, that is when all risks and charges relating to the instrument are transferred, cancelled or extinguished. The classification of financial liabilities has not changed since the introduction of IFRS 9.

3.20 Financial liabilities for leases

At the commencement date of a lease, the Group recognises financial liabilities for leases, measuring them at the present value of the lease payments due and not yet paid at that date. The payments due include fixed payments (including substantially fixed payments) net of lease incentives received, variable lease payments that are index or rate dependent, and amounts expected to be paid for residual value guarantees. Lease payments also include the exercise price of a call option if it is reasonably certain that this option will be exercised by the Group, and lease termination penalty payments if the lease term takes into account the Group's exercise of the lease termination option.

Variable lease payments that are not dependent on an index or rate are recognised as costs in the period in which the event or condition that generated the payment occurs.

In calculating the present value of the payments due, the Group uses the incremental borrowing rate at inception if the implicit interest rate cannot be easily determined. After the commencement date, the amount of the lease liability is increased to reflect interest on the lease liability and decreased to reflect payments made. In addition, the carrying value of lease payables is recalculated in the event of any amendments to the lease or the revision of the contractual terms to change the payments; it is also recalculated in the event of changes to the valuation of the option to purchase the underlying asset or for changes in future payments that result from a change in the index or rate used to determine such payments.

3.21 Financial derivatives

At the date of entering into the contract, derivatives are initially recognised at fair value as FVTPL financial assets when the fair value is positive or as FVTPL financial liabilities when the fair value is negative. The Group normally uses derivatives to hedge foreign exchange risk or interest rate risk.

Pursuant to IFRS 9, derivatives may only be booked using hedge accounting methods when:

- at the beginning of the hedge there is formal designation and documentation of the hedging relationship;
- it is assumed that the hedge is highly effective;
- the effectiveness can be reliably measured;
- the hedge is highly effective throughout the financial reporting periods for which it is designated.

When derivatives meet the criteria for hedge accounting, the following accounting treatments apply:

- if the derivatives hedge the risk of changes in the fair value of the assets or liabilities being hedged (fair value hedge, e.g. hedging of fluctuations in the fair value of fixed-rate assets/liabilities), the derivatives are recognised at fair value through profit or loss; correspondingly, the assets or liabilities being hedged are adjusted to reflect changes in fair value associated with the hedged risk;
- if the derivatives hedge the risk of changes in the cash flows of the assets or liabilities being hedged (cash flow hedge, e.g. hedging of changes in the cash flows of assets/liabilities due to variations in interest rates or the energy market price [PUN index]), changes in the fair value of the derivatives are initially recognised in equity and subsequently in profit or loss in line with the economic effects of the hedged transaction.

If hedge accounting is not applied, gains or losses arising from the measurement of the derivative at fair value are immediately recognised in the income statement.

3.22 Segment information

The information relating to business segments was provided pursuant to IFRS 8 - Operating segments, which stipulates that information be presented in a way that is consistent with the procedures used by management to make operational decisions. The operating segments and the information presented are therefore identified according to the internal reports used by management to allocate resources to the various segments and to analyse their performance.

IFRS 8 defines an operating segment as a component of an entity that: i) engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity); ii) whose operating results are reviewed regularly by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance; and iii) for which discrete financial information is available.

The operating segments identified by management, which incorporate all of the services and products provided to customers, are represented by the OVS division, dedicated to the marketing of clothing products for the value fashion market segment, and the Upim division, which provides clothing for women, men and children for the value segment of the Italian market, as well as products in the homeware and fragrance segments.

The Italian business operated in franchising with the GAP brand (acquired in 2022), the STEFANEL business (acquired in March 2021) and the GOLDENPOINT business (acquired in July 2025) are presented together as "Other businesses", given their irrelevance in terms of invested capital

and turnover (less than 10% when compared with Group data).
Lastly, it should be noted that JB Licenses S.r.l. represents a vertical integration with a supplier/customer of the Group that was already operating under the OVS and Upim brands, therefore it does not represent the addition of a new operating segment.

3.23 Revenues and costs

On the basis of the five-step model introduced by IFRS 15, the Group recognises revenues after identifying contracts with its customers and the related services to be provided (transfer of goods and/or services), determining the consideration to which it believes it is entitled in exchange for providing each of these services, and assessing how these services are provided (at a point in time or over time).
Revenues from the sales of DOS are recognised when the customer makes the payment. More specifically, revenues from the sale of goods are recognised in the income statement when control of the product sold is transferred to the customer, usually coinciding with the delivery or shipment of the goods to the customer; revenues for services are recognised in the period in which the services are rendered, with reference to completion of the service provided and as a proportion of the total services still to be rendered.
Revenues are recognised at the fair value of the consideration received. Revenues are recognised net of value added tax, expected returns and any trade discounts, rebates and bonuses granted.
Sales in the franchising channel are recognised when the goods are shipped to the customer, as from that moment ownership, with the relevant risks and benefits, is transferred. The provision for returns and discounts, which is recorded as an adjustment to revenue, is estimated on the basis of future forecasts, taking account of historical trends, and is recognised as a variable component of the contractual fee, with the simultaneous presentation of a liability for returns in the statement of financial position.
Variable components of the fee (such as those linked to returns) are recognised in the financial statements only if it is highly probable that there will be no significant future adjustment to the amount of revenue recognised.
Payment times granted to Group customers do not exceed a 12-month period, so the Group does not make transaction price adjustments to take financial components into account.
Costs are recognised when they relate to goods and services acquired or used during the year, while in the case of multi-year use the costs are systematically spread. The acquisition of goods, mirroring revenue, is determined by the transfer of control over them.

3.24 Income from leases

Income from operating leases is recognised on a straight-line basis over the term of the leases to which it relates, unless it relates to sub-leases with characteristics to which the IFRS 16 accounting standard applies (in such cases, see the note on "Financial assets" above).

3.25 Income tax

Current income tax for the year is calculated by applying the current tax rates to reasonably estimated taxable income, determined in accordance with the tax regulations in force. The expected payable, net of payments on account and withholding taxes, is recognised in the statement of financial position under "Current tax liabilities" (or under "Current tax assets" if the payments on account made and the withholdings exceed the estimated payable). Deferred tax assets and deferred tax liabilities are determined on the basis of taxable temporary differences between the carrying amount of assets and liabilities and their value for tax purposes, except for goodwill, which is not tax deductible, and are classified under non-current assets and liabilities.
Income tax is recognised in the income statement, except in relation to items directly credited to or debited from equity, in which case the tax effect is recognised directly in equity.
Deferred tax assets, including those relating to previous tax losses, are recognised to the extent that it is probable that future taxable income will be available in respect of which they can be recovered. The value of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable income will be available in the future to use all or part of this receivable.
Deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on the tax rates in force and tax rates that have been enacted or substantively enacted at the reporting date.

3.26 Foreign exchange gains and losses

Foreign exchange transactions are recognised at the current exchange rate at the date of completion of the transaction (or the relative down payment flow). Monetary assets and liabilities denominated in foreign currencies are translated into euro at the current exchange rate at the reporting date and recognised in the income statement under the "Foreign exchange gains and losses" item.

3.27 Earnings per share

EARNINGS PER SHARE - BASIC

Basic earnings per share is calculated by dividing the profit pertaining to the OVS Group by the weighted average of the ordinary shares outstanding during the year, excluding treasury shares.

EARNINGS PER SHARE - DILUTED

Diluted earnings per share is calculated by dividing the profit pertaining to the OVS Group by the weighted average of the ordinary shares outstanding during the year, excluding treasury shares. To calculate diluted earnings per share, the weighted average number of shares outstanding is adjusted assuming the exercise by all those granted rights with a potentially dilutive effect, while the profit pertaining to the OVS Group is adjusted to take account of any effects, net of tax, arising from the exercise of these rights.

3.28 Dividends

Dividends are recognised at the date of approval by the Shareholders' Meeting.

3.29 Accounting standards, amendments and interpretations effective as of financial year 2025

In preparing these consolidated financial statements, the same accounting standards and drafting criteria were substantially applied as in the preparation of the financial statements for the year ended 31 January 2025, having regard to the standards and amendments that came into effect on 1 January 2025, described below, which in any case did not have a material impact on the Group.
The measures that entered into force on 1 January 2025 are set out below.

Lack of exchangeability (Amendments to IAS 21) - In August 2023, the IASB issued an amendment to IAS 21 Effects of Changes in Foreign Exchange Rates clarifying when a currency is not exchangeable with other currencies and how a company should estimate spot exchange rates when a currency is not exchangeable. This amendment was approved by the European Union on 12 November 2024 and applies from 1 January 2025.
The adoption of this amendment has had no effect on the Group's consolidated financial statements.

3.30 New accounting standards and interpretations approved by the European Union and effective for financial years starting on or after 31 January 2026 and not yet adopted by the OVS Group

At the date of preparation of these annual financial statements, the competent bodies of the European Union have completed the endorsement process for the adoption of the following accounting standards and amendments. With regard to the applicable standards, the Group has decided not to exercise the early adoption option, where this exists.

Amendments to the classification and measurement of financial instruments (Amendments to IFRS 9 and IFRS 7) - With these amendments, the IASB introduced additional disclosure requirements particularly with regard to Investments in equity instruments designated under FVOCI. The amendments will apply as from the financial statements of financial years starting on or after 1 January 2026.

Annual Improvements to IFRS Accounting Standards – Volume 11 Cycle (Amendments to IAS 7 and IFRS 1, 7, 9, 10) - On 18 July 2024, the IASB published a document entitled "Annual Improvements Volume 11" that includes clarifications, simplifications, corrections and changes to improve the consistency of various IFRS Accounting Standards.
The revised standards are: IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 7 Financial Instruments: Disclosures and related guidelines on the implementation of IFRS 7, IFRS 9 Financial Instruments, IFRS 10 Consolidated Financial Statements and IAS 7 Statement of Cash Flows.
The amendments will become effective from 1 January 2026, but early adoption is permitted.

Contracts referencing nature-dependent electricity (Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures) - The objective of the amendments to IFRS 9 and IFRS 7 Contracts referencing nature-dependent electricity is to more accurately report the financial effects of electricity contracts dependent on renewable sources, through the application of "own use" requirements, hedge accounting and new disclosure requirements.
These amendments were approved by the European Union on 30 June 2025 and will apply from 1 January 2026. The Group has decided not to exercise the early adoption option.
However, during 2025, the Parent Company OVS S.p.A. signed a Power Purchase Agreement (PPA) and Virtual Power Purchase Agreement (VPPA), with the aim of stabilising the cost of energy supplies in the medium to long term and, at the same time, acquiring energy from renewable sources and the related guarantees of origin. Specifically, two agreements were in effect at 31 January 2026, summarised below.

VPPA Capoda: a Virtual Power Purchase Agreement with a duration of 10 years. The relevant photovoltaic plant is located in Pozzolo Formigaro (province of Alessandria), with an expected capacity of approximately 8.05 MWp and expected annual production of approximately 10.9 GWh. The agreement is virtual, so it does not provide for the physical delivery of energy between the parties, but rather periodic financial regulation defined by the agreement. In addition to financial regulation, the agreement also provides for the transfer to OVS of the Guarantees of Origin associated with production.
PPA Catania: a Power Purchase Agreement with a duration of 15 years, with the possibility of extension for a further 5 years. The relevant photovoltaic system is located in Contrada Passo Martino, Catania, with a rated power of approximately 2.45 MWp, connection of 2.389 MWAC and estimated production of approximately 4.5 GWh in the first year of operation. As regards settlement, this agreement provides for the purchase of the energy produced by the plant according to a pay-as-produced model. The agreement will assign 1 Guarantee of Origin for each MWh produced and fed into the grid.
It should be noted that the Capoda VPPA was signed on 28 January 2026, and therefore the Group, given its formalisation on a date close to the end of the financial year, will determine its fair value starting from the next financial statements.
Regarding the Catania PPA instead, as provided for in IFRS 9, the Group adopted the "own use exception". This allows for the fair value measurement of the agreement to be excluded, when it is stipulated to receive or physically supply energy in line with the operating requirements of the company, and does not envisage cash settlement.

IFRS 18 Presentation and Disclosure in Financial Statements - In April 2024, the IASB issued IFRS 18, replacing IAS 1 Presentation of Financial Statements. IFRS 18 introduces new requirements for the presentation of the income statement, including specific totals and subtotals. Furthermore, entities will have to classify all costs and revenues in the income statement under four categories: operational, investment, financing, income taxes and discontinued business activities, where the first three categories are new. IFRS 18, and the amendments to the other standards, are effective for financial years beginning on or after 1 January 2027, but early adoption is permitted unless otherwise disclosed. IFRS 18 will be apply retrospectively.

With regard to the above standards and interpretations, it is not expected that adoption will have a material impact on the valuation of the OVS Group's assets, liabilities, costs and revenues.

3.31 Accounting standards, amendments and interpretations not yet approved by the European Union and not adopted by the OVS Group

The international accounting standards, interpretations, amendments to existing accounting standards and interpretations, or specific provisions contained in the standards and interpretations approved by the IASB and not yet adopted by the OVS Group as they are not yet endorsed by the European Union, are shown below.

IFRS 14 Regulatory deferral accounts - Standard not yet approved by the European Union.

IFRS 19 - Subsidiaries without public accountability additional disclosures and subsequent amendments to IFRS 19 - In May 2024, the IASB issued IFRS 19, which allows eligible entities that meet certain requirements to opt for a reduction in their disclosure requirements, while continuing to apply the recognition, measurement and presentation requirements of other IFRS accounting standards. IFRS 19 will become effective for financial years starting on or after 1 January 2027, with the option of early adoption. Given that the Parent Company's shares are publicly listed, the Group is not eligible to apply IFRS 19.

Sale or contribution of assets between an investor and its associate or joint venture (Amendments to IFRS 10 and IAS 28) - Amendments not yet approved by the European Union.

As already mentioned, no accounting standards and/or interpretations for which adoption is mandatory for periods beginning on or after 1 February 2026 have been applied in advance.
In addition, the Group will assess the potential impacts on the Consolidated Financial Statements when these standards/interpretations are endorsed by the European Union.

4. Use of estimates

The preparation of the consolidated financial statements in accordance with the IFRSs requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the reporting date. The final results may differ from these estimates. Estimates are used to recognise provisions for doubtful accounts, inventory obsolescence, useful life, depreciation and amortisation, impairment of assets, employee benefits, restructuring provisions, deferred tax assets, other provisions for risk and valuations of derivatives. Estimates and assumptions are reviewed periodically and the effects of any changes are immediately reflected in the income statement.

In addition to the above, and in accordance with the instructions contained in the ESMA document of 25 October 2023 ("European common enforcement priorities for 2023 annual financial reports"), it should be noted that in 2025, although the Russian-Ukrainian conflict and the conflict in the Middle East continue to influence the global economic scenario (in particular the tensions affecting the navigation area of the Suez Canal, with serious repercussions in supply processes from the Far East), the available forecasts for the scenarios in the foreseeable future are consistent with the assumptions and hypotheses used in preparing the impairment testing of the Group's consolidated financial statements (the estimation process for these financial statements in 2025 is described in detail in Notes 6.11 and 6.12 below). Accordingly, no indicators of possible impairment at 31 January 2026 (trigger events) were identified in addition to the impairment losses already recorded in previous years. There were no significant changes in the volatility of the estimates for other items regarded as material (inventories and trade receivables from customers). For further details, see in any case notes 6.2 and 6.3 below and the extensive comments in the Report on Operations.

Finally, with regard to the additional ESMA guidelines of 24 October 2024 ("European common enforcement priorities for 2024 annual financial reports"), there are no significant considerations for the Group except for those already reported in detail under "Accounting policies, judgements, significant estimates".

4.1 Impairment of tangible and intangible assets

Goodwill and the brands are tested at least once a year, and in any case whenever events or circumstances indicate the possibility of impairment, for recoverability pursuant to IAS 36 – Impairment of Assets. If the recoverable amount is less than the carrying amount, the asset is written down to its recoverable amount (defined as the greater of its value in use and its fair value). Verification of the amount requires subjective judgements to be made, based on information available within the OVS Group and from the market, as well as past experience. In addition, where potential impairment is identified, it is determined using evaluation techniques regarded as appropriate. The same verifications of value and the same valuation techniques are applied to intangible and tangible assets with a definite useful life, including right-of-use assets, when there are indicators suggesting that recovery of the relative net carrying amount through use might be difficult. The correct identification of impairment triggers and estimates to determine this depend on factors that may vary over time, with an effect on the valuations and estimates made by the OVS Group.

4.2 Depreciation and amortisation

Depreciation and amortisation reflect the best estimate of the expected useful life of assets with a finite life.

This estimate is based on the possibility of use of these assets and their capacity to contribute to the OVS Group's results in future years.

4.3 Inventory obsolescence and inventory differences

The OVS Group develops and sells items of clothing that change according to customer taste and trends in the world of fashion. The provision for inventory write-downs therefore reflects estimated expected impairment of the collections in stock, taking account of the OVS Group's capacity to sell items of clothing through a range of distribution channels.

The provision for inventory differences reflects the estimate of inventory differences at the end of each of the periods under review, in view of the fact that the OVS Group carries out a physical inventory in February and/or June of each year.

4.4 Provisions for doubtful accounts

The provision for doubtful accounts reflects the best estimate of losses relating to the portfolio of trade receivables. This estimate is based on the losses expected by the OVS Group, determined on the basis of past experience with similar receivables, current and previous receivables falling due, the careful monitoring of credit quality and projections of economic and market conditions. See the information given above regarding "Trade and other receivables".

4.5 Deferred tax assets/liabilities

Deferred tax assets are booked based on expectations of taxable income in future years for the purpose of recovering them. The evaluation of expected taxable income for the accounting of deferred tax assets depends on factors that may vary over time and have significant effects on the recoverability of the deferred tax assets.

4.6 Pension funds and other employee benefits

The cost of the defined benefit pension plans is determined using actuarial valuations. The actuarial valuations involve making assumptions about discount rates, expected rates of return on investments, future salary increases, mortality rates and future pension increases. Because of the long-term nature of these plans, such estimates are subject to significant uncertainty. Further details are provided in note 6.19.

The costs recognised in the income statement in relation to incentive plans for employees (see the explanations in note 7.26 "Staff costs") are mainly influenced by the estimated timing of the occurrence of the event that triggers vesting, as well as the actual possibility of the occurrence of the event and the presumed reference value of the plan. Therefore, this estimate depends on factors that may vary over time and variables that the directors might find it hard to predict and determine. Changes in these items may significantly influence the assessments made by the directors and therefore result in changes in the estimates.

4.7 Provisions for risks and charges

Provisions representing the risk of a negative outcome are recognised for legal and tax risks. The amount of provisions recorded in the financial statements in relation to these risks represents the best estimate to deal with potential risks.

This estimate entails the use of assumptions that depend on factors that might change over time and that might therefore have significant effects compared with the current estimates used to prepare the financial statements.

4.8 Valuation of derivatives

The determination of the fair value of unlisted financial assets, such as derivatives, takes place using commonly used valuation techniques that require basic assumptions and estimates. These assumptions may not occur within the time frames and in the manner envisaged. Estimates of derivatives may therefore differ from the final figures.

4.9 Financial liabilities and assets for leases and Right of use assets

The Group recognises the right of use asset and the lease liability. The right of use asset is initially measured at cost, and subsequently at cost, net of depreciation and cumulative impairment losses and adjusted to reflect the revaluations of the lease liability.

The Group values its lease liability at the present value of lease payments due and not paid at the commencement date, discounting them using the interest rate as defined above.

The lease liability is subsequently increased by interest accruing on that liability and decreased by the lease payments owed, and is revalued in the event of a change in future lease payments due as a result of a change in the index or rate, in the event of a change in the amount that the Group expects to have to pay as a residual value guarantee or when the Group changes its assessment with regard to the exercise of a purchase, extension or termination option.

Leases in which the Group acts as lessee may provide for renewal options which therefore affect the term of the lease. Assessments of whether there is a relative certainty that this option is (or is not) exercised may significantly affect the amount of lease liabilities and right of use assets as well as the incremental borrowing rate applied when it is not possible to easily determine the interest rate implicit in the lease.

4.10 Impacts of climate change

With regard to environmental risks related to climate change, it should be noted that environmental issues are a strategic priority for the OVS Group: the relevant risks are defined, assessed and consequently managed as part of a mitigation and adaptation plan in order to achieve certain objectives and, ultimately, to preserve the continuity of the business and the Group.
Within the periodic risk identification and assessment process, OVS also considers risks related to environmental and social aspects both from an inside-out perspective (impacts generated) and from an outside-in perspective (impacts suffered).
Climate change is identified as an area of significant risk, due to the actual impact generated by OVS in terms of CO_2 emissions and also the consequences that climate change may have on the business of the company and the Group.
Some time ago, OVS launched a decarbonisation plan with objectives approved by the Science Based Targets Initiative, to keep global warming below 1.5°C. More generally, fully aware of the risks associated with climate change, the Group has assessed climate risks in terms of physical risks and transition risks. The analyses showed that the risk of drastic environmental changes, with reference to the scope analysed, is more significant in the long term, beyond 2030. Given the average term of the Company's assets, the strategic planning horizon and the Group's capital allocation plans, which do not extend beyond the medium term, and the results of the assessment carried out to identify the potential financial costs associated with climate risks, the Directors did not believe that there would be any significant accounting impact in the consolidated financial statements at 31 January 2026, particularly with regard to potential reductions for impairment of non-financial assets or the need to make provisions related to climate risks.
Finally, for more information, including a review of the rules, processes and control activities adopted by the Group to prevent and manage any environmental risks, see the relevant section of the Report on Operations relating to the Consolidated Sustainability Report.

5. Information on financial risks

The main corporate risks identified, monitored and - as specified below - actively managed by the OVS Group are as follows:

- credit risk (relating both to normal commercial relationships with customers and to financing activity); and
- liquidity risk (relating to the availability of financial resources and access to the credit market, and to financial instruments in general); and
- market risk (defined as foreign exchange risk and interest rate risk).

The OVS Group aims to maintain balanced management of its financial exposure over time, to ensure that its liability structure is in balance with the composition of its balance-sheet assets and to provide the necessary operational flexibility through the use of cash generated by current operating assets and bank loans.
Management of the relative financial risks is centrally guided and monitored. Specifically, the central finance function is responsible for evaluating and approving the projected financial requirements of the entire Group, monitoring progress and establishing appropriate corrective action if necessary.
The financial instruments most used by the OVS Group are as follows:

- medium/long-term financing, including in the form of bond loans, to cover investments in non-current assets;
- short-term loans and use of lines of credit on current accounts to fund working capital.

In addition, the OVS Group enters into a considerable number of forward derivative contracts in currency, annually, in order to reduce exchange rate risks relating to the US dollar, which is the main currency used to purchase goods from suppliers in the Far East.
The following section provides qualitative and quantitative information on the impact of these risks on the OVS Group's business.

5.1 Credit risk

Credit risk represents the OVS Group's exposure to the risk of potential losses arising from default by counterparties. There were no significant concentrations of credit risk at the end of the year under review.
To reduce credit risk, the OVS Group generally obtains guarantees in the form of sureties in respect of loans granted for the supply of goods. At 31 January 2026, the total guarantee amount was €104.1 million, including €19.6 million in overdue receivables (€89.1 million at 31 January 2025, including €22.4 million in overdue receivables).
The Group also regularly undertakes revolving assignments of receivables without recourse for a small number of select customers. At 31 January 2026, the value of the receivables assigned was €20.7 million.
Trade receivables are recognised net of write-downs calculated on the basis of the risk of counterparty default, determined by using available information on the solvency of the customer and also taking historical data and prospective losses into account to the extent reasonably expected. Positions that are particularly significant, and that are objectively partially or totally irrecoverable, are written down individually.
Trade receivables totalled €94.7 million at 31 January 2026 (€107.0 million at 31 January 2025).
Receivables written down (partially or fully) amounted to €12.8 million at 31 January 2026 (€15.1 million at 31 January 2025).
Overdue receivables amounted to €24.9 million (€35.3 million at 31 January 2025).

The following tables provide a breakdown of trade receivables at 31 January 2026 and at 31 January 2025, grouped according to maturity and net of the provision for doubtful accounts:

(millions of euro)	At 31 January 2026	Due	Past due within 90 days	Past due between 90 and 180 days	Past due after 180 days
Trade receivables	107.5	69.8	25.0	0.8	11.9
Provision for doubtful accounts	(12.8)	0.0	(0.9)	(0.6)	(11.3)
Net value	94.7	69.8	24.1	0.2	0.6

(millions of euro)	At 31 January 2025	Due	Past due within 90 days	Past due between 90 and 180 days	Past due after 180 days
Trade receivables	122.1	71.9	35.0	2.1	13.1
Provision for doubtful accounts	(15.1)	(0.2)	(0.7)	(1.1)	(13.1)
Net value	107.0	71.7	34.3	1.0	0.0

The following table analyses financial assets, including for leases, according to the contractual maturities on which collection will take place, at 31 January 2026 and 31 January 2025:

(millions of euro)	Balance at 31 January 2026	1 year	1-5 years	> 5 years	Total
Financial assets for leases	0.2	0.1	0.1	0.0	0.2
Other loans receivable from third parties	3.7	0.0	3.7	0.0	3.7

(millions of euro)	Balance at 31 January 2025	1 year	1-5 years	> 5 years	Total
Financial assets for leases	0.7	0.3	0.4	0.0	0.7
Other loans receivable from third parties	5.9	0.0	5.9	0.0	5.9

5.2 Liquidity risk

Liquidity risk can arise through an inability to access, under economically viable conditions, the financial resources necessary for the OVS Group to operate. The two main factors influencing the OVS Group's liquidity levels are:

- the financial resources generated or absorbed by operating and investment activities;
- the expiry and renewal of financial debt.

The OVS Group's liquidity requirements are monitored by the central finance department to ensure effective access to financial resources and adequate liquidity investment/yield levels.

For a detailed description of the financial resources used by the OVS Group at 31 January 2026, see the notes below on "Shareholders' equity" and "Bank debt", respectively.

In light of the consolidated financial strength of the Group and in view of the 2026 Loan described in greater detail in paragraph 11. Subsequent events, management believes that the funds and credit facilities currently available, in addition to those generated by operating and financing activities, will enable the OVS Group to meet its requirements in respect of future investment activities, management of working capital and the repayment of debt when it is contractually due.

For more information about the changes that took place in the OVS Group's capital and financial structure during the financial year, see also note 6.14 below.

The following table breaks down financial liabilities (including trade and other payables): in particular, all the flows shown are nominal future undiscounted cash flows, calculated with reference to residual contractual maturities (for both the principal portion and the interest portion). Loans have been included based on the contractual maturity for repayment.

(millions of euro)	Balance at 31 January 2026	1 year	1-5 years	> 5 years	Total
Trade payables	413.4	413.4	0.0	0.0	413.4
Payables to banks (*)	93.2	27.3	65.9	0.0	93.2
Financial liabilities for leases	1,158.9	168.3	572.0	418.6	1,158.9
Bond loan	160.0	0.0	160.0	0.0	160.0
Financial expenses payable to banks (**)		8.6	2.6	0.0	11.2
Financial expenses for leases		65.2	170.5	84.4	320.1
Total	**1,825.5**	**682.8**	**971.0**	**503.0**	**2,156.8**

(*) The amount includes interest accrued but not yet paid at 31 January 2026.
(**) The amount was calculated by applying the forward curve recorded at 31 January 2026 to the loan repayment plan. For the Revolving Line, an average utilisation level of 50% was assumed.

The same breakdown for 31 January 2025 is as follows:

(millions of euro)	Balance at 31 January 2025	1 year	1-5 years	> 5 years	Total
Trade payables	435.0	435.0	0.0	0.0	435.0
Payables to banks (*)	82.1	17.1	65.0	0.0	82.1
Financial liabilities for leases	1,047.4	145.0	504.4	398.0	1,047.4
Bond loan	160.0	0.0	160.0	0.0	160.0
Financial expenses payable to banks (**)		8.9	10.0	0.0	18.9
Financial expenses for leases		61.6	162.8	76.0	300.4
Total	**1,724.5**	**667.6**	**902.2**	**474.0**	**2,043.8**

(*) The amount includes interest accrued but not yet paid at 31 January 2025.
(**) The amount was calculated by applying the forward curve recorded at 31 January 2025 to the loan repayment plan. For the Revolving Line, an average utilisation level of 50% was assumed.

The following table shows the breakdown of the derivatives entered into by the OVS Group and their fair value at year-end compared with the previous year:

	2025		2024	
(millions of euro)	**Assets**	**Liabilities**	**Assets**	**Liabilities**
IRS derivatives	0.0	(0.1)	0.0	0.0
Forward derivatives	0.2	(11.9)	14.8	0.0
Total	**0.2**	**(12.0)**	**14.8**	**0.0**
Current portion:				
IRS derivatives	0.0	0.0	0.0	0.0
Forward derivatives	0.1	(11.9)	14.8	0.0
Total current portion	**0.1**	**(11.9)**	**14.8**	**0.0**
Non-current portion:				
IRS derivatives	0.0	(0.1)	0.0	0.0
Forward derivatives	0.1	0.0	0.0	0.0
Total non-current portion	**0.1**	**(0.1)**	**0.0**	**0.0**

Lastly, it should be noted that during the year the net changes in financial assets and liabilities represented in the consolidated statement of cash flows (corresponding to a net cash absorption of €19.2 million) were analysed as follows: partial repayment of the Amortising loan for -€15.0 million and some short-term lines attributable to Goldenpoint for -€13.0 million, new loans for +€9.5 million, a decremental change in financial payables for interest for -€1.2 million, an incremental change in loans receivable from third parties for -€0.3 million and other minor changes that generated cash for +€0.8 million.

5.3 Market risk

INTEREST RATE RISK

The OVS Group uses external financial resources in the form of debt and employs liquidity available in bank deposits and lending to third parties where deemed to be of interest to the Group. Fluctuations in market interest rates may affect the cost and returns of various forms of financing and investment, thus affecting the OVS Group's level of financial expenses and income. In particular, the loan agreement signed on 7 April 2022 and disbursed on 8 April 2022 (the "2022 Loan") is remunerated at the 3-month Euribor variable rate for the Amortising Line and 1-3-6-month Euribor for the Revolving Line, to which the contractual margin is added. There is no obligation to hedge interest rate risk for this 2022 Loan. Conversely, the Bond Loan carries a fixed coupon of 2.25%, that will be further reduced by 25 bps starting from November 2026 and until maturity due to a step down recognised thanks to certain ESG parameters being achieved (described in more detail in note 6.14 below).

Finally, reference is made to a further bank loan of the subsidiary Goldenpoint S.p.A., subject to a variable 3-month Euribor rate plus the contractual margin. To manage interest rate risks, the OVS Group used interest rate derivatives in previous years with the aim of mitigating, under economically acceptable conditions, the potential impact of changes in interest rates on the income statement.

In view of the debt composition of the Group, which is only partially exposed to changes in interest rates, no specific hedges against the risk of interest rate fluctuations are in place, with the exception of the only IRS of Goldenpoint S.p.A., the fair value of which at 31 January 2026 was negative for €94 thousand. However, any additional transactions may be implemented based on market volatility.

SENSITIVITY ANALYSIS

The OVS Group's exposure to interest rate risk was measured using a sensitivity analysis that shows the effects on the income statement and on shareholders' equity of a hypothetical change in market rates of 40 bps higher or lower than the hypothetical forward rate curve at 31 January 2026. This analysis is based on the assumption of a general and instantaneous change in benchmark interest rates.

Excluding the impact of amortised cost on the loans, the results of such a hypothetical, instantaneous and unfavourable (favourable) change in the short-term interest rates applicable to the OVS Group's financial liabilities at variable interest rates (therefore excluding bond loans and leases pursuant to IFRS 16) are shown in the following table:

Effect of change on financial expenses - income statement

(millions of euro)	- 40 bps	+ 40 bps
At 31 January 2026	(0.4)	0.4

The same figure at 31 January 2025 is shown below:

Effect of change on financial expenses - income statement

(millions of euro)	- 40 bps	+ 40 bps
At 31 January 2025	(0,5)	0.5

FOREIGN EXCHANGE RISK

Exposure to the risk of exchange rate fluctuations derives from the OVS Group's commercial activities, which are also conducted in currencies other than the euro. Revenues and costs denominated in foreign currencies can be affected by exchange rate fluctuations, with an impact on sales margins (economic risk), and payables and receivables in foreign currencies may be affected by the conversion rates used, with an impact on the income statement (transactional risk).
The main exchange rate to which the OVS Group is significantly exposed is the EUR/USD, in relation to purchases in dollars made in the Far East and on other markets in which the dollar is the trading currency.
The Group is also exposed to the EUR/HKD exchange rate in relation to the translation risk of investee company OVS Hong Kong Sourcing Limited. The conversion effects of the other foreign companies for which the euro is not the functional currency are marginal.
Exchange rate fluctuations may result in the realisation or reporting of foreign exchange gains or losses. The OVS Group also hedges orders, including those that are highly probable although not final, pursuing the management aim of minimising exposure to risk.
The OVS Group purchases most of its products for sale from foreign suppliers for which the reference currency is the US Dollar (USD). In order to ensure reliability in the planning of sales prices and the relative industrial margin (understood as the difference between sales prices in EUR and the purchase costs of products in USD), the OVS Group routinely enters into derivative contracts designed to stabilise the exchange rate of goods purchases. The nature of these instruments is quite simple, as they are purchases of forward USD currency (forward derivatives) implemented in relation to estimated inflows and with timelines associated with the foreseeable outflow of cash, usually with a time horizon of 12 to 24 months from the date of signing the associated contracts.

The instruments in question are initially entered into, in particular, taking into account quantifications (based on estimates) determined on the basis of purchases of the previous collection and considering the business outlook. Such operational hedges of purchase flows take place, in fact, by collection and by month. The instruments are then constantly monitored and updated by the OVS Group in relation to potential changes in purchase and payment flows and therefore to the variable need for stabilisation of exchange rates during the operational development of commercial planning.

It should be noted that in exceptional cases the Group may liquidate hedging derivative contracts for the expected purchase of goods. No such operation was necessary during 2025.

The derivatives described are recognised at 31 January 2026 at fair value, according to the methods of recognition and measurement established in IFRS 9. Under this accounting standard, the Group is still permitted, under certain conditions, to book derivatives using hedge accounting. In view of the operational complexity in managing the correspondence between the theoretical underlyings (the flows subject to the management hedging described) and the derivatives, the OVS Group has decided not to adopt hedge accounting. Consequently, the fair value of existing financial instruments and subsequent changes in such instruments are directly charged to the income statement on each reporting date. The fair value of derivatives is quantified using common valuation techniques and is mainly determined by the difference between the notional amount in USD converted into euro at the forward exchange rate at the time of entering into the contract and the notional amount in USD converted into euro at the exchange rate at the end of the reference period. This difference may be positive or negative depending on changes in the EUR/USD exchange rate.
During the year under review, the nature and structure of exposure to foreign exchange risk and the hedging policies followed by the OVS Group did not change substantially compared with the consolidated financial statements for the year ended 31 January 2025.

At 31 January 2026, this measurement was negative for €11.8 million, relating to the fair value of the contracts in place at year-end, as the forward exchange rate for the portfolio at 31 January 2026 was 1.1702, while the average EUR/USD exchange rate at year-end was 1.1919. This figure is further affected by the release to the income statement of the positive fair value recognised at 31 January 2025 of €14.8 million, thus having an overall negative effect in the income statement of €26.6 million, recognised as foreign exchange differences in the financial area.

The following table summarises key information relating to currency forwards:

	Transaction date	Maturity date	Notional in USD/000	Strike price	Notional in €/000	Fair value in €/000
At 31 January 2026	Between 12/05/2025 and 26/01/2026	Between 02/02/2026 and 14/06/2027	535,500	from 1.0970 to 1.2198	457,606	(11,772)

In the year under review, the nature and structure of exposure to foreign exchange risk and the hedge management policies followed by the OVS Group did not change substantially.

SENSITIVITY ANALYSIS

To perform the exchange rate sensitivity analysis, items in the statement of financial position (commercial and financial assets and liabilities) denominated in currencies other than the function currencies of each company within the OVS Group were identified.

The effects of a 5% appreciation and depreciation in the US dollar against the euro are summarised below:

Effect of change on result and shareholders' equity

(millions of euro)	-5%	+5%
At 31 January 2026	14.8	(13.4)

The same analysis at 31 January 2025 is as follows:

Effect of change on result and shareholders' equity

(millions of euro)	-5%	+5%
At 31 January 2025	4.1	(3.7)

However, with regard to the appreciation/depreciation of 5% in the Hong Kong dollar against the euro, it should be noted that, at 31 January 2026, the translation reserve in equity reserves would have been subject to a positive/negative change of €1.1 million and €1.0 million, respectively.

5.4 Capital management risk

The Group manages and if necessary modifies the equity structure with the adjustments that it considers to be most consistent with changes that may occur from time to time in general economic conditions and strategic objectives. In relation to equity risk, the Group's primary objective is to ensure that the company continues as a going concern in order to ensure a fair economic return to shareholders and others while maintaining a good risk rating in the debt capital market.

This also includes the buyback plans and the cancellation of treasury shares, which will be discussed in more detail in note 6.22 Shareholders' equity. In pursuit of this objective, the Group's capital management works, inter alia, to ensure that covenants linked to financial debts to banks and bondholders and that define capital structure requirements are honoured.

There are no noteworthy minority share purchase agreements.

5.5 Fair value estimates

The fair value of financial instruments traded in an active market is based on market prices at the reporting date. The fair value of instruments that are not traded in an active market is measured using valuation techniques based on a series of methods and assumptions linked to market conditions at the reporting date.

The fair value classification for financial instruments based on hierarchical levels is shown below:

- Level 1: fair value is measured with reference to quoted prices (unadjusted) in active markets for identical financial instruments;
- Level 2: fair value is measured using valuation techniques with reference to variables observable on active markets;
- Level 3: fair value is measured using valuation techniques with reference to variables unobservable on active markets.

The financial instruments shown at fair value of the OVS Group are classified as Level 2, and the general criterion used to calculate it is the present value of future cash flows expected from the instrument being valued.

Moreover, in 2025 there were no transfers of financial assets and liabilities classed in the various levels of the fair value hierarchy.

Liabilities relating to bank borrowings are measured using the "amortised cost" criterion.

Trade receivables and payables were measured at the price defined for the relevant transaction as this is deemed to be close to the present value.

In addition to the information on financial risk, the following is a reconciliation between classes of financial assets and liabilities as identified in the Group's statement of financial position, and the types of financial assets and liabilities identified pursuant to IFRS 7 at 31 January 2026:

	Finan-cial assets at fair value through profit or loss	Financial liabilities at fair value through profit or loss	Financial assets measured at amortised cost	Financial liabilities at amortised cost	Derivatives	Total
Cash and banks			105,228			105,228
Trade receivables			94,661			94,661
Current financial assets					52	52
Financial assets for current leases			120			120
Other current receivables			27,839			27,839
Equity investments	2					2
Non-current financial assets	3,596				97	3,693
Financial assets for non-current leases			103			103
Other non-current receivables	7,020		1,505			8,525
Current financial liabilities				40,842		40,842
Financial liabilities for current leases				168,313		168,313
Trade payables				413,378		413,378
Other current payables				190,643		190,643
Non-current financial liabilities				225,554		225,554
Financial liabilities for non-current leases				990,644		990,644
Other non-current payables				28,471		28,471

The same reconciliation for 31 January 2025 is provided below:

	Financial assets at fair value through profit or loss	Financial liabilities at fair value through profit or loss	Financial assets measured at amortised cost	Financial liabilities at amortised cost	Derivatives	Total
Cash and banks			87,729			87,729
Trade receivables			107,033			107,033
Current financial assets					14,840	14,840
Financial assets for current leases			269			269
Other current receivables			23,059			23,059
Equity investments	150					150
Non-current financial assets	5,921					5,921
Financial assets for non-current leases			444			444
Other non-current receivables	5,447		1,189			6,636
Current financial liabilities				16,959		16,959
Financial liabilities for current leases				144,995		144,995
Trade payables				434,965		434,965
Other current payables				174,843		174,843
Non-current financial liabilities				224,250		224,250
Financial liabilities for non-current leases				902,448		902,448
Other non-current payables				25,869		25,869

6. Notes to the consolidated statement of financial position

Details of the content of and changes in the most significant items are provided below (unless otherwise specified, amounts are in thousands of euro).

6.1 Cash and banks

	31.01.2026	31.01.2025	Change
Cash and banks	105,228	87,729	17,499

The balance represents cash and cash equivalents at the reporting date and breaks down as follows (in thousands of euro):

	31.01.2026	31.01.2025	Change
1) Bank and post office deposits	99,440	82,499	16,941
2) Checks	7	6	1
3) Cash on hand	5,781	5,224	557
Total	**105,228**	**87,729**	**17,499**

Cash and cash equivalents consists of cash, bank and post office deposits, cheques and cash on hand at the head office and stores in the direct sales network.
For a detailed examination of the main changes in the Group's cash and cash equivalents during the year, see the consolidated statement of cash flows.

6.2 Trade Receivables

	31.01.2026	31.01.2025	Change
Trade receivables	94,661	107,033	(12,372)

The breakdown of trade receivables was as follows (thousands of euros):

	31.01.2026	31.01.2025	Change
Trade Receivables			
Receivables for retail sales	587	509	78
Receivables for wholesale sales	96,195	108,956	(12,761)
Receivables for services provided	6,450	8,511	(2,061)
Disputed receivables	4,260	3,670	590
Trade receivables from related parties	0	449	(449)
Subtotal	**107,492**	**122,095**	**(14,603)**
(Provision for doubtful accounts)	(12,831)	(15,062)	2,231
Total	**94,661**	**107,033**	**(12,372)**

Receivables for wholesale sales derive from sales to affiliates.
Receivables from services mainly include charges for department management and subletting to external managers.
Disputed receivables mainly consist of receivables for problem loans. Most of these receivables are written down by recognising a specific provision for doubtful accounts.
The write-downs relate to receivables from affiliates or business partners, collection of which is presumed to be difficult, for disputes, or, in the majority of cases, for pending legal proceedings against customers.

The provision for doubtful accounts amounted to €12,831 thousand at 31 January 2026. During the year, €4,544 thousand was utilised and an allocation of €1,998 thousand was made.
Changes in the provision for doubtful accounts are shown below:

(thousands of euros)	
Balance at 31 January 2025	**15,062**
Allocations during the year	1,998
Uses during the year	(4,544)
Effect of exchange rate adjustment	(101)
Business combinations	416
Balance at 31 January 2026	**12,831**

The change in the provision for doubtful accounts in the previous year was as follows:

(thousands of euros)	
Balance at 31 January 2024	**13,286**
Allocations during the year	7,392
Uses during the year	(5,616)
Balance at 31 January 2025	**15,062**

The accrual to the "Provision for doubtful accounts" expresses the presumed realisable amount of receivables that are still collectable at the closing date of the financial year and has been adjusted to the risk assessments related to the particular economic situation in Italy and Europe.
The drawings for the period relate to receivable positions for which elements of certainty and accuracy, or the presence of insolvency procedures, determine the total or partial derecognition of the position.
Given the types of products and services sold by the OVS Group, there is no significant concentration of revenues and trade receivables with individual customers.

6.3 Inventory

	31.01.2026	31.01.2025	Change
Inventory	496,487	486,706	9,781

The itemisation of the inventory is shown in the following table:

(thousands of euros)	31.01.2026	31.01.2025
Goods	571,124	547,759
Gross inventory	**571,124**	**547,759**
Provision for depreciation	(58,262)	(47,325)
Provision for inventory differences	(16,375)	(13,728)
Total provision for inventory write-downs	**(74,637)**	**(61,053)**
Total	**496,487**	**486,706**

This item includes stocks of merchandise at warehouses and stores at the reporting date.
The amount is largely in line with the amounts that would be obtained by valuing the inventories at current cost at the reporting date.
The increase in inventories is mainly due to the expansion of the scope of consolidation following the acquisition of Goldenpoint S.p.A. as from July 2025. Excluding Goldenpoint, net inventories at 31 January 2026 would have been €469,308 thousand, therefore down by more than €17 million compared to the previous year.

The provision for depreciation reflects management's best estimate based on the breakdown by type and season of inventories, considerations arising from past experience and the outlook for sales volumes, including in light of the macroeconomic situation. The provision for inventory differences includes the estimate of inventory differences at the end of each of the periods under review, in view of the fact that the OVS Group carries out a physical inventory in February or June of each year.
These provisions are based on the management best estimate and are therefore believed by management to be consistent with their respective purposes.
Changes in the provision for depreciation and the provision for inventory differences for the year ended 31 January 2026 are shown below:

(thousands of euros)	Provision for depreciation	Provision for inventory differences	Total
Balance at 31 January 2025	**47,325**	**13,728**	**61,053**
Allocation	21,675	20,479	42,154
Increase from business combinations	6,175	0	6,175
Drawdown	(16,913)	(17,832)	(34,745)
Balance at 31 January 2026	**58,262**	**16,375**	**74,637**

The change in the same provisions in the previous year was as follows:

(thousands of euros)	Provision for depreciation	Provision for inventory differences	Total
Balance at 31 January 2024	**40,458**	**16,301**	**56,759**
Allocation	25,306	17,196	42,502
Drawdown	(18,439)	(19,769)	(38,208)
Balance at 31 January 2025	**47,325**	**13,728**	**61,053**

6.4 Current and non-current financial assets

	31.01.2026	31.01.2025	Change
Current financial assets	52	14,840	(14,788)
Non-current financial assets	3,693	5,921	(2,228)

The breakdown of the "Financial assets" item into current and non-current at 31 January 2026 and at 31 January 2025 is shown below:

(thousands of euros)	31.01.2026	31.01.2025
Derivatives (current portion)	52	14,840
Other loans receivable from third parties	0	0
Total current financial assets	**52**	**14,840**
Derivatives (non-current portion)	97	0
Other loans receivable from third parties	3,596	5,921
Total non-current financial assets	**3,693**	**5,921**
Total	**3,745**	**20,761**

Derivatives include the fair value of forward derivatives entered into with the objective of hedging future purchases of goods in currencies other than the euro.

Other loans to third parties, included under non-current financial assets, include €2,791 thousand for medium-term investment mechanisms granted by the Parent Company OVS S.p.A. to Italian third parties remunerated at market interest rates and measured at fair value through profit or loss, and €658 thousand for a loan granted to the related party Deaway Solar 3 S.r.l. (formerly Energia Verde Uno S.r.l.) on 19 August 2025. The remaining €146 thousand is attributable to the Spanish subsidiary OVS Fashion Espana S.L.

On 1 February 2025, the item also included the bond loan granted to Goldenpoint S.p.A., of a fair value of €2,666 thousand, which was then fully repaid on 31 January 2026.

6.5 Financial assets for current and non-current leases

	31.01.2026	31.01.2025	Change
Financial assets for current leases	120	269	(149)
Financial assets for non-current leases	103	444	(341)

Financial assets for leases are recorded in accordance with IFRS 16 with effect from the 2019 financial year. Please refer to note 3.13 above for information on the valuation criteria for these assets.

6.6 Current tax assets

	31.01.2026	31.01.2025	Change
Current tax assets	8,790	8,753	37

The balance mainly consists of receivables for withholding tax on fees (€2,327 thousand), tax receivables of €6,049 thousand and taxes withheld at source.
The receivables for IRES and IRAP tax down payments have been fully offset by the tax payable in the current year.

During 2024, OVS S.p.A. joined the national tax consolidation scheme provided for by Articles 117 and following of Presidential Decree no. 117 of 22 December 1986 (the "TUIR") and the ministerial decree of 1 March 2018, with the subsidiary OVS Innovazione e Sostenibilità S.r.l. (a consolidated entity). The national tax consolidation scheme will continue uninterrupted during the period 2024-2026.
Finally, it should be noted that since 2026, the Italian subsidiary Goldenpoint S.p.A. has also participated in the group's national tax consolidation scheme.

6.7 Other current and non-current receivables

	31.01.2026	31.01.2025	Change
Other current receivables	27,839	23,059	4,780
Other non-current receivables	8,525	6,636	1,889

Other receivables are itemised as follows:

	31.01.2026	31.01.2025	Change
Other receivables	5,226	6,598	(1,372)
Receivables from insurance companies for claims reimbursements	388	271	117
Receivables from personnel	491	408	83
Accrued income and prepaid expenses - rents and service charges	7,475	4,257	3,218
Accrued income and prepaid expenses - insurance	503	527	(24)
Accrued income and prepaid expenses - interest on security deposits	24	24	0
Accrued income and prepaid expenses - other	13,732	10,974	2,758
Total current receivables	**27,839**	**23,059**	**4,780**
Security deposits	7,020	5,447	1,573
Minor investments	76	74	2
Other receivables	1,429	1,115	314
Total non-current receivables	**8,525**	**6,636**	**1,889**

The item "Other receivables" in current receivables relates to guarantee deposits made for new leases amounting to €71 thousand and receivables for business unit disposals amounting to €500 thousand, while the remainder refers to social security receivables and advances to suppliers and shippers.
"Receivables from insurance companies" mainly refer to the reimbursement following damage to goods during transport (€351 thousand), as well as the damage due to flooding at the OVS store in Trieste (€19 thousand) and the damage due to the theft at the OVS store in Nocera (€18 thousand).
The item "Accrued income and prepaid expenses - other" primarily includes prepayments for advertising and marketing services of €1,784 thousand and the share of deferred financial fees (€63 thousand) incurred to obtain the revolving lines of credit described in more detail in note 6.14 ("Financial liabilities") below. The item also includes accrued income for public contributions accrued up to 31 January 2026 from the Region of Puglia as part of the Programme Agreement signed by the subsidiary OVS Innovazione e Sostenibilità S.r.l. (€5,786 thousand, compared to €2,226 thousand at 31 January 2025).
The remaining amount mainly refers to prepaid expenses on utilities costs, costs for services and reimbursement of training costs.
"Other non-current receivables" include security deposits that mainly relate to securities paid under leases, utilities and deposits with customs to guarantee goods imports.

The item "Minor investments" mainly includes equity investments in consortia recognised at cost.
The item "Other non-current receivables" item refers to deferred assets beyond 12 months from the reporting date: specifically, the item includes receivables from third parties for €18 thousand and advances from agreements with lessors for €1,207 thousand.

6.8 Property, plant and equipment

	31.01.2026	31.01.2025	Change
Property, plant and equipment	322,185	311,347	10,838

Annex No. 1 shows the historical cost for each item, the accumulated depreciation and amortisation, changes during the year and the final balances.
Investments during the year mainly related to:

- expenses for modernising, renovating and upgrading stores in the sales network;
- purchases of furniture and fittings for the commercial network to furnish both newly opened and renovated stores.

Leasehold improvements, allocated to the items in question, mainly relate to renovations of stores not under direct ownership.

Pursuant to IAS 36, for businesses showing signs of impairment the Group assessed the recoverability of the relative assets using the discounted cash flow method.
The analysis carried out at the end of the year did not show any impairment.
For a detailed analysis, see Section 6.12 below on "Impairment testing".

6.9 Right-of-use assets

	31.01.2026	31.01.2025	Change
Right-of-use assets	1,046,008	946,726	99,282

Pursuant to the IFRS 16 international accounting standard, this item includes right-of-use assets relating mainly to store leases and deposits and to a minor extent to leases on offices, apartments for company use and motor vehicles/other equipment.
For a detailed analysis, see Annex 2 on changes during the year and the following section on "Impairment testing".

6.10 Intangible assets

	31.01.2026	31.01.2025	Change
Intangible assets	609,480	587,549	21,931

Annex No. 3 to these notes shows the change for each item in the period.

Intangible assets at 31 January 2026 mainly included the amounts allocated to the OVS Group deriving from the previous acquisition of Gruppo Coin by Icon, which was then transferred to the current OVS S.p.A. in July 2014.
At 31 January 2026, these amounts included:

- €377.5 million for the OVS brand, with an indefinite life (included under "Concessions, licences and brands");
- €13.3 million for the Upim brand, with an indefinite life (included under "Concessions, licences and brands");
- €3.4 million for the STEFANEL brand, registered during 2021 due to the acquisition of the STEFANEL business unit in March 2021, with an indefinite life (included under "Concessions, licences and trademarks");
- €29.9 million for the OVS franchising network, amortised over 20 years (included under "Other intangible assets");
- €11.9 million for the Upim franchising network, amortised over 20 years (included under "Other intangible assets");
- €70.7 million for licences relating to OVS stores, amortised over 40 years (included under "Concessions, licences and brands");
- €20.9 million for licences relating to Upim stores, amortised over 40 years (included under "Concessions, licences and brands");
- The Les Copains brand, acquired during 2022, equal to €1.0 million;
- Third-party client relationships and relationships with licensors increased following the acquisition of JB Licenses S.r.l. during FY 2024 (residual amount of €3.8 million at 31 January 2026) amortised over 6 years;
- Valuation of the brand attributed to Goldenpoint S.p.A. following the acquisition during FY 2025 amounting to €23.1 million with an indefinite useful life (included under "Concessions, licences and trademarks").

All the brands owned by the OVS Group are regarded as having an indefinite useful life.
To establish this, a management analysis was performed on all relevant factors (legal, judicial, contractual, competitive, economic and other) relating to the brands. The conclusion was reached that there is no foreseeable time limit for the generation of cash inflows for the OVS Group.

The recoverability of the value of the brands was measured using the discounted cash flow method for the CGUs to which these brands are allocated. See the section below on "Impairment testing" for the outcome of the analyses.

The useful life of the licences is 40 years.
This was estimated on the basis of historical analyses carried out within the OVS Group.
It should be noted, in this regard, that the time limit placed on the term of the leases is insignificant. In fact, there are protections provided to the tenant in market practice and under specific legal provisions; in addition, a strategy of gradual further expansion of the network is being implemented by the OVS Group, which usually renews leases before they expire naturally. All these factors have resulted over time in the almost completely successful implementation of the renovation policy. Also note that we have identified a component of residual value (non-amortised residual value at the end of the useful life) calculated over 18 monthly rental payments, representing the amount payable by the lessor if the lease is not renewed for a reason not attributable to the OVS Group.
The remainder of the item mainly consists of rights to industrial patents and intellectual property rights relating to investments in software programmes.

6.11 Goodwill

	31.01.2026	31.01.2025	Change
Goodwill	301,123	301,123	0

Goodwill mainly relates to the acquisition of Gruppo Coin in 2011 (the carrying amount was originally €451,778 thousand, allocated to the OVS CGU, transferred to OVS S.p.A. due to the transfer of the OVS-Upim business unit in July 2014, and partially written down by €155,000 thousand following impairment testing in 2019).
The item also includes goodwill of €3,437 thousand recorded during FY 2024 as a result of the acquisition of control of JB Licenses S.r.l..

For the results of the impairment testing carried out at 31 January 2026, see the next section.

6.12 Impairment testing

Pursuant to IAS 36, the Group verifies the recoverability of intangible assets with an indefinite useful life (goodwill and brands) when indicators of impairment are identified, and in any event at the closing date of the year, while for tangible assets and other assets with a finite useful life this takes place when indicators of impairment are identified. The recoverable amount of the cash-generating units (CGUs) to which the individual assets are allocated is verified by calculating their value in use and/or fair value.

The cash generating units identified by management coincide with the OVS, Upim, Stefanel (since 2021), GAP Italia (since 2022) and Goldenpoint (since 2025) operating segments, which include all services and products provided to customers.

OVS CGU

Impairment testing, approved by the Board of Directors, entailed the comparison of the carrying amount of the cash generating unit (CGU) and its value in use (VIU). Note that the carrying amount of the OVS CGU includes almost all of the goodwill, entirely allocated to the CGU, of €297.7 million, and the OVS brand for €377.5 million, both with an indefinite useful life.

The estimated value in use of the OVS operating segment for the purposes of impairment testing is based on the discounting of provisional data for the OVS CGU, determined on the basis of the following assumptions:

- The expected cash flows of the OVS operating segment were extrapolated from the 2026 Budget and the 2027-2028 Plan, both approved by the Board of Directors on 4 February 2026. Provisional cash flows for the OVS CGU were determined according to levels of turnover growth and EBITDA, based on both past operating and profit performance and on future projections, also taking the ongoing context of uncertainty into account;
- future cash flows, standardised to use for the terminal value, were constructed by consistently applying a growth rate "g" for EBITDA of 2.0% a year, applied to EBITDA in the final year of the Plan (in line with the most recent projections of the International Monetary Fund). Annual investments were estimated consistently on the basis of depreciation and amortisation in the last year of the Plan (€67.9 million): this amount is believed to be representative of the standardised investments needed to maintain existing fixed assets, while annual investments of €98.0 million were estimated to be required to maintain right-of-use assets;
- the discount rate (WACC) used to estimate the present value of cash flows is 8.56% and was determined on the basis of the following assumptions:

  i) the risk-free rate used was 3.57%, corresponding to the return on ten-year Italian government bonds (average over the last 12 months); ii) the equity risk premium used was 5.5%, an average rate in line with both the results of the long-term analysis for industrialised countries and professional practices; iii) the beta coefficient was estimated based on a panel of comparable listed companies operating in the retail clothing sector and was 1.02; iv) borrowing costs (6.49%) were estimated in line with the contractual conditions provided for (including lease liabilities pursuant to IFRS 16); and v) the debt/equity ratio used was calculated based on the average figure presented by a panel of comparable companies.

Based on the above considerations, the value in use of the OVS CGU at 31 January 2026 was €2,269.1 million. The comparison between the VIU (€2,269.1 million) and the carrying amount (net invested capital) of the OVS CGU shows a cover of over 34%, and therefore there is no impairment to be recognised.

In addition, the Group analysed the sustainability of the results of the impairment testing, based on changes in the following assumptions of the model:

- 25 bps increase in the discount rate;
- 25 bps decrease in the growth rate.

These sensitivity analyses performed separately for each of the above assumptions would not, however, result in write-downs to be recorded in 2025 in relation to the OVS CGU.

UPIM CGU

Although no substantial goodwill amount has been allocated for the Upim CGU, the Group has carried out impairment testing on it (also subject to approval by the Board of Directors), in view of the fact that it includes an amount allocated to the brand of €13.3 million, with an indefinite useful life.

The estimated value in use of the Upim operating segment for the purposes of impairment testing is based on the discounting of provisional data for the Upim CGU, determined on the basis of the following assumptions:

- The expected cash flows of the Upim operating segment were extrapolated from the 2026 Budget and the 2027-2028 Plan, both approved by the Board of Directors on 4 February 2026. Provisional cash flows for the Upim CGU were determined according to levels of turnover growth and EBITDA, based on both past operating and profit performance and on future projections, also taking the ongoing context of uncertainty into account;
- expected future cash flows, standardised to use for the terminal value, were constructed by consistently applying a growth rate "g" for EBITDA of 2.0% a year (in line with the most recent projections of the International Monetary Fund) applied to EBITDA in the final year of the Plan.

Annual investments were estimated consistently on the basis of depreciation and amortisation in the last year of the Plan (€23.2 million): this amount is believed to be representative of the standardised investments needed to maintain existing fixed assets, while annual investments of €27.8 million were estimated to be required to maintain right-of-use assets;

- the discount rate (WACC) used to estimate the present value of cash flows is 8.56% and was determined on the basis of the following assumptions:
  i) the risk-free rate used was 3.57%, corresponding to the return on ten-year Italian government bonds (average over the last 12 months); ii) the equity risk premium used was 5.5%, an average rate in line with both the results of the long-term analysis for industrialised countries and professional practices; iii) the beta coefficient was estimated based on a panel of comparable listed companies operating in the retail clothing sector and was 1.02; iv) borrowing costs (6.49%) were estimated in line with the contractual conditions provided for (including lease liabilities pursuant to IFRS 16); and v) the debt/equity ratio used was calculated based on the average figure presented by a panel of comparable companies.

Based on the above considerations, the VIU of the Upim CGU at 31 January 2026 was €550.0 million. The comparison between the VIU (€550.0 million) and the carrying amount (net invested capital) of the Upim CGU shows a cover of over 58%, and therefore there is no impairment to be recognised.
In addition, the Group analysed the sustainability of the results of the impairment testing, based on changes in the following assumptions of the model:

- 25 bps increase in the discount rate;
- 25 bps decrease in the growth rate.

These sensitivity analyses, performed separately for each of the above assumptions, would not, however, result in write-downs to be recorded in 2025 in relation to the Upim CGU.

As regards the Stefanel CGU, it should be noted that it includes the eponymous brand, amounting to €3.4 million, which also has an indefinite useful life, like the Group's other brands. The Stefanel division was acquired by the Group in 2021: therefore, the year just ended is only the fourth complete year of new management after a long period of decline. Positive flows were not yet generated in 2025, but there was a marked recovery in margins. The capital invested in the CGU is relatively minor (less than 2% of the total consolidated capital invested); however it was decided to conduct impairment testing based on the same external parameters applied for the OVS and Upim CGUs, taking into account the 2026 Budget and the 2027-2028 Plan, both approved by the Board of Directors on 4 February 2026, accompanied by a terminal value representative of a steady state situation of the CGU. The results showed no impairment compared with capital invested in the CGU of approximately €31 million.

With regard to the remaining goodwill recorded due to the JB Licenses S.r.l. business combination of €3.4 million, it should be noted that an impairment test was carried out at the end of the year, which did not show any impairment.
With regard to the Goldenpoint CGU, allocated a brand value of €23.1 million with an indefinite useful life (due to the purchase price allocation described above), it should be noted that the acquisition took place in July 2025. Economic flows for the 7 months of 2025 are in line with expectations. The first tests on the recoverability of the invested capital will be carried out in FY 2026.
Finally, the GAP CGU did not show intangible assets with an indefinite useful life.

Impairment testing on licences and right-of-use assets relating to stores

Licences relating to some OVS and Upim stores and right-of-use assets of the various Group stores showing indicators of impairment were tested for impairment by calculating the value in use for each store thus identified.
The key assumptions used to determine the value in use of the CGUs concern the discounting rate and the growth rate. Specifically, the post-tax discount rate (WACC) was used and no growth rate was projected for the period following the 2026 Budget, except where reasonably predictable.
Based on the analysis carried out, in the year ended 31 January 2026, 7 licences were written down for a total of €1.4 million, and 7 licences previously written down were reinstated for €2.2 million.

6.13 Equity investments

	31.01.2026	31.01.2025	Change
Equity investments	2	150	(148)

It should be noted that at 31 January 2021, the value of the equity investment in the consortium company, Centomilacandele S.C.p.A., of which OVS S.p.A. holds 31.63%, had already been fully written off. The write-off of €136 thousand took place after the consortium company was placed in liquidation in 2020.
The change during the year relates to the loss of the minority interest in Goldenpoint S.p.A. due to its acquisition in July 2025 and consequent full consolidation and the deconsolidation of Energia Verde Uno S.r.l. (now Deaway Solar 3 S.r.l.).
See the Report on Operations and note 6.4 above on current and non-current financial assets for further details.

6.14 Current and non-current financial liabilities

	31.01.2026	31.01.2025	Change
Current financial liabilities	40,842	16,959	23,883
Non-current financial liabilities	225,554	224,250	1,304

The breakdown of the items "Current financial liabilities" and "Non-current financial liabilities" at 31 January 2026 and 31 January 2025 is shown below:

(thousands of euros)	31.01.2026	31.01.2025
Current financial payables	1,854	2,093
Current portion of non-current debt	27,097	14,866
Other current financial payables	11,891	0
Current financial liabilities	**40,842**	**16,959**
Non-current financial payables	225,431	224,250
Other non-current financial payables	123	0
Non-current financial liabilities	**225,554**	**224,250**

The OVS Group's current and non-current financial payables at 31 January 2026 are shown below:

(thousands of euros)	Maturity date	Interest rate	At 31 January 2026 Total	of which current portion	of which non-current portion
Sustainability-linked bond loan	10.11.2027	2.25 %	160,000	0	160,000
Amortising Line (2022 Loan) (1)	07.04.2027	Euribor +1.95%	65,000	15,000	50,000
BNL loans (1)	26.03.2027	Euribor +0.80%	7,500	5,000	2,500
SACE guaranteed funding (2)	30.09.2028	Euribor +1.65%	18,750	5,400	13,350
Finimport (3)	12.02.2026	Euribor +0.50%	1,980	1,980	0
Due for financial expenses			1,854	1,854	0
Finance costs			(701)	(283)	(419)
Financial payables			**254,382**	**28,951**	**225,431**

(1) The reported margin is the margin that existed at the reporting date of 31 January 2026. For the sake of completeness, it should be noted that at 31 January 2025 the margins applicable to the Amortising Line and to the Revolving Line were 2.05% and 1.55%, respectively.
(2) These financial payables relate to Goldenpoint S.p.A., which entered the OVS Group's scope of consolidation as a result of its acquisition, effective for accounting purposes from 1 July 2025.
(3) These financial payables refer to JB Licences S.r.l..

The lines of credit available to the Group at 31 January 2026 mainly refer to:

- a loan agreement signed on 07 April 2022 (the "2022 Loan Agreement") for a capital amount totalling €230,000,000, disbursed on 08 April 2022 (the "2022 Loan") by OVS S.p.A., which provides for the granting of (i) a sustainability-linked amortising line for an original principal amount of €110,000,000 (the "Amortising Line"). This line provides for a grace period and 8 subsequent half-yearly instalments of €7,500,000 each, starting on 31 May 2023 and a final instalment of €50,000,000; (ii) a sustainability-linked revolving line of €120,000,000 (the "Revolving Line" or "RCF" and, together with the Amortising Line, the "Lines of Credit");
- a sustainability-linked fixed-rate bond loan (the "Bond Loan") issued by OVS S.p.A. on 10 November 2021 for a total nominal amount of €160,000,000;
- and the SACE guaranteed loan signed in 2020 by Goldenpoint S.p.A. (SACE Goldenpoint loan) for an original principal amount of €30,000,000, with a duration of 6 years (see below for a description of the renegotiation of the loan terms in 2024).

Below is a summary description of the current conditions underlying the loans outstanding at 31 January 2026.

With regard to the 2022 Loan, the applicable interest rate for the Amortising Line at 31 January 2026 was equal to the sum of (i) the "Amortising Line Margin" of 1.95% per annum and (ii) the 3-month EURIBOR;

while for the RCF, the interest rate applicable at 31 January 2026 was equal to the sum of (i) the "RCF Margin" and, together with the Amortising Line Margin, the "Margin") of 1.45% per annum and (ii) the Euribor. The Euribor parameter is set at zero if the parameter is negative. The interest rate is calculated on a quarterly basis for the Amortising Line, and on a monthly, quarterly or half-yearly basis, depending on what is indicated in the relevant request for use, for the Revolving Line.

As of the date of delivery of the compliance certificate (as described and regulated in the 2022 Loan Agreement), the Margin may be further reduced or increased according to the ratio of average total net debt (as defined in the 2022 Loan Agreement) to EBITDA (as defined in the 2022 Loan Agreement), calculated every half-year on the basis, as the case may be, of the consolidated financial statements at 31 January of each year and the half-year report (both subject to revision), prepared pursuant to IFRS. In particular, the 2022 Loan Agreement provides that the determination of the Margin – as of the financial year ended 31 January 2023 – is calculated as follows:

- if the ratio of average debt to EBITDA is greater than or equal to 3.50:1, the applicable Amortising Line Margin will be 2.60% per annum and the applicable RCF Margin will be 2.10% per annum;
- if the ratio of average debt to EBITDA is less than 3.50:1 but greater than or equal to 3.00:1, the applicable Amortising Line Margin will be 2.45% per annum and the applicable RCF Margin will be 1.95% per annum;
- if the ratio of average debt to EBITDA is less than 3.00:1 but greater than or equal to 2.50:1, the applicable Amortising Line Margin will be 2.35% and the applicable RCF Margin will be 1.85% per annum;

- if the ratio of average debt to EBITDA is less than 2.50:1 but greater than or equal to 2.00:1, the applicable Amortising Line Margin will be 2.25% per annum and the applicable RCF Margin will be 1.75% per annum;
- if the ratio of average debt to EBITDA is less than 2.00:1 but greater than or equal to 1.50:1, the applicable Amortising Line Margin will be 2.15% per annum and the applicable RCF Margin will be 1.65% per annum;
- if the ratio of average debt to EBITDA is less than 1.50:1 but greater than or equal to 1.00:1, the applicable Amortising Line Margin will be 2.05% per annum and the applicable RCF Margin will be 1.55% per annum; and
- if the ratio of average debt to EBITDA is less than 1.00:1, the applicable Amortising Line Margin will be 1.90% per annum and the applicable RCF Margin will be 1.40% per annum.

As of June 2025, the applicable Margin pursuant to the 2022 Loan Agreement benefited from a contractually agreed 10 bps step-down mechanism as a result of the achievement of certain sustainability key performance indicators (KPIs) similar to those provided for in the Bond Loan, which will be discussed in more detail below.

At 31 January 2026, the ratio of average debt to EBITDA over the last 12 months was 1.24x.

The final due date of the 2022 Loan Agreement, which also coincides with the repayment date for the credit facilities, is fixed in the contract as 7 April 2027. However, reference is made to section 11. Significant events occurring after the end of the financial year relating to the voluntary early repayment of 31 March 2026.

The 2022 Loan Agreement does not provide for any security package to guarantee the fulfilment of the related obligations.

Under the 2022 Loan Agreement, OVS S.p.A. has also undertaken, inter alia, to announce the occurrence of any significant adverse events or events of default that could restrict and/or impede the ability of the Parent Company, OVS S.p.A., or any guarantor to meet its contractual obligations under the 2022 Loan Agreement.
In terms of financial obligations, the only parameter that the Parent Company, OVS S.p.A., has undertaken to comply with the leverage ratio (as defined in the 2022 Loan Agreement), i.e. the OVS Group's ratio of average debt to EBITDA over the last 12 months, on a consolidated basis. From 31 January 2022, this parameter must be equal to or less than 3.50:1 for each testing period (i.e. each 12-month period ending in a reporting date (i.e. 31 January and 31 July of each year)), according to a calculation based on the consolidated financial statements and consolidated interim reports of OVS Group. From FY 2023 this parameter must be equal to or less than 3.00:1.

In the light of the above parameters, full compliance with all the contractual financial obligations is confirmed.

The 2022 Loan Agreement is governed by Italian law and any disputes relating thereto are under the exclusive jurisdiction of the Court of Milan. Any breach of the covenants provided for in the 2022 Loan Agreement constitutes a default event that may be remedied, inter alia, as follows:

- with respect to the non-payment of any amount due pursuant to a Finance Document (as defined in the 2022 Loan Agreement), provided that it is due to technical or administrative error or a Disruption Event (as defined in the 2022 Loan Agreement), within 3 working days of the relevant expiry; and
- with regard to default events other than non-payment and breach of the financial parameter, within 21 days of the date on which the Agent (i.e. MPS Capital Services Banca per le Imprese S.p.A.) sent a written communication to OVS or from the day on which OVS became aware of the non-compliance with this contractual covenant.

If the default is not rectified, Monte dei Paschi di Siena S.p.A (previously MPS Capital Services Banca per le Imprese S.p.A.), as the Agent, may (but is not obliged, unless requested to do so by the Majority Lenders (as defined pursuant to the 2022 Loan Agreement)), inter alia, request early payment of the 2022 Loan.

The main characteristics of the Bond Loan are set out below.
The Bond Loan is governed by UK law and any disputes relating thereto are under the exclusive jurisdiction of the UK courts.
The nominal value of the bond loan is €160,000,000 and it has a term of 6 years from the issue date, with a maturity date of 10 November 2027, subject to the early redemption provisions established in the bond loan regulations.
As part of the bond offer, 160,000 bonds with a par value of €1,000 each were subscribed at an issue price equal to 100% of the par value.
The gross annual yield of the bond loan is 2.25% per annum.

The bond has a remuneration mechanism linked to some sustainability objectives.
In order to ensure that investors have public updates on the progress of the achievement of each KPI, the relevant targets and any other significant event during the year of interest for investors for the monitoring of the KPIs, OVS publishes an annual Sustainability-Linked Bond Progress Report ("SLB Progress Report") by and no later than 120 days after the end of each financial year.

The ESG objectives underlying the Sustainability-Linked Bond Loan are aligned with the Group's sustainability path and reflect the main elements in the OVS strategic plan, including:

- guiding the Group's supply chain towards sustainable objectives with the aim of minimising social impacts throughout the chain, by means of careful monitoring of working conditions and respect for human rights, and ensuring complete product traceability;
- increasing the sustainability of the stores by designing and managing them in a way that is completely respectful of the environment and people, following green design and energy efficient approaches, while ensuring the well-being of customers;
- combating climate change through initiatives to reduce the carbon footprint and the overall environmental footprint by controlling the consumption of natural resources, including water, and waste production, including in relation to product packaging.

On 30 May 2025, OVS published the final Progress Report confirming that all the KPIs provided for in the contract had been achieved, thus eliminating all possible step ups of the annual return, guaranteeing the rate of 2.25% per annum up until the maturity of the Loan.

It should be recalled that as of 10 November 2021, the obligations underlying the Bonds are traded on the Regulated Market of the Official List of the Irish Stock Exchange - Euronext Dublin (Euronext Dublin) and on the Electronic Bond Market ("MOT") organised and managed by Borsa Italiana S.p.A..
On the basis of quotations as of 31 January 2026, the fair value of the bond at year-end was €158,544 thousand.

Both the 2022 Loan Agreement and the Bond Loan provide for a "change of control" clause, albeit with different consequences.
More specifically, pursuant to the 2022 Loan Agreement, the occurrence of a change of control results in the mandatory early repayment of any amount of the loan disbursed and not yet repaid.
In the case of the Bond Loan, however, if a change of control event occurs, the Parent Company is required to offer bondholders early redemption of their bonds amounting to 101% of the nominal value of the outstanding bonds together with interest accruing up to the early redemption date.
This redemption will only take place if the request is made by at least 20% of the nominal value of the bonds in issue and will affect only the bondholders that have requested it.

On 26 March 2025, OVS S.p.A. signed a BNL Loan Agreement for €10,000,000, with simultaneous disbursement. This line involves half-yearly repayments of €2,500,000 each, starting on 26 September 2025 and ending on 26 March 2027. The applicable interest rate is equal to the sum of a spread of 0.80% and the average 6-month EURIBOR rate for the previous month, updated at the end of every six months for the following period. At 31.01.2026, this loan amounted to €7,500,000.

Finally, with respect to the SACE guaranteed loan held by Goldenpoint S.p.A., it should be noted that this was taken out in 2020 for a total of €30,000,000, with a term of 6 years and repayment commencing on 31 December 2022.
In July 2024, following an agreement with the banking pool, this loan was restructured for the remaining principal amount of €18,750,000, with repayment commencing on 31 March 2026 and ending on 30 September 2028.
The loan is backed by a guarantee issued by SACE S.p.A., in line with the provisions of the Liquidity Decree (Legislative Decree 23/2020), for a maximum guaranteed amount equal to 90% of the loan amount.
There are two financial covenants on the SACE guaranteed loan.
However, reference is made to section 11. Significant events occurring after the end of the financial year relating to the voluntary early repayment of 31 March 2026.

The average interest rate on the Group's financial debt in 2025 was 3.01%.

Below is the itemisation of the consolidated net financial debt of the OVS Group at 31 January 2026 and 31 January 2025, shown in the format of CONSOB Notice No. DEM/6064293 of 28 July 2006, supplemented by CONSOB Call for Attention No. 5/21, also including the effects on indebtedness of the accounting standard IFRS 16 and the liabilities for earn-outs estimated as part of the acquisition price of JB Licenses S.r.l. and Goldenpoint S.p.A. under "other current liabilities" and "other non-current liabilities" (second column):

(thousands of euros)	31.01.2026 Reported	31.01.2026 Reported including earn-out liabilities	31.01.2026 Reported excluding IFRS 16	31.01.2025 Reported	31.01.2025 Reported including earn-out liabilities	31.01.2025 Reported excluding IFRS 16

The following table shows the breakdown of current and non-current financial payables at 31 January 2026 and at 31 January 2025:

(thousands of euros)	31.01.2026 Reported	31.01.2026 Reported including earn-out liabilities	31.01.2026 Reported excluding IFRS 16	31.01.2025 Reported	31.01.2025 Reported including earn-out liabilities	31.01.2025 Reported excluding IFRS 16
Current financial payables	1,854	1,854	1,854	2,093	2,093	2,093
Other current payables	0	2,442	0	0	1,705	0
Derivatives	11,891	11,891	11,891	0	0	0
Payables for finance leases	168,313	168,313	122	144,995	144,995	487
Current portion of non-current financial debt	27,097	27,097	27,097	14,866	14,866	14,866
Current financial payables	**209,155**	**211,597**	**40,964**	**161,954**	**163,659**	**17,446**
Non-current financial payables	225,431	225,431	225,431	224,250	224,250	224,250
Other non-current payables	0	4,430	0	0	4,689	0
Derivatives	123	123	123	0	0	0
Payables for finance leases	990,644	990,644	198	902,448	902,448	320
Non-current financial payables	**1,216,198**	**1,220,628**	**225,752**	**1,126,698**	**1,131,387**	**224,570**

6.15 Financial liabilities for current and non-current leases

	31.01.2026	31.01.2025	Change
Financial liabilities for current leases	168,313	144,995	23,318
Financial liabilities for non-current leases	990,644	902,448	88,196

Financial lease liabilities are recognised in accordance with the application of IFRS 16 with effect from 2019.

The changes in lease liabilities during 2025 are shown below:

(thousands of euros)	IFRS 16	Ex IAS 17	Financial liabilities for leases
Balance at 31 January 2025	**1,046,635**	**808**	**1,047,443**
Increase due to business combinations	74,028	0	74,028
Increases	191,330	0	191,330
Decreases	(221,973)	(519)	(222,492)
Financial expenses	68,617	31	68,648
Balance at 31 January 2026	**1,158,637**	**320**	**1,158,957**

It should also be noted that current financial liabilities for leases include a portion of rent and interest (€7,700 thousand) that, at the reporting date, had not been paid as it is subject to negotiation with the respective real estate owners.

The breakdown by maturity of minimum payments and principal amounts on finance leases recognised in accordance with IFRS 16 is shown below:

	Minimum payments owed for finance leases		Principal amount	
	31.01.2026	31.01.2025	31.01.2026	31.01.2025
Within 1 year	225,852	200,038	160,613	138,395
From 1 to 5 years	742,542	667,215	572,045	504,398
Beyond 5 years	502,998	473,982	418,599	398,050
Total	**1,471,392**	**1,341,235**	**1,151,257**	**1,040,843**

The reconciliation between the minimum payments owed to the lessors and their present value (principal) is as follows:

	31.01.2026	31.01.2025
Minimum payments owed for finance leases	1,471,392	1,341,235
(Future financial expenses)	(320,135)	(300,392)
Present value of payables for finance leases	**1,151,257**	**1,040,843**

6.16 Trade payables

	31.01.2026	31.01.2025	Change
Trade payables	413,378	434,965	(21,587)

This item includes payables relating to the OVS Group's normal course of operations, in respect of the supply of goods, assets and services.
The balance includes trade payables to foreign suppliers (mainly in Asia) amounting to €185,422 thousand; it also includes exposure in foreign currency (mainly USD) amounting to USD 201,645 thousand.
The change in the year was due to the excellent management of operating working capital and significant cash generation, which more than offset the effect of the acquisition of Goldenpoint.

6.17 Current tax liabilities

	31.01.2026	31.01.2025	Change
Current tax liabilities	4,209	7,318	(3,109)

This item mainly includes the current tax payable of OVS Hong Kong Sourcing Ltd.
There is also a residual payable of €92 thousand recognised by the Parent Company OVS S.p.A. in 2024 (totalling €923 thousand) and arising from the application of Pillar II regulations in the tax jurisdictions where GloBe taxation was not yet applicable in 2024 (i.e. the application of the QDMTT directly to local entities had not yet been adopted by the jurisdiction). This balance is expected to be paid in August 2026.
The current tax payables of the Group's Italian companies are almost entirely net of the advances paid during the year.

6.18 Other current and non-current payables

	31.01.2026	31.01.2025	Change
Other current payables	190,643	174,843	15,800
Other non-current payables	28,471	25,869	2,602

The breakdown of the item "Other payables" into current and non-current at 31 January 2026 and at 31 January 2025 is shown below:

	31.01.2026	31.01.2025	Change
Payables to personnel for holidays not taken and related contributions	11,041	8,759	2,282
Payables to employees for deferred salaries, overtime, bonuses and related contributions	31,009	31,421	(412)
Payables to Directors and Statutory Auditors for compensation	1,907	2,085	(178)
Other payables	57,556	52,411	5,145
Payables to pension and social security institutions	10,189	7,256	2,933
VAT payables	48,011	42,413	5,598
Other tax payables	3,590	3,387	203
Other payables - to customers	360	692	(332)
Accrued expenses and deferred income - rents	3,409	2,260	1,149
Accrued expenses and deferred income - utilities	4,892	4,382	510
Accrued expenses and deferred income - insurance	711	683	28
Accrued expenses and deferred income - other	17,968	19,094	(1,126)
Total current payables	**190,643**	**174,843**	**15,800**
Other payables	5,091	4,689	402
Accrued expenses and deferred income - other	23,380	21,180	2,200
Total non-current payables	**28,471**	**25,869**	**2,602**

Payables to employees relate to benefits accrued and not paid out at 31 January 2026.
"Other payables" mainly relate to the recognition of €27,347 thousand for the value of expected returns on sales made, pursuant to IFRS 15 (€28,862 thousand at 31 January 2025).

The balance also includes advance payments by customers for pre-orders of goods and purchases of vouchers amounting to €15,514 thousand, and payables for deposits and securities received from customers to guarantee affiliation agreements of €10,291 thousand. In addition, €2,442 thousand relating to the current portion of the payable for earn-out JB Licenses S.r.l. is included, as will be discussed in more detail in the next comments.
The item "Payables to pension and social security institutions" mainly includes payables to INPS (the Italian social security and welfare institution).
At the reporting date, the Group had a VAT payable deriving from retail and wholesale sales and to a lesser extent from the sale of goods and services.
The "Other tax payables" item includes IRPEF (personal tax) on employees, payables to tax offices and payables for unpaid withholding tax.
The "Other accrued expenses/deferred income" item includes €7,609 thousand of accrued expenses for local taxes, €305 thousand of travel expenses, €584 thousand of bank charges, €2,639 thousand of deferred income for contributions payable by partners and lessors and €1,400 thousand of unredeemed reward points relating to customer loyalty programmes (€1,700 thousand at 31 January 2025).
"Non-current payables" also include €8,533 thousand as the non-current portion of deferred income for contributions recognised by lessors after store restructurings and conversions. These contributions were discounted based on the term of the lease. The same item includes €6,195 thousand relating to the deferral of the contribution deriving from investments in new capital goods (mainly Industria 4.0). It should be noted that the investments have been booked including the contribution amount, which was spread throughout the period of depreciation of the goods concerned. Lastly, a deferral of €8,652 thousand should be noted, relating to the contributions accrued under the Planning Agreement with the Puglia Regional Authority to support the investments in industrial research and experimental development, which are being implemented through the subsidiary OVS Innovazione e Sostenibilità S.r.l..
For the sake of completeness, it should be recalled that the maximum contribution approved by the Puglia Regional Authority amounts to a total of €14,824 thousand, the first tranche of 50% of which was already disbursed to the subsidiary at the end of the previous financial year. The amount of the contribution accrued based on work performed as at 31 January 2026 but not yet paid is recorded under current accruals, as there is reasonable certainty that a second instalment will be received by the end of the first half of 2026. The final value of the subsidies will be determined on completion of the projects provided for in the Programme Agreement, the investment plan for which is expected to be completed in September 2026.
Finally, it should be noted that at 31 January 2026, Other non-current payables include: i) €2,700 thousand relating to the remaining price, deferred beyond 12 months, payable to the seller as part of the acquisition of the shares in JB Licenses S.r.l. completed in 2024 and ii) €1,730 thousand relating to the estimated earn-out, including accrued interest, for the full acquisition of Goldenpoint S.p.A. (for further details, see section 3.4 above, Business Combinations).

6.19 Employee benefits

	31.01.2026	31.01.2025	Change
Employee benefits	26,292	26,535	(243)

The amount mainly includes the provisions made by the Parent Company, OVS S.p.A., for accrued employee severance benefits. Post-employment benefits are guaranteed by the Group as part of its defined benefit plans. The defined benefit plans include the provision for employee severance benefits accrued at 31 December 2006, since which date, due to the reform that has taken place, the provision has been identified as a defined contribution provision.
As already mentioned, from 1 January 2007, the Financial Law and the associated implementing decrees introduced significant amendments to the rules on employee severance benefits, including options for employees with regard to the allocation of their accruing severance benefits. Specifically, new flows of severance benefits may be directed by the employee to preselected or company pension schemes (in the latter case, the company will pay severance benefit contributions into a treasury account set up with the INPS (the Italian social security and welfare institution).
The change in the "Employee benefits" item is shown below:

(thousands of euros)	31.01.2026	31.01.2025
Balance at start of year	**26,535**	**28,039**
Increase due to business combinations	707	0
Increase during the year	974	877
Decrease during the year	0	0
Actuarial (gains) losses	(124)	(815)
Benefits paid	(1,800)	(1,566)
Balance at end of year	**26,292**	**26,535**

The economic and demographic assumptions used for actuarial evaluation are listed below:

Demographic assumptions:

- for the expectation of death, the IPS55 demographic, broken down by gender;
- for the expectation of disability, the assumptions used by the INPS model for projections to 2010. Expectations are constructed starting with the distribution by age and gender of pensions in force at 1 January 1987 starting in 1984, 1985 and 1986 relating to personnel in the credit unit;
- for the age of retirement of the general working population, achievement of the first retirement requirement applicable for Mandatory General Insurance was assumed;
- for the probability of leaving employment for reasons other than death, based on statistics provided by the Group, an annual frequency rate of 5.00% was assumed;

- for the probability of early retirement, a year-on-year figure of 3.00% was assumed.

Economic and financial assumptions:

Annual discount rate	3.00%
Annual inflation rate	2.00%
Annual increase in employee severance benefits	3.00%

The iBoxx Eurozone Corporates AA 5-7 index at the calculation date was used as the benchmark for the discount rate. This expiry relates to the average remaining period of service at the company of the employees of Group Companies, weighted with the expected payments.
For the choice of the annual inflation rate, reference was made to the DEF 2025 published on 2 October 2025, which shows the value of the consumption deflator for the years 2026, 2027 and 2028 amounting to 2.0%, 1.8% and 1.8% respectively. On the basis of the above and the current trend in inflation, it was deemed appropriate to use a constant rate of 2.0%.

SENSITIVITY ANALYSIS

As required by the revised version of IAS 19, a sensitivity analysis was carried out on changes in the key actuarial assumptions included in the calculation model.
The above scenario was used as the baseline scenario; from this, the most significant assumptions - i.e. the average annual discount rate, the average inflation rate and the turnover rate, were increased and decreased. The results obtained are summarised in the following table:

	Annual discount rate		**Annual inflation rate**		**Annual turnover rate**	
(millions of euro)	**+0.50%**	**-0.50%**	**+0.25%**	**-0.25%**	**+2.00%**	**-2.00%**
OVS	25.4	26.8	26.3	25.9	26.2	26.0

FUTURE CASH FLOWS

As required by IAS 19, the expected future payment flows for the next few years were calculated, as the following table shows (in millions of euro):

years	**Cash flow**
0 - 1	2.5
1 - 2	2.6
2 - 3	2.9
3 - 4	3.2
4 - 5	3.2
5 - beyond	16.9

The average number of personnel during the year just ended was 113 managers, 9,642 white-collar workers and 381 blue-collar workers.
At 31 January 2026, the Group had 116 managers, 9,823 white-collar workers and 416 blue-collar workers on its payroll.

6.20 Provisions for risks and charges

	31.01.2026	31.01.2025	Change
Provisions for risks and charges	7,199	7,959	(760)

Changes in the "Provision for risks and charges" item are shown below:

(thousands of euros)	31.01.2026	31.01.2025
Balance at start of year	**7,959**	**6,324**
Allowances for the year	1,154	2,075
Increase due to business combinations	50	0
Used/released during the year	(1,964)	(440)
Balance at end of year	**7,199**	**7,959**

The provision is made for the risk of disputes with suppliers in relation to product sales and marketing, public entities, former employees and third parties of various kinds.
The outcome of these risks cannot be defined with certainty, and the amount recorded therefore represents the best estimate of the presumed charge at year-end.
The provision for the year of €1.2 million is for risks relating to employment law and legal or contractual risks, mainly regarding some suppliers.
The decrease refers to drawings on previous provisions made for disputes with former employees and various legal cases, and for charges for the repayment of previous R&D tax benefits affecting most companies in the fashion industry.

6.21 Deferred tax liabilities

	31.01.2026	31.01.2025	Change
Deferred tax liabilities	25,124	28,908	(3,784)

The changes in 2025 are shown below:

(thousands of euros)	Balances at 31.01.2025	Provisions from PPA	Allocated/ released to income statement	Allocated/ released to statement of comprehensive income	Balances at 31.01.2026
Provision for inventory write-downs	14,232	1,468	1,830		17,530
Appropriation for local taxes	2,225		(520)		1,705
Provisions for risks and charges	1,422	12	175		1,609
Doubtful accounts	3,532	110	(613)		3,029
Tangible and intangible assets	(53,676)	(5,729)	255		(59,150)

Total net deferred tax assets (liabilities)	**(27,833)**	**(1,509)**	**629**	**(195)**	**(28,908)**

Deferred tax liabilities related to the higher carrying amount, compared with the amount for tax purposes, of intangible assets in the financial statements were mainly due to their recognition at fair value according to the acquisition method at the time of the business combinations. The Goldenpoint acquisition in July 2025 also resulted in the recognition of a provision for deferred tax liabilities, calculated on the value of the brand, recognised at the time of the purchase price allocation, amounting to €6,446 thousand.

6.22 Shareholders' equity

Shareholders' equity amounted to €903.6 million.
Further details of all the changes in the items included in shareholders' equity are provided in the relative accounting schedule.

SHARE CAPITAL

At 31 January 2026, the share capital of OVS S.p.A. amounted to €290,923,470, comprising 255,032,123 ordinary shares with no par value.
OVS was incorporated on 14 May 2014 with share capital of €10,000.
The transferral of the OVS-Upim business unit by the then sole shareholder Gruppo Coin, which took effect as of 31 July 2014, entailed a share capital increase from €10,000 to €140,000,000, with a premium of €249,885,000.
On 24 February 2015, the global offer for subscription and sale of ordinary shares of OVS S.p.A., with the aim of listing this company on the MTA, was successfully completed.
The subscription operation entailed a further capital increase of €87,000,000, increasing the share capital from €140,000,000 to €227,000,000, divided into 227,000,000 ordinary shares with no par value.
The aforementioned paid capital increase, in tranches, completed in July 2021, entailed an additional increase in the share capital of €63,923,470, from €227,000,000 to €290,923,470, divided into 290,923,470 ordinary shares with no par value.
Subsequently, pursuant to the resolution of the Extraordinary Shareholders' Meeting of 19 February 2025, a total of 35,891,347 treasury shares were cancelled, of which 29,092,347 were cancelled at the Shareholders' Meeting and 6,799,000 by the Board of Directors on 1 April 2025, in implementation of the mandate granted by reducing the share premium reserve by a corresponding amount. The share capital has thus far been divided into 255,032,123 ordinary shares.

TREASURY SHARES

At 31 January 2026, the Parent Company, OVS S.p.A., held a total of 11,402,806 treasury shares, equal to 4.471% of the share capital, for a total amount of €30,899 thousand.
At 31 January 2025, there were 46,208,461 shares in the portfolio, for a total amount of €101,845 thousand. During the year, 35,891.347 treasury shares were cancelled, while an additional 4,484,351 treasury shares were purchased at an average carrying price of €3.554 for a total amount of €15,937 thousand. During the financial year, a total of 3,398,659 treasury shares were also sold, resulting in a reduction in the treasury share reserve totalling €7,778 thousand.
The purchases made during the financial year were carried out as part of the authorisations to purchase treasury shares approved by the Shareholders' Meeting of the Parent Company on 24 January 2024 and 30 May 2025.
It should also be noted that, as part of the authorisations to purchase treasury shares approved by the Shareholders' Meeting on 30 May 2025, in implementation of the purchase programme launched on 9 June 2025 and further confirmed on 27 March 2026 (already subject to disclosure also pursuant to Article 144-bis of CONSOB Regulation 11971/99 and Article 132 of Legislative Decree no. 58/98), from 1 February 2026 to date, the Parent Company has purchased an additional 1,788,244 treasury shares, while it sold on the market 16,382 treasury shares following the exercise of options by certain Beneficiaries of the 2019-2022 Stock Option Plan and 1,409,466 treasury shares following the vesting of the second cycle of the 2022-2026 Performance Share Plan.

Therefore, at 16 April 2026 the Parent Company held 11,765,202 treasury shares (equal to 4.613% of the share capital, broken down into 255,032,123 shares), while its subsidiaries did not hold any OVS shares.

OTHER RESERVES

The breakdown of other reserves is as follows:
The **share premium reserve**, amounting to €449.6 million, derives from the increases in the capital of OVS S.p.A., as previously mentioned, and the decreases due to the cancellation of treasury shares mentioned above. It is also net of listing costs of €7,590 thousand (gross costs of €10,469 thousand and deferred taxes of €2,879 thousand) and the capital increase that took place in July 2021, amounting to €394 thousand (gross costs of €518 thousand and deferred taxes of €124 thousand). With regard to the accounting treatment applied to these costs, pursuant to IAS 32, following the positive outcome of the listing process, the ratio between the number of new shares/number of shares post-listing determined the percentage of charges registered as a direct reduction in shareholders' equity, while the remainder was recognised under costs in the income statement.
The **legal reserve** amounts to €58.2 million, and was established with the allocation of earnings during previous financial years. In particular, it should be noted that with the allocation of the 2024 financial year results, the Shareholders' Meeting of 30 May 2025 resolved to allocate €39.8 million of retained earnings to the legal reserve, thus increasing the latter to a value equal to 20% of the share capital.
There are also **other reserves**, with a positive net balance of €86.6 million, which mainly include retained earnings of €76.2 million, the effects of the direct recognition in shareholders' equity of actuarial gains/(losses) relating to employee severance benefits, the translation reserve and the effects of booking management incentive plans in equity reserves in accordance with the provisions of IFRS 2

(see also note 7.26 "Staff costs") and the impacts arising from the application of IFRS 9 and IFRS 16 at the respective transition date.
Changes in the reserve for actuarial gains/(losses) were as follows:

(thousands of euros)	2025	2024
Value at start of year	**(1,593)**	**(2,213)**
Change in provision for employee severance benefits under IAS 19	124	815
Deferred tax effect	(30)	(195)
Total changes	*94*	*620*
Value at end of year	**(1,499)**	**(1,593)**

Lastly, it should be noted that, due to the realignment of the tax value of the OVS and Upim brands to their statutory value, as required by Decree Law 104/2020 (known as the "August Decree"), Article 110, paragraph 8, a restriction was imposed on the untaxed share premium reserve of €360,238,047.

MINORITY SHAREHOLDINGS OF CAPITAL AND RESERVES

Minority interests mainly relate to 82 S.r.l., which is 70% owned by OVS S.p.A. and 30% owned by Angelo Massimo Piombo. The amount shown includes €3 thousand for share capital and €834 thousand for net results accrued to 31 January 2026, already net of the 2024 dividend of €660 thousand distributed to minority shareholders in 2025.
Finally, the deconsolidation of Vespucci Fashion, Inc. following its cancellation and of Energia Verde Uno S.r.l. (now Deaway Solar 3 S.r.l.) due to the loss of control, which resulted in a change in minority interests of €1,114 thousand, are reported.

DIVIDENDS PAID AND PROPOSED

In particular, following the shareholders' resolution of 30 May 2025 on the allocation of the 2024 earnings, in FY 2025 the Parent Company, OVS S.p.A., distributed an ordinary gross dividend of €0.11 per share to its shareholders for each of the ordinary shares issued.

An ordinary gross dividend of €0.14 per share is proposed for the appropriation of earnings for 2025.

For further details on changes during the year, see the consolidated statement of changes in shareholders' equity and the proposed allocation of earnings for financial year 2025.

7. Notes to the consolidated income statement

The breakdown of some income statement items (values are expressed in thousands of euro), and comments on the main changes compared with the previous year, are provided below.

7.23 Revenues

The breakdown of the "Revenues" item is as follows:

	31.01.2026	31.01.2025
Revenues from retail sales	1,753,887	1,616,705
VAT on retail sales	(315,699)	(291,356)
Net sales	**1,438,188**	**1,325,349**
Revenues from sales to affiliates, administered and wholesale	306,951	305,828
Subtotal net sales	**1,745,139**	**1,631,177**
Revenues from services	882	781
Total	**1,746,021**	**1,631,958**

In 2025, sales revenues recorded an overall increase of 7%, driven mainly by the direct retail channel, also due to the acquisition of Goldenpoint S.p.A., on 3 July 2025. For further details, see the section on the Group Operating Performance, in the Report on Operations.

7.24 Other operating income and revenues

The breakdown of the "Other operating income and revenues" item is provided below:

	31.01.2026	31.01.2025
Revenues from services provided	63,685	60,460
Rental income and leases	15,209	15,310
Compensation for damages	688	414
Capital gains from asset disposals	6,662	2,610
Other revenues	13,032	13,189
Total	**99,276**	**91,983**

Revenues from services provided mainly relate to fees from commercial partners in concessions at the OVS Group's stores, as well as the provision of professional services, the recovery of transport expenses, the recovery of advertising expenses, promotional contributions and charges for staff costs and other services provided.

The item "Rental income and leases" mainly includes rent from concession partners at OVS and Upim stores; it should be emphasised that this type of agreement is not based on IFRS 16, except to a marginal extent.
"Capital gains from asset disposals" are attributable mainly to the early termination of certain rental/lease agreements (often followed by new agreements with different terms) and the consequent termination of rights of use and liabilities related to them. The "Other revenues" item mainly comprises contributions from suppliers and lessors, reimbursements of start-up costs and various contingent assets.

7.25 Purchases of raw materials, consumables and goods

Purchases of raw materials, supplies, consumables and goods mainly consist of purchases of products for sale and amount to €711,687 thousand.
The item breaks down as follows:

	31.01.2026	31.01.2025
Purchases of raw materials, consumables and goods	721,468	714,880
Change in inventories	(9,781)	(25,734)
Total	**711,687**	**689,146**

The consideration in euro for purchases abroad, mainly in dollars, including ancillary costs, is €518,001 thousand.

7.26 Personnel costs

The breakdown of the "Personnel costs" item is provided below:

	31.01.2026	31.01.2025
Wages and salaries	266,124	242,742
Social security charges	81,461	73,596
Employee severance benefits	16,269	15,476
Other personnel costs	2,411	1,976
Directors' fees	4,127	4,070
Total	**370,392**	**337,860**

Net of the Goldenpoint acquisition, personnel costs in 2025 would be €349,210 thousand (+3.4% on the previous year).

The number of employees, expressed as the "full-time equivalent" headcount, was 7,249 at the end of the year (considering only permanent staff), compared to 6,348 at 31 January 2025.
The average number of employees, expressed as the full time equivalent, for 2025 was 8,316.

7.27 Share-based payments

Since June 2015, key employees of the Parent Company and its subsidiaries have been granted options to purchase OVS S.p.A. shares under the Company's stock option plans (hereinafter also the "Plans"). In order to create value for shareholders by improving long-term corporate performance and promoting the loyalty and retention of key personnel for the Group's development, the Company's Shareholders' Meeting approved, on 26 May 2015 and 31 May 2017 respectively, two capital increases for the issue of shares to be offered for subscription to the beneficiaries of two separate stock option plans. On the basis of these capital increases, the authorised capital stands at €39,080,000. Information on the modalities for exercising options is provided below.
Subsequently, the Ordinary Shareholders' Meeting held on 31 May 2019 approved, pursuant to Article 114-bis of the Consolidated Law on Finance, the adoption of a new incentive plan named the "Stock Option Plan 2019-2022 or "2019-2022 Plan", to be implemented through the allocation of free options for subscription to newly issued ordinary shares of OVS S.p.A.. The Plan is reserved to directors who are also employees, managers with strategic responsibilities and/or other employees of OVS S.p.A. and its subsidiaries pursuant to Art. 93 of Legislative Decree no. 58 of 24 February 1998, which were identified by the Board of Directors, after consulting the Appointments and Remuneration Committee, from among those individuals who perform a key role in the achievement of the Company's strategic objectives (hereinafter, the "Beneficiaries"). The Shareholders' Meeting also approved a capital increase for the issue of shares to be offered for subscription to beneficiaries of the 2019-2022 Plan. Based on this capital increase, the authorised capital has a par value of €5,000,000, through the issue of a maximum of 5,000,000 newly issued ordinary shares of OVS.
Information on the modalities for exercising options is provided below.
The aforementioned shareholders' meetings delegated to the Board of Directors the widest powers to implement the capital increases in one or more tranches, granting employees options, as deemed appropriate by the Board, and thus, inter alia:

- to establish terms and conditions for the subscription of new shares;
- to demand payment in full of the price necessary to release the shares at the time of subscription;
- to draw up lists of the names of the beneficiary employees identified by means of the parameters which it considers most appropriate from time to time;

- to regulate the effects of termination of employment with the Company or its subsidiaries and the effects of death of the employee on the options offered through the provisions of the option agreement to be signed by each beneficiary employee.

In execution of the powers received from the Shareholders' Meeting, the Board of Directors granted a total of 13,836,375 options. In total, the Board of Directors, in execution of the powers granted to it, launched the following Plans (figures updated at 31 January 2026):

Plan	Grantable	Granted	Accrued	Exercised/ Cancelled	Exercisable
2015-2020	0	5,101,375	2,724,963	(2,724,963)	0
2017-2022	145,000	3,935,000	1,222,000	0	1,222,000
2019-2022	200,000	4,800,000	4,800,000	(4,723,425)	76,575
Total	**345,000**	**13,836,375**	**8,746,963**	**(7,448,388)**	**1,298,575**

On 8 June 2025, the exercise period for the stock option plan known as the "2015-2020 Plan" definitively expired thus also eliminating the possibility of increasing the share capital by issuing a maximum of 5,107,500 new ordinary shares in OVS, as per the mandate granted at the time by the Extraordinary Shareholders' Meeting of 26 May 2015 to the Board of Directors.

On 21 September 2017, pursuant to the mandate granted by the Extraordinary Shareholders' Meeting of 31 May 2017, the Board of Directors resolved to carry out a paid share capital increase by the deadline of 30 June 2027, by issuing, in one or more tranches, a maximum of 3,935,000 new ordinary shares of OVS with no par value, with the same characteristics as the ordinary shares outstanding on the issue date, with ordinary rights, excluding option rights pursuant to Article 2441, paragraph 8, of the Italian Civil Code, to be reserved for subscription by the beneficiaries of the aforementioned stock option plan called the "2017-2022 Plan".

Lastly, on 19 June 2019, pursuant to the mandate granted by the Extraordinary Shareholders' Meeting of 31 May 2019, the Board of Directors resolved to carry out a paid share capital increase by the deadline of 30 June 2026, by issuing, in one or more tranches, up to 5,000,000 new ordinary shares of OVS with no par value, with the same characteristics as the ordinary shares outstanding on the issue date, with ordinary rights, excluding option rights pursuant to Article 2441, paragraph 8, of the Italian Civil Code, to be reserved for subscription by the beneficiaries of the aforementioned stock option plan called the "2019-2022 Plan".

Both plans still in place provide for the free allocation to each of the beneficiaries of options that confer the right to subscribe to or purchase ordinary shares of OVS in the ratio of 1 ordinary share for every 1 option exercised at a price which, as a result of the 2021 capital increase, has been recalculated respectively as €5.26 per share (for the 2017-2022 Plan), €1.72 per share (for the 2019-2022 Plan), subject to further price adjustments following operations after 2021 on capital or for the distribution of dividends (as described in greater detail below).

The ordinary shares of OVS allocated to beneficiaries from time to time after the exercise of the options carry ordinary rights, the same as those of the ordinary shares outstanding on the allocation date, and therefore carry any coupons in effect at that date.

All the Plans provided for a vesting period of at least three years for options granted to beneficiaries. Each beneficiary may exercise the options allocated on condition that specific annual performance targets (or cumulative targets in the case of the 2019-2022 Plan) are met, relating to OVS's consolidated EBITDA.

The Stock Option Plan also authorised beneficiaries to exercise the options early if certain events occur, including:

- change of control pursuant to Article 93 of the Consolidated Law on Finance, even if this does not entail a public tender offer obligation;
- a public tender offer for the Company's shares pursuant to Articles 102 et seq. of the Consolidated Law on Finance; or
- resolutions on transactions that could result in the delisting of ordinary shares of OVS.

The Plan also required, as a condition for participation in the Plan itself, that the relationship of permanent employment or executive management with OVS or a subsidiary, depending on the type of beneficiary (the "Relationship"), be maintained.

For the 2017-2022 Plan, beneficiaries will be able to exercise the potentially exercisable options for which the performance objectives have been achieved, to the following extent and within the following periods:

- up to 1/3 of the Options granted, rounded down to the lowest whole unit, after 36 months from the Grant Date (First Vesting Period);
- up to 1/3 of the Options granted, rounded down to the lowest whole unit, after 48 months from the Grant Date (Second Vesting Period);
- the balance of the potentially exercisable options after 60 months from the Grant Date (Third Vesting Period).

As already mentioned, the exercise period of the 2015-2020 Plan ended on 8 June 2025 and therefore all the 2,724,963 options actually accrued were cancelled and the relevant IFRS 2 reserve was reclassified to other profit reserves for €5,209 thousand.

The 2017-2022 Plan has also been completed and all of the 1,222,000 options actually accrued are potentially exercisable from 2022 and until 30 June 2027.

Also for the 2019-2022 Plan, it should be noted that as of 1 July 2023, beneficiaries may exercise the options accrued (4,800,000) as the cumulative performance targets were achieved over the three-year period 2019-2021 and 2022, and the condition of access to the plan has been fulfilled. At 31 January 2026, only 4,609,604 options had been exercised, as a result of which the Parent Company sold an equal number of shares for a total amount received of €7,009 thousand and a reversal of the IFRS 2 reserve of €3,450 thousand. During FY 2024, 113,821 options also expired, with a consequent reversal of the IFRS 2 reserve of €85 thousand.

The Plan described above is defined as equity-settled pursuant to IFRS 2. In accordance with this accounting standard, the fair value of the Plans was estimated at the grant date, using the Black-Scholes method. The portion of the overall fair value of the individual Plans pertaining to the reporting period has therefore been recognised in the income statement. In particular, staff costs attributable to the granting of OVS shares, (amounting to €13,996 thousand which were fully accounted for at 31 January 2024), were recognised with a balancing entry in the shareholders' equity.

The movements recorded in the various Stock Option Plans in 2025 are as follows:

Stock Option Plan	Exercise price	Currency	No. of options at 31.01.2025	Options granted	Options cancelled	Options exercised	Options expired	No. of options at 31.01.2026
2015-2020 Plan	4.08	euros	2,724,963	0	0	0	(2,724,963)	0
2017-2022 Plan	5.26	euros	1,222,000	0	0	0	0	1,222,000
2019-2022 Plan	1.72	euros	2,103,293	0	0	(2,026,718)	0	76,575
Total			**6,050,256**	**0**	**0**	**(2,026,718)**	**(2,724,963)**	**1,298,575**

At 31 January 2026, 1,298,575 options were potentially exercisable (accrued or accruable).

During 2025, 2,026,718 options were exercised under the 2019-2022 Plan.

For the purposes of completeness, it should also be noted that the strike prices of the Plans referred to above must be adjusted to neutralise the effects of the distribution of dividends in the years following their respective maturity dates and possibility of exercise (a total of €0.31 per ordinary share until the current date for the two Plans still in place).

It should again be noted that, on 31 May 2022, the Ordinary Shareholders' Meeting approved a new medium/long-term equity-based incentive plan named the "Performance Share Plan 2022-2026" (the "Plan"), which aims to align the interests of the beneficiaries with the creation of value for OVS's shareholders and investors in the long term, and to promote the permanence of the beneficiaries by incentivising them to add value to the Group and simultaneously creating a loyalty-building tool.

The Plan is intended for the top management of OVS S.p.A. and its subsidiaries and other employees and contractors (including consultants and/or providers of intellectual work) of OVS and/or subsidiaries with roles that are strategically important for the Company's business or that are otherwise able to make a significant contribution in light of the pursuit of the strategic objectives of OVS and its subsidiaries.

When a performance objective is achieved for each three-year vesting period for measurement of the results, starting on 1 February and ending on 31 January of the third subsequent year (2022-2024 / 2023-2025 / 2024-2026), the Plan entitles each beneficiary to receive OVS shares free of charge, subject to the circumstances set out in the Plan (existence of a relationship with the company and absence of disciplinary sanctions). The number of actual shares granted to each beneficiary in the event of achievement of the objective, under the terms and conditions of the Plan regulations, will be determined by applying different criteria, depending on whether the reference price of the OVS share is less than or equal to €3.00 or more than €3.00.

The Plan is divided into three, three-year ("rolling") performance cycles (2022-2024, 2023-2025 and 2024-2026) and will expire on 31 January 2027. The maximum total number of shares to be granted to beneficiaries in order to execute the Plan is 4,500,000.

For further details on the Plan, see (i) the explanatory report on the 4th (fourth) item on the agenda of the Ordinary Shareholders' Meeting of OVS of 31 May 2022, and (ii) the information document prepared pursuant to Article 84-bis of the regulation approved by CONSOB resolution of 14 May 1999, No. 11971, available on the Company's website, www.ovscorporate.it, and on the authorised storage facility 1Info at www.1info.it.

The first three-year cycle was assigned by resolution of the Board of Directors on 14 June 2022.

The second three-year cycle was assigned by resolution of the Board of Directors on 21 March 2023.

The first three-year cycle was assigned by resolution of the Board of Directors on 17 April 2024.

Also on 31 May 2022, the Extraordinary Shareholders' Meeting resolved to grant the Board of Directors, pursuant to Article 2443 of the Italian Civil Code, for a period of five years from the date of the resolution, the authority to increase the share capital, free of charge and in one or more tranches, pursuant to Article 2349 of the Italian Civil Code, to be allotted to the beneficiary employees of the Plan, through the issue of a maximum of 4,500,000 ordinary shares at an issue value equal to the accounting par value of the OVS shares at the execution date, to be fully allocated to capital. Article 5 of the current Articles of Association was amended accordingly.

Pursuant to IFRS 2, the 2022-2026 Performance Share Plan is also defined as equity-settled. Accordingly, the fair value of the Plan was estimated at the grant date, using the Black-Scholes method. Therefore, the overall fair value pertaining to the reporting period has been recognised in the income statement. In particular, staff costs at 31 January 2026 attributable to the granting of OVS shares, amounting to €955 thousand, were recognised under this plan with a balancing entry in shareholders' equity.

On 30 May 2024, the ordinary Shareholders' Meeting approved a new compensation plan based on mid-long term financial instruments called the "2024-2026 Performance Share Plan" (the "2024-2026 Plan"), reserved to executive directors, managers with strategic responsibilities of OVS and other employees or contractors - including consultants and/or intellectual service providers - of the Company and/or the OVS Group who perform functions with a significant impact on the sustainable success of the Company and the Group, concerning a maximum of 6,600,000 rights. Under the Performance Share Plan, if Performance Targets are achieved during a Vesting Period starting on 1 February 2024 and ending on 31 January 2027 (consistent with the closing dates of the company's financial statements), each Beneficiary will be entitled to receive OVS shares (the 'Shares') free of charge, provided that after the Vesting Period (and except as provided for below in the event of leavership), the relationship between OVS or the Subsidiary and the Beneficiary still exists (without prejudice to the Board of Directors' right to waive this last condition in favour of the Beneficiary). The maximum total number of shares to be granted to the Beneficiaries to execute the Plan is 6,600,000.

The actual number of Shares to be delivered to each Beneficiary by the deadlines indicated below is determined at the end of the Vesting Period, based on the degree of achievement of the Performance Objectives, while their actual delivery to each Beneficiary will be divided into 2 (two) tranches subject to the conditions set out below, as follows:

- the first tranche, regarding the allocation of 60% of the Shares to which the rights are allotted, is awarded at the end of the Vesting Period, which will end with the approval of the consolidated financial statements for the year ended 31 January 2027 (during which the Performance Targets are measured);
- the second tranche (i.e. the allotment of the remaining 40% of the shares vested with the rights allotted) is assigned at the end of a further two-year deferral period that will end on 31 January 2029, without prejudice to the provisions in the event of a good leaver after the Vesting Period and during the two-year period following the Performance Period.

The rights attributed to the Beneficiaries accrue, thereby entitling the relevant Beneficiaries to receive Company Shares (in the ratio of 1 share for each accrued right), based on the level of achievement of the Performance Targets.

For further details on the Plan, see (i) the explanatory report on the 4th (fourth) item on the agenda of the ordinary Shareholders' Meeting of OVS of 30 May 2024, and (ii) the information document prepared pursuant to Article 84-bis of the regulation approved by CONSOB Resolution of 14 May 1999, No. 11971, available on the Company's website, www.ovscorporate.it, and on the authorised storage facility 1Info at www.1info.it.

On 12 June 2024, the Board of Directors, following the favourable opinion of the Appointments and Remuneration Committee, identified 19 beneficiaries in addition to the Chief Executive Officer. The beneficiaries include managers with strategic responsibilities, employees and contractors.

On 17 September 2025, the Board of Directors identified 2 additional beneficiaries, bringing the total number to 21 (already net of a beneficiary who left the Company without the recognition of good leavership).

For the purposes of implementing the Plan, the shares that can be assigned to the beneficiaries shall reflect, in whole or in part, (i) the amount of treasury shares that the Company may purchase and which it may dispose of in execution of appropriate shareholders' meeting authorisations, pursuant to Articles 2357 and 2357-ter of the Italian Civil Code, Article 132 of the Consolidated Law on Finance and Art. 144-bis of the Issuers' Regulation and in compliance with current EU legislation, including Regulation (EU) 596/2014 and Delegated Regulation (EU) 1052/2016, and/or, where necessary, (ii) any future capital increases in accordance with Article 2349 of the Italian Civil Code, to be submitted to the Shareholders' Meeting for approval.
Pursuant to IFRS 2, the 2024-2026 Performance Share Plan is also defined as equity-settled. Accordingly, the fair value of the Plan was estimated at the grant date, using the Montecarlo method. Therefore, the overall fair value pertaining to the reporting period has been recognised in the income statement. In particular, staff costs at 31 January 2026 attributable to the granting of OVS shares, amounting to €1,998 thousand, were recognised under the above plan with a balancing entry in shareholders' equity.

7.28 Depreciation, amortisation and write-downs of assets

The breakdown of the "Depreciation, amortisation and write-downs of assets" item is provided below:

	31.01.2026	31.01.2025
Amortisation of intangible assets	22,519	20,987
Depreciation of tangible assets	54,338	51,523
Depreciation of right-of-use assets	166,061	153,484
Write-downs of tangible and intangible assets	3,077	3,105
Total	**245,995**	**229,099**

Due to adoption of the IFRS 16 accounting standard, this item includes depreciation of right of use assets relating mainly to store leases and deposits and to a minor extent to leases on offices, apartments for company use and motor vehicles/other equipment.
For a detailed analysis of changes during the year, see Annex 2.
It should be noted that the amount relating to write-downs of tangible and intangible assets in the appendices in question has been included in the amounts shown in the "Disposals" and "Write-downs" columns.
Write-downs refer to assets written down due to store closures that have already taken place or are planned, including in relation to some foreign business being divested, and/or any results of impairment testing on stores.

7.29 Other operating expenses

SERVICE COSTS

Service costs, which reflect the Group's use of external resources, can be broken down as follows:

	31.01.2026	31.01.2025
Advertising	36,974	38,161
Utilities	39,433	39,749
Miscellaneous sales costs	79,303	75,523
Professional and advisory services	37,552	34,697
Travel and other staff expenses	14,897	13,803
Insurance	4,676	4,034
Maintenance, cleaning and security	41,031	39,626
Other services	1,535	1,630
Remuneration of the Board of Statutory Auditors/Supervisory Board	277	288
Total	**255,678**	**247,511**

LEASE AND RENTAL COSTS

"Lease and rental costs" are itemised as follows:

	31.01.2026	31.01.2025
Rental costs and ancillary charges	33,471	34,816
Leasing of plant, equipment and vehicles	9,227	7,053
Total	**42,698**	**41,869**

The item "Rental costs and ancillary charges" mainly includes rents deriving from leases accounted for outside the scope of IFRS 16, variable rent components within the scope of the standard and the service charges of the sales network. The leases were entered into under arm's length conditions.

WRITE-DOWNS AND PROVISIONS

The breakdown of the "Write-downs and provisions" item is provided below:

	31.01.2026	31.01.2025
Doubtful accounts	1,998	7,392
Provisions for risks	1,154	2,075
Total	**3,152**	**9,467**

For details of the amounts described above, see note 6.2 "Trade receivables" and note 6.20 "Provisions for risks and charges".

OTHER OPERATING EXPENSES

Other operating charges break down as follows:

	31.01.2026	31.01.2025
Materials and equipment for offices and points of sale	7,397	6,002
Taxes	9,377	7,827
Capital losses	554	1,084
Charitable donations	325	458
Corporate expenses	683	588
Other general and administrative costs	1,172	891
Other operating expenses	3,445	4,192
Total	**22,953**	**21,042**

The "Other operating expenses" item mainly comprises €1,449 thousand relating to rebates, fines and rounding liabilities and €193 thousand for discounts on partner goods distributed to customers during special events; the same item also includes transactional agreements with lessors and suppliers for €277 thousand, and miscellaneous reimbursements for expenses.

7.30 Financial income (expenses)

FINANCIAL INCOME

	31.01.2026	31.01.2025
Financial income on bank current accounts	605	864
Financial income from miscellaneous sources	692	409
Income from financial lease assets	26	37
Total	**1,323**	**1,310**

FINANCIAL EXPENSES

	31.01.2026	31.01.2025
Financial expenses on bank current accounts	57	4
Financial expenses on loans	11,275	13,785
Expenses from finance lease liabilities	68,648	63,972
Interest cost on provision for employee severance benefits	794	855
Other financial expenses/fees	8,104	6,106
Total	**88,878**	**84,722**

Other financial expenses on loans mainly include fees associated with existing loans.

With regard to the financial income/expenses for leases due to adoption of IFRS 16, see the extensive comments in the sections above.
The weighted average IBR applied in 2025 was 6.35%.

FOREIGN EXCHANGE GAINS AND LOSSES

	31.01.2026	31.01.2025
Exchange rate gains	23,280	10,280
Foreign exchange losses	(22,189)	(11,514)
Gains (losses) on changes in fair value on forward derivatives	(26,258)	14,590
Total	**(25,167)**	**13,356**

GAINS (LOSSES) FROM EQUITY INVESTMENTS

	31.01.2026	31.01.2025
Gains (losses) from equity investments	(922)	0
Total	**(922)**	**0**

7.31 Taxes

The following is a breakdown of the charge to the income statement:

	31.01.2026	31.01.2025
Taxes on the income of Italian companies	16,754	19,133
IRAP Italian companies	8,876	7,756
Taxes of foreign companies	4,358	461
Deferred taxes (net change)	(49)	(1,525)
Total	**29,939**	**25,825**

The following table shows the reconciliation of the theoretical tax charge with the effective tax charge:

(thousands of euros)	31.01.2026	%	31.01.2025	%
Net result for the year before tax	79,098		77,891	
Theoretical income tax (IRES)	(18,984)	(24.0)%	(18,694)	(24.0)%
IRAP	(8,876)	(11.2)%	(7,756)	(10.0)%
Tax effect of permanent differences and other differences	(2,079)	(2.6)%	625	0.8%
Taxes	**(29,939)**		**(25,825)**	
Effective tax rate		**(37.9)%**		**(33.2)%**

Current taxes at 31 January 2026 mainly include the estimate of the Parent Company's IRES and IRAP charge for a total of €24.0 million and a provision for approximately €3.5 million due to the preliminary effects deriving from the application of the QDMTT by the subsidiary in Hong Kong according to the Globe rules under Pillar II. The effective tax charge for the FY 2025 was 37.9% (compared with 33.2% in FY 2024) and differs from the theoretical tax charge due to the effect of the IRAP charge on earnings before tax and the effect of the new income tax of multinational groups in application of the aforementioned legislation which, for the first year, directly affects local jurisdiction.

7.32 Earnings per share

The share capital is divided into 255,032,123 shares with no par value.
The calculation of earnings per share shown in the following table is based on the ratio of earnings attributable to the Group to the weighted average number of shares of OVS S.p.A. outstanding in the year, net of treasury shares held (11,402,806 treasury shares, equal to 4.471% of the share capital), weighted for the period of ownership.

	31.01.2026	31.01.2025
Net result for the year attributable to the Group (in euro/000)	48,373	51,957
Number of ordinary shares at end of year	255,032,123	290,923,470
Average weighted number of shares outstanding for the calculation of basic earnings per share	244,764,722	249,836,360
Basic earnings per share (in Euro)	**0.198**	**0.208**
Diluted earnings per share (in Euro)	**0.188**	**0.206**

Diluted earnings per share were essentially in line with basic earnings per share, since at 31 January 2026 the dilutive effects of the various stock option and stock grant plans (see note 7.27 above for details) were not material.

8. Relations with related parties

The following table summarises the OVS Group's lending and borrowing relations with related parties, as defined by IAS 24, at the reporting date. It should be noted that due to the acquisition of Goldenpoint on 3 July 2025, this company is no longer shown in the table below at 31 January 2026 as it is now subject to full consolidation.

	Related parties								
(thousands of euros)	Goldenpoint S.p.A.	String S.r.l.	Centomila-candele S.c.p.a. in liquidation	Directors and executives with strategic responsibilities	Deaway Solar 3 S.r.l. (formerly Energia Verde Uno S.r.l.)	Other related parties	Total	Total balance sheet item	Percentage of balance sheet item

At 31 January 2026	0	0	0	(2,772)	0	0	(2,772)	(190,643)	1.5%
At 31 January 2025	0	0	0	(2,588)	0	0	(2,588)	(174,843)	1.5%
Financial liabilities for non-current leases									
At 31 January 2026	0	(2,409)	0	0	0	0	(2,409)	(990,644)	0.2%
At 31 January 2025	0	(2,511)	0	0	0	0	(2,511)	(902,448)	0.3%

String S.r.l. is a company controlled by the Chief Executive Officer of the Parent Company OVS S.p.A., with which it had signed a property lease agreement in January 2025 for a store which is accounted for, under IFRS 16, as a financial liability for leases of a residual amount of €2,511 thousand at 31 January 2026. The leased property derives from a purchase and sale transaction in August 2024 between the Parent Company OVS S.p.A. and the previous lessor. The purchase was completed following the exercise of the right of first refusal. As the management of properties is not part of OVS's strategy, by the end of 2024, after evaluating certain proposals, the Parent Company sold the property to the related party in question and at the same time signed the lease agreement described above. No significant income or expenses arose from the sale and therefore the transaction was considered to be of "lesser importance".

Centomilacandele S.C.p.A. in liquidation is a non-profit consortium company that was engaged in the supply of electricity and natural gas under the best possible conditions to the consortium entities. It was placed in liquidation in August 2020. Business relations with the company had already ceased in 2020.

The following table summarises the economic relations of the OVS Group with related parties:

	Related parties							
(thousands of euros)	**Goldenpoint S.p.A.**	**Directors and executives with strategic responsibilities**	**String S.r.l.**	**Deaway Solar 3 S.r.l. (formerly Energia Verde Uno S.r.l.)**	**Other related parties**	**Total**	**Total balance sheet item**	**Percentage of balance sheet item**

Cash flow generated (absorbed) by financing activities	(2,850)	0	0	0	0	(2,850)	(221,612)	1.3%

The transactions listed above took place under arm's length conditions.

9. Information on operating segments

Pursuant to IFRS 8, management has identified the following operating segments:

- OVS, active in the value fashion market, offering stylish and high-quality clothing at competitive prices, with a focus on the latest trends and fashions;
- Upim, active in the value segment of the Italian market, offering women's, men's and children's clothing products, homeware and fragrance, with particularly competitive price positioning and a key focus on the family; and
- with the acquisition of STEFANEL in March 2021, GAP Italia in February 2022 and Goldenpoint in July 2025, three new business units were identified within the Group. However, given the smaller size of these recent acquisitions compared with the consolidated accounting balances, they are included in the "Other businesses" category.

The results of the operating segments are measured by analysing revenues and adjusted EBITDA, with the latter defined as earnings before depreciation and amortisation, asset write-downs, financial income and expenses and tax, net of non-recurring income and expenses and other non-monetary accounting effects, as well as the effect of application of IFRS 16.

Specifically, management believes that revenues and adjusted EBITDA provide a good performance indicator as they are not affected by tax legislation or depreciation/amortisation policy.

With regard to the Group's invested capital, however, it should be noted that this is managed synergistically between all the divisions at the central level: therefore, management does not consider a view of capital by brand to be representative.

(thousands of euros)	31.01.2026				31.01.2025			
	OVS	UPIM	Other businesses	Total	OVS	UPIM	Other businesses	Total
Revenues by segment	**1,252,215**	**384,577**	**109,158**	**1,745,950**	**1,208,994**	**378,693**	**43,737**	**1,631,424**

10. Other information

10.1 Contingent liabilities

It should be noted that, other than what is described in note 6.20, "Provisions for risks and charges", no other potential risks have been identified as possible by management.

10.2 Sureties and guarantees relating to third parties

These amounted to €112,866 thousand (€102,641 thousand at 31 January 2025) and were granted on behalf of the Group by banks or insurance companies, mainly to guarantee Italian leases.

10.3 Other commitments

There are no commitments at the reporting date that are not already reflected in other items of the consolidated statement of financial position.

10.4 Directors' and Statutory Auditors' fees

The following table shows the fees payable to Directors and Statutory Auditors for positions held at the Group:

(thousands of euros)	Directors	Auditors
Financial year ended 31 January 2026	3,945	182
Financial year ended 31 January 2025	3,945	182

10.5 Reconciliation of shareholders' equity and net result for the year of the Parent Company with consolidated shareholders' equity and consolidated net result for the year

(thousands of euros)	Result for the year	Shareholders' equity
Financial statements of OVS S.p.A at 31.01.2026, prepared according to international reporting standards (IFRSs)	**51,751**	**888,345**
Shareholders' equity and profit for the year of the fully consolidated subsidiaries, net of the carrying amount of the equity investments	21,203	(9,203)
Elimination of infra-group dividends	(24,478)	0
Elimination of unrealised infra-group results net of the relative tax effect	(164)	(1,283)
Exchange rate gains or losses from the translation of financial statements in foreign currencies	0	(1,633)
Elimination of inter-company write-downs	1,825	3,758
Consolidation differences	(1,764)	22,804
Non-controlling interests	786	839
Consolidated financial statements of OVS at 31.01.2026, prepared according to international reporting standards (IFRS)	**49,159**	**903,627**

10.6 Significant non-recurring events and operations

In accordance with CONSOB Communication No. DEM/6064293 of 28 July 2006, note that the Group's results for the FY 2025 were influenced by non-recurring net expenses of €1,909 thousand.

	31.01.2026	31.01.2025
Revenues	(71)	(553)
Other operating income and revenues	(736)	0
Purchases of raw materials, consumables and goods	13	685
Personnel costs	820	851
Depreciation, amortisation and write-downs of assets	404	761
Service costs	1,366	1,671
Lease and rental costs	73	767
Write-downs and provisions	0	1,985
Other operating expenses	643	1,223
Taxes	(603)	(1,774)
Total	**1,909**	**5,616**

Net non-recurring expenses refer to:

- revenues of €71 thousand, purchases of goods of €13 thousand and lease and rental costs of €73 thousand relating to certain foreign initiatives being partially divested;
- other income and revenues of €736 thousand relating to income from asset disposals of €720 thousand and €16 thousand relating to certain foreign initiatives being divested;
- personnel costs of €820 thousand relating to transactions with employees for €632 thousand and costs relating to certain foreign initiatives being partially divested for €188 thousand;
- depreciation, amortisation and extraordinary write-downs of assets for €404 thousand related to some foreign initiatives under partial divestment;
- service costs of €1,366 thousand, mainly relating to one-off costs related to some foreign initiatives being discontinued for €198 thousand and other net one-off costs of €1,168 thousand;
- other operating expenses of €643 thousand, for €22 thousand relating to some foreign initiatives being partially disposed of and other one-off costs of €621 thousand;
- the tax effect on the above non-recurring items of €603 thousand.

In accordance with the above Consob Communication, it should also be noted that in 2025, no atypical and/or unusual transactions were entered into as defined by the Communication.

10.7 Public funds – Information pursuant to Law no. 124/2017

Pursuant to Article 1, paragraph 125, of Law no. 124/2017, regarding the obligation to indicate in the notes any sums of money received during the year by way of subsidies, grants, remunerated mandates and any economic benefits of any kind from public administrations and from the parties referred to in paragraph 125 of the same article, see the guidelines in the National Register of State Aid pursuant to Article 52 of Law no. 235 of 24 December 2012.

10.8 Information pursuant to Article 149 – duodecies of the Consob Issuer Regulation

The following table, prepared pursuant to Article 149-duodecies of the Consob Issuer Regulation shows the fees for the financial years 2025 and 2024 for auditing services and other services provided by the independent auditors (KPMG S.p.A.), as well as services provided by companies within the same network:

(thousands of euros)	2025		2024	
a) Independent auditor's fees for the provision of auditing services:				
- to Parent Company OVS S.p.A.	294		242	
- to subsidiaries (services provided by companies in the KPMG network)	118		61	
b) Independent auditor's fees for the provision of services other than auditing:				
- to Parent Company OVS S.p.A. for audit services for the issuance of certification	85	(1)	98	(1)
- to Parent Company OVS S.p.A. for audit services for the issuance of certification (services provided by companies in the KPMG network)	0		0	
- to Parent Company OVS S.p.A. for other services	0		18	(2)
c) Fees for entities in the KPMG network for the provision of services:				
- to Parent Company OVS S.p.A.	11	(3)	0	

(1) These fees relate to "audit related" services for the limited review of the Consolidated Sustainability Report and various tax certifications.
(2) These fees relate to gap assessment activities in the context of the CSRD.
(3) These payments relate to assistance with methodological support activities in the Power Purchase Agreement.

11. Significant events after the reporting period

With reference to the incentive plan "2022-2026 Performance Share Plan", approved by the Shareholders' Meeting on 31 May 2022 and divided into three, three-year cycles (2022-2024; 2023-2025; 2024-2026), on 4 February 2026, the Board of Directors of OVS S.p.A. notified that the actual number of shares to be allocated to each beneficiary, based on the level of achievement of the performance target, had been determined, since the vesting period for the second cycle (2023-2025) of the Plan had ended and the conditions for the allocation of shares to the beneficiaries identified on 19 April 2023 had been met.
In particular, considering that the performance target had been achieved in full, the Board of Directors resolved - for each of the 84 beneficiaries in respect of whom the conditions for allocation had been verified - to allocate 100% of the maximum number of shares that could be allocated.
The Chief Executive Officer was allocated 230,000 shares and Directors and executives with strategic responsibilities were allocated 255,000 shares. The other beneficiaries were allocated 924,466 shares.
The number of beneficiaries, initially identified as 91, changed in application of the provisions governing bad and good leavers set out in the Information Document and the Regulations of the 2022-2026 Performance Share Plan.
On 26 February 2026, OVS Cyprus Ltd, a wholly owned subsidiary of the Parent Company, was incorporated. The company will be in charge of developing the commercial business with the opening of stores in Cyprus.
As already mentioned, on 27 March 2026, OVS S.p.A. completed a process for the total refinancing of the Group by signing a sustainability-linked loan agreement (hereinafter the "2026 Loan"), consisting of three lines of credit totalling €300 million, with a 5-year term. The transaction was closed on 31 March 2026.
This transaction further improves the Group's financial structure, already strengthened thanks to a strong performance in terms of cash flows generated during 2025. The new lines present significant advantages in terms of cost, extension of terms and, more generally, contractual conditions in line with the Group's situation.
The 2026 Loan allows the Parent Company to access financial resources aimed, among other things, at repaying and replacing: i) two lines of credit, a Revolving Loan for €120 million and a Term Loan for the remaining €65 million,

which became available with the loan signed on 7 April 2022, both maturing in April 2027; ii) a credit line for €18.75 million guaranteed 90% by SACE for the subsidiary Goldenpoint S.p.A., obtained pursuant to a loan agreement signed in 2020 to meet the needs related to the Covid-19 pandemic, subsequently amended with the Framework agreement signed in July 2024 expiring in September 2028. The new financial lines, which will expire on 31 March 2031, consist of: (i) a Term Line of €120 million with a pre-amortisation period until 31 May 2027, followed by a repayment plan in eight six-monthly instalments; (ii) a Revolving Line of €120 million; and (iii) a committed Backstop Line of €60 million, which may be requested by OVS for Capex and/or to repay the Bond Loan by no later than November 2027 and which, if used even partially, will have a repayment plan for the actual amount used in six, six-monthly instalments with maturity aligned with that of the Term Line.
The lines, as per market practice, will be subject to compliance with a covenant relating to the ratio of the average annual adjusted NFP to adjusted EBITDA, set at 3.0x, a level that ensures a large margin compared to the current situation and future reasonable management forecasts.
The 2026 loan includes pricing of between 160 bps and 135 bps, to which the value of the Euribor should be added if positive, therefore with costs lower at 31 January 2026 than the lines being repaid.
The structure of the financing agreement also provides for an annual decrease or increase in the cost of financing of 5 bps, depending on the achievement of specific sustainability targets, starting from FY 2026. With this agreement, all of the Group's main lines of financing are linked to sustainability performance.
On 31 March 2026, the OVS Group increased its presence in India two-fold, through its subsidiary OVS India Retail Private Ltd.. After a debut in New Delhi, the company opened its second direct store covering a surface area of 1,000 m^2 in the Sky City Mall shopping centre in Borivali (Mumbai), with an offering that includes the women's, men's and children's clothing collections and a wide selection of brands developed by the internal creative team, including Piombo, Les Copains, B.Angel, Altavia and Ovs Kids.
Lastly, for the sake of completeness, it should be noted that, as part of the authorisations to purchase treasury shares approved by the Shareholders' Meeting on 30 May 2025, in implementation of the purchase programme launched on 9 June 2025 and further confirmed on 27 March 2026 (already subject to disclosure also pursuant to Article 144-bis of CONSOB Regulation 11971/99 and Article 132 of Legislative Decree no. 58/98), from 1 February 2026 to date, the Parent Company has purchased an additional 1,788,244 treasury shares, while it sold 16,382 treasury shares following the exercise of options by certain Beneficiaries of the 2019-2022 Stock Option Plan and 1,409,466 treasury shares following the vesting of the second cycle of the 2022-2026 Performance Share Plan.
At 16 April 2026, the Company therefore held 11,765,202 treasury shares (4.613% of the share capital, currently divided into 255,032,123 shares), whereas subsidiaries do not hold OVS shares. There were no other significant events after 31 January 2026.

12. Appendices to the consolidated financial statements

The following documents contain additional information on the consolidated financial statements for the year ended 31 January 2026.

Annexes:
- no. 1 Property, plant and equipment at 31 January 2026;
- no. 2 Right-of-use assets at 31 January 2026;
- no. 3 Intangible assets at 31 January 2026;
- no. 4 Property, plant and equipment at 31 January 2025;
- no. 5 Right-of-use assets at 31 January 2025;
- no. 6 Intangible assets at 31 January 2025.

(1) Of this amount, €1,857 thousand represents assets under construction at 31/01/2024, reclassified to the specific asset categories in 2024.
(2) The item includes €89 thousand relating to fixed assets disposed of and written down in the period following to the closure of stores.
(3) It also includes €8,845 thousand relating to the allocation of the consideration arising from the acquisition of JB Licenses S.r.l..

Certification in accordance with the provisions of Article 154-bis, paragraph 5 of Legislative Decree 58/1998 (Consolidated Act on Finance)

1. We, the undersigned, Stefano Beraldo, the Chief Executive Officer, and Nicola Perin, the Director responsible for preparing the corporate accounting statements of OVS S.p.A., hereby declare, also taking account of Article 154-bis, paragraphs 3 and 4, of Legislative Decree of 24 February 1998 no. 58:
   - the adequacy with respect to the characteristics of the Company and
   - the effective application of the administrative and accounting procedures for the preparation of the consolidated financial statements in the period from 1 February 2025 to 31 January 2026.

2. The evaluation of the adequacy of the administrative and accounting procedures used in the preparation of the consolidated financial statements at 31 January 2026 was based on a process defined by OVS S.p.A. consistent with the Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (CoSO), which is a generally accepted international framework.

3. Moreover, we certify that:
   3.1 the consolidated financial statements at 31 January 2026:
      a. have been prepared in accordance with the international accounting standards recognised by the European Union pursuant to Regulation (EC) no. 1606/2002 of the European Parliament and of the Council of 19 July 2002 as subsequently amended;
      b. correspond to the accounting books and records;
      c. are suitable to provide a true and fair representation of the financial position and results of the Issuer and all the companies included within the scope of consolidation.
   3.2 The Report on Operations includes a reliable analysis of the operating performance and results and the situation of the Issuer and all the companies included within the scope of consolidation, as well as a description of the main risks and uncertainties to which they are exposed.

Independent auditors' report pursuant to article 14 of Legislative decree no. 39 of 27 January 2010 and article 10 of Regulation (EU) no. 537 of 16 April 2014

To the shareholders of
OVS S.p.A.

Report on the audit of the consolidated financial statements

Opinion

We have audited the consolidated financial statements of the OVS Group (the "group"), which comprise the statement of financial position as at 31 January 2026, the income statement and the statements of comprehensive income, changes in equity and cash flows for the year then ended and notes thereto, which include material information on the accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the financial position of the OVS Group as at 31 January 2026 and of its financial performance and cash flows for the year then ended in accordance with the IFRS Accounting Standards as issued by the International Accounting Standards Board and endorsed by the European Union, as well as the Italian regulations implementing article 9 of Legislative decree no. 38/05.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISA Italia). Our responsibilities under those standards are further described in the "*Auditors' responsibilities for the audit of the consolidated financial statements*" section of our report. We are independent of OVS S.p.A. (the "parent") in accordance with the ethics and independence rules and standards applicable in Italy to audits of financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in the audit of the consolidated financial statements of the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Recoverability of the carrying amount of goodwill and intangible assets

Notes to the consolidated financial statements: paragraphs "6.10 Intangible assets", "6.11 Goodwill" and "6.12 Impairment testing"

Key audit matter	Audit procedures addressing the key audit matter
The consolidated financial statements at 31 January 2026 include goodwill of €301.1 million and intangible assets of €609.5 million, €417.3 million of which with an indefinite useful life. Goodwill is allocated to the OVS and JB Licenses cash-generating units ("CGUs") (€297.7 million and €3.4 million, respectively), while intangible assets with an indefinite useful life are allocated to the OVS, UPIM, Stefanel and Goldenpoint CGUs (€377.5 million, €13.3 million, €3.4 million and €23.1 million, respectively). The parent's directors tested the carrying amounts of the OVS, UPIM, Stefanel and JB Licenses CGUs to which goodwill and the intangible assets are allocated for impairment in order to identify any impairment losses compared to the CGUs' recoverable amount. They calculated the recoverable amount by estimating its value in use using the discounted cash flow model. With respect to Goldenpoint, which was acquired during the year, the purchase price allocation process was completed as at 31 January 2026. The model is very complex and entails the use of estimates which, by their very nature, are uncertain and subjective about: • the expected cash flows, calculated by taking into account the general economic performance and that of the group's sector, the actual cash flows for recent years and the projected growth rates; • the financial parameters used to calculate the discount rate. For the above reasons, we believe that the recoverability of the carrying amount of goodwill and intangible assets with an indefinite useful life is a key audit matter.	Our audit procedures included: • understanding the process adopted to prepare the impairment test of the carrying amount of the OVS, UPIM, Stefanel and JB Licenses CGUs to which goodwill and intangible assets are allocated; • understanding the process adopted for preparing the 2026 budget and the 2027-2028 business plan, approved by the parent's board of directors on 4 February 2026, from which the expected future cash flows underlying the impairment test were derived; • analysing the reasonableness of the key assumptions used by the directors of OVS S.p.A. in preparing the impairment test exercise approved by the board of directors on 16 April 2026; • analysing the criteria used to identify the CGUs and tracing the amount of the CGUs' assets and liabilities to the relevant carrying amounts in the consolidated financial statements; • checking any discrepancies between the previous year business plans' figures and actual figures, in order to check the accuracy of the measurement process adopted; • involving experts of the KPMG network in the assessment of the reasonableness of the impairment testing model and related assumptions, including by means of a comparison with external data and information; • checking the sensitivity analysis presented in the notes in relation to the key assumptions used for impairment testing; • assessing the appropriateness of the disclosures provided in the notes about the impairment tests and their compliance with IAS 36.

Responsibilities of the parent's directors and board of statutory auditors ("Collegio Sindacale") for the consolidated financial statements

The directors are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with the IFRS Accounting Standards as issued by the International Accounting Standards Board and endorsed by the European Union, as well as the Italian regulations implementing article 9 of Legislative decree no. 38/05 and, within the terms established by the Italian law, for such

internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

The directors are responsible for assessing the group's ability to continue as a going concern and for the appropriate use of the going concern basis in the preparation of the consolidated financial statements and for the adequacy of the related disclosures. The use of this basis of accounting is appropriate unless the directors believe that the conditions for liquidating the parent or ceasing operations exist, or have no realistic alternative but to do so.

The *Collegio Sindacale* is responsible for overseeing, within the terms established by the Italian law, the group's financial reporting process.

Auditors' responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISA Italia will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISA Italia, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors;
- conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the group to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation;
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated financial statements.

We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance, identified at the appropriate level required by ISA Italia, regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with the ethics and independence rules and standards applicable in Italy and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, the measures taken to eliminate those threats or the safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current year and are, therefore, the key audit matters. We describe these matters in our auditors' report.

Other information required by article 10 of Regulation (EU) no. 537/14

On 31 May 2022, the parent's shareholders appointed us to perform the statutory audit of its separate and consolidated financial statements as at and for the years ending from 31 January 2024 to 31 January 2032.

We declare that we did not provide the prohibited non-audit services referred to in article 5.1 of Regulation (EU) no. 537/14 and that we remained independent of the parent in conducting the statutory audit.

We confirm that the opinion on the consolidated financial statements expressed herein is consistent with the additional report to the *Collegio Sindacale*, in its capacity as audit committee, prepared in accordance with article 11 of the Regulation mentioned above.

Report on other legal and regulatory requirements

Opinion on the compliance with the provisions of Commission Delegated Regulation (EU) 2019/815

The parent's directors are responsible for the application of the provisions of Commission Delegated Regulation (EU) 2019/815 with regard to regulatory technical standards on the specification of a single electronic reporting format (ESEF) to the consolidated financial statements to be included in the annual financial report.

We have performed the procedures required by Standard on Auditing (SA Italia) 700B in order to express an opinion on the compliance of the consolidated financial statements with Commission Delegated Regulation (EU) 2019/815.

In our opinion, the consolidated financial statements at 31 January 2026 have been prepared in XHTML format and have been marked up, in all material respects, in compliance with the provisions of Commission Delegated Regulation (EU) 2019/815.

Due to certain technical limitations, some information included in the notes to the consolidated financial statements when extracted from the XHTML format to an XBRL instance may not be reproduced in an identical manner with respect to the corresponding information presented in the consolidated financial statements in XHTML format.

OVS Group
Independent auditors' report
31 January 2026

Opinion and statement pursuant to article 14.2.e)/e-bis)/e-ter) of Legislative decree no. 39/10 and article 123-bis.4 of Legislative decree no. 58/98

The parent's directors are responsible for the preparation of the group's directors' report and report on corporate governance and ownership structure at 31 January 2026 and for the consistency of such reports with the related consolidated financial statements and their compliance with the applicable law.

We have performed the procedures required by Standard on Auditing (SA Italia) 720B in order to:

- express an opinion on the consistency of the directors' report and the specific information presented in the report on corporate governance and ownership structure indicated by article 123-bis.4 of Legislative decree no. 58/98 with the group's consolidated financial statements;
- express an opinion on the compliance of the directors' report, excluding the section that includes the consolidated sustainability statement, and certain specific information presented in the report on corporate governance and ownership structure required by article 123-bis.4 of Legislative decree no. 58/98 with the applicable law;
- issue a statement of any material misstatements in the directors' report and certain specific information presented in the report on corporate governance and ownership structure required by article 123-bis.4 of Legislative decree no. 58/98.

In our opinion, the directors' report and the specific information presented in the report on corporate governance and ownership structure required by article 123-bis.4 of Legislative decree no. 58/98 are consistent with the group's consolidated financial statements at 31 January 2026.

Moreover, in our opinion, excluding the section which includes the consolidated sustainability statement, the directors' report and the specific information presented in the report on corporate governance and ownership structure required by article 123-bis.4 of Legislative decree no. 58/98 have been prepared in compliance with the applicable law.

With reference to the above statement required by article 14.2.e) of Legislative decree no. 39/10, based on our knowledge and understanding of the entity and its environment obtained through our audit, we have nothing to report.

Our opinion on compliance with the applicable law does not extend to the directors' report section which includes the consolidated sustainability statement. Our conclusion on the compliance of this section with the legislation governing its preparation and with the disclosure requirements of article 8 of Regulation (EU) 2020/852 is included in the assurance report prepared in accordance with article 14-bis of Legislative decree no. 39/10.
